\* (U) Counter narcotics budget is based on programs, rather than countries. Therefore, proper funding amount for each country/region is determined and estimated by each Geographic Combatant Command, the supporting Military Services, and the Defense Agencies. The Counter narcotics funding in the table includes both direct and indirect funding within the country/region totals. The indirect CN support includes efforts that primarily do not benefit the foreign country. Regional totals that cannot be broken out by specific country include mobile assets or regional headquarters/activities that are used in multiple countries or cover large geographic areas.
