## Joint Report to Congress

### Volume I

This report is jointly presented by DoD and State pursuant to the Foreign Assistance Act of 1961, as amended, and the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2008 (P.L. 110-161).

The complete report consists of three volumes. Volume I is unclassified. Volume II and Volume III are classified.

*Refer questions to the appropriate office of the Legislative Liaison.*

UNCLASSIFIED

## EXECUTIVE SUMMARY

This report is presented pursuant to the requirements of two laws: the Foreign Assistance Act (FAA) of 1961, as amended, and the Department of State, Foreign Operations, and Related Programs Appropriations Act 2008 (P.L. 110-161). FAA, Section 656 (22 U.S.C. 2416), requires:

### **(A) ANNUAL REPORT**

- (1) **IN GENERAL** - not later than January 31 of each year, the Secretary of Defense and the Secretary of State shall jointly prepare and submit to the appropriate congressional committees a report on all military training provided to foreign military personnel by the Department of Defense (DoD) and the Department of State (DoS) during the previous fiscal year and all such training proposed for the current fiscal year.
- (2) **EXCEPTION FOR CERTAIN COUNTRIES** – Paragraph (1) paragraph does not apply to any NATO member, Australia, Japan, or New Zealand, unless one of the appropriate congressional committees has specifically requested, in writing, inclusion of such country in the report. Such request shall be made not later than 90 calendar days prior to the date on which the report is required to be transmitted. No such request has been received this year.

### **(B) CONTENTS** - The report includes the following:

- (1) For each military training activity, the foreign policy justification and purpose for the activity, the number of foreign military personnel provided training and their units of operation, and the location of the training.
- (2) For each country, the aggregate number of students trained and the aggregate cost of the military training activities.
- (3) With respect to United States (U.S.) personnel, the operational benefits to the U.S. forces derived from each military training activity and the U.S. military units involved in each activity.

**(C) FORM** – The report described in subsection (a) shall be in unclassified form but may include a classified annex.

**(D) AVAILABILITY ON THE INTERNET**- All unclassified portions of the report described in subsection (A) shall be made available to the public on the Internet through the DoS website.

Section 652 of the DoS, Foreign Operations, and Related Programs Appropriations Act, 2008 (P.L. 110-161), requires that the report be submitted to the Committees on Appropriations of the House of Representatives and the Senate by the date specified in FAA, Section 656.

This report was generated using data submitted by multiple sources, including Security Assistance Organizations, Combatant Commands and other Department of Defense (DoD) agencies. Volume I provides the operational benefits to U.S. forces for training and education programs and other security cooperation activities; a description of each type of activity; a summary of all training provided, along with the foreign policy justification for each country; country activity training lists; and explanations of the purpose for each training activity. Volume I is unclassified and posted on the Department of State (State) website. Volumes II and III are classified and, therefore, are not posted.

The report contains approximately 33,400 individual events. In fiscal year 2009, approximately 69,500 students from 159 countries participated in training, the total value of which is approximately \$536.5M. The individual events are assembled in alphabetical order within geographic regions by country and fiscal year, and are listed in three main categories – education and training activities provided under the Foreign Military Sales (FMS) Program; State-funded activities; and DoD-funded activities.

State-funded activities reported include: International Military Education and Training (IMET); Foreign Military Financing (FMF)-funded training; International Narcotics and Law Enforcement (INL); African Contingency Operations Training and Assistance (ACOTA); Global Peace Operations Initiative (GPOI); and FAA drawdown for narcotics education and training.

DoD-funded activities reported include: Regional Defense Combating Terrorism Fellowship Program (CTFP); Section 1004 Drug Interdiction and Counter-Drug Training Support (CDTS); Combatant Command Security Cooperation Activities (e.g., Counter-Narcotics, Humanitarian Demining); and other Non-Security Assistance programs.

Miscellaneous DoD activities reported include: Service Academy Foreign Student Program; Aviation Leadership Program; Professional Military Education (PME) Exchanges; and Regional Programs: the Asia-Pacific Center for Security Studies (APCSS), the George C. Marshall European Center for Security Studies (Marshall Center), the Center for Hemispheric Defense Studies (CHDS), the Near East South Asia Center for Strategic Studies (NESA Center), and the Africa Center for Strategic Studies (ACSS); Section 1206 and certain classified Combatant Command activities.

Although the DoD does not deem the Joint Combined Exchange Training (JCET) events as training, they are included in this report. Some categories of training, such as Expanded-IMET (E-IMET) activities, the Regional Defense Combating Terrorism Fellowship Program (CTFP), and the programs of the Regional Centers, also include training of non-military personnel, and some non-training counterdrug activities.

## READING THIS REPORT

All activities are listed by the Fiscal Year (FY) in which the training occurred, not by the FY in which the funding for the training was provided. Most data in the report is current as of October 1, 2009. Some Future/Planned FY costs were not finalized as of the data collection cutoff date. Many Future/Planned FY events were listed before the foreign operations budget was passed and funding allocations were decided.

This report is comprised of three volumes:

<b>Volume I</b>	<b>Volume II</b>	<b>Volume III</b>
UNCLASSIFIED	CONFIDENTIAL	SECRET
		
UNCLASSIFIED	CONFIDENTIAL	SECRET
Classification : Unclassified	Classification : Confidential	Classification : Secret

Each volume is divided into sections. Each major section includes its own Table of Contents (TOC); for example Volume I, Section III includes a TOC containing the list of countries and pages where training data appears. Each TOC is also divided by the geographic regions below:

- Africa
- East Asia and Pacific
- Europe
- Near East
- South Central Asia
- Western Hemisphere

## VOLUME I

### *Section I – OPERATIONAL BENEFITS TO UNITED STATES FORCES*

- This section lists the legal requirements and benefits of the training programs to the United States and our allies.

### *Section II – DESCRIPTION OF PROGRAMS*

- This section lists the multiple funding sources and training programs that are reported on in this report.

### *Section III – DEPARTMENT OF STATE FOREIGN POLICY OBJECTIVES*

Section III contains summary data for all military training.

This report section is broken out into 3 main areas:

1. Actual Fiscal Year programs and totals.
2. Forecast Fiscal Year programs and totals.
3. Department of State country and program description.

Volume I Section III - Africa

Program	FY 2007				FY 2008			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CITFP	1	1	1	\$1,000	0	0	0	\$0.00
OFPA	2	2	1	\$1,000	0	0	1	\$0.00
IMET-E	1	1	1	\$1,000	0	0	0	\$0.00

#### **Within areas 1 and 2 :**

- “Training Sessions” reflect the count of all student training sessions conducted under that level of detail. This is determined by summing the total reported student numbers for all reported training activities.
- “Individual Students” reflect a count of students that received training under that level of detail. If a student attended multiple training sessions under a given level of detail, that student will only be counted once.
- “Course Count” reflects a count of individual courses offered under that level of detail. This is determined by counting courses with known start/end dates.
- “Dollar Value” represents the sum of reported training dollars spent on that level of detail. This is determined by summing all applicable costs associated with the training.

#### **Note:**

- The totals for “Training Sessions,” “Individual Students,” and “Course Count” detail levels may not equal the sum of the reported country level figures. This is because of how items are counted, and various methods of conducting training. For example, an individual student may have received training under more than one program. Because of this, the student will be counted and reported under each program, but will only be counted once for the country total.
- The totals for “Training Sessions,” “Individual Students,” “Course Count,” and “Dollar Value” may not match training line totals listed in Volume I, Section IV, as these summary totals may include training line data that are classified above the level of Volume I. Confidential and Classified training lines appear in Volume II and Volume III, respectively.
- The reported FY International Military Education and Training (IMET) dollar amounts may include funds expended to support travel and living allowances paid to most IMET recipient countries, as well as course cancellation fees.
- If next fiscal year’s training has a cost of \$0, the activity may have been fully funded by other participants or reimbursed through another training activity/event that was part of a student’s training pipeline.

*Section IV - COUNTRY TRAINING ACTIVITIES*

Section IV contains the available unclassified training activity listing.

- This section will break out each training program's courses as training lines.
- Summary totals for each program as well as overall totals are available.

The screenshot shows a table titled 'Bandaria' with columns for 'Country/Region', 'Course No.', 'Course Title', 'Students', 'Locations', 'Start Date', 'End Date', 'Total Cost', and 'Fiscal Year'. It lists two programs: 'PM 2007 Self Training' and 'Regional Centers - PM 2007 Self Training'. Summary lines for 'PM 2007 Program Totals' and 'Regional PM 2007 Totals' are also present.

**Note:**

- Country and program totals listed in this section may not match totals listed in Volume I, Section III due to the removal of any ongoing/future training or classified training programs.
- If a course started in or before the current Fiscal Year but is not scheduled to end until sometime in the next Fiscal Year, it is reflected in the summary data for the next Fiscal Year. This data is included in Volume II (vice Volume I) since the training may still be ongoing at the time of publication.

*Section V - COURSE DESCRIPTIONS*

Section V contains descriptions for known Military Article and Services List (MASL) items within the training data.

- This listing is arranged in alphabetical order by course name.

The screenshot shows a list of courses under the heading 'PMTR Course List'. It includes two entries: 'Course Title A - MASL : J000000X' and 'Course Title B - MASL : YYYYYY'. Each entry is followed by a 'Course Description' and a 'Service Note' field, with the descriptions filled with placeholder characters.

**Note:**

- Courses submitted to DSCA from the Regional Centers and Service Academies are not listed.

## VOLUME III

### Section I - JOINT COMBINED EXCHANGE TRAINING (JCET and other SECRET DATA)

Section I contains training activity listings and totals for the JCET program. This data is classified Secret (S) and is not made available to the general public.

- This report lists each training line showing relevant details provided to DSCA on the course offering.
- This report also shows totals for program/training type as well as country level totals.

#### Notes:

- FY 2009 Joint Combined Exchange Training (JCET) costs that reflect course costs and “O” students typically represent costs incurred where the JCET did not include international participants and/or the event did not take place, but costs were incurred in planning the event.
- Most costs are either the price actually paid or the standard price as outlined in governing laws, regulations, and documents. Costs associated with training provided in U.S. military schools represent additional U.S. costs incurred in providing the training.

## OTHER REPORT NOTES

Foreign military training figures for Regional Defense Combating Terrorism Fellowship Program (CTFP) in this report are known to be different from those figures provided in this year’s CTFP Congressional Report. These discrepancies are due to different statistical and data collection methods as well as differing Congressional reporting requirements.

This page intentionally left blank.

## I. OPERATIONAL BENEFITS TO UNITED STATES FORCES

The 2010 Quadrennial Defense Review (QDR) is based on the premise that the strength and influence of the United States are deeply intertwined with the fate of the broader international system—a system of alliances, partnerships, and multinational institutions that our country has helped build and sustain for more than sixty years. Because of this, the QDR concludes, the United States must be prepared to support the broad national goals of promoting stability in key regions, providing assistance to nations in need, and promoting the common good.

U.S. security cooperation is an important instrument in executing this strategy. Security cooperation advances U.S. security interests by building defense partnerships for the future. Security cooperation also prepares the United States, allies, and partner nations for unforeseen circumstances.

Security cooperation involves the following operational benefits:

1. Building defense relationships that promote specific U.S. security interests.
2. Developing allied and partner military capabilities for self-defense and coalition operations, including allied transformation.
3. Improving information exchange and intelligence sharing to harmonize views on security challenges.
4. Providing U.S. forces with peacetime and contingency access and en route infrastructure.
5. Influencing the development of foreign military institutions and their roles in democratic societies.

For details on the benefits of specific programs, see the Program Descriptions section.

## II. DESCRIPTION OF PROGRAMS

### **A. GENERAL**

Security cooperation directly contributes to U.S. national security and foreign policy objectives. The following section outlines the range of security cooperation programs through which the United States government provides military training and describes each program's particular benefits.

### **B. PROGRAMS FUNDED BY FOREIGN NATIONAL FUNDS - FOREIGN MILITARY SALES (FMS)**

FMS involves government-to-government sales of U.S. defense articles, services, and training. Total FMS sales in FY 2009 (articles and training) were approximately \$38.1 billion. Security Cooperation Education and Training, including professional military education as well as technical training related to equipment purchases, is sold to foreign countries via FMS. The total Security Cooperation Education and Training sold to foreign countries reported in this report through the FMS program in FY 2009 was over \$259.5 million.

### **C. PROGRAMS FUNDED BY THE DEPARTMENT OF STATE (DoS)**

#### **1. FOREIGN MILITARY FINANCING (FMF)**

FMF, the U.S. appropriation for financing the acquisition of U.S. defense articles, services, and training through grants, supports U.S. foreign policy and regional security goals and enables allies and friendly nations to improve their defense capabilities, work toward common security goals, and share burdens in joint missions. Congress appropriates FMF funds in the International Affairs budget; State manages the funds for eligible allies and friendly nations; and DoD implements the program. FMF helps countries meet their legitimate defense needs and promotes U.S. national security interests by strengthening coalitions with allies and friendly nations, cementing cooperative bilateral military relationships, and enhancing interoperability with U.S. forces. Because FMF monies are used to purchase U.S. defense articles, services, and training, FMF contributes to a strong U.S. defense industrial base, which benefits both America's armed forces and U.S. workers.

FMF grants in FY 2009 (articles and training) totaled \$4.81 billion, with the vast majority of funds earmarked to support stability in the Middle East. FMF is also being used in the Middle East to strengthen self-defense capabilities and to safeguard borders and coastal areas. In Africa, the bulk of the funds support counter-terrorism programs and provide security for borders and territorial waters. The majority of FMF funds in the East Asia and Pacific region support Indonesia for defense reform, improving maritime security, counter-terrorism efforts, mobility, and disaster relief capabilities. In Europe and Eurasia, FMF funding supports modernization and interoperability programs in Poland and with other coalition partners. Funding will also be used to continue the integration of new NATO members into the Alliance, support prospective NATO members and coalition partners, and assist critical coalition partners in Iraq and Afghanistan. In South and Central Asia, FMF will continue to be used for Operation Enduring Freedom

sustainment, countering regional and international violent extremism, and enhancing counter-insurgency programs and peace support programs. Finally, in the Western Hemisphere, FMF for Colombia will continue to support counter-narcotics and counter-terrorism efforts, and maritime interdiction programs.

## 2. INTERNATIONAL MILITARY EDUCATION AND TRAINING (IMET)

The IMET program is a low-cost, highly effective component of U.S. security assistance. In FY 2009 the U.S. provided approximately \$82.6 million in training to students from 135 allied and partner nations.

The overall objectives of the program are to:

- Further the goal of regional stability through effective, mutually beneficial military-to-military relations that culminate in increased understanding and defense cooperation between the United States and foreign countries;
- Provide training that augments the capabilities of participant nations' military forces to support combined operations and interoperability with U.S. forces; and
- Increase the ability of foreign military and civilian personnel to instill and maintain democratic values and protect internationally recognized human rights in their own government and military.

Training provided under the IMET program is professional and non-political, exposing foreign students to U.S. professional military organizations and procedures and the manner in which military organizations function under civilian control. The IMET program's mandatory English-language proficiency requirement establishes an essential baseline of communication skills necessary for students to attend courses. This requirement facilitates the development of valuable professional and personal relationships that have provided U.S. access to and influence in a critical sector of society that often plays a pivotal role in supporting, or transitioning to, democratic governments. The IMET program introduces military and civilian participants to elements of U.S. democracy such as the U.S. judicial system, legislative oversight, free speech, equality issues, and U.S. commitment to human rights.

IMET objectives are achieved through a variety of technical training and professional military education activities conducted by DoD for international military and civilian officials. These activities include formal instruction that involves over 4,000 courses taught at approximately 150 military schools and installations to roughly 7,000 international students annually.

The Expanded IMET (E-IMET) program is a subset of the IMET program that fosters greater understanding of and respect for civilian control of the military, exposes students to military justice systems, and promotes the development of strong civil-military relations by showing key military and civilian leaders how to overcome barriers that can exist between armed forces, civilian officials, and legislators.

A less formal, but still significant, part of IMET is the U.S. Field Studies Program, which

exposes students to the U.S. way of life, including regard for democratic values, respect for individual civil and human rights, and belief in the rule of law.

IMET assists U.S. allies and friendly nations in professionalizing their militaries through participation in U.S. military educational programs. The resulting military competence and self-sufficiency of U.S. allies and partner nations provide a wide range of benefits to the United States in terms of collective security, stability, and peace. As foreign militaries improve their knowledge of and integrate U.S. military principles into their own forces, military cooperation is strengthened. Similarly, opportunities for military-to-military interaction, information sharing, joint planning, and combined force exercises, as well as essential requirements for access to foreign military bases and facilities, are notably expanded. IMET fosters important military linkages essential to advancing global security interests of the United States and improving the capabilities of its allies and partner nations.

### 3. INTERNATIONAL NARCOTICS AND LAW ENFORCEMENT (INL)

The State Department's Bureau for International Narcotics and Law Enforcement Affairs (INL) partners with DoD to combat international drug trafficking, terrorist groups, and other transnational crime groups by providing training (and other support) to strengthen law enforcement and security institutions in key countries of Central and South America (particularly Colombia). Using both Andean Counterdrug Initiative (ACI) and International Narcotics Control and Law Enforcement (INCLE) funding, INL programs are designed to blunt the impact of international drugs and crime by strengthening foreign government ability to identify, confront and disrupt the operations of such groups before they reach American soil.

In countries such as Colombia, where narco-terrorism poses a major threat, such assistance is provided to a broader range of police and military, including counterdrug units and personnel.

### 4. GLOBAL PEACE OPERATIONS INITIATIVE (GPOI)

The Global Peace Operations Initiative was initially envisioned as a five-year program (encompassing fiscal years 2005-2009) to help address major gaps in international capacity to conduct Peace Support Operations (PSO). Such gaps included a shortage of capable peacekeepers and formed police units, limited national capabilities to train and sustain peacekeeping proficiencies, and a lack of international coordination mechanisms to assist the deployment of troop and police contingents to PSOs. Despite considerable progress in these areas since 2005, significant capacity shortfalls continue to impact the effectiveness of United Nations and regional PSOs. Addressing these gaps will require a long-term commitment to capacity building by the United States and other contributing countries. Toward this end, a National Security Council (NSC) Deputies Committee approved a five-year renewal of GPOI's mandate (fiscal years 2010-2014) in October 2008. Through policy statements and budgetary allocations, the current Administration subsequently affirmed support for the continuation of PSO capacity building activities through GPOI.

## **D. PROGRAMS FUNDED BY THE DEPARTMENT OF DEFENSE (DoD)**

## 1. DoD REGIONAL CENTERS FOR SECURITY STUDIES

The Regional Centers for Security Studies support the U.S. Defense Strategy and DoD security cooperation priorities with programs designed to enhance security, deepen understanding of the United States, foster bilateral and multilateral partnerships, improve defense-related decision-making, and strengthen cooperation among U.S. and regional military and civilian leaders.

Each Regional Center, based on guidance from the Under Secretary of Defense for Policy and their respective Combatant Commands, tailors its program specifically to help meet the Secretary of Defense's key goals in each region. Common topics are regional security issues, defense planning, and civil-military relations.

Regional Centers have been established for all major regions of the world. The five Regional Centers are:

- Africa Center for Strategic Studies
- Asia-Pacific Center for Security Studies
- Center for Hemispheric Defense Studies
- George C. Marshall European Center for Security Studies
- Near East South Asia Center for Strategic Studies

Typical activities include in-resident extended academic programs, one- to three-week seminars conducted in the region, multi-day conferences, and research studies. In addition, the Regional Centers maintain communications with their former participants through electronic mail, web sites, newsletters, and country-based alumni organizations.

## 2. SECTION 1004 -- DRUG INTERDICTION AND COUNTER-DRUG ACTIVITIES: COUNTER-DRUG TRAINING SUPPORT (CDTS)

CDTS includes deployments for training of foreign forces at the request of an appropriate law enforcement agency official as defined in section 1004 of the National Defense Authorization Act for FY 1991. The purpose of the CDTS is to conduct counternarcotics-related training of foreign military and law enforcement personnel. Special Operations Forces (SOF) and service forces conduct this counter-drug training of light infantry, aviation, coastal, riverine, rotary wing operations, and staffs associated with counter-drug operations.

## 3. MINE ACTION (MA) PROGRAMS

The United States provides MA assistance to many countries throughout the world in order to relieve human suffering from the dangers of landmines, to promote regional peace and stability, and to promote U.S. foreign policy and national security goals. A collateral benefit of the program is the enhancement of operational readiness skills of participating U.S. forces. Within the overall MA program, DoD provides training to foreign nations in mine clearance operations, mine awareness education and information campaigns, assistance in the establishment of MA centers, emergency medical care, and leadership and management skills needed to successfully

conduct a national-level MA program. When called upon for MA training, the ultimate goal of DoD participation is to develop a self-sustaining, indigenous demining capability within each recipient country.

SOF normally conducts MA training, using the “train-the-trainer” concept, with augmentation from explosive ordnance disposal and engineer personnel as needed. The Combatant Commands execute the MA program, facilitating military-to-military engagement opportunity. Such participation allows the Combatant Commanders to work closely with Country Teams to show mine-affected countries how military forces can support the civilian population. By participating in these activities, the Combatant Commands and the Country Teams demonstrate the U.S. commitment to provide direct, bilateral humanitarian assistance, relieve suffering, improve the socio-economic environment, promote regional stability and support democratic ideals.

#### 4. DISASTER RESPONSE (HUMANITARIAN ASSISTANCE)

The goal of disaster response training is an improved host nation capability to respond effectively to disasters, thereby reducing or eliminating the need for a U.S. military response. Humanitarian Assistance (HA) is authorized pursuant to 10 U.S.C. 2561 for providing transportation of humanitarian relief or for other humanitarian purposes, including training in disaster response/preparedness. Normally, HA and training conducted pursuant to 10 U.S.C. 2561 is not provided to foreign militaries. However, selected military members of the host nation occasionally are included in the training so that the military understands its role in supporting civilian government during emergencies. In some instances, disaster response training is provided directly to the host nation military when the military is the only government institution capable of responding to the natural disaster. Disaster response training provides the necessary skills for civilian leaders of foreign governments and institutions to organize emergency workers, hospital medical and administrative personnel, and military members to respond to natural disasters. Additionally, disaster response programs contribute to regional stability, and support both ambassadorial and command theater security cooperation strategies.

#### 5. REGIONAL DEFENSE COMBATING TERRORISM FELLOWSHIP PROGRAM (CTFP)

The CTFP is a Department of Defense (DoD) security cooperation program that engages foreign military officers, ministry of defense officials, and foreign security officials and provides them with education and training to augment regional cooperation in support of overseas contingency operations. The Principal Deputy Assistant Secretary of Defense for Special Operations and Counter Terrorism and Interdependent Capabilities (SO/CT&IC) oversees the creation and application of a mixture of mobile and resident U.S. institutional courses that are designed to: 1) build combating terrorism capabilities and capacities of partner nations; 2) build and strengthen a global network of combating terrorism experts and practitioners committed to participation in support of U.S. efforts against terrorists and terrorism organizations; and 3) counter ideological support for terrorism. This program allows DoD to work with countries of critical importance to overseas contingency operations by providing education and training that enhance the tools to effectively build, manage, and sustain combating terrorism programs. Specifically, the CTFP is used to bolster the capacity of nations to detect, monitor, and interdict the activities of terrorist

networks ranging from weapons trafficking and terrorist-related financing to actual operational planning by terror groups. The CTFP complements existing Security Cooperation programs and fills a current void in the USG's efforts to provide targeted combating terrorism assistance. This program is a key tool for Combatant Commanders to foster regional cooperation and professionalize foreign combating terrorism capabilities to assist in the fulfillment of the command's responsibilities. Combatant Commands identify and recommend to SO/CT&IC for approval CTFP participants who have a direct impact on their country's ability to cooperate with the United States in overseas contingency operations. All participants are verified consistent with legal requirements regarding human rights issues.

## 6. SECTION 1206 AUTHORITY (BUILDING PARTNERSHIP CAPACITY)

Section 1206, National Defense Authorization Act for FY2006, authorizes the President to direct the Secretary of Defense to build capacity of a foreign country's national military forces in order for that country to conduct counterterrorist operations, or to participate in or support military and stability operations in which U.S. armed forces are a participant. Building Partnership Capacity is directed toward partner nations that uphold the cornerstones of democracy, human rights, attendant fundamental freedoms, and the rule of law. Pursuant to Section 1206(d), the Secretaries of Defense and State shall jointly formulate this program.

## 7. SERVICE-SPONSORED ACTIVITIES

### A. Academy Exchanges/Service Academy Foreign Student Program

DoD's three service academies (U.S. Military Academy, U.S. Naval Academy, U.S. Air Force Academy) have conducted traditional academic exchange programs of varying length and content. As with civilian exchanges, U.S. cadets and midshipmen may spend a portion of the academic year or summer training period at a comparable foreign institution while counterpart students participate in the U.S. program. In addition, the Service Academy Foreign Student Program allows up to 60 foreign students to attend each Service Academy at any one time as actual members of an Academy class (i.e., as full-time, four-year degree candidates). The foreign and national security policy justification for these activities centers on the inestimable value of exposing future foreign leaders, at the beginning of their careers, to their U.S. peers in an environment that is designed to promote military professionalism in every respect. The presence of foreign students in U.S. institutions also serves our foreign and national security policy interests by exposing future U.S. military leaders to individuals from the many parts of the globe to which they may deploy or work within coalition operations. The cost reflected in the report represents the cost to the DoD. Some countries reimburse all or a portion of the cost of the program to the Service Academies.

### B. Aviation Leadership Program (ALP)

ALP provides Undergraduate Pilot Training (UPT) to 15-20 select international students per year from friendly, less-developed nations. ALP is a USAF-funded program authorized under 10 U.S.C. 9381-9383. ALP consists of English-language training, Introduction to Flight Training, UPT, and necessary related training, as well as programs to promote better awareness and

understanding of the democratic institutions and social framework of the United States. The duration of ALP is one to two years depending on the amount of English-language training required to bring the student up to entry level and the student's progression through the UPT program. ALP was suspended for FY 1999, FY 2000, and FY 2001 due to a shortfall of UPT quotas for overall Air Force requirements. The program resumed in FY 2002 with a number of students entering into English-language training and follow-on undergraduate pilot training in FY 2003.

### C. Exchanges

Pursuant to Section 544 of the Foreign Assistance Act of 1961, as amended (FAA) (22 U.S.C. 2347(c)), reciprocal professional military education (PME) exchanges provide for the attendance of foreign military personnel at PME institutions in the United States (other than service academies) without charge, if such attendance is part of an international agreement. These international agreements provide for the exchange of students on a one-for-one reciprocal basis each fiscal year between the U.S. professional military education institutions and comparable institutions of foreign countries and international organizations.

Section 30A of the Arms Export Control Act, as amended (22 U.S.C. 2770(a)) authorizes the President to provide training and related support to military and civilian defense personnel of a friendly foreign country or international organization. Such training and related support are provided through the military departments. Unit exchanges conducted under this authority are arranged under international agreements negotiated for such purposes, and are integrated into the theater engagement strategies of the relevant combatant commander. Recipient countries provide, on a reciprocal basis, comparable training and related support within a reasonable period of time (which may not be more than one year) of the provision of training and related support by the United States.

### 8. FOREIGN ASSISTANCE ACT (FAA) -- FAA DRAWDOWN

Section 506(a)(1) of the FAA (22 U.S.C. 2318) authorizes the President to direct the drawdown of defense articles from DoD stocks, defense services, or military training and education from the DoD if he determines and reports to the Congress that an unforeseen emergency exists which requires immediate military assistance to a foreign country or international organization, and that such emergency requirements cannot be met under the Arms Export Control Act, or any other law except Section 506 of the FAA.

Under section 506(a)(2) of the FAA, the President must determine and report to the Congress, that it is in the national interest of the United States to drawdown articles and services from the inventory and resources of any agency of the U.S. government and military training and education from the DoD for specific purposes.

### **E. DEPARTMENT OF DEFENSE - JOINT COMBINED EXCHANGE TRAINING (JCET) ACTIVITIES**

The JCET program, authorized under 10 U.S.C. 2011, permits U.S. SOF to train through

interaction with friendly foreign forces. The particular value of this training is that it enhances those SOF skills, such as instructor skills, language proficiency, and cultural awareness, critical to required missions generated either by existing plans or unforeseen contingencies. The primary purpose of JCET activities is always the training of U.S. SOF personnel, although incidental training benefits may accrue to the foreign forces.

## **F. DEPARTMENT OF HOMELAND SECURITY/U.S. COAST GUARD ACTIVITIES**

The U.S. Coast Guard routinely assists other federal agencies such as State and the Department of Defense through the provision of training and technical assistance. Subject areas include the full breadth of Coast Guard core mission areas including maritime law enforcement, search and rescue, marine environmental protection, port security, and marine safety. As the U.S. Coast Guard has no independent authority to conduct this training, funding is provided under the auspices of programs such as Anti-Terrorism Assistance, INL, Cooperative Threat Reduction, IMET, and FMF, to name a few. Countries may also use their national funds to purchase training through the FMS program.

Pursuant to 14 U.S.C. 195, foreign national appointments to the U.S. Coast Guard Academy (USCGA) are authorized. The number of foreign USCGA cadets may not exceed 36 at any given time. Cadets earn a Bachelor of Science degree in one of the following disciplines:

- Marine engineering and naval architecture
- Electrical engineering
- Civil engineering
- Mechanical engineering
- Marine and environmental sciences
- Management
- Government.

The presence of foreign students at the USCGA serves to enhance international relationships with key maritime partners around the world. Normally, sponsoring governments agree in advance to reimburse the Coast Guard for all costs incurred for a cadet's training at the USCGA. Countries may request a waiver to this policy, which can only be granted by the Commandant of the U.S. Coast Guard. Therefore, the figures provided in this report represent only those costs borne by the U.S. Coast Guard. Countries also must agree that the cadet will serve in the comparable maritime service of his or her respective country upon graduation. An appropriate duration of service is determined by the sponsoring government.

<b>Totals:</b>	<b>45</b>	<b>45</b>	<b>4</b>	<b>\$78,548</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$475,000.00</b>

Angola has one of Africa's largest, healthiest most experienced, and well-equipped militaries. This force can play a constructive role in ensuring a safe, peaceful, and democratic Angola, and potentially contribute to international peacekeeping operations. Since the end of the 27-year civil war in 2002, the Government of Angola (GRA) has focused both on post-war reconstruction as well as building the economy and investing in social development. The GRA is taking serious measures to diversify the economy, invest in development programs, and has demonstrated an interest in regional stability. The credible 2008 legislative elections were the first elections since the end of the civil war. In February 2010 the Angolan Parliament promulgated a new constitution which legally codifies Angola's democracy as well as fundamental human rights. The country's first presidential elections are scheduled for late 2012.

Angola is the sixth largest supplier of petroleum to the United States. Rich in natural resources, Angola rivals Nigeria as the second largest oil producer in sub-Saharan Africa (nearly 2.0 million barrels per day), and the world's fourth-largest producer of rough diamonds. U.S. investment in Angola, estimated at USD2.6 billion, highlights the close economic ties between the United States and Angola. However, Angola's social development indicators, particularly infant mortality and literacy, remain low.

To address this critical need, U.S. defense cooperation with Angola has focused on the health and education sectors. Since the end of the Angolan civil war, the International Military Education and Training (IMET) program has been slowly but successfully changing the FAA's perceptions of the United States, while promoting an apolitical, professional defense force respectful of human rights. For example, fifty-nine members of the Angolan military recently completed the first English Language training program funded through IMET. The program was highly praised, and another course will open in early FY2011. Building on this success, the English teachers expressed an interest in going to the United States for professional training.

In addition to IMET funding, USDAO has partnered with the Angolan Armed Forces (FAA) and Charles Drew University to provide HIV/AIDS training. In 2010 the program implemented a \$400,000 budget to train over 250 soldiers across Angola about HIV/AIDS through the President's Emergency Fund for AIDS Relief (PEPFAR). Since 2008 this program has trained 700 NCOs and officers in the FAA.

The United States is encouraging Angolan participation in the Africa Contingency Operations Training and Assistance (ACOTA) program as a component of the larger Global Peace Operations Initiative (GPOI). Angolan officials will likely carefully weigh Angola's interests in these programs to determine how the FAA may be able to participate.

## Benin

<b>Totals:</b>	<b>2973</b>	<b>2969</b>	<b>36</b>	<b>\$2,013,155</b>	<b>1300</b>	<b>1300</b>	<b>2</b>	<b>\$0.00</b>

Benin continues to be a model of democracy and stability in the region. A free and fair presidential election in 1991 led to a peaceful transition of government to civilian authorities and has since been characterized by a lively and crowded political landscape. The Beninois military has returned to a subordinate role in society, fully respecting civilian control and the apolitical nature of the armed forces. During the 2006 Presidential elections, the Chief of Defense Staff and other key officers toured the country's military installations to reiterate to the armed forces that they should not be involved in politics and that the role of the military was only to help ensure secure conditions for the conduct of the elections. At present, Benin faces no external threat to its stability and the armed forces play an increasing role in regional peacekeeping activities.

The Beninois were enthusiastic participants in the African Crisis Response Initiative (ACRI) training program in the late 1990s, and military leaders continue to benefit from training opportunities presented under programs such as the Africa Contingency Operations Training and Assistance (ACOTA) program (the successor to the ACRI program), a component of the larger Global Peace Operations Initiative (GPOI). Benin's Armed Forces (BAF) have played a significant role in regional peacekeeping activities, and programs like ACOTA will help them enlarge that role. We continue to encourage the Beninois to be engaged in the region, both on a political and military/peacekeeping level. They have been responsive, most recently deploying troops with the United Nations Operation in Cote d'Ivoire (ONUCI) and the United Nations Organization Mission in the Democratic Republic of Congo (MONUSCO), as well as deploying observers to multilateral peacekeeping missions in Haiti and Sudan. After the January 12, 2010 earthquake in Haiti, Benin contributed police personnel to the United Nations Stabilization Mission in Haiti (MINUSTAH).

Beninois troops have earned solid praise for their performance on these deployments, including the decision to name a Beninois general as ONUCI commander in the fall of 2006. Beninois commanders have attributed the BAF's peacekeeping success directly to the ACOTA training provided. Deployments continue and Benin has indicated its readiness to conduct further deployments, if assistance with material and logistical requirements can be provided. We continue to seek to strengthen the capabilities of the BAF to provide international peacekeeping and humanitarian relief.

In July 2005, Benin signed an Article 98 agreement with the United States, which entered into force in August of 2005. The International Military Education and Training (IMET) programs, which have played a key role in securing the Beninois military's professionalism and apolitical role, were therefore able to restart in the fall of 2005 and have continued to date. The Africa Center for Strategic Studies (ACSS) also supports democratic governance in Benin by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation helps build and maintain long-term, continuing interaction with and among participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States. Benin has been an active participant in ACSS programs, including hosting an 11-nation Ministerial Conference on Maritime Security and Safety in the Gulf of Guinea during November 2006.

### **Volume I Section III-I - Africa**

The United States government continues to explore other avenues for increasing security cooperation with Benin in areas of common interest, such as Peacekeeping Operations (PKO), good governance, promoting maritime security in the Gulf of Guinea, and support of humanitarian demining training via the joint French-Beninois Demining School for Africa based in Ouidah, Benin. Programs such as IMET, ACOTA, and those sponsored by ACSS and the Defense Institute of International Legal Studies (DIILS) will help to increase the BAF's readiness for, and participation in, international peacekeeping, as well as in buttressing democratic government and good governance.

## Botswana

<b>Totals:</b>	<b>139</b>	<b>117</b>	<b>72**</b>	<b>\$1,654,158</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Botswana has one of the oldest democracies and most fiscally prudent economic regimes on the African continent. Our efforts focus on supporting Botswana's stable democracy, expanding U.S. business opportunities, advocating Botswana's leadership in the region, and helping Botswana confront its HIV/AIDS epidemic, which is among the world's worst.

Botswana has one of the region's most professional and responsible military establishments and offers a model for civilian-military relations for the rest of Africa. The International Military Education and Training (IMET) program in Botswana provides for well-received regional military exchanges that have fostered a spirit of regional cooperation. Through our IMET and other security cooperation programs, including the Regional Defense Combating Terrorism Fellowship Program (CTFP) and Foreign Military Financing (FMF) or Foreign Military Sales (FMS) training cases, we seek to expand our connections with Botswana's military leaders and support their interest in contributing to efforts to strengthen both regional civil-military ties and regional military-military relations. The Botswana Defense Force (BDF) uses IMET as the primary vehicle to obtain intermediate and senior professional military education (PME) for their officer corps.

FY 2008 saw the continuation of a program to enhance the professionalism and capabilities of BDF Non-Commissioned Officer (NCO) Corps with NCO-specific training. The United States government plans to expand the NCO training program to fifty percent of the IMET budget over the next two years. These courses not only support individual professional development, but also prepare the BDF to better execute peacekeeping operations (PKO) and humanitarian support operations while complementing other previous and existing programs, such as the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI). Training included components on HIV/AIDS and civil-military relations. Eleven of fourteen currently-serving General Officers in the BDF are IMET graduates, including the Commander of the Botswana Defense Force, who is a graduate of the Air Command and Staff College. The BDF has leveraged its CTFP funding to foster the development of an internal Counterterrorism (CT) capacity with an emphasis on building the intelligence capabilities of the BDF. In the future, we plan to continue our efforts in assisting Botswana further enhance its national counterterrorism capabilities.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Botswana by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

## Burkina Faso

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	6	4	4	\$54,511	0	0	0	\$0.00
GPOI	614	614	14	\$1,359,841	0	0	0	\$0.00
IMET-1	3	2	3	\$68,412	0	0	0	\$0.00
Non-SA, UC, JCET	0	0	0	\$0.00	50	50	3	\$485,000
Regional Centers	19	19	6	\$285,965	0	0	0	\$0.00
<b>Totals:</b>	<b>642</b>	<b>639</b>	<b>27</b>	<b>\$1,768,729</b>	<b>50</b>	<b>50</b>	<b>3</b>	<b>\$485,000</b>

Military engagement with Burkina Faso continue to expand, after many years during which it was limited to participation in an occasional Africa Center for Strategic Studies (ACSS) event and infrequent contacts in the context of Economic Community of West African States (ECOWAS) oriented regional training or development programs. The increased engagement follows Burkina Faso's efforts during the past several years to play a more productive regional role and to improve relations with the United States. The Government of Burkina Faso (GOBF) has also demonstrated a willingness to cooperate on important United States government policy priorities such as overseas contingency operations and support of the peace process in Cote d'Ivoire and Guinea.

Burkina Faso sent participants to various International Military Education and Training (IMET) and ACSS events in FY 2009-20010. Military and civilians alike covet spots for IMET and ACSS events and participation is a mark of distinction. ACSS provides an exceptional forum for engaging senior-level military and civilian officials in African countries. The Africa Center program promotes democratic governance in the defense and security sectors and fosters critical partnerships with African nations. The Burkinabe graduates of previous ACSS seminars have formed a local community chapter, which held an ACSS-funded local seminar on the importance of democracy and good governance.

Burkina Faso was the Multinational Coordination Center for the DOD-led regional FLINTLOCK 10 training, a multinational exercise focused on military interoperability and capacity-building with an emphasis on counterterrorism. This program included extensive training and joint exercises that included Burkinabé and other military personnel from the region.

Burkina Faso is a partner in the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), and has participated in numerous peacekeeping training events through the ACOTA program. Three Burkinabé battalions of 800 troops each, destined for Darfur, have been trained through the ACOTA program.

## Burundi

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	5	5	1	\$5,280	0	0	0	\$0.00
GPOI	2674	2674	14	\$2,710,372	1950	1950	3	\$0.00
IMET-1	49	46	6	\$135,087	0	0	0	\$0.00
Regional Centers	10	10	4	\$157,907	0	0	0	\$0.00
<b>Totals:</b>	<b>2738</b>	<b>2735</b>	<b>25</b>	<b>\$3,008,646</b>	<b>1950</b>	<b>1950</b>	<b>3</b>	<b>\$0.00</b>

Burundi's peace consolidation process was essentially completed with the successful conclusion of the 2010 electoral process and the re-election of President Pierre Nkurunziza to his second and final term. f Sanctions under Section 508 of the Foreign Operations, Export Financing and Related Programs Appropriations Act were lifted after the 2005 elections, so Burundi is eligible for International Military Education and Training (IMET) and other forms of military assistance. Burundi still faces some challenges which could undermine its long term stability unless they are addressed. Although observers considered the 2010 elections to be credible, the Forces for National Liberation (FNL) party, together with several smaller political parties, pulled out of the electoral process. The FNL was the last militia group to relinquish its arms and did not register as a political party until 2009. The exclusion of the FNL and so much of the opposition from the political process raises concerns that the elements from these organizations might revert to violence. Burundi also suffers from a high rate of violent crime, fueled in part by large numbers weapons, and the many ex-combatants and displaced people who are still at loose ends.

With the lifting of Section 508 sanctions, there has been a significant expansion in military-to-military engagement with Burundi. U.S. funding has provided an English lab and financed training for English instructors to help the Burundian Defense Forces obtain the necessary proficiency to attend military training programs in the United States. Other funding has provided HIV-AIDS awareness and prevention programs; planning is currently underway for a clinic that will provide HIV/AIDS testing, counseling and treatment and other medical services to security forces and the surrounding community.

State-funded peacekeeping training has been critical in helping to develop a professional cadre of military officers and enlisted personnel. Funds have also been used to provide equipment, pre-deployment, and other training for a Burundian contingent of three permanent battalions serving as peacekeepers with the African Union (AU)-led Mission in Somalia (AMISOM); a fourth permanent battalion will deploy in November, 2010. A total of 8 Burundian battalions have been trained and equipped through ACOTA. Burundian willingness to play a regional role in AU operations in Burundi and in Somalia offers the United States government an opportunity to collaborate with European partners to help the military transform and ultimately deploy in support of other international peace and stability operations. In 2007, Burundi joined the East African Community. For the first time in 2009, Burundi contributed troops to the biannual "Natural Fire" exercises with the EAC member countries and the US. Burundi is also a member of the Economic Community of Central African States (CEEAC), and has pledged to support the AU's Standby Brigade. However, to participate effectively in the CEEAC standby brigade, Burundi requires further training in staff operations. This provides us with an opportunity to focus IMET funding for Burundi on encouraging sub-regional organizations.

As Burundi emerges from years of conflict, continued U.S. support for the military and security services will be critical to long-term stability. Burundi is working to right-size the military and police force, and is providing both with the training and equipment necessary to confront rising crime and banditry. IMET and other military-related funding can be used to good effect to continue to help professionalize the Burundian National Defense Force, building capacity in an institution that is suffering from over a dozen years of neglect caused by the civil war and the recent integration of a largely untrained rebel force. Such funding would also support programs that will provide the Burundians the capacity to increase control of the waters along Lake Tanganyika, and enforce maritime law and conduct security operations there.

### **Volume I Section III-I - Africa**

Further, IMET and other funding programs would help absorb former combatants, including providing vocational skills training and integration of former rebel soldiers into the police and military. Continued support for English language training would increase opportunities for Burundians to participate in senior training in the United States. Additional training could promote respect for human rights, improved civil-military relations, and the importance of civilian control of the military. IMET-sponsored civil-military relations training could educate the defense forces on the proper role of the military in a democratic society and help avoid a repetition of Burundi's coup-ridden history.

<b>Totals:</b>	<b>925</b>	<b>924</b>	<b>40</b>	<b>\$2,114,603</b>	<b>30</b>	<b>30</b>	<b>2</b>	<b>\$732,000</b>

United States government goals in Cameroon include supporting the successful transformation of Cameroonian society into a democratic, pluralistic community, with a globally integrated market-based economy. Cameroon's political stability and relative economic development make it a leading sub-regional power. Construction of the Chad-Cameroon pipeline further integrates Cameroon into the regional petroleum economy, while its geographic location and national security interests make it a potentially key partner in Gulf of Guinea maritime security programs.

Cameroon's military could play an important role in supporting regional peacekeeping initiatives and promoting peaceful resolution of border disputes with neighboring countries. This is especially true now that Nigeria has turned over control of the once-disputed Bakassi peninsula to Cameroon, which remains plagued by armed groups. Cameroon has expressed its willingness and intent to play a more active role in regional peacekeeping operations, including the contribution of a battalion of police officers to a peacekeeping operation. Cameroon already participates in the Economic Community of Central African States (CEEAC) mission in the Central African Republic. Cameroon has proposed the establishment of an international facility to train police officers in missions identified by the UN and the African Union (AU). Moreover, it is crucial to have military participation and cooperation as Cameroon undertakes additional political and economic reforms.

Military training provided to Cameroon is designed to promote professional military capacity, especially regarding the ability to increase regional stability. Training priorities include leadership, maritime security, military police, and peacekeeping. Cameroon has been an Africa Contingency Operations Training Assistance (ACOTA) partner, a component of the larger Global Peace Operations Initiative (GPOI) since 2007. Cameroon received ACOTA training for approximately 912 personnel, mostly military personnel, in 2008. Cameroon will also benefit from significantly increased U.S. engagement in the Gulf of Guinea.

Cameroon was restricted to Expanded International Military Education and Training (E-IMET) in FY 2008-2009. E-IMET programs sponsored reform within the Cameroonian Armed Forces through professional training for junior- to mid-level military officers. Cameroon values International Military Education and Training (IMET) courses and continues to fill every available course. Senior level courses, especially professionalization training, remain highly sought after by the Cameroonian senior leadership. A well-trained Cameroonian military would serve United States government interests by promoting security in the Gulf of Guinea and the region.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Cameroon by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and

## **Volume I Section III-I - Africa**

the United States. In November 2006, Cameroon hosted RECAMP V, a comprehensive staff training exercise for CEEAC forces that focused on peacekeeping and regional security. The two-week exercise involved multinational and joint staffs from division to brigade to battalion level, and included all 11 CEEAC countries and some 13 Western nations. Cameroon continues to express its willingness to contribute to peacekeeping operations, though it also expresses a need for military equipment upgrades, including vehicles.

## Cape Verde, Republic of

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

<b>Totals:</b>	<b>16</b>	<b>14</b>	<b>10</b>	<b>\$235,408</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Since gaining independence in 1975, Cape Verde has maintained domestic peace, as well as continual peaceful relations with its neighbors. Its military has consistently played a constructive role in civil society. The country's physical isolation, poverty, and limited number of educational institutions make it heavily reliant on training from other countries to develop appropriate technical proficiencies. Its military is seeking to transform itself from a heavy Soviet-model land force to one that focuses on maritime security and crisis response. This force will better be able to counter the transnational threats facing Cape Verde, including drug smuggling, counterterrorism (CT), maritime disaster, and the illicit movement of persons. An overarching goal is to enhance the capacity of Cape Verde to contribute to regional peace and security initiatives, as well as counternarcotics efforts.

Through the International Military Education and Training (IMET) program, we are seeking to increase the level of professionalism and technical competency among military and security forces and, at the same time, raise their respect for civilian leadership and democratic institutions.

Cape Verdeans continue to participate in training hosted by various U.S. organizations, including U.S. Africa Command and the Africa Center for Strategic Studies (ACSS). Given Cape Verde's strategic location for narco-traffickers, it has often been used as a narcotics hub of choice by traffickers sending shipments to the United State or to European markets. Consequently, many of our training efforts are focused on building counternarcotics capacity in Cape Verde.

## Central African Republic

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	1	1	1	\$17,710	0	0	0	\$0.00
Regional Centers	13	13	4	\$218,826	0	0	0	\$0.00
<b>Totals:</b>	<b>14</b>	<b>14</b>	<b>5</b>	<b>\$236,536</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Central African Republic (CAR) President Francois Bozize came to power in a 2003 coup and was subsequently elected in May 2005 in an election that was generally considered free and fair. In late 2006 and 2007, activity by armed rebel groups intensified. Rebel activity, along with the presence of foreign rebel groups and an increase in criminal activity, has led to the displacement of approximately 200,000 Central Africans. The government signed ceasefire and comprehensive peace agreements in May and July 2008. An Inclusive Political Dialogue, aimed at charting a path forward with all political stakeholders, including rebel groups, exiled opposition leaders, and civil society, was scheduled for December 2008. As CAR prepares for scheduled elections in 2010, the U.S. supports ongoing efforts to identify the military's role in a free and fair electoral process.

Two peacekeeping forces operate in CAR. The first, headed by the Economic Community of Central African States (CEEAC) operates through much of the country; while the second, headed by the United Nations (UN), is limited to the northeastern part of the country. The UN is also engaged in security sector reform and demobilization efforts.

Restrictions on direct U.S. military assistance to CAR imposed in 2003 under Section 508 of the Foreign Operations, Export Financing and Related Programs Appropriations Act, which prohibits most direct assistance to the government of any country when the duly elected head of government is deposed by decree or military coup, were lifted in September 2005 following the successful 2005 presidential election. However, in FY 2008 CAR's International Military Education and Training (IMET) was limited to Expanded IMET (E-IMET) programs only. As a result, in FY 2009, IMET programs have focused on English language training and civil-military relations.

## Chad

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Non-SA, UC, JCET	0	0	1	\$225,000	0	0	5	\$1,395,000
Regional Centers	12	12	5	\$193,109	0	0	0	\$0.00
<b>Totals:</b>	<b>66</b>	<b>62</b>	<b>19</b>	<b>\$652,336</b>	<b>0</b>	<b>0</b>	<b>5</b>	<b>\$1,395,000</b>

Chad occupies a strategic position west of Sudan and south of Libya, sharing additional borders with the Central African Republic (CAR), Cameroon, Nigeria, and Niger. Chad's oil production is attracting attention from foreign businesses; improved security and rule of law will promote domestic and foreign investment in Chad. A well-disciplined, effective military under civilian control will reinforce Chad's role as a point of relative stability in a troubled region. U.S. assistance strengthens leadership and respect for rule of law within the military, which over time will contribute to the development of a military that supports civilian control and direction of the armed forces and whose members are cognizant of their duty with respect to human rights. Such a force would have a strong influence throughout the region, and would be able to contribute constructively to regional conflict resolution and counterterrorism initiatives.

The Government of Chad (GOC) has a stake in excluding potential terrorist elements from Chadian territory, particularly because its unsecured borders may provide haven to groups hostile to the current government. In March 2004, the Chadian military engaged members of the Salafist Group for Preaching and Combat (GSPC), now known as Al Qaeda in the Maghreb (AQIM), an Algerian terrorist cell, in a firefight in northern Chad. During this skirmish, more than forty GSPC and five Chadians were killed. Several of the GSPC, including their leader Al-Para, escaped and were captured by a Chadian rebel group in the Tibesti region of Chad. The GOC was instrumental in facilitating the eventual turnover of this terrorist leader to the Algerian government. The GOC has also been supportive in sharing anti-terrorism information with its partners and raising awareness of regional threats.

Chad, a committed member of the former Pan-Sahel Initiative (PSI) and now the Trans-Sahara Counter-Terrorism Partnership (TSCTP), has participated in several Peacekeeping Operations (PKO) in the region and possesses the most operational airlift capability of the Sahelian countries. Since 2005, U.S. Special Forces provided training for select members of the Chadian Army in order to develop an anti-terrorism unit known today as the PSI Regiment, comprised of two PSI battalions totaling 450 soldiers. After a training pause of almost two years resulting from an evacuation of the embassy during a rebel attack and followed by Leahy Vetting issues, the U.S. Special Forces Joint Planning Advisory Team (JPAT) will again conduct training with the PSI Regiment beginning in 3rd quarter FY 2010. The training will focus on small unit tactics, first aid, command and control, and cross border coordination. The end state goal of TSCTP is to enable the GOC to detect and defeat existing terrorist and extremist groups.

In FY 2009, Chad's International Military Education and Training (IMET) was restricted to Expanded IMET (E-IMET), which limited IMET training to human rights and civil-military relations training. Professionalization courses remain sought after by the Chadian military. A more professional Chadian military will benefit the United States, which currently contributes to a UN/European Union (EU) peacekeeping force in eastern Chad.

The process of restructuring the Chadian Armed Forces is ongoing. In April 2005, the Chadian military conducted an internal review and made a series of recommendations including downsizing, demobilization of soldiers, and improving professionalism. These recommendations have yet to be implemented. U.S. training supports our objectives of strengthening

the rule of law and respect for human rights within the security forces. A well-trained and professional military is crucial to Chad's democratic development and stability.

## Comoros

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	2	2	\$14,856	0	0	0	\$0.00
GPOI	10	10	3	\$358,120	0	0	0	\$0.00
IMET-1	88	88	8	\$183,886	0	0	0	\$0.00
Regional Centers	15	15	11	\$148,981	3	3	3	\$39,516
<b>Totals:</b>	<b>115</b>	<b>115</b>	<b>24</b>	<b>\$705,843</b>	<b>3</b>	<b>3</b>	<b>3</b>	<b>\$39,516</b>

A small island nation in the Indian Ocean, the Union of Comoros has a history of political instability and military intervention in politics. This background has given particular importance to U.S. efforts to promote democracy and stability in Comoros and to strengthen the professionalism of the Comoran Defense Forces, including respect for civilian control of the military. A modest International Military Education and Training (IMET) program for Comoros is an important element in U.S. policy toward, and bilateral relations with, the Comoran government. Another very important element is the presence in Comoros of a small CJTF-HOA Civil Affairs team. Comoros is a Muslim country with historic trade ties to the Middle East that condemned the September 11, 2001 terrorist attacks on the United States. In addition to strengthening democracy, U.S. government priorities include helping to develop maritime security capacity and enhancing Comoros' Counterterrorism (CT) capabilities .

In April 1999, Comoros experienced a military coup that overthrew the civilian government elected in March 1996. Assistance to Comoros was suspended pursuant to Section 508 of the Foreign Operations, Export Financial and Related Programs Appropriations Act until December 2003, following the previous year's flawed but fair presidential election. In 2006, Ahmed Abdallah Sambi, a Sunni Muslim cleric, was elected President in what was regarded as Comoros' first free and fair democratic elections and peaceful transfer of power. Efforts to emphasize democratic values were reflected in the successful resolution of a crisis in 2008 on Anjouan Island when Union Forces intervened in concert with African Union (AU) forces to remove former Colonel Mohamed Bacar when he failed to vacate the island presidency. A democratic island government was successfully elected and Union military forces are working in concert with the Union government to maintain the rule of law. More recently, Comoros was again able to democratically overcome a political crisis when President Sambi and the national assembly extended Sambi's time in office – less than 2 months after that event, an agreement was reached between all parties that set a timetable for democratic elections.

Goals of the IMET program included emphasizing the proper role of the military in a democracy in order to reduce the likelihood of inappropriate military involvement in politics. The program also sought to strengthen military and civil capabilities in the areas of CT, drug/weapon trafficking, and illegal immigration, as well as to improve the English language capabilities of the military to promote greater interaction with the United States and other militaries in the region. Comoran soldiers continue to train at the English lab opened in 2004.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Comoros by offering senior civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continued interaction with and among participants, and supports additional research, seminars, conferences, and other exchange activities in Africa, Europe, and the United States.

The Combined Joint Task Force – Horn of Africa (CJTF-HOA) Civil Affairs team is a key piece of the U.S. bilateral relationship with Comoros. In 2010, team members have been instrumental in helping to train the nascent Comoran coast guard forces in the operation of a small patrol boat donated by the U.S. government. The CJTF-HOA team also promotes bilateral cooperation and understanding by engaging the local population in a wide variety of development activities, from public building repairs to English language learning. This small team of Navy reservists are the only U.S. government representatives living full-time in Comoros.

## Congo, Democratic Republic of (Kinshasa)

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Non-SA, UC, JCET	1	1	1	\$0.00	0	0	0	\$0.00
Regional Centers	10	10	6	\$77,203	0	0	0	\$0.00
<b>Totals:</b>	<b>360</b>	<b>359</b>	<b>19</b>	<b>\$1,400,159</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The Democratic Republic of the Congo (DRC) successfully conducted national elections in 2006. Joseph Kabila was inaugurated as president in December 2006 and Antoine Gizenga installed as prime minister in February 2007. Gizenga resigned in September 2008 due to old age and ill health and was replaced by Adolphe Muzito. Elections have played a key role in the difficult transition from post-conflict status to a democratic republic with an elected parliament and head of state. The Muzito government faces significant challenges. Reform of the security forces, which continue to be responsible for most human rights abuses, is perhaps the most pressing. The existing integration program and training is insufficient.

Despite three surveys one conducted by South Africa, the other currently underway by the Congolese military under the European Union (EU) auspices and a Belgian study, the exact size of the DRC military is unknown. Some experts believe that the number of soldiers is around 150,000, of whom only about one third has gone through "brassage," the United Nations (UN)-sponsored process to reintegrate ex-combatants. The vast majority of the DRC military are army personnel, with a small air force and a principally riverine navy. The Congolese Armed Forces, FARDC (Forces Armées de la République Démocratique du Congo), currently has 15 Integrated Brigades and another in training, each with approximately 3,000 soldiers. In its Security Sector Reform (SSR) process, the DRC is also trying, with international assistance, to redefine FARDC's appropriate missions, size, function, and organization. Additional concerns include inadequate and inconsistent payment of salaries, poor living conditions including lack of sustenance, and lack of training. While the main mission of the restructured FARDC will be to defend the country's borders, it is currently incapable of doing so, and will remain so for the foreseeable future. Other security forces suffer from a similar lack of capacity. Poor maritime, airport, and border security, rampant corruption, and weak to non-existent infrastructure and laws make the DRC a potential haven for transnational terrorists, smugglers, and traffickers.

Democratic institution-building, SSR, human rights, and protection of American citizens are the most significant U.S. interests in the DRC, followed by humanitarian assistance, economic development, and global issues including promoting health and the environment. Sustaining a peaceful democracy contributes to U.S. humanitarian interests and regional security by creating and supporting institutional mechanisms for peaceful resolution of disputes and by providing a fertile environment for a growing economy. Using limited Foreign Military Financing (FMF) and International Military Education and Training (IMET) funds, Post continues to utilize the military English language lab in Kinshasa and provides English language instructor and laboratory technician training. The DRC continues to be eligible to receive Excess Defense Articles (EDA) on a grant basis under Section 516 of the Foreign Assistance Act of 1961, as amended (FAA). The United States government looks at ways, given availability of materials, to use the EDA program to support Congolese military equipment and restructuring needs.

The priority for our military assistance programs will continue to be to support the modernization and professionalization of the FARDC, leaning heavily toward creation of a moderate-sized force capable of securing its own borders, respecting and protecting the civilian population, and carrying out, and supporting regional and international peacekeeping operations. With some Peacekeeping Operations (PKO) funds the State Department plans to implement a new program against military

## **Volume I Section III-I - Africa**

impunity and to support FARDC's military law and justice capabilities by building on previous Department of Defense work in this area. Related objectives include putting an end to widespread FARDC's human rights abuses and increasing interoperability with regional and international forces -- mainly through development of a robust English language training program. Program objectives also seek to contribute to the development of a professional officer and non-commissioned officer corps; the FARDC officer corps is currently estimated to account for at least 28 percent of all soldiers. Using PKO funds in FY09 and FY10, State contractors and DoD trainers equipped and trained a light infantry battalion (LIB) and refurbished infrastructure in Kisangani, concluding with a graduation in September 2010. The intent is to have the unit serve as a model for the other FARDC reform efforts.

The DRC continues to participate in United States government-funded programs such as the Africa Center for Strategic Studies (ACSS) seminars. ACSS supports democratic governance in the DRC by offering senior government civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

**Congo, Republic of (Brazzaville)**

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	5	2	5	\$123,481	0	0	0	\$0.00
Regional Centers	14	14	6	\$200,621	0	0	0	\$0.00
<b>Totals:</b>	<b>19</b>	<b>16</b>	<b>11</b>	<b>\$324,102</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Emerging from a five-year period of instability that included a civil war, the Republic of the Congo (ROC) has made considerable progress in moving towards more democratic political and economic systems and a more peaceful and stable country. Presidential and legislative elections were held in 2002, and a peace agreement was signed in March 2003 with the last vestiges of the rebel faction known as the "Ninjas". Since the 2002 presidential and legislative elections, the government has made some progress in rebuilding institutions destroyed during the years of civil conflict in an attempt to restore the faith and confidence of the Congolese people in the government. Legislative elections held in June and July of 2007 were marred by mismanagement and disorganization, according to opposition leaders, but overall were carried out without incident. Presidential elections were held in July 2009, and Denis Sassou-Nguesso, who has been President for 26 of the last 31 years, was declared the winner of another seven-year term. The leader of the Ninja rebel group has accepted a position in the government in accordance with the peace agreement signed in 2003. As a post-conflict country, the ROC still faces challenges to ensure that it remains on the path to develop fully transparent procedures, particularly in the oil sector, and to increase efforts for good governance. The country continues to require considerable repair of its infrastructure and basic social services. Major projects to repair and improve the infrastructure, such as a hydroelectric dam, a new airport terminal, the refurbishment of several hospitals, the construction of several housing projects, and resurfacing of the road between Brazzaville and Pointe Noire, are currently underway. Other projects, including an upgrade to the Brazzaville city water system and the rehabilitation of the Congo-ocean railway, have been announced but not started. International Military Education and Training (IMET) funds support Congolese efforts to restructure and professionalize the Congolese military. The Africa Center for Strategic Studies (ACSS) supports democratic governance in Congo-Brazzaville by offering senior African civilian and military leaders courses in civil-military relations and technical issues. ACSS participation has helped to build and maintain long-term interaction among African counterparts, and has supported additional exchanges through research, seminars, conferences, and other activities on relevant topics in Africa, Europe, and the United States.

## Côte d'Ivoire, Republic of

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$8,113	0	0	0	\$0.00
Non-SA, UC, JCET	1	1	1	\$0.00	0	0	0	\$0.00
Regional Centers	13	13	5	\$188,773	0	0	0	\$0.00
<b>Totals:</b>	<b>15</b>	<b>15</b>	<b>7</b>	<b>\$196,886</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

After a decade of political instability, including two years of civil war, direct United States assistance to Cote d'Ivoire remains restricted due to the lack of elections and democratic transitions. A laborious peace process has yielded a modicum of stability since 2007, but several key steps must be taken before direct military cooperation can resume. Presidential and parliamentary elections, which have been delayed repeatedly since 2005, are the largest hurdle for the country to overcome in order to move forward with much needed reforms in the security and social sectors. Although the government has extended its national administration to the northern region, it exercises little real authority in the former rebel territory. Former rebel forces maintain de facto control over much of northern Cote d'Ivoire, including its borders. The disarmament and re-integration into society of these forces is critical to the country's ability to move past the political stalemate in place since 2005.

## Djibouti

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	34	32	10	\$347,628	0	0	0	\$0.00
FMF	48	46	7	\$438,304	0	0	0	\$0.00
GPOI	4	4	1	\$100,408	12	12	1	\$0.00
IMET-1	25	10	25	\$469,395	0	0	0	\$0.00
Regional Centers	8	8	6	\$82,267	0	0	0	\$0.00
<b>Totals:</b>	<b>119</b>	<b>100</b>	<b>49</b>	<b>\$1,438,002</b>	<b>12</b>	<b>12</b>	<b>1</b>	<b>\$0.00</b>

Djibouti, a country strategically located at the entrance to the Red Sea, is the gateway to Ethiopia. It joins the northwest corner of Somalia, faces Yemen across the Gulf of Aden, and is home to the only U.S. military base in Africa, Camp Lemonnier, as well as the multi-national Combined Joint Task Force-Horn of Africa (CJTF-HOA). Djibouti also hosts France's largest military presence overseas. Djibouti has played a strategic role in overseas contingency operations and currently has forces from multiple countries (Germany, United Kingdom, France, Romania, Kenya, Pakistan, South Korea, and the United States) participating in the coalition effort to fight terrorism and promote democratic stability. In addition, Djibouti hosts anti-piracy forces, such as the European Union's Task Force Atalanta and German, Spanish and Japanese Maritime Patrol Aircraft (MPA). As the main seaport for Ethiopia, it is vital to that staunch ally in overseas contingency operations. Annually, emergency food aid from the United States passes through the Port of Djibouti to Ethiopia, and Djibouti has replaced Dubai as the pre-positioning center for all food aid in the region.

Djibouti is also an important refueling point for U.S. military aircraft and is a training area for U.S. military personnel, ships, and aircraft. The Horizon Fuel Terminal, where the U.S. Navy has leased four storage tanks, supports refueling of naval vessels and has markedly increased the number of U.S. Navy ship visits to Djibouti. The French military hospital is a key trauma care center in the area and helped stabilize victims after the terrorist attack on the USS Cole in October 2000.

Efforts to improve maritime and land border security are crucial to Djibouti's long-term stability. Foreign Military Financing (FMF) funds have enhanced its maritime and land border capabilities by providing equipment, and by improving Djibouti's capacity to monitor marine traffic.

International Military Education and Training (IMET) is a core program for Djibouti and has been one of the most successful programs in the region. IMET graduates now hold key policy and operational positions within the Djiboutian military, including major command positions. Djiboutian mid- and senior-grade officers have attended Command and General Staff and War College courses. Professional education and English language training continued in FY 2009 and 2010. IMET helps U.S. strategic interests by expanding relations and our influence in a frontline state in overseas contingency operations. Djiboutians benefit from the training in meeting their core objectives of creating a professional and well-trained force with shared commitments to democratic values and security objectives.

Djibouti is in a very strategic position adjacent to the Bab el Mandeb strait between the Indian Ocean and the Red Sea, and it provides the United States access, basing, and over-flight rights. Djibouti works closely with CJTF-HOA to counter terrorism and promote security. In FY 2009 and 2010, the Regional Defense Combating Terrorism Fellowship Program (CTFP) continued to foster bilateral relations with Djiboutian Armed Forces and is an integral part of U.S. Africa Central Command's Theater Security Cooperation Strategy. CTFP in FY2009 and 2010 continued to help to promote access, while serving overall U.S. strategic interests, including Djibouti's participation in regional activities, associated with this important littoral nation.

The Africa Center for Strategic Studies (ACSS) has become an important complement to IMET in exposing senior Djiboutian leaders to core U.S. values, including civil-military relations and national security and defense concerns. This

program enhances interaction between our countries, and expansion of this program will promote closer bilateral cooperation and trust.

## Equatorial Guinea

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	6	6	3	\$87,081	0	0	0	\$0.00
<b>Totals:</b>	<b>6</b>	<b>6</b>	<b>3</b>	<b>\$87,081</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

At present, virtually all forms of military assistance to Equatorial Guinea (EG) remain suspended. In the past several years, some genuine progress has been made in the EG government's historically poor human rights record, governance problems, and democratic reforms. However, the country's leadership and political power continue to remain in the hands of a small group headed by President Teodoro Obiang. The legitimacy of this group is often questioned, as it has held power without meaningful opposition since a successful coup in 1979 to overthrow a brutal and oppressive dictator. Consequently, no military-to-military engagement with EG has taken place, except for occasional participation at the Africa Center for Strategic Studies (ACSS) and at Gulf of Guinea conferences. U.S. military ships also visit EG ports.

The U.S. government utilizes these small scale interactions to convey to the Equatoguinean government the steps it must take in order to qualify for bilateral military assistance programs. Some progress has been made and the government appears amenable to continue on this path, especially with strong and consistent U.S. encouragement and pressure.

As Equatorial Guinea's oil production continues to surge, making it the the third largest source of oil in Sub-Saharan Africa and of increasing importance to the U.S. energy supply, both the military and the civilian leadership are more acutely aware of the need for greater security in the Gulf of Guinea. As all of the production rigs are offshore and vulnerable, security concerns may be leveraged to push the country into more meaningful reform. If International Military Education and Training (IMET) funding resumes, the program could start with occasional ship riders and basic IMET programs, and progress from there as warranted by results. Continued and increased participation in ACSS programs would also become more important, as they contribute to long-term improvements in defining the military's role in developing democratic governance. Further, the country has a strong and functioning coast guard and several modern fighter jets (currently operated with foreign pilots) as well as the financial resources to contribute strongly to maritime security in the region. EG and Nigeria, both of whom were unwilling to wait indefinitely for serious multilateral talks to get started, have recently begun bilateral discussions to explore how they can best cooperate in quickly implementing a Gulf of Guinea maritime security strategy.

## Ethiopia

Program	FY 2009				FY 2010

<b>Totals:</b>	<b>2419</b>	<b>2415</b>	<b>30</b>	<b>\$3,784,500</b>	<b>1390</b>	<b>1390</b>	<b>4</b>	<b>\$0.00</b>

Ethiopia is arguably the key to U.S. security interests in the Horn of Africa, a turbulent region threatened by Islamic fundamentalism and terrorism. The Ethiopian National Defense Force (ENDF) is one of, if not the most, capable military force in sub-Saharan Africa, and has clearly established itself as the dominant military power within the Horn of Africa. Ethiopia remains a staunch ally in overseas contingency operations and the ENDF has been our most effective partner in the Counterterrorism (CT) fight within the region. Ethiopia's internal stability and its role as a regional and international leader remain critical for the stability of the Horn as a whole. The long-term goal of transforming the Ethiopian military into a professional, apolitical modern force remains important.

The Ethiopians have a long history of successful participation in United Nations (UN) military efforts, spanning the spectrum from the Korean War to combating genocide in Rwanda. Ethiopia currently has peacekeepers deployed to Liberia and to Darfur in the UN/African Union (AU) Mission in Darfur (UNAMID).

Ethiopia is a critical member of the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI). ACOTA training and equipment assisted the ENDF to deploy to UNAMID. Ethiopia received funding pursuant to Section 1207 of the National Defense Authorization Act for FY 2006 that was directed towards border security training and received additional funds in anti-terrorism assistance for specialized counter-terrorism training.

As principally a former-guerrilla army, the ENDF lacks strong organic training institutions (a deficiency of which the Ethiopian senior leadership is painfully aware and working hard to correct). Not only does this lack of formal military schooling hinder the professional growth of the military, but also it drastically reduces proper use of defense resources critical to a poor nation like Ethiopia. During the past several years, the Ethiopians have increasingly turned to the U.S. military for assistance in addressing these shortcomings. The ENDF Chief of General Staff requested U.S. military assistance in helping reform the Ministry of National Defense. U.S. Army Central Command (ARCENT) has sent several Mobile Training Teams (MTT), specifically the Law of Land Warfare and Human Rights, the Role of the Military Lawyer, and Public Affairs, to assist this reform effort.

International Military Education and Training (IMET) funds assist in increasing the professionalism of the Ethiopian military and strengthen the U.S.-Ethiopian military relationship. The focus of the IMET program in Ethiopia is on building host-nation training institutions. Increasing the English-speaking capability of the military is achieving this by training instructors at U.S. military training institutions and by bringing U.S. military trainers to Ethiopia. The ACOTA training management workshops have also assisted greatly in specifically addressing the ENDF's training shortcomings.

The ENDF requested U.S. assistance using Foreign Military Financing (FMF) to help establish its own command and general staff college for Professional Military Education (PME) of mid-rank and senior officers. The USG responded with funding support to the Ethiopian Defense Command and Staff College (EDCSC). Two U.S. Army instructors and one U.S. Air Force

## Volume I Section III-I - Africa

instructor teach at the EDCSC. During the fall of 2007 a MTT provided train-the-trainer and full-time instruction to the EDCSC. Enhancing ENDF professionalism will better position them for the future in combating terrorism.

Ethiopia has taken an aggressive stance against terrorism in Somalia and has supported the United States with operational access and invaluable intelligence sharing. Ethiopia's participation in the Regional Defense Combating Terrorism Fellowship Program (CTFP) strengthens U.S. and Ethiopian bilateral relations, especially in areas of CT training and education.

The George C. Marshall European Center for Security Studies, National Defense University (NDU), and the Africa Center for Strategic Studies (ACSS) support democratic governance in Ethiopia by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. Senior Ethiopian civilian and military leaders continue to benefit from participation in these events and conferences. Participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States. ACSS opened its first satellite office in Addis Ababa in September 2006.

The scourge of HIV/AIDS transcends political and geographic boundaries, making it a global humanitarian issue. The training support provided through the Office of the Secretary of Defense's (OSD) HIV/AIDS Prevention Program to ENDF medical personnel is not limited to the transfer of skills and knowledge during the duration of training. It has developed into a network of close person-to-person professional contacts, establishment of bilateral research studies, and access to ENDF military hospitals. This has established an effective, tightly knit team of American and Ethiopian military health professionals working together on common issues. Every indication is that the HIV prevalence rate within the Ethiopian military remains lower than that of the general population, a rare, if not unique, situation in sub-Saharan Africa.

## Gabon

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
ALP	3	1	3	\$33,488	2	1	1	\$28,970.00
CTFP	2	1	2	\$17,150	2	2	2	\$4,470.00
DOHS/USCG	43	43	2	\$0.00	0	0	0	\$0.00
GPOI	1	1	1	\$833	0	0	0	\$0.00
IMET-1	20	11	14	\$267,711	14	8	4	\$200,000.00
Regional Centers	7	7	5	\$107,202	11	11	11	\$0.00
<b>Totals:</b>	<b>76</b>	<b>64</b>	<b>27</b>	<b>\$426,384</b>	<b>29</b>	<b>22</b>	<b>18</b>	<b>\$233,367.00</b>

The Gabonese Republic remains a politically stable and influential regional leader after experiencing a peaceful transition of power in 2009. President Ali Bongo Ondimba, inaugurated in October 2009, has continued his father's role as a regional peacemaker, especially in Central African Republic (CAR). Gabon has 200 peacekeepers in the Economic Community of Central African States (CEEAC)'s mission in CAR. Gabon is the headquarters for CEEAC and its military component, FOMAC. On several occasions Gabon has served as a safe haven in times of conflict in the region, and the government has authorized the United States to use its facilities as a staging area for evacuations of Americans and other Westerners in case of need. Gabon has hosted a standby component of the European Force to provide security for elections in the Democratic Republic of the Congo (DRC). Oil production, the basis of the national economy, is declining. President Bongo Ondimba's vision includes economic diversification to attract foreign investment. Social indicators remain skewed. Gabon has a high per capita GNP, but in reality, has high levels of poverty and infrastructure decay. Continued economic deterioration could create additional problems for the President, Gabon's stability, and democratic progress.

Fostering effective relations between the Gabonese and the U.S. military, and exposing the Gabonese participants to U.S. professional military organizations and procedures, such as civilian control of the military, will increase the efficiency and effectiveness of Gabon's military. International Military Education and Training (IMET) in FY 2010 focused on improving the English language capability of Gabonese military personnel and increasing professionalism, as well as enhancing peacekeeping capability and increasing maritime security. These programs also support the goal of regional stability, particularly through peacekeeping operations in which the Gabonese participates. Gabon is an Africa Contingency Operations Training and Assistance (ACOTA) partner, a component of the larger Global Peace Operations Initiative (GPOI), but did not receive any training during FY 2010.

Participation in the Africa Center for Strategic Studies (ACSS) also supports democratic aims in Gabon through reinforcement of the relationship between the military and its civilian leaders. In addition, creating military-to-military contacts will increase the likelihood that Gabon will remain willing to serve as a staging area for evacuation operations in the region. Successful ship visits continued in 2010.

## Gambia, The

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	50	50	1	\$5,300	0	0	0	\$0.00
IMET-1	15	7	13	\$186,734	0	0	0	\$0.00
Regional Centers	10	10	4	\$163,302	0	0	0	\$0.00
<b>Totals:</b>	<b>75</b>	<b>67</b>	<b>18</b>	<b>\$355,336</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Since gaining independence in 1965, The Gambia has maintained peaceful relations with its neighbors. Until a military coup in 1994, The Gambia was one of the oldest existing multi-party democracies in Africa. The current military contingent is approximately 1,000 men strong. The country has committed troops to several peacekeeping missions, including those in Bosnia, Kosovo, the Democratic Republic of the Congo, Sierra Leone, Eritrea, East Timor, Liberia, and most recently a 196-man contingent to the United Nation (UN)/African Union (AU) Mission in Darfur. The country is keen for western military, especially U.S. military, cooperation to assist with training soldiers and updating broken or outdated equipment.

During FY 2003, following the lifting of Section 508 sanctions that resulted from the 1994 coup, the United States resumed a modest International Military Education and Training (IMET) program to expose the next generation of Gambian military officers to U.S. military organizations and procedures, civil-military relations, and the role of the military in a democracy. Until the lifting of those sanctions, the only military-to-military cooperation between the United States and The Gambia was through the Africa Center for Strategic Studies (ACSS) programs. ACSS continues to support democratic governance in The Gambia by offering senior Gambian military and civilian leaders practical programs in civil-military relations, national security strategy, defense economics and related topics.

## Ghana

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

<b>Totals:</b>	<b>4373</b>	<b>4354</b>	<b>85</b>	<b>\$4,168,075</b>	<b>1372</b>	<b>1372</b>	<b>4</b>	<b>\$0.00</b>

The Ghana Armed Forces (GAF) is one of the more reliable and professional militaries in Africa. It has a long and commendable record in Peacekeeping Operations (PKO), participating in operations around the globe. The GAF currently deploys battalions in Chad and the Central African Republic, West (MINURCAT), the Democratic Republic of the Congo (MONUSCO), Darfur (UNAMID), Lebanon (UNIFIL), Liberia (UNMIL), and Cote d'Ivoire (UNOCI), and has United Nations (UN) military observers in the UN peacekeeping missions in the Western Sahara (MINURSO), Kosovo (UNMIK), Sudan (UNMIS); and has had observers in East Timor, Angola, Tajikistan, Kuwait, the Balkans, and Ethiopia/Eritrea and. Because of its history of political stability and its use of English as an official language, the Republic of Ghana provides an ideal platform for staging humanitarian operations and regional peacekeeping training activities.

U.S. military assistance programs in Ghana seek to strengthen democracy through enhanced military professionalism by reinforcing proper civil-military relationships, increasing and improving the GAF's ability to project and support peacekeeping operations, and increasing and improving the Government of Ghana's (GOG) ability to support U.S. overseas contingency operations, by increasing interoperability with U.S. forces.

Military cooperation under the International Military Education and Training (IMET) program, the Regional Defense Combating Terrorism Fellowship Program (CTFP), and the Global Peace Operations Initiative (GPOI) including the Africa Contingency Operations Training and Assistance (ACOTA) program, all reinforce the GAF's ability to play a constructive role in the development of Ghana as a democratic society and to contribute to peacekeeping efforts in the region and beyond. The GAF was one of the prime organizers behind the West African response to the recent Liberian crisis and the Economic Community of West African States (ECOWAS). This effort sponsored deployment in Cote d'Ivoire, and Ghana played an integral part in African Union (AU) initiatives to develop an African Stand-by Force.

Training provided by IMET funding enables Ghana to build a network of graduates from U.S. education and training programs. These graduates can pass on their knowledge and expertise and assist Ghana in building the institutions needed to play a constructive role in regional leadership. These courses also help strengthen the GAF's apolitical role in a democratic society.

Ghana's armed forces were the first to be trained under the ACOTA program, and ACOTA-trained GAF trainers have trained all deploying GAF peacekeeping units since April 2003. The GAF continues to be supported by ACOTA training and

## **Volume I Section III-I - Africa**

equipment, which helps ensure there are up-to-date training modules, and continuity of its trainer force. Peacekeeping training capability development programs, such as ACOTA and GPOI, increase the GOG's ability to more effectively cooperate with ECOWAS and other partners in regional security, peacekeeping, and humanitarian operations.

## Guinea

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	7	5	5	\$74,456	0	0	0	\$0.00
<b>Totals:</b>	<b>7</b>	<b>5</b>	<b>5</b>	<b>\$74,456</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

U.S. diplomatic efforts in Guinea have primarily been directed towards democracy, good governance, and economic development, as well as reinforcing Guinea's ability to play a more effective role in regional conflict-resolution and peacekeeping efforts. A coup d'état installed a military regime on December 23, 2008. Section 508 of the Foreign Operations Appropriations Act was not automatically invoked since a democratically elected government did not exist prior to the coup. However, on December 31, 2008, the U.S. decided to suspend all U.S. assistance to Guinea except for humanitarian aid and assistance for democratic elections until after Guinea holds credible, free, fair, timely and transparent national elections. Because Guinea has recently taken some steps towards democracy, some limited IMET participation was allowed in FY 2009.

A moderate and tolerant Muslim country, Guinea is pro-United States and supported the United States on United States Security Council Resolution (UNSCR) 1441 and on the passage of numerous anti-terrorism resolutions. The United States witnessed the indirect benefit of U.S. military engagement when Guinea agreed to participate in the West Africa Training Cruise (WATC), a multilateral Navy and Marine Corps military exercise, conducted within Guinean among the United States, Guinea, Italy, and Spain in October 2005. This was the first time that the Guinean government had allowed a foreign military to participate in an exercise within its national borders. In March 2006, Guinea hosted the first annual U.S.-Guinea bilateral consultations, designed to deepen our diplomatic, strategic, and commercial relationships.

Guinea has a long history of assisting other African countries, but its contributions and effectiveness in peace operations are limited by its army's organic capabilities. To the extent that the United States can help Guinea develop its armed forces, we will witness improved participation in African multilateral contingency operations. Guinea has participated in the Economic Community of West African States (ECOWAS) and United Nations (UN) Peacekeeping Operations (PKO) in Liberia, Sierra Leone, Burundi, Haiti, and Rwanda. Through combined training and exercises, West African countries may be able to avoid conflict in the future, and failing that, will be better able to conduct multilateral peace/humanitarian operations.

English is the operational language for international peace/humanitarian operations and the Guinean Armed Forces are finally seeing the value of having English-speaking personnel. To assist in this endeavor, efforts will be undertaken to improve the military's two existing language laboratories with an infusion of updated training materials and English language instructor training, as well as building a third language lab outside of Conakry.

Collectively, in-country training has included components on human rights, the rule of law, law of land warfare, civil-military relations, and the role of a military in a democratic society. The United States has also successfully used Expanded International Military Education and Training (E-IMET) to fund seminars in Guinea in which these topics were reinforced. The seminars have bolstered confidence and mutual respect between the Guinean military establishment and civilian leaders. They serve as a catalyst for a joint civil-military follow-up committee that continues to engage in open dialogue and sponsor events including "open-door" visits for civilians to military bases. For many of Guinea's political, labor, and community leaders, these seminars provide their first opportunities to access these locations.

With the assistance of the U.S. and other donors, Guinea continues its HIV/AIDS Education and Awareness Program. This program is funded by the Department of Defense and managed by the DAO's implementing partner, Population Services International. During its first two and one-half years of existence, this program has resulted in the creation of the Guinean Armed Forces' first HIV/AIDS policy. It has also produced peer educators throughout the country, promoted condom usage and distribution, and inaugurated the military's first voluntary counseling and testing facility. The program remains a great success.

### **Volume I Section III-I - Africa**

Guinea continues to be a strong supporter of the Africa Center for Strategic Studies (ACSS). Guinea continues to participate in ACSS events. ACSS supports democratic governance in Guinea by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

## Guinea-Bissau

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	60	58	4	\$102,113	0	0	0	\$0.00
Regional Centers	7	7	3	\$108,681	0	0	0	\$0.00
<b>Totals:</b>	<b>67</b>	<b>65</b>	<b>7</b>	<b>\$210,794</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Following eleven months of internal conflict in 1998-99, Guinea-Bissau elected a new government in 2000 that ruled until the September 14, 2003 military intervention. A democratically elected legislature took office in Guinea-Bissau on May 12, 2004. In August 2004, the United States lifted sanctions against Guinea-Bissau under section 508 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act. New presidents were elected in 2005 and 2009. On April 1, 2010, then-Deputy Chief of Defense Indjai led a successful mutiny against Chief of Defense (ChoD) Induta and on June 25, President Sanha formally appointed Indjai as ChoD. Indjai's open contempt of the civilian leadership, exhibited by the temporary abduction of the Prime Minister on April 1 and the continued incarceration of the former ChoD and others, led the United States, European Union (EU), and other Western donors involved in security sector reform to make the political decision to suspend military assistance, including an EU-led plan for security sector reform agreed to by the previous ChoD.

Guinea-Bissau faces four major challenges:

- Downsizing and reforming the military, and bringing it under civilian authority
- Promoting economic development
- Strengthening democratic institutions
- Stemming the flow of drug trafficking within its borders

Considering these priorities and parameters, any future U.S. military cooperation with Guinea-Bissau should focus on human rights and the role of a military in a democratic society. International Military Education and Training (IMET) resumed in 2005.

Additional challenges in Guinea-Bissau include an extremely poor public health system, making it difficult to prevent and combat HIV/AIDS, malaria, tuberculosis, and other tropical diseases. HIV/AIDS control and other health programs conducted with U.S. assistance would contribute to regional stability as well as basic humanitarian needs. U.S. assistance to Humanitarian Demining efforts in Guinea-Bissau has resulted in the removal of nearly all mines from the city of Bissau. The remaining landmines and unexploded ordnance are in two-dozen well-known locations spread throughout the country. There are also an undetermined number of mines scattered along the border with Senegal resulting from the long-standing conflict in Senegal's Casamance region, which occasionally involves people and locations in northern Guinea-Bissau.

Assistance provided under the Humanitarian Assistance (HA), Excess Property (EP), and other activities programs for schools, health centers, and bridges have been very well received by Bissau-Guinean authorities and local populations. Continued HA activities in Guinea-Bissau would further enhance U.S. relations with the country and contribute to long-term political and economic development goals.

## Kenya

Program	FY 2009				FY 2010

Non-SA, UC, JCET	390	390	3	\$1,159,166	130	130	7	\$2,850,000
Regional Centers	10	10	6	\$124,289	0	0	0	\$0.00
Service Academies	3	3	2	\$214,641	0	0	0	\$0.00
<b>Totals:</b>	<b>620</b>	<b>593</b>	<b>77</b>	<b>\$4,904,595</b>	<b>190</b>	<b>190</b>	<b>8</b>	<b>\$2,850,000</b>

Kenya is the lynchpin of East African stability and security and has been a solid partner in U.S. overseas contingency operations. Kenya has the significant challenge of securing its porous borders with Sudan and Somalia, as well as improving its maritime security. The purpose of military training for Kenya is to improve the professionalism of the Kenyan military and its capabilities in supporting overseas contingency operations and Peacekeeping Operations (PKO) around the world. Kenya is a major contributor to PKOs, with troops participating in all current United Nations (UN) peacekeeping missions in Africa. A key aspect of U.S. engagement with Kenya is maintaining access to Kenya's sea and air facilities for contingencies and training exercises. Access to the Horn of Africa region and the Indian Ocean remains important for current operations, as well as for enhancing U.S. capabilities to respond to future humanitarian and other emergencies in the region.

Training engagement for Kenya has included the Regional Defense Combating Terrorism Fellowship Program (CTFP), Africa Center for Strategic Studies (ACSS) activities, U.S. Central Command exercises, and the Global Peace Operations Initiative (GPOI), including the Africa Contingency Operations Training and Assistance (ACOTA) program. Most of the top Kenyan military leaders have attended U.S. resident Professional Military Education (PME) in the past and PME will continue to be a key ingredient for a balanced approach to professional development.

Kenya's porous borders are exposed to external threats such as terrorists and insurgents. Even though Kenya's relatively small armed force of 30,000 personnel is focused on external threats, they are transitioning to more multifaceted missions against terrorism following the bombing of the American Embassy in Nairobi in August 1998, the bombing at a tourist hotel in Mombasa, and the attempt to shoot down an Israeli civilian aircraft. CTFP is instrumental in training key Kenyan Ministry of Defense (KMOD) leaders at the National Defense University's (NDU) Counterterrorism Fellows course and the Center for Civil-Military Relations (CCMR) course on combating terrorism. These alumni are now responsible for helping to fight terrorism and helping to coordinate KMOD/U.S. operations within the Horn of Africa region. Kenya has also received Counterterrorism (CT) training through Combined Joint Task Force-Horn of Africa (CJTF-HOA) activities. The CTFP also trained key, promising mid-level officers in such areas as Stabilization and Reconstruction, the Naval Staff College, and Defense Analysis. Under the CTFP, a total of fourteen students were trained. In FY 2009, the United States continued to help improve Kenya's capabilities in disaster preparedness and response. Kenyan military and civilian leaders participated in ACSS events focused on defense management, future African Leaders, community leadership, and small arms proliferation.

ACOTA focuses on training of personnel as commanders and staff at Kenya's International Peace Support Training Center (IPSTC) near Nairobi. The training emphasized "train-the-trainer" skills for junior commanders and staff officers in peacekeeping operations. ACOTA training for Kenya is shifting to direct training of units preparing for deployments to

**Volume I Section III-I - Africa**

mandated PKOs. ACOTA also supported a Peace Support Operations (PSO) lessons learned workshop hosted by the Rwanda Defense Forces in March 2008.

## Lesotho

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	3	3	3	\$36,397	5	10	5	\$424,867
IMET-1	7	4	7	\$80,527	11	4	11	\$189,651
Regional Centers	15	15	6	\$205,334	12	100	6	\$0.00
<b>Totals:</b>	<b>25</b>	<b>22</b>	<b>16</b>	<b>\$322,258</b>	<b>28</b>	<b>24</b>	<b>22</b>	<b>\$614,518</b>

Prior to the turn of the century, Lesotho's army had been a highly politicized force, vulnerable to influence by political parties. Military involvement in political destabilization and coups d'état had been a problem since independence in 1966. The political/security crisis of 1998, for example, included an army mutiny and junior officer complicity in an unconstitutional attempt to overthrow the elected government. The crisis demonstrated that, at that time, a significant segment of the Lesotho Defense Forces (LDF) neither understood nor accepted the subordinate role of the military in a civilian-led democracy.

Since the political upheaval and violence of 1998, the military has avoided involvement in political issues. An international review of the April 2009 assassination attempt on the Prime Minister found that LDF involvement was limited to low-level soldiers who were negligent in protecting weapons and vehicles that were stolen and used in the attack on the Prime Minister's residence. Lesotho's current government has undertaken a comprehensive program to reform and professionalize the LDF and other security services. The United States has an interest in supporting Lesotho's program because it advances our foreign policy goals of promoting democracy and human rights as well as humanitarian response skills. Support from the Department of Defense is invaluable in meeting these goals.

Lesotho receives International Military Education and Training (IMET) funds. Participation in IMET and other military exchange and training opportunity programs (e.g. Regional Defense Combating Terrorism Fellowship Program (CTFP), Africa Center for Strategic Studies (ACSS), etc.) supports democratic governance in Lesotho by offering senior officials practical instruction in civil-military relations, national security strategy, and defense economics.

In addition, U.S. funding has been helping the LDF combat its growing HIV/AIDS problem by training lab technicians to provide in-house services for HIV positive members of the LDF. Lesotho's current prevalence rate is 23.6% - the third highest in the world. Although the LDF has not been specifically surveyed, UNAIDS estimates that in the military HIV can be 2 to 5 percent higher than other populations. The Center for Disease Control's (CDC's) cooperative agreement with PSI is assisting the LDF in prevention and counseling and testing activities, including provision of social marketing for a camouflaged condom as well as targeted counseling and testing activities for the LDF and for family members.

The Africa Center for Strategic Studies (ACSS) programs support democratic governance in Lesotho by offering senior civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. Lesotho has benefited from training designed to assist the next generation of African military leaders to successfully address complex domestic and regional security challenges, as well as training for the legal aspects of conflict prevention and combating terrorism. In February 2009, Lesotho celebrated the launch of its local chapter with a seminar on developing a National Security Strategy.

## Liberia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	4	4	4	\$57,163	0	0	0	\$0.00
FMF	4	4	2	\$392,250	0	0	0	\$0.00
IMET-1	55	29	49	\$640,876	0	0	0	\$0.00
Misc								
DOD/DOS Non-SA	1	1	1	\$2,500	0	0	0	\$0.00
Regional Centers	10	10	6	\$151,102	0	0	0	\$0.00
<b>Totals:</b>	<b>74</b>	<b>48</b>	<b>62</b>	<b>\$1,243,891</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

After 14 years of civil war and two years of an interim government, Ellen Johnson Sirleaf was declared the winner of multiparty presidential elections on November 23, 2005 and took office on January 16, 2006. Her election marked a significant milestone in the country's transition to democracy. With over 8,000 United Nations (UN) peacekeeping and police forces on the ground in Liberia, an effort to restore Liberia's capacity to provide for its own security is essential. The United States has taken the lead in military Security Sector Reform (SSR) for Liberia. We are providing the appropriate equipment, support, and training for a new 2,000 strong Liberian military along with the establishment of a trained Ministry of National Defense staff. The new Armed Forces of Liberia (AFL) will be a fiscally sustainable, professional, civilian-led national military force to supplement border control and to interdict arms traffickers and regional paramilitaries.

A weak Liberia could fuel regional instability in West Africa. We need to reduce the potential for terrorists to threaten Liberia's fragile peace or to take advantage of Liberia as a haven for money laundering, arms smuggling, and other activities supporting terrorism. Liberia has a newly trained, but insufficiently equipped and poorly managed police force. In addition, the new military is not yet fully operational, and the new government has almost no current capacity to control its borders or to enforce customs and other laws.

Liberia's military is beginning from scratch. Over 9,000 war recruits were demobilized, former AFL members have received severance pay, and those eligible are awaiting pensions. A recruiting and vetting process has ensured that the AFL receives the best candidates available. Recruits have completed initial entry training and infantry advanced individual training, which is the end state for basic training. Nearly 1,000 Non-Commissioned Officers (NCOs) have completed training in the basic NCO course and more than 100 have undergone training in the Officers' Candidate School (OCS). International Military Education and Training (IMET) funding is critical to allow for the continuation of training beyond the basic recruit level. Numerous Liberian students have attended IMET courses. Foreign Military Financing (FMF) will be used to build on the IMET program by funding Mobile Training Teams (MTT) and long-term (3-5 year) mentorship for the fledgling military, and to help create a coast guard from the ground up. FMF and Excess Defense Articles (EDA) will be necessary to help equip these forces.

Participation in the Africa Center for Strategic Studies (ACSS) programs provides a low-cost investment to build professionalism within Liberia's military under civilian, democratic leadership. ACSS conferences support democratic governance in Liberia by offering senior civilian and military leaders a practical program in civil-military relations, national security strategy, respect for human rights, and defense economics, as well as engagement and interaction with USG and fellow African civilian and military officials.

## Madagascar

Program	FY 2009				FY 2010

Madagascar's current de-facto leadership came to power in what the United States considers a military coup. In early 2009, the Malagasy military made it clear to the country's democratically-elected leader, Marc Ravalomanana, that they would not protect him against attack. This effectively forced Ravalomanana to step down, hand power over to the military, and leave the country. The military in turn immediately handed power over to Andry Rajoelina, the figurehead of a sometimes-violent movement opposing Ravalomanana. Rajoelina remains in power today, with the military indicating it wants no part of politics for the time being. These events mark a sad departure from previous progress toward democracy in Madagascar. After the failure of its socialist experiment (1975-1991), Madagascar underwent a period of transition to democracy and economic liberalization, showing much greater openness towards the United States and the West. During the political turmoil of the early and mid-1990s, the military remained disciplined, apolitical, and respectful of civilian authority, despite calls for it to intervene. The resolve of their apolitical posture was again tested in early 2002 during the political standoff over disputed presidential election results. The dispute was resolved democratically and peacefully, without causing significant damage to civil-military relations. Following an unsuccessful coup attempt in November 2006 led by a former Malagasy general, Madagascar held presidential elections in early December 2006, electing Marc Ravalomanana.

Even in the best of times, as the world's fourth-largest island, but one of the poorest countries in the world, Madagascar lacks the capability to protect its 5,000 kilometer maritime border against smuggling and other threats. This inability deprives the government of significant tax revenues, contributes to the endangerment of many rare species found nowhere else, and creates a permissive environment for transnational terrorists. Since the 2009 coup, the de-facto government's ability to secure ports and borders has eroded yet further due to rampant corruption and fewer available funds since the secession of international aid by most donors.

The Malagasy are traditionally inward looking, but have sometimes sought to play a more active role in regional and international affairs. Madagascar had been scheduled to host the African Union (AU) annual summit in 2009 and the annual summit of Francophone countries in 2010 – both of these were moved to other venues due to the 2009 coup. Ravalomanana had made international engagement a priority, although his efforts were largely focused on financing development within the country – Rajoelina has been much less willing to engage internationally, likely due to widespread international condemnation of the manner in which he came to power as well as his efforts to consolidate and extend his power.

The United States ceased all forms of non-humanitarian aid and military engagement with Madagascar in response to the 2009 coup. Due to the ongoing political situation, none of our previous military engagement or aid programs have yet been restarted.

## Malawi

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

A professional and apolitical military is essential to continuing stability in Malawi, one of the world's poorest countries. Malawi held its first free and fair national multi-party elections in May 1994 and its first-ever local multi-party election in November 2000. Presidential and parliamentary elections took place in May 2009 within a relatively free and fair environment. The country faces increasing and significant external threats from both the rise of terrorism in East Africa and from transnational crime. Malawi has steadily improved relations with its neighbors since its democratic transition and has sought to play a stabilizing role in the region and the continent.

Malawi takes seriously its cooperative military relationship with the United States and participates in the International Military Education and Training (IMET) program and the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI). Its military is small and under-funded, yet has maintained an apolitical and highly professional character. The Malawi Defense Force (MDF) has been an exemplary participant in a very active slate of programs. The MDF joins the equally resource-strapped Malawi Police Service in select operations to fight crime and continues to participate in Peacekeeping Operations (PKO) and Humanitarian Assistance (HA) missions.

In addition to traditional professional military skills training, IMET and other security assistance programs are allowing the Malawi Army to bring significant resources to bear on key issues, including HIV/AIDS, structural reform, civilian-military relations, and human rights.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Malawi by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

Security assistance programs and military exercises provide excellent opportunities and resources in the effort to assist the Government of Malawi in the battle against HIV/AIDS. In-country training typically includes sessions on the disease. In addition, the USG's security assistance effort continues to be a partner in the U.S. Mission's overall GHI/PEPFAR effort.

## Mali

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	28	25	19	\$707,466	0	0	0	\$0.00

Misc								
DOD/DOS Non-SA	2	2	1	\$5,000	0	0	0	\$0.00
Non-SA, UC, JCET	722	722	7	\$1,286,085	200	200	4	\$2,275,000
Regional Centers	18	18	9	\$215,137	0	0	0	\$0.00
<b>Totals:</b>	<b>846</b>	<b>834</b>	<b>53</b>	<b>\$2,727,162</b>	<b>200</b>	<b>200</b>	<b>4</b>	<b>\$2,275,000</b>

Over the past decade, the Malian Armed Forces have made strides toward becoming a professional organization, which supports human rights, economic development, and conflict resolution. U.S. security assistance programs in Mali serve to institutionalize these changes, providing training in civil-military affairs, coordinating ongoing peacekeeping training, and conducting seminars on the role of the armed forces in a democracy.

Although Mali has made progress in military professionalism, the overall military capability is hampered by a severe lack of resources, which directly impacts military readiness and ability to deploy. The lack of resources and capacity, as well as the large under-governed northern region, left Mali vulnerable to become a safehaven for terrorist organizations operating in the Sahel region.

Mali is a central partner in the Trans-Sahara Counterterrorism Partnership (TSCTP), an interagency program to improve the Counterterrorism (CT) capabilities of nine partner countries. As part of the broader TSCTP program, the United States has provided significant Peacekeeping Operations (PKO) funds and Section 1206 funds to train and equip Malian CT units, including the *Echelons Tactiques Inter-Armees (ETIAs)* created in 2009 to respond to the evolving security threats in northern Mali. The United States has also provided training to improve Mali's military intelligence capability.

Mali has been an effective interlocutor, mediator, and staunch supporter of regional security issues within the Economic Community of West African States (ECOWAS). Mali deployed a 250-man contingent to Liberia as part of the United Nations (UN) Mission in Liberia (UNMIL).

Mali was among the first countries to participate in the African Crisis Response Initiative (ACRI), which provided training on basic capabilities in responding to crises. Mali is also a partner in the ACRI successor program, the Africa Contingency Operations and Training Assistance (ACOTA) program a component of the larger Global Peace Operations Initiative (GPOI), a five-year program to increase the capacity of countries to participate in peacekeeping operations. Malian leaders remain committed to and seek a greater role for Mali as a force for regional stability and peace.

FY 2007 was the first year Mali was eligible for International Military Education and Training (IMET) assistance as a result of an amendment to the American Servicemembers' Protection Act of 2002 removing IMET as a form of prohibited military assistance. IMET funds provide training to develop the military into a non-political professional military force respectful of human rights.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Mali by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports

**Volume I Section III-I - Africa**

additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States. Mali has participated in all available ACSS programs and has an active chapter of ACSS graduates.

## Mauritania

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Non-SA, UC, JCET	0	0	0	\$0.00	0	0	4	\$1,275,000
<b>Totals:</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>\$1,275,000</b>

Since 1999, Mauritania has been a recipient of U.S. military and security related support. While support to the Mauritanian military was cut off following coups in 2005 and 2008, Mauritania's return to constitutional order in 2009 has allowed military capacity building assistance to resume. Mauritania has put this assistance to good use, directly challenging. Mauritania has been an active participant in the Trans-Sahara Counterterrorism Partnership (TSCTP), which aims to build host nation counterterrorism capability and foster regional CT cooperation. Under TSCTP, Mauritania received assistance under International Military Education and Training (IMET) and Regional Defense Combating Terrorism Fellowship Program (CTFP) funding to professionalize Mauritanian military cadre, enhance Mauritanian CT doctrine, and strengthen ties to their U.S. military counterparts. Mauritania also stands to benefit assist from Peacekeeping Operations (PKO) and Section 1206 accounts, which will further enhance the Mauritanian military's capacity to fight al-Qaida in the Islamic Magrheb (AQIM), which responsible for the death of an American citizen and other terrorist operations directed against Westerners in Mauritania. Senior Mauritanian civilians and military leaders continue to benefit from the efforts of the George C. Marshall European Center for Security Studies and the Africa Center for Strategic Studies (ACSS). ACSS offers a practical program in civil-military relations, national security strategy, and defense economics. Additionally, ACSS helps build and maintain long-term, continuing interaction amongst participants by offering exchanges, research opportunities, and seminars in the United States, Africa, and Europe. Mauritians participated in different regional center seminars in FY 2009.

## Mauritius

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	7	6	6	\$97,896	7	32	7	\$228,980

Non-SA, UC, JCET	1	1	1	\$0.00	0	0	0	\$0.00
Regional Centers	12	12	7	\$168,372	2	2	2	\$28,929
Service Academies	1	1	1	\$0.00	0	0	0	\$0.00
<b>Totals:</b>	<b>137</b>	<b>135</b>	<b>23</b>	<b>\$426,459</b>	<b>14</b>	<b>74</b>	<b>14</b>	<b>\$407,909</b>

Located 600 miles east of Madagascar in the Indian Ocean, the island nation of Mauritius enjoys one of the strongest economies and highest per capita incomes in Sub-Saharan Africa. The economy is based on export-oriented manufacturing (mainly textiles and sugar), tourism, Information and Communication Technologies (ICT), financial services, and marine industries. While Mauritius has no military, approximately 13,135 active security personnel under the command of the Police Commissioner are divided into various units including the National Police, a VIP Protection Unit, a Police Helicopter Squadron, a paramilitary Special Mobile Force (SMF), and a National Coast Guard (NCG). Officers on loan from India head up the Coast Guard and the Police Helicopter Squadron.

U.S. military training assistance has focused a great deal on regional, coastal, and maritime security, enabling Mauritius to promote professionalism, play a greater role in regional stability, enforce maritime law, protect territorial waters, and build capacity for anti-terrorism efforts. These activities contribute to the creation of a stable, peaceful, and equitable international regional order as well as to other U.S. foreign policy goals in this area, such as increasing capability and support for U.S. overseas contingency operations.

The training provided through International Military Education and Training (IMET) funds, though limited, has provided the National Coast Guard (NCG) with basic maritime domain awareness, enhanced control of maritime spaces, and cooperation with regional neighbors. On the CT front, Mauritian forces have been trained to detect and defeat terrorist activity, collaborate with the U.S. and neighbors, and increase their crisis response capabilities. Consistent peacekeeping training has enhanced the capacity of a professionally-trained force and is creating officers capable of individual or small unit deployment in support of African Union Peacekeeping Operations.

In 2010 CTFP funding was used for a MTT to conduct a training program focused on the whole-of-government approach to CT. This program was very successful in addressing the needs of the newly established Mauritian Counter-Terrorism Unit (CTU), specifically in creating synergy and collaboration among the various CTU stakeholders. Sharing information with their neighbors on intelligence issues and the ability to collaborate with the U.S., which are crucial to the U.S. fight against terrorism, were also key take-aways of the training.

IMET funded a U.S. Coast Guard MTT which provided training in Coastal Search and Rescue Operations to the NCG. This type of technical expertise is highly valued by an island nation like Mauritius. Given the increasing threat posed by Somali pirates, these acquired skills also contribute to the maritime forces' capability to tackle terrorism and piracy in their territorial waters and in the international waters of the region.

Ongoing peacekeeping training has enabled the participation of Mauritius in international peacekeeping efforts. Currently Mauritius is preparing to send 30 Mauritian peacekeepers on mission in Africa.

## Mozambique

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	4	4	4	\$45,025	0	0	0	\$50,000

Misc								
DOD/DOS Non-SA	1	1	1	\$2,500	0	0	0	\$0.00
Regional Centers	9	9	6	\$90,177	4	4	2	\$0.00
<b>Totals:</b>	<b>174</b>	<b>170</b>	<b>26</b>	<b>\$497,914</b>	<b>4</b>	<b>4</b>	<b>2</b>	<b>\$430,000</b>

Since the signing of the 1992 Rome Peace Agreement that ended sixteen years of civil war, Mozambique has made significant progress in promoting economic reform and advancing democracy. In October 2009, Mozambique held its fourth multi-party presidential election since independence in 1975. The elections were criticized by local and international observers as lacking a “level playing field” and faulted for inadequate transparency, integrity, impartiality and independence. Freedom House has since removed Mozambique from its list of electoral democracies. Nonetheless, the result was the peaceful re-election of President Guebuza to another 5-year term. Since 1992, U.S. policy has been to encourage democratic consolidation and socio-economic reform. Success in achieving these goals is essential for lasting peace and prosperity for the Mozambican people and for regional stability. While there is still work to be done, Mozambique has developed into one of Africa’s fastest growing economies.

Mozambique has expressed an interest in participating in observer missions and in other peacekeeping missions. In July 2006, Mozambique contributed a 12-man team as part of Southern African Development Community’s (SADC) contingent monitoring the presidential elections in the Democratic Republic of the Congo. Under the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), in Mozambique, the U.S. government has provided Peacekeeping Operations (PKO) support training to increase its peacekeeping capabilities, most notably Exercise Shared Accord in August 2010, a joint, live-fire, humanitarian exercise involving more than 1,500 U.S. and Mozambican soldiers, sailors, Marines and airmen.

HIV/AIDS poses a threat to this progress as trained and ready personnel become unavailable for service, while also causing liabilities to the health care system. Through the President’s Emergency Plan For AIDS Relief (PEPFAR), the capabilities and infrastructure of the Mozambican Military Health Service have been improved, and International Military Educational and Training (IMET) funds have been used to provide HIV-related training in the United States in previous years.

The consolidation of democracy in the post-war period requires that the military play a constructive role by becoming an apolitical and professional force for improvement that respects the rule of law and human rights. IMET training has primarily focused on maritime security training, to enable Mozambique to patrol its waters and intercept illegal fishing vessels. The Mozambican navy requires continued assistance and training before it can begin to effectively control its largely unpatrolled 2,500-mile coastline.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Mozambique by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States. Mozambique has participated in all available ACSS programs and has an active chapter of ACSS graduates.

## Namibia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	4	4	4	\$81,936	0	0	0	\$0.00
IMET-X	5	2	5	\$107,856	0	0	0	\$0.00
Regional Centers	12	12	4	\$177,364	0	0	0	\$0.00
<b>Totals:</b>	<b>21</b>	<b>18</b>	<b>13</b>	<b>\$367,156</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Independent since 1990, Namibia has made significant strides in developing a stable, democratic political system and free-market economy; however, challenges remain. Assisting Namibia in its efforts to address the HIV/AIDS crisis and to overcome the legacy of apartheid provides a basis for enhanced regional stability, economic development, trade, and investment opportunities.

Namibia continues to be a provider of peacekeeping troops and, as recently as April 2010, was committed to sending a motorized infantry battalion of 800 personnel to the U.N. mission to Chad and Central African Republic. While Namibia became a partner in the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), the program has been on suspension since 2007 when the Chief of Defense Force announced that the military was conducting an internal review and change from a threat based to a capability based force.

In FY 2010, the U.S. Department of Defense (DoD) continued to lead the fight against HIV/AIDS in the Namibian military by managing a program that provided annual prevention training and treatment awareness to over 16,000 Namibian soldiers, sailors, airmen, and marines at 23 different bases and camps throughout the country. DoD initiated this program in 2001 and, to date, it remains the Namibian Defense Force's (NDF) only foreign assistance for HIV/AIDS prevention.

In the past, Namibian officials have attended the Africa Center for Strategic Studies (ACSS), which supports Namibia's young democracy by offering senior African civilian and military leaders a program in national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

For the foreseeable future the Namibian Defense Force will be shaped by the recently released Defense Policy which states that the country intends to develop a small, highly mobile, well-equipped force, which excels in service through discipline and vigorous training. The three main objectives being the development of human resources in the defense force, contributing towards Vision 2030 and improving infrastructure.

## Niger

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	9	9	3	\$289,926	0	0	0	\$0.00
IMET-1	58	55	6	\$93,765	0	0	0	\$0.00
Non-SA, UC, JCET	0	0	0	\$0.00	0	0	1	\$0.00
<b>Totals:</b>	<b>67</b>	<b>64</b>	<b>9</b>	<b>\$383,691</b>	<b>0</b>	<b>0</b>	<b>1</b>	<b>\$0.00</b>

According to the United Nations, Niger is one of the least developed countries in the world and possesses limited resources. It has a democratic government and a primarily Muslim population, which maintains positive relations with the United States and supports U.S. security interests in the region. Niger also has long porous borders with vast tracts of uninhabited desert and savannah. It is geographically situated to the south of Algeria and Libya, north of Nigeria, and lies between Chad and Mali, making it a high-transit area for traffickers and terrorists. Niger is one of the nine countries in the Trans-Sahara Counter Terrorism Partnership (TSCTP) program.

Since FY 2002, military-to-military programs have contributed to continued engagement. Niger was able to re-start its participation in the International Military Education and Training (IMET) program in 2007 after IMET was de-linked from the American Servicemembers' Protection Act of 2002 (ASPA). Such programs provide a vehicle to enhance the armed forces' positive role within civil society and assist the country in its continued democratic transition.

In the past, the U.S.-funded training provided to Niger included training provided by the Regional Defense Combating Terrorism Fellowship Program (CTFP), IMET, Africa Contingency Operations Training and Assistance (ACOTA) - a component of the larger Global Peace Operations Initiative (GPOI) - and TSCTP programs. Under CTFP, Nigerien company grade officers attended various combating terrorism training in the United States, including legal aspects of and civil-military response to terrorism. Additionally, Niger was also able to send senior officers to regional center seminars in the United States and others to civil-military relations training seminars in Ghana and Senegal. Under ACOTA, two battalions of Nigerien forces received training in conduct of Peacekeeping Operations (PKO) in advance of their deployment to United Nations (UN) Peacekeeping missions. Under TSCTP, military personnel from Niger attended regional leadership conferences, information sharing, and medical training.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Niger by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

On July 15, 2008, the Department of State restricted current and all prior year Foreign Military Financing (FMF), ACOTA, TSCTP activities, and the IMET program, with the exception of the Expanded IMET (E-IMET) program to Niger. On August 19, 2009, State suspended all military assistance to Niger until further notice and no activities are exempt from this suspension. This policy restriction is due to human rights concerns and Nigerien President Tandja's undemocratic seizure of power, and was not rescinded when a military junta ousted the Tandja government in February 2010. This aid suspension remains in place, though is under review.

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

U.S. engagement with Nigeria on political, economic, and security issues is vital to the stability and prosperity of West Africa and the entire continent. Nigeria is Africa's most populous nation, a key source of U.S. oil imports, and a crucial security partner. Two U.S.-trained battalions of the Nigerian Army played a key role in ending the civil war in Liberia and created conditions for a peace settlement in Sierra Leone. Nigeria has the largest contingent in the United Nations (UN)/African Union (AU) Mission in Darfur (UNAMID) in Sudan. Under its historic border agreement with Cameroon, Nigeria promptly and peacefully withdrew its 3,500 troops from the once-disputed Bakassi Peninsula in 2006.

Nigeria is the anchor of U.S.-supported Peacekeeping Operations (PKO) in Africa, but it lost almost a decade of U.S. military influence through training and cooperation because of sanctions over political and human rights issues. Consequently, we now are ramping up our programs to help the Nigerian military focus on military tasks and the creation of a professional, apolitical leadership. We also must continue to support the participation of the armed forces in international and regional peacekeeping and as a strong and willing ally in U.S. overseas contingency operations.

The International Military Education and Training (IMET) program in Nigeria will focus on structured logistics and maintenance training systems and professional military training for mid- to senior-level personnel. This training will be a key component of our effort to professionalize the Nigerian military. Similar training in FY 2000 and 2001 successfully helped shape the attitudes of the Nigerian officer corps after years of military rule and instilled a sense of their role in a democratic, civilian government. This is a key component of our strategy to consolidate democratic gains, especially in light of the military leadership's principled refusal to get involved in the April 2007 elections.

U.S.-Nigerian security cooperation remains strong in several areas. DoD Regional Defense Combating Terrorism Fellowship Program (CTFP) funds have been used to train Nigerian officers and officials in regional Counterterrorism (CT) issues and intelligence operations. Because of continued U.S. support through the Foreign Military Financing (FMF)/Foreign Military Sales (FMS) program the Nigerian Air Force is in the process of refurbishing their C-130 fleet in order to ensure the Nigerian military can self-deploy its own peacekeepers to Darfur. The U.S. is currently providing Nigeria assistance with the establishment of a CT unit as well as develop an active humanitarian assistance program.

Several new programs have begun, one of which links the Nigerian military with the California National Guard as part of the State Partnership Program. U.S. support of a tactical simulation center has enabled the Nigerian military to improve command and control, tactical planning, execution of tactical and peacekeeping missions, and enhanced coordination with other government agencies. In view of Nigeria's major peacekeeping commitments, the Nigerian military is training under the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI).

## Rwanda

<b>Totals:</b>	<b>983</b>	<b>965</b>	<b>54</b>	<b>\$2,613,850</b>	<b>2882</b>	<b>2882</b>	<b>11</b>	<b>\$250,000</b>

U.S. programs in Rwanda aim at preventing the recurrence of genocide (which claimed at least 800,000 lives in 1994) by helping to create the political, economic, and social conditions that will lead to a prosperous civil society that embraces democratic governance and respect for human rights. To achieve these goals, the United States has implemented a variety of political, humanitarian, military, and economic assistance programs that support U.S. interests in aiding Rwanda's transition to sustainable development while securing regional peace and stability in Africa's Great Lakes Region. Today U.S. service academy participation helps provide a foundation of respect for human rights and rule of law for future military leaders.

Following a two-year period of suspension, International Military Education and Training (IMET) was reinstated for Rwanda on March 5, 2003, but was limited to Expanded IMET (E-IMET). Currently, Rwanda is no longer limited to E-IMET. Rwanda qualified to become a full partner in the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), in June 2006. Currently, ACOTA trains-up four battalions per year for Darfur and the UN Mission in Sudan (Khartoum). This amounts to approximately 3,500 troops. A total of 26 battalions have been trained by ACOTA to date. The Rwandan Defense Forces have fully embraced and taken ownership of much of the ACOTA program. Of note, the ACOTA mission to prepare peacekeepers for UN missions has garnered the interest of the Dutch Government over the past couple of years. The Dutch have contributed both funds and Dutch officers to support ACOTA training and enable Rwandan troops to deploy to United Nations (UN)/African Union (AU) Mission in Darfur (UNAMID). The UNAMID mission is currently commanded by a Rwandan Officer, LTG Patrick Nyamvumba. LTG Nyamvumba's outstanding performance has earned him a second-term extension to his contract. Approximately 3,500 Rwandan peacekeepers serve in Darfur.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Rwanda by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States. A local chapter, the Rwandan Center for Strategic Studies (RCSS), has hosted several successful seminars in Kigali on regional security topics.

## Sao Tome and Principe

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Sao Tome and Principe (STP) is a maturing multi-party democracy that observes political and civil liberties. Its vibrant democracy, built on fragile coalitions, has resulted in several changes in key cabinet and legislative positions. In August, 2010, the President's party lost all but one of the 55 seats in the legislature, resulting in the naming of a new Prime Minister. The presidential elections are slated for mid-2011. STP is one of the poorest and most heavily indebted nations in Africa, and its economic problems could undermine its long-term stability and democratic institutions. At the same time, the country's social indicators are strong for such a poor country. The possibility that there could be large oil reserves in STP's coastal waters offers hope for considerable new revenues. It could also make STP a major player in the economically and strategically important Gulf of Guinea. So far, however, commercially viable oil reserves have not been identified.

International Military Education and Training (IMET) funds facilitate the building of effective relations between the Sao Tomean and U.S. militaries. It exposes the trainee-participants to U.S. professional military organizations and procedures and the manner in which the U.S. military functions under civilian control. IMET in FY 2010 focused on improving military professionalism and maritime security while continuing to develop the English language capability of STP military personnel, thereby enhancing STP's ability to participate in other IMET courses. In addition, participation in the Africa Center for Strategic Studies (ACSS) supports democratic aims in STP by reinforcing the relationship between the military and its civilian leaders.

## Senegal

Senegal is our most important Francophone partner in sub-Saharan Africa, a supporter of key U.S. foreign policy initiatives, and a consistent voice for moderation and compromise in multilateral and Islamic organizations. Senegal was the first sub-Saharan country to offer troops to Operation Desert Shield. Senegal plays a key role in ensuring a vital U.S. interest: regional stability. Senegal is a participant in the Africa Contingency Operations and Training Assistance (ACOTA) a component of the larger Global Peace Operations Initiative (GPOI) and participated in Operation Focus Relief (OFR). It hosted the first Africa Center for Strategic Studies (ACSS) seminar in November 1999, the first brigade-level exercise under Africa Crisis Response Initiative (ACRI) (ACOTA predecessor) in October 2000, and has been a leader in the ACOTA program ever since. The Senegalese military has distinguished itself in Peacekeeping Operations (PKO) in Sudan, Cote d'Ivoire, the Democratic Republic of the Congo, Liberia, Sierra Leone, Lebanon, Rwanda, Bosnia, and the Sinai. It currently has four battalions, about 25% of their army, deployed supporting PKOs and recently committed to increase their participation in peace operations by 30%, for a total of 3,600 troops serving worldwide.

International Military Education and Training (IMET) activities underpin all U.S.-Senegalese military cooperation. The continuing development of a cadre of professional officers through the IMET program is in the interest of the United States and will reinforce Senegal as a full partner with its neighbors in peacekeeping operations in the sub-region. IMET training and Africa Center for Strategic Studies (ACSS) programs have complemented training under ACOTA to strengthen the level of professionalism within the Senegalese officer and Non-Commissioned Officer (NCO) corps and support English language capabilities. Reinforcing the traditions of a professional civilian-controlled military that emphasizes respect for democratic principles, human rights, and the rule of law will set an example for other nations in the sub-region. By working with Senegal to further democracy and economic liberalization, the United States helps strengthen the democratic foundation of a country whose growth and successes are extremely important.

The ACSS supports democratic governance in Senegal by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

**Volume I Section III-I - Africa**

Senegal is a strong supporter of the United States in overseas contingency operations and is one of the nine countries in the Trans Sahara Counterterrorism Partnership (TSCTP) program.

## Seychelles

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	4	4	3	\$14,196	4	17	4	63,001
GPOI	3	3	2	\$102,633	0	0	0	\$0.00
IMET-1	3	3	3	\$45,801	4	3	4	118,080
Regional Centers	6	6	3	\$69,115	0	0	0	\$0.00
<b>Totals:</b>	<b>16</b>	<b>16</b>	<b>11</b>	<b>\$231,745</b>	<b>8</b>	<b>20</b>	<b>8</b>	<b>\$181,081</b>

Seychelles, an archipelago located in the Indian Ocean, has a population of approximately 84,000. Tourism and seafood processing are the primary sources of foreign income. Despite considerable economic growth since independence in 1976, many macroeconomic structural problems plague Seychelles, and shortages of basic commodities and high prices are common.

The purpose of U.S. sponsored military training in Seychelles is to professionalize the Seychelles Peoples Defense Forces (SPDF) and improve the skills necessary to enforce maritime law, especially given the current piracy situation in the Indian Ocean, and protect the marine environment and local fisheries. An important by-product of U.S. military engagement with Seychelles is access to its airspace and seaports.

The International Military Education and Training (IMET) program is administered by Embassy Port Louis and focuses primarily on building the capacity of the Seychelles Coast Guard in maritime security, thwarting piracy, enforcing maritime law, search and rescue missions, protection of the marine environment and disaster management and control. The IMET budget for Seychelles is limited, but has been focused effectively to develop maturity, improve professionalism, and provide essential skills. Professional Military Education (PME), junior officer development courses (i.e. International Maritime Officer) and skills-based courses are providing a limited but comprehensive foundation for building military professionalism and competence. These courses also serve to increase Seychelles' CT skills and capabilities.

Providing U.S. influence through PME and junior officer development courses helps to promote continued cooperation and access to Seychelles. However, the limited Seychelles IMET budget does not support conducting PME courses, MTTs, junior officer development and skills training simultaneously. Given the multiple U.S. flagged ships which visit Seychelles each year and the current piracy issues plaguing the Indian Ocean, increasing the IMET budget could bring significant benefits to the region, to Seychelles, and to U.S. mission priorities such as counter-terrorism.

## Sierra Leone

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Our priorities in Sierra Leone are to consolidate peace by enhancing political and economic governance, reducing corruption, and building national capacity for conflict prevention (including training a professional, civilian-led military). The security situation in Sierra Leone continues to improve, as demonstrated by the successful election of former opposition leader, Ernest Bai Koroma to the presidency. With the departure of the United Nations (UN) Mission in Sierra Leone (UNAMSIL) in December 2005, the UN Integrated Office (UNIPSIL) assumed a peace-building mandate.

Over 45,000 combatants were disarmed in a UNAMSIL-supervised disarmament program that was declared complete in January 2002. Parliamentary and presidential elections were held successfully in August 2007; elections were last held in May 2002 without any violence. The Special Court for Sierra Leone continues to try those most responsible for crimes during the 11-year long civil war under international humanitarian law. The Government of Sierra Leone's (GoSL) efforts to consolidate constitutional order and state authority by improving its diamond industry and by decentralizing administrative machinery have been commendable, though greater reforms are needed. Many of the root causes for of Sierra Leone's civil war are yet to be addressed, including poverty, youth unemployment, illiteracy, and the lack of basic infrastructure. The GoSL also needs to establish a culture of respect for human rights by enacting recommendations of the Truth and Reconciliation Commission. Sierra Leone was one of the first two countries selected to work with the UN Peace building Commission to address the challenges faced by countries following the "post-conflict" state of rebuilding. The Republic of Sierra Leone Armed Forces (RSLAF) has benefited from British training and has deployed to the borders with Liberia and with Guinea, where border demarcation is ongoing.

Seven years following the end of the Civil War, Sierra Leone continues to face three major challenges: down-sizing and reforming the military and bringing it under civilian control, promoting economic development and strengthening democratic institutions. The RSLAF strives to be a professional military but is hampered by lack of resources, lack of education, as a result of the war, and high levels of illiteracy, which has resulted in a poorly trained and ill-equipped force. U.S. military training assistance has been, and continues to be, exceptionally beneficial to improving the RSLAF's capabilities and professionalism. The International Military Education and Training (IMET) program is the cornerstone of U.S. assistance to Sierra Leone.

IMET funded training has focused on strengthening civil-military relations, understanding; defense resource management, combating corruption through transparency and good governance by hosting a number of in-country Mobile Education Teams (MET) and Mobile Training Teams (MTT). Future IMET will focus on capacity building for the Maritime Wing in order to strengthen counter-narcotics, port security, and environmental support elements key to protecting Sierra Leone's fragile coastal environment.

The RSLAF has an HIV/AIDS rate of 3.2% and Sierra Leone an HIV/AIDS rate of 1.5%. The United States Department of Defense HIV/AIDS Prevention Program (DHAPP), with its funding to the RSLAF has made the military a leader in the

AIDS fight in Sierra Leone providing leadership in sensitization and education campaigns throughout the country which continues to be absolutely essential to reducing HIV/AIDS rates.

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

After South Africa's first democratic elections in May 1994, the new government undertook a sweeping transformation of its military. The transformation has included incorporating ten former homeland militaries and anti-apartheid militant groups with the regular armed forces into what is now known as the South African National Defense Force (SANDF). The SANDF leadership struggles with issues of racial representation within the military; differences in levels of training, education, and promotion criteria among the various groups; and limited resources as the new government focuses on providing services to the historically disadvantaged majority.

The South African government is also struggling to define an appropriate mission for the SANDF and to structure the force to accomplish that mission. In recent years, SANDF forces have been deployed for border control, police support, and peace support operations in Burundi, the Democratic Republic of the Congo, Sudan, Lesotho, and elsewhere in Africa. A controversial multi-billion dollar defense acquisition program is adding corvettes to the naval fleet and replacing old submarines, jet fighters, trainers, and helicopters in the SANDF arsenal. At the same time, downsizing efforts have brought the SANDF forces from a peak of 100,000 personnel to around 70,000 active personnel.

U.S. interests are served by assisting South Africa to transform its military into a professional, apolitical force capable and willing to undertake a regional leadership role commensurate with the country's size, population, and level of development. A successful transformation will serve as a model for other African countries with which the United States can cooperate on conflict resolution and peacekeeping. South Africa and the United States enjoy an active military relationship, meeting bi-annually to exchange views at the Defense Committee.

In FY 2007, IMET training was resumed after being suspended for several years in accordance with the American Servicemembers' Protection Act of 2002 (ASPA) due to the government of South Africa's refusal to sign an Article 98 waiver. The FY 2009 IMET program for South Africa focused on mid and senior level officer Professional Military Education (PME). PME graduates will contribute capacity building within the South African Military and will enhance the professionalism of the overall force. PME provides senior leaders with crucial managerial skills that will strengthen decision making abilities. To further enhance the FY 2009 IMET program, the United States Naval Academy extended an offer to host a South African Naval cadet from June 2009 to June 2013 and the offer to attend was accepted by the South African Navy. Many U.S. training offers for FY 2009 and FY 2010 were aimed at improving the South African's ability to respond to a man-made or natural disaster during the World Cup.

### **Volume I Section III-I - Africa**

South Africa is a partner in the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), which is helping increase its peacekeeping capabilities. The Africa Center for Strategic Studies (ACSS) supports democratic governance in South Africa by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. ACSS participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in Africa, Europe, and the United States.

In addition, United States funding has been helping the SANDF combat its HIV/AIDS problem by training chaplains and laypersons to provide in-house awareness and prevention education to its new recruits and counseling services for HIV positive members of the SANDF. South Africa's current prevalence rate is one of the highest in the world. Although the SANDF has not been specifically surveyed, UNAIDS estimates that in the military HIV can be 2 to 5 percent higher than other populations.

## Sudan

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	1	1	1	\$9,870	0	0	0	\$0.00
<b>Totals:</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$9,870</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Promoting peace, security, and development in Sudan has consistently been one of the United States' top priorities in sub-Saharan Africa. The United States helped to broker the 2005 Comprehensive Peace Agreement (CPA) between the Government of Sudan and the Sudan People's Liberation Movement / Army (SPLM/A), based in the country's south. The CPA ended Africa's longest civil war, established an autonomous Government of Southern Sudan (GoSS), and gave southern Sudanese the opportunity to vote in a self-determination referendum, scheduled for January 9, 2011. Provisions of the CPA allow for international assistance to the SPLA to assist in the necessary transformation from a guerrilla force into a professional military body. The United States began its assistance to the SPLA in May 2006 increased its engagement in subsequent years. U.S. assistance focuses on strengthening institutions and building capacity through training and mentoring programs across all levels of the SPLA. U.S. assistance was initially targeted to facilitate SPLA's participation in the CPA-mandated Joint Integrated Units (JIUs), prepare the SPLA for integration with the north's Sudan Armed Forces (SAF) in the event of a 2011 referendum vote for unity, as well as prepare the SPLA to become the national army of a newly independent south in the event of a vote for secession. As the referendum approaches, the United States has provided assistance focused on referendum security.

U.S. defense cooperation with the SPLA promotes a military that is professionally trained and led, ethnically balanced, aware of moral imperatives, and able to contribute positively to national and South-South reconciliation. IMET programs focus on English language training and mid-level management courses.

## Sudan, Government of Southern

Program	FY 2009				FY 2010

<b>Totals:</b>	<b>65</b>	<b>42</b>	<b>54</b>	<b>\$939,669</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Sudan has been the United States' highest priority in sub-Saharan Africa and it will remain so for the near future. Africa's longest civil war was halted by the 2005 Comprehensive Peace Agreement (CPA) that brought an end to hostilities between the conflict's major actors, the National Congress Party (NCP) of the north, and the Sudan People's Liberation Movement / Army (SPLM/A) in the south. The CPA contains provisions for a six-year interim period that includes the implementation of a national census and elections, and concludes with a referendum in which the south can vote for self-determination and secede from the north. Additional provisions of the CPA allow for international assistance to the SPLA to transform it from a guerrilla force into a professional military body. The United States began its assistance to the SPLA in May 2006, which focuses on institutional and strategic levels, and is intended to strengthen SPLA military capacity. This increased capacity is intended to facilitate the SPLA's participation in the CPA-mandated Joint Integrated Units (JIUs), and prepare the SPLA for integration with the north's Sudan Armed Forces (SAF) in the event of a 2011 referendum vote for unity, as well as prepare the SPLA to become the national army of a newly independent south in the event of a vote for secession.

U.S. defense cooperation with the SPLA promotes a military that is professionally trained and led, ethnically balanced, aware of moral imperatives, and able to contribute positively to national and South-South reconciliation. IMET programs focus on English language training and mid-level management courses.

## Swaziland

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	6	6	3	\$70,068	0	0	0	\$0.00

<b>Totals:</b>	<b>21</b>	<b>19</b>	<b>14</b>	<b>\$316,568</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

U.S. government funding for military training in Swaziland is designed to promote democracy, human rights, and professional military development. Over the past several years, there has been increasing pressure both internationally and domestically for Swaziland to move from its current system of absolute monarchy toward democracy. In a first step towards this end, King Mswati III ratified Swaziland's first constitution in over 30 years on February 8, 2006. The International Military Education and Training (IMET) program, by promoting the professionalization of the Swazi defense force and the role of an apolitical military that respects human rights, will be of vital importance for the rule of law to take hold in this country.

In addition, U.S. funding has been helping the Umtfo Swaziland Defense Force combat its growing HIV/AIDS problem by training lab technicians to provide in-house services for HIV positive members of the SDF. The overall accepted (adult) prevalence rate is at 26%; while 40% of pregnant women attending pre-natal clinics report positive. Although the Umtfo Swaziland Defense Force (USDF) has not been specifically surveyed, UNAIDS estimates that in the military HIV can be 2 to 5 percent higher than other populations.

The Africa Center for Strategic Studies (ACSS) supports democratic governance in Swaziland by offering senior civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. Swaziland has benefited from training designed to assist the next generation of African military leaders to address successfully complex domestic and regional security challenges, as well as training for the legal aspects of conflict prevention and combating terrorism.

## Tanzania

<b>Totals:</b>	<b>1374</b>	<b>1370</b>	<b>48</b>	<b>\$1,895,011</b>	<b>778</b>	<b>778</b>	<b>7</b>	<b>\$74,959</b>

Tanzania is strategically situated along the East African coast. Porous borders make Tanzania readily accessible overland and by sea to drug smugglers, human traffickers, and terrorists. The 1998 U.S. Embassy bombing is evidence of Tanzania's vulnerability to terrorist attacks. Tanzania is affected by Somali piracy, recently including attacks within its territorial waters. Tanzania has served as the main reception point for refugees fleeing instability in neighboring countries, most notably Burundi and the Democratic Republic of the Congo. The numbers of refugees have decreased as the region slowly stabilizes, but Tanzania still hosts approximately 100,000 refugees. However, in search of a durable solution to the refugee crisis, Tanzania granted citizenship to 162,000 Burundi refugees that have been in the country since 1972. Also, since early 2007, illegal migrants from Somalia have been trying to enter Tanzania in greater numbers not to claim refugee status, but in order to transit on to Malawi and South Africa. Tanzania also serves an important role in regional politics. For instance, President Kikwete was instrumental in negotiating a peace settlement in Burundi after years of ethnic violence. Arusha is the site of the International Criminal Tribunal for Rwanda and the secretariat of the East African Community (EAC), both key institutions in addressing regional issues, past and present. Tanzania is a member of the EAC, together with Kenya, Uganda, Rwanda, and Burundi. In addition to integrating the markets and economic policies of these five countries, the EAC envisions facilitating security cooperation among the member nations through a military liaison office. Tanzania is also a member of the Southern African Development Community (SADC).

Tanzania is a stable country and is favorably disposed to U.S.-led initiatives and training programs, such as within the law enforcement and health sectors. Tanzania has been a cooperative partner in U.S. overseas contingency operations. As a key partner in efforts to fight HIV/AIDS and combat malaria, Tanzania is a focus country under the President's Emergency Plan for AIDS Relief (PEPFAR) and receives considerable support through the President's Malaria Initiative. Tanzania is the recipient of the largest Millennium Challenge Compact to date, \$698 million for major improvements in Tanzania's transport, energy, and water infrastructure.

As International Military Education and Training (IMET) is no longer restricted by the American Service Members' Protection Act of 2002 (ASPA), Tanzania has enjoyed a growth in IMET funding during recent years, resulting in enrollment in more military courses and a closer bilateral military relationship. The IMET program serves as a foundation for Tanzania-U.S. relations as it helps professionalize the armed forces, provides critical training on core skills, and also creates valuable links between our militaries. Many senior Tanzanian military leaders have attended training in the U.S. through either IMET or the Combating Terrorism Fellowship Program (CTFP). Tanzanian officers have attended officer basic and career, intelligence, and staff college courses. IMET was also used for the first time to send a non-commissioned officer to a seminar in the U.S.

### **Volume I Section III-I - Africa**

A member of the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), the U.S. trained a Military Police Company for subsequent deployment to the UN Interim Force in Lebanon (UNIFIL) and trained the replacement company in FY 2009. In January 2010, Tanzania deployed a battalion to Darfur as part of the UN peacekeeping mission. The ACOTA provided training in basic soldier skills, logistics planning, and leadership procedures. Tanzanian participation in Africa Center for Strategic Studies (ACSS) and other regional centers helps build and maintain long-term, continuing interaction with American and other foreign participants, furthering support for democratic governance in Tanzania and other African countries.

## Togo

<b>Totals:</b>	<b>552</b>	<b>551</b>	<b>13</b>	<b>\$632,872</b>	<b>30</b>	<b>30</b>	<b>1</b>	<b>\$0.00</b>

Thirty-eight years after seizing power in a military coup, former President Gnassingbe Eyadema unexpectedly died in February 2005. During his reign, the rule of law was not respected, human rights abuses occurred regularly, and the army was used as a tool of repression. After Eyadema's death, the military installed his son, Faure Gnassingbe, as president in contravention of the constitution. After sustained international pressure, Faure stepped down and Togo held presidential elections. In a hotly contested election marred by serious irregularities, Faure was declared the winner.

The Government of Togo, under Eyadema, had begun formal political consultations with the European Union in 2004, promising to make improvements in the areas of democracy, civil liberties, and human rights. Faure issued statements urging reconciliation between the ruling and opposition parties, but nothing materialized until the national dialogue convened in April 2006, resulting in the global political agreement of August 2006. Pursuant to the terms of the agreement, the government, the opposition, and civil society established the framework for forming a government of national unity in Togo. The resulting parliament, along with President Faure, is mandated with undertaking, democracy and governance reforms in a number of key areas. The legislative elections held in October 2007, in which all opposition parties participated, were declared free and fair by international and national election observers. As a result of the successful elections, many donors reinitiated assistance to Togo. In the March 2010 presidential election, President Faure was re-elected. The election was peaceful and deemed relatively free and fair by the international community, despite some major irregularities.

In spite of its political and economic problems, Togo has played a major role - disproportionate to its small size - in the sub-region to promote peace and stability. Togo's troops continue to support peacekeeping efforts in both Cote d'Ivoire and Liberia.

Because of Togo's difficult transition to democracy and because of the role the military played in the 2005 constitutional machinations and election-related violence, the United States suspended most military assistance until elections were subsequently held. As a result of the progress on the global political agreement, a five-day seminar on civil and military relations, cancelled as a result of the military's role in the election related violence in 2005, was held in Togo in late March 2007. Currently, Togo receives International Military Education and Training (IMET) funds to help professionalize its military, install an appreciation of respect for the rule of law, respect for human rights, and civilian control of the military.

## Uganda

<b>Totals:</b>	<b>2381</b>	<b>2358</b>	<b>76</b>	<b>\$3,805,068</b>	<b>3600</b>	<b>3600</b>	<b>2</b>	<b>\$0.00</b>

Uganda continues to play an important role in East Africa and the Great Lakes region. Over the past few years, President Yoweri Museveni pushed a new Somali transitional government to reinstall itself in Somalia, maintained international pressure on Burundi to see through its peace accord and elect a new government, and worked with Rwanda and the Democratic Republic of the Congo (DRC) to enact confidence-building measures and move forward to disarm and demobilize militias in eastern Congo. Uganda also cooperated closely with the Government of Southern Sudan (GoSS) to bring an end to the 22-year long conflict with the Lord's Resistance Army (LRA). In the meantime, Uganda continues to professionalize its military. Uganda has been a staunch backer of U.S. overseas contingency operations.

The Ugandan Peoples' Defense Force (UPDF) withdrew its forces from the DRC in mid-2003. Since then, however, the Ugandan government has complained that the DRC is unstable and provides a haven for remnants of anti-government rebel groups, the Allied Democratic Force (ADF), the People's Redemption Army (PRA), and since late 2005, the LRA. Uganda has stepped up its joint monitoring and coordination efforts with DRC and the United Nations Mission in Congo (MONUC). In 2005, Uganda's improved relations with the GoSS enabled the UPDF to continue to score successes against the LRA by splintering and reducing their ranks and driving the LRA's leadership out of northern Uganda and southern Sudan into DRC. In July 2006, the Ugandan government and the LRA entered into GoSS-mediated peace talks, which informally ended in February 2007. There has not been an LRA attack within Uganda since 2006, and most of the approximately 1.3 million Ugandans internally displaced by the LRA conflict have now returned to their homes. In an election with opposition party participation for the first time in 20 years President Museveni was re-elected for a third term in February 2006.

As a result of Uganda's withdrawal from the DRC, restrictions on the International Military Education Training (IMET) program were relaxed. In 2004, the U.S. government lifted the last restrictions on Ugandan participation in regular IMET. Ugandans also participated in events at the Marshall Center and the Africa Center for Strategic Studies.

The Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI), re-engaged in Uganda in a major way during 2007, with the goal of enhancing the UPDF's ability to perform as peacekeepers in the African Union Mission in Somalia (AMISOM) in Somalia.

## Zambia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$19,499	0	0	0	\$0.00

<b>Totals:</b>	<b>53</b>	<b>43</b>	<b>36</b>	<b>\$538,075</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Zambia has been a commendable example of peace and stability in southern Africa. Not only has Zambia avoided involvement in the civil conflicts of two of its neighbors, Angola and the Democratic Republic of the Congo (DRC), but it also has played a role in efforts to broker and implement a cease-fire agreement for the DRC.

Zambia must confront a host of domestic political and economic challenges. The economy contracted sharply for over two decades because of irresponsible economic management and over-reliance on one commodity: copper. Zambia returned to multi-party democracy in 1991 after nearly two decades of one-party rule, but corruption and cronyism undermined the rule of law throughout the ensuing decade. Thanks to better economic management and strong world copper prices, Zambia has enjoyed annual economic growth of about 6 percent in recent years, but this is still not sufficient to alleviate widespread poverty. Zambia held its fifth multiparty national elections in October 2008 and will hold its sixth in the latter half of 2011. The United States and other donor countries work with the public and private sectors in Zambia to support market-driven growth, develop good governance, and combat the HIV/AIDS epidemic. A more prosperous, democratic Zambia can serve as a strong model in a region of increasing economic and political importance to the United States.

The Zambia Defense Force (ZDF) strives to be a professional military but is hampered by a lack of resources, resulting in a force that is poorly trained and ill equipped. U.S. military training assistance has been, and continues to be, exceptionally beneficial to improving the ZDF's capabilities and professionalism. The International Military Education and Training (IMET) program is the cornerstone of this U.S. assistance.

IMET provides technical training in both operations and support fields. Zambian senior and mid-grade officers also participated in seminars sponsored by the Africa Center for Strategic Studies (ACSS). These seminars, whose topics vary but focus on cooperation and regional/international security, are held both in the United States and abroad.

Zambia is a lapsed partner of the Africa Contingency Operations Training and Assistance (ACOTA) program, a component of the larger Global Peace Operations Initiative (GPOI). This peacekeeping training provided in 2007 not only served to improve Zambia's peacekeeping abilities but is also expected to improve overall capabilities and professionalism of the force. It is uncertain when or if a second round of battalion-level training will be scheduled.

The ZDF has an HIV/AIDS prevalence of approximately 29 percent. The United States funds a program currently valued at over ten million dollars per year to increase HIV awareness and to improve prevention and treatment programs for active-duty ZDF personnel and their families. This program is under the joint auspices of the President's Emergency Plan for AIDS Relief (PEPFAR) and the Department of Defense HIV/AIDS Prevention Program (DHAPP).

## Zimbabwe

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	1	1	1	\$13,368	0	0	0	\$0.00
<b>Totals:</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$13,368</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Zimbabwe has been and is currently on numerous sanctions, reducing U.S. aid to a minimum:

- No funds obligated or expended except through Foreign Operations, pursuant to P.L. 111-8, Section 7015, and regular notification to Appropriate Committees
- The United States will vote no to international financial Foreign Operations international loans (except basic human needs) and no funds to assist GOZ unless Secretary of State certifies that rule of law has been restored pursuant to P.L. 111-8, Section 7070(e)
- Limitation to Countries In Default (6 Months) FAA sec 620(q) (22 U.S.C. 2370(q))
- Limitation to Countries In Default (12 Months) Foreign Ops, PL 111-8, Sec. 7012 [Brooke]
- Limited License Exemptions at Section 123.17 of International Traffic in Arms Regulations (ITAR) are allowed for Firearm Exports pursuant to 22 C.F.R. Parts 120-130 (DoS Public Notice 4068, July 17, 2002)
- No non-humanitarian, nontrade-related foreign Trafficking Victims Protection Act of 2000, assistance until the government complies with minimum standards to eliminate human trafficking or makes significant efforts to bring itself into compliance with such standards; with exceptions as may be determined by the President

Presidential Directive 2011-15, dated September 10, 2010, partially waived sanctions to allow funding for programs described in Section 110(d)(1)(A)(i) of the Trafficking Victims Protection Act of 2000, P.L. 108-186, for assistance for victims of trafficking in persons or to combat such trafficking, the promotion of health, good governance, education, agriculture and food security, poverty reduction, livelihoods, family planning, macroeconomic growth including anti-corruption, and programs which would have a significant adverse effect on vulnerable populations if suspended, would promote the purposes of this act, or is otherwise in the national interest of the United States.

## Brunei

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$0.00	0	0	0	\$0.00

<b>Totals:</b>	<b>6</b>	<b>6</b>	<b>6</b>	<b>\$209,644</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>\$5,425</b>

The Royal Bruneian Armed Forces (RBAF) consists of infantry, navy, and air combat units. A British armed forces Gurkha battalion permanently stationed in Brunei near the center of the country's oil industry contributes to Brunei's national security. Because of the country's small size, Bruneians regard a continued U.S. presence in the region as critical to their long-term security and prosperity. Since the signing of a November 1994 Memorandum of Understanding on Defense Cooperation, the RBAF have engaged in joint exercises, training programs, and other military exchanges with the United States. Their continued participation in Asia-Pacific Center for Security Studies (APCSS) courses and in training they purchase through Foreign Military Sales (FMS) enables the USG to help Brunei train future leaders for its armed forces. This training also increases Brunei's awareness and understanding of U.S. policies and facilitates lasting relationships between Bruneian military leaders and their counterparts from the United States and the Asia-Pacific region.

We have steadily enhanced military cooperation since the Sultan of Brunei's visit to the United States in 2002. The Joint Working Committee on Defense meets annually to plan and coordinate bilateral military-to-military activities, which have expanded to include joint special forces exercises, multilateral peacekeeping operations training, explosive ordinance disposal training, and maritime ship boarding and interdiction exercises, along with increased port calls by U.S. Navy vessels for training and community relations events.

A Bruneian cadet graduated from West Point as a member of the class of 2009, and another cadet is attending the Air Force Academy Class of 2012, with the cost of training underwritten by the Government of Brunei.

## Cambodia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Service Academies	1	1	1	\$73,519	0	0	0	\$0.00
<b>Totals:</b>	<b>947</b>	<b>946</b>	<b>45</b>	<b>\$2,059,332</b>	<b>15</b>	<b>15</b>	<b>11</b>	<b>\$1,058,015</b>

The U.S. enjoys an expanding military relationship with Cambodia. In 2006, with the lifting of the suspension of International Military Education and Training (IMET) and Foreign Military Financing (FMF) funding as a result of Cambodia's change in anti-trafficking status from Tier 3 to Tier 2 Watchlist, DoD and State developed a plan to expand our military ties with Cambodia, with the aim of promoting reform and professionalization within the Royal Cambodian Armed Forces. Cooperation focuses on defense reform, promoting regional cooperation and international peacekeeping capacity, addressing capacity gaps in border and maritime security, enhancing counter-terrorism and counter-narcotics capacity, and promoting civil-military operations and disaster response capability. All aspects of U.S. military cooperation with Cambodia promote reform and restructuring of the military, transparency, and respect for the rule of law.

IMET funds are used to provide training to help professionalize the Royal Cambodian Armed Forces, though funding levels and greatly limit the scope. When available, funds are also used to provide training and education to the Cambodian military in order to combat terrorism and improve border surveillance and control. These activities support our goals of improving Cambodia's counter-terrorism, counter-narcotics, and anti-piracy capabilities. Participation in Expanded International Military Education and Training (E-IMET) in civil-military relations, human rights, the military justice system, and establishing democratic values in the military, was not possible in 2010 due to the low IMET funding level. Increased IMET funding requested for FY 2012 is justified by increased professional military education and the incorporation E-. In FY 2010, FMF funds also provided training, in addition to military equipment, to increase English Language Proficiency and provide low-level PME in support of FMF granted equipment. In FY 2009 and FY 2010, the Global Peace Operations Initiative (GPOI) funded training for peace support operations for the military, which included courses in basic peacekeeping operations and staff skills. The State Department also provides funding in support of Nonproliferation, Anti-Terrorism, Demining and Related Programs - Humanitarian Demining (NADR-HD) and weapons destruction programs that included training components.

**China, People's Republic of**

<b>Totals:</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$9,685</b>	<b>4</b>	<b>4</b>	<b>4</b>	<b>\$46,807</b>

The United States welcomes the continued participation of the Cook Islands in the Asia-Pacific Center for Security Studies' (APCSS) courses, designed to focus on the non-warfighting aspects of security and international relations. These courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from these islands. Participation by the single student in 2009 and the projected four students in 2010 ensure access to, and relationships with, key security sector officials in the Cook Islands.

## Fiji

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	2	1	\$20,000	0	0	0	\$0.00
Regional Centers	9	9	5	\$64,048	11	11	7	\$119,937
<b>Totals:</b>	<b>11</b>	<b>11</b>	<b>6</b>	<b>\$84,048</b>	<b>11</b>	<b>11</b>	<b>7</b>	<b>\$119,937</b>

On December 5-6, 2006, the Fiji military overthrew the lawfully elected government of Fiji. The United States has called on the leader of the coup, Commodore Bainimarama, to abandon his extra-judicial activities, withdraw completely from politics, and restore Fiji's legitimate democratically elected government.

After the coup, the United States reviewed its assistance programs and policy options under section 508 of the Foreign Operations and Related Programs Appropriations Act and determined it appropriate to cease all applicable U.S. assistance directed to the Government of Fiji. This decision covered approximately \$2.5 million in primarily military-related assistance in the FY 2007-FY 2008 timeframe, such as the Foreign Military Financing (FMF) and International Military Education and Training (IMET) programs. This action further precluded new economic assistance programs to the Government of Fiji under the Foreign Operations Appropriations Act.

The United States has suspended all deliveries and sales of lethal military equipment to Fiji, official visits to the United States, and participation by senior Fiji military and government officials in U.S. sponsored events in third countries. The United States has also suspended the Fiji military's participation in and planning for joint military exercises and U.S.-sponsored conferences and courses. Visa sanctions have been imposed on coup and interim government leaders. These measures will remain in place until the President or Secretary of State determines that a democratically elected government has taken office, which may not happen until 2014. Other U.S. actions taken in response to the coup are subject to further review as circumstances in Fiji merit. In the meantime, participation in Regional Defense Combating Terrorism Fellowship Program (CTFP) and Regional Center events are the only allowable security-related engagements, such as those in FY 2009.

## Hong Kong

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	2	2	2	\$7,706	4	4	4	\$5,425
<b>Totals:</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>\$7,706</b>	<b>4</b>	<b>4</b>	<b>4</b>	<b>\$5,425</b>

The United States is committed to strengthening the Hong Kong Special Administrative Region's (HKSAR) autonomy from mainland China. The HKSAR Government Disciplined and Civil Services are all highly professional organizations with little to no contact with their mainland counterparts. It is in the USG interest to see that these entities are capable of remaining independent from the mainland. Training of this nature in FY 2009 helped to cement the already strong relationship in existence between the United States and Hong Kong Government ; this also includes Hong Kong Government continued attendances at the Asia-Pacific Center for Security Studies.

## Indonesia

As the world's fourth most populous nation, and the largest Muslim-majority nation, Indonesia has considerable influence in Southeast Asia. Indonesia is undergoing an historic transition to democracy while attempting to foster economic recovery and reform; it is critical that military reform keep pace with broader democratic reform. Indonesia's future political and economic path will have profound implications for U.S. strategic interests in the region such as combating terrorism, preserving regional stability in Southeast Asia, strengthening democracy and respect for human rights, and expanding access for U.S. exports and investment.

Our International Military Education and Training (IMET) program, Global Peace Operations Initiative (GPOI) funding and other engagement activities are designed to:

- Enhance military professionalism
- Improve interoperability (critical in disaster relief, peace support operations, and other operations)
- Support Indonesian efforts to reform its defense establishment
- Provide opportunities for Indonesian military and civilian personnel to attend courses in, and have other exposure to, our norms of civil-military relations, defense budget formulation, and respect for internationally recognized human rights

In 2009 Indonesia hosted the annual GPOI Capstone multinational peace support exercise, bringing together under US sponsorship the region's GPOI participants.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) is providing important training and education to assist Indonesia in combating terrorism. This program brings together counterparts from different countries and agencies across the Counterterrorism (CT) spectrum. Through this cross-fertilization, Indonesia is building a more comprehensive approach to addressing its particular concerns in combating terrorism; other countries in the region are gaining an understanding of the challenges, successes, and failures of CT efforts in Indonesia; and the United States is assisting Indonesia in building its long-term CT capacity.

The United States welcomes the continued participation of Indonesia in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Indonesia.

## Kiribati

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
GPOI	7	7	2	\$10,981	0	0	0	\$0.00
Regional Centers	1	1	1	\$13,136	4	4	4	\$46,807
<b>Totals:</b>	<b>8</b>	<b>8</b>	<b>3</b>	<b>\$24,117</b>	<b>4</b>	<b>4</b>	<b>4</b>	<b>\$46,807</b>

As a means of strengthening defense ties with Kiribati, the United States welcomes its continued participation in the Asia-Pacific Center for Security Studies' (APCSS) courses, designed to focus on the non-warfighting aspects of security and international relations. These courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Kiribati.

International Military Education and Training (IMET) funding has been requested for Kiribati for the first time in FY 2010. These funds will be used to provide training to strengthen its maritime search and rescue and disaster preparedness capabilities.

## Korea, Republic of South

Program	FY 2009				FY 2010

Since the Korean War, the Republic of Korea (ROK) has proven a strategically important and reliable defense treaty ally. While efforts to reduce tensions on the Korean Peninsula are underway, the United States and the ROK continue to maintain and strengthen the three major elements of our security alliance: the 1953 Mutual Defense Treaty, strong bilateral ties, and the interoperability of our military forces to conduct combined operations. U.S. and ROK forces, unified under the Combined Forces Command, continue to enhance their capabilities to deter and, if necessary, defeat aggression. To sharpen readiness and interoperability, the Command is continually refining its vigorous program of training and exercises.

The key objectives of U.S. training are to: enhance partnership capacity in warfighting and senior executive leadership skills; ensure the interoperability between U.S. and ROK military forces to conduct combined operations; and foster continued relationships with ROK officers that build on the shared values and purpose for the U.S.-ROK Alliance. Toward that end, the United States and the ROK had signed a Memorandum of Agreement (MOA) for Professional Military Education (PME). Although the PME agreement recently expired, much re-negotiation occurred in FY 2009 and a new final agreement is expected soon. An interim agreement allowed the PME Reciprocal Exchange Program to continue in FY 2009, and it was comprised of an annual exchange with the Army Command and General Staff College (CGSC) and United States Marine Corps (USMC) Command and Staff College and a bi-annual exchange with the Air Command and Staff College.

In addition to these programs, the ROK sends additional officers to PME institutions, which the ROK pays for in cash through the Foreign Military Sales (FMS) program. Air Force receives an additional annual slot at the Joint Forces Staff College. The ROK services receive one National Defense University slot each year and the ROK Army and the ROK Air Force each receive an annual U.S. Army and U.S. Air Force Senior Service College slot. The ROK Navy receives one Naval Command College and one Naval Staff College slot per year.

The United States welcomes the continued participation by the ROK in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from the ROK.

## Laos

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$10,000	0	0	0	\$0.00
GPOI	1	1	1	\$833	0	0	0	\$0.00
IMET-1	2	1	2	\$32,878	0	0	0	\$0.00
Misc DOD/DOS Non-SA	1	1	1	\$2,500	0	0	0	\$0.00

<b>Totals:</b>	<b>18</b>	<b>17</b>	<b>12</b>	<b>\$152,163</b>	<b>10</b>	<b>10</b>	<b>5</b>	<b>\$120,010</b>

The United States International Military Education and Training (IMET) program with Laos supports efforts to professionalize the military, improve English language skills, and provide needed technical skills as we seek to build a new relationship with the Lao People's Army. IMET funded English-language training began in FY 2008 when two Lao military students attended the Defense Language Institute-English Language Center (DLI-ELC). In 2009, English-language training continued, and will be a major focus area for IMET for the immediate future. Medical training in FY 2008 and FY 2009 helped to strengthen Laos's own capacity to deal with public health threats such as Pandemic Influenza and HIV/AIDS.

Representatives of the Lao government regularly attend four separate courses at the Asia-Pacific Center for Security Studies (APCSS). The APCSS courses focus on the non-warfighting aspects of security issues and international relations. These courses are critical to increase awareness and understanding of U.S. and regional policy developments, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Laos.

The United States also plans to conduct a series of training events on Humanitarian Demining and Unexploded Ordnance (UXO) Removal, to enhance the Lao People's Army capacity to clear land of cluster munitions. This will be funded by Humanitarian Demining Assistance, and directly reinforces existing U.S. funded programs aimed at strengthening Laos's UXO-clearance capacity.

## Malaysia

Program	FY 2009				FY 2010

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

The United States has important security interests in Malaysia, which is currently chair of the Organization of the Islamic Conference (OIC). A key counterterrorist partner, Malaysia borders and helps to safeguard one of the world's most important maritime waterways. U.S. military response to the Aceh tsunami crisis benefited from transit rights over Malaysian territory and access to Malaysian airfields.

International Military Education and Training (IMET) in FY 2008 and FY 2009 contributed significantly to the strengthening of our military-to-military ties and further familiarize the Malaysian military with U.S. doctrine, equipment, and management techniques through Professional Military Education (PME) courses at U.S. military colleges. IMET also reinforced the Malaysian military's commitment to human rights, good civil-military relations and management of defense resources. Training in FY 2009 and beyond is also focused at increasing Malaysia's maritime security capabilities. It also helps expand our access to, and cooperation with, Malaysian military leaders. Malaysia participates actively in, and provides other nations training for, multinational peace support operations, which necessitates U.S.-funded training that promotes interoperability.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) has provided important training and education to assist Malaysia in integrating its interagency approach to combating terrorism, with a focus in FY 2009 on enhancing maritime security. This program brings together counterparts from different countries and agencies across the counterterrorism spectrum and, through this cross-fertilization process, builds a more comprehensive approach to addressing regional concerns in combating terrorism.

The United States welcomes the continued participation by Malaysia in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Malaysia.

## Marshall Islands

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	1	1	1	\$28,137	0	0	0	\$0.00

<b>Totals:</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$28,137</b>	<b>4</b>	<b>4</b>	<b>4</b>	<b>\$46,807</b>

As a means of strengthening ties with the Marshall Islands, the U.S. welcomes its continued participation in the Asia-Pacific Center for Security Studies' (APCSS) courses, designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from the Marshall Islands.

International Military Education and Training (IMET) funding was provided to the Marshall Islands for the first time in FY 2008. IMET funds are used to enhance the Marshall Islands' security forces' maritime security and disaster relief capabilities, with Mobile Training Teams providing local instruction in FY 2008 and FY 2009. More local training is planned for FY 2010 and FY 2011.

## Micronesia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	2	1	\$20,000	0	0	0	\$0.00

As a means of strengthening ties with Micronesia, the United States welcomes its continued participation in the Asia-Pacific Center for Security Studies' (APCSS) courses, designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Micronesia.

Micronesia has a student in the US Naval Academy Class of 2010, and will vie for future academy attendance opportunities.

## Mongolia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	4	4	2	\$26,500	0	0	0	\$0.00
FMF	3	3	2	\$27,748	0	0	0	\$0.00
FMS	1	1	1	\$879,393	0	0	0	\$0.00
GPOI	125	125	14	\$185,741	0	0	0	\$0.00
IMET-1	74	35	66	\$1,168,701	0	0	0	\$0.00
Regional Centers	120	120	19	\$346,148	10	10	6	\$110,738
<b>Totals:</b>	<b>327</b>	<b>288</b>	<b>104</b>	<b>\$2,634,231</b>	<b>10</b>	<b>10</b>	<b>6</b>	<b>\$110,738</b>

Continued support of Mongolia's transformation into a secure, democratic, and stable country greatly serves the U.S. national interest. This support facilitates Mongolia's contribution to the security and prosperity of the Asia-Pacific region, its participation in international peacekeeping missions, and support for Operation Enduring Freedom (OEF) to assist in international peacekeeping efforts. . For a modest investment Mongolia has become a reliable partner.

With a trained cadre and training equipment provided from the now defunct Enhanced International Peacekeeping Capabilities (EIPC) program, the Mongolian General Staff established a Department of Peacekeeping Operations that developed and trained a Mongolian peacekeeping battalion for participation in international peace support operations and multinational training events. Building on this experience, Mongolia has deployed peacekeeping forces to Iraq, Afghanistan, Sierra Leone, and Kosovo, and has contributed military observers to United Nations peacekeeping missions in other countries. With funding from the Foreign Military Financing (FMF) and the Peacekeeping Operations Global Peace Operations Initiative (GPOI), Mongolia enhanced its - Five Hills - Training Center. This facility has hosted national and multinational GPOI peace support exercises in each year of 2006-2009. Funds from the Coalition Solidarity Fund are also being used to purchase equipment that will increase the deployment capabilities of the two current peacekeeping battalion and lay the groundwork for the planned standup of a third battalion.

International Military Education and Training (IMET) for Mongolia promotes civilian control of the military, military justice and law, and respect for international human rights standards. IMET funded language and professional military training not only strengthen U.S.-Mongolian defense ties, but also continue to build a cadre of pro-U.S. reformers in the most critical leadership positions in the armed forces. IMET programs have been largely responsible for developing the English language skills of the Mongolian officers and Non-Commissioned Officers who participated in deployments to Iraq from 2003-2009 and Afghanistan from 2004-2009. IMET-funded coursework included training in infantry, engineer, health care specialists, quartermaster, defense management, Ranger, civil military relations, and senior service education. The State Partnership Program between Mongolia and the Alaska National Guard also contributed to Mongolia's training, including medical readiness exercises.

The United States welcomes the continued participation by Mongolia in both the Asia-Pacific Center for Security Studies (APCSS) and the George C. Marshall European Center for Security Studies' courses that focus on the peacetime aspects of security and international relations. These courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence.

## Nauru

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	2	2	1	\$26,272	3	3	3	\$36,220
<b>Totals:</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>\$26,272</b>	<b>3</b>	<b>3</b>	<b>3</b>	<b>\$36,220</b>

Nauru participation in Asia Pacific Center for Security Studies (APCSS) courses in FY 2009 and previous years offered the right level of engagement with the small island nation's security sector. The US will continue to invite one-to-three officials each year to APCSS events in the coming years.

International Military Education and Training (IMET) funding has been requested for Nauru for the first time in FY 2010. These funds will be used to provide training to strengthen its maritime security capabilities.

## Niue

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	0	0	0	\$0.00	1	1	1	\$7,291
<b>Totals:</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$7,291</b>

As a means of strengthening ties with Niue, the United States welcomes its participation in the Asia-Pacific Center for Security Studies' courses, designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Niue. While no Niue officials were available to attend the Center's courses in FY 2009, an invitation will be extended again in FY 2010.

## Papua-New Guinea

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	13	11	12	\$249,730	0	0	0	\$0.00
Regional Centers	4	4	3	\$42,227	9	9	6	\$98,372
<b>Totals:</b>	<b>17</b>	<b>15</b>	<b>15</b>	<b>\$291,957</b>	<b>9</b>	<b>9</b>	<b>6</b>	<b>\$98,372</b>

U.S. national interests in Papua New Guinea (PNG) derive from security and policy considerations related to two U.S. energy corporations, ExxonMobil and InterOil, developing liquefied natural gas (LNG) projects worth over \$20 billion. The projects have the potential to transform PNG's economy and greatly enhance its regional strategic and political profile, making it an increasingly important player in regional security coordination; recognizing this, both Australia and the People's Republic of China (PRC) have increased investment and assistance levels in recent years. Just as important is PNG's status as home to one of the world's greatest remaining tropical rain forests and biodiversity reservoirs. PNG is the largest and most populous island nation in the South Pacific and neighbor to the troubled Indonesian province of West Papua; Indonesia depends on PNG's policy cooperation to help it deal with separatists there. U.S. interests include strengthening democratic institutions, assisting with development of disaster relief capabilities, supporting peaceful transition from civil strife to rule of law in Bougainville, destroying extensive caches of WWII weapons and explosives in Bougainville and elsewhere, maintaining friendly host country support for JPAC remains repatriation missions, supporting the nation's pursuit of free enterprise, and fostering stewardship of diverse natural resources.

FY 2008 and FY 2009 International Military Education and Training (IMET) funded activities continued to focus on professional military education (PME) for the PNG Defense Force (PNGDF), contributing to better discipline, and increasing PNG's ability to engage in cooperative international military-related efforts, including peacekeeping. Other FY 2009 IMET activity focused on PME courses for non-commissioned officers, and defense resource management.

The United States welcomes the continued participation of Papua New Guinea in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Papua New Guinea. At our urging, PNG in 2010 passed legislation allowing PNGDF to participate in international peacekeeping operations (PKO); PNG will look to the U.S for training and assistance as it works with relevant UN agencies on actual participation.

## Philippines

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

The Government of the Philippines continues to face threats from terrorist groups, including four terrorist groups on the U.S. government's Foreign Terrorist Organization list. Most notable because of the international threat they pose are the terrorist Abu Sayyaf Group (ASG), which has gained international notoriety with its kidnappings of foreign tourists and relief workers in the southern islands, as well as members of the Indonesia-based Jemaah Islamiyah (JI) organization. Efforts to track down and interdict ASG and JI members have met with significant success, especially in Basilan and Jolo, where U.S. troops provide counterterrorism (CT) assistance and training to Philippine soldiers, along with conducting humanitarian activities. In August 2006, the Armed Forces of the Philippines (AFP) began a major offensive against ASG and JI on the island of Jolo. This offensive was successful and resulted in the deaths of ASG leader Khadafy Janjalani and his deputy, Abu Solaiman. The U.S. government provided rewards to Philippine citizens whose information led to these deaths in the military operations, as well as to many other operations against terrorist leaders. The broad-based efforts to weaken terrorist organizations have resulted in over 250 terrorists being killed or captured since August 2006.

Building on longstanding bilateral CT cooperation and stemming from commitments made during presidential discussions in both Manila and Washington, the United States and the Philippines have embarked on a comprehensive military-to-military program to enhance the AFP's CT capabilities. As U.S. military cooperation under this counterterrorism program grows, International Military Education and Training (IMET) funds have become an even more important part of the effort to maintain and enhance the professionalization of the AFP.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) is providing important training and education to assist the Philippines in combating terrorism. This program brings together counterparts from different countries and agencies across the CT spectrum. Through this cross-fertilization, the Philippines is building a more comprehensive approach to addressing its particular concerns in combating terrorism; other countries in the region are gaining an understanding of the challenges, successes, and failures of CT efforts in the Philippines; and the United States is assisting the Philippines' build its long-term CT capacity.

In addition to our counterterrorism cooperation with the Philippines, the United States has important security, commercial, and political interests in the Philippines, a treaty ally that straddles important air and sea-lanes. As a nation committed to democratic political principles and as a regional leader, a stable Philippines is an important force for stability in Southeast Asia. The Philippines is committed to close relations with the United States in support of regional peace and security in Southeast Asia. It seeks to promote regional, economic, and political cooperation through the Association of Southeast Asian Nations (ASEAN), the ASEAN Regional Forum, and the Asia-Pacific Economic Cooperation (APEC). The Philippines joined the United States in co-hosting a successful ARF Disaster Relief Exercise, the first of its kind, in 2009.

## Volume I Section III-II - East Asia and Pacific

IMET funds have contributed to overall regional stability and positively influenced the Philippine military's professionalism and discipline. IMET also has helped further strengthen civilian control over the military. The steady advancement of IMET graduates helps ensure the continued understanding and cooperation of the Government of the Philippines on U.S. views toward regional issues. IMET graduates who populate the top ranks of the AFP contribute to building the close professional military-to-military relations that exist between the U.S. military and the AFP. With the Visiting Forces Agreement (VFA) in force, the U.S. military is actively engaged in ship visits and joint training exercises with the AFP.

These cooperative bilateral military activities constitute important steps toward normalizing our military-to-military ties and increasing interoperability and standardization with the AFP. They also enable the AFP to defend the national borders against external aggression, counter separatist insurgencies, participate in regional peacekeeping operations, and combat terrorism. In support of these goals, and in keeping with our treaty ally relationship, Philippine officers have participated in a range of operational, officer training, and leadership courses. These include courses related to aviation, aircraft maintenance, field artillery, expeditionary warfare training, psychological operations, ranger operations, signals, supply, service and maintenance, the Medical Strategic Leadership Program, and similar courses.

Officer professionalization and leadership development are the aims of Command and Staff College and military law courses. Such training increases Philippine military exposure to the U.S. system of civil-military relations and respect for human rights. Staff officer and related courses are aimed at increasing Philippine officers' ability to participate effectively with the United States in international peacekeeping and related operations. A Joint Defense Assessment (JDA) conducted by the U.S. and Philippine militaries of the AFP's status and capabilities was accepted in September 2003 by President Arroyo as the basis for a further expansion of military cooperation through the jointly funded Philippine Defense Reform (PDR) program. As of January 2010, the Philippine government has contributed \$514 million to overall PDR objectives and reforms,

The provision of Global Peace Operations Initiative (GPOI) funds enabled increased participation by the AFP in multinational peace operations training conducted regionally in 2009. This promoted the AFP's interoperability with U.S. forces as well as for the conduct of peace support operations with other regional militaries.

DoD has also funded Philippine participation in joint exercise training and a military training team assessment of defense needs and requirements. These also increase interoperability and provide the Philippines with a realistic assessment of how to shape their defense strategy.

As another means of strengthening our defense cooperation with the Philippines, the United States welcomes continued Philippine participation in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from the Philippines.

## Samoa

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	1	1	\$10,000	0	0	0	\$0.00
IMET-1	2	2	2	\$46,719	0	0	0	\$0.00
Regional Centers	0	0	0	\$0.00	2	2	2	\$21,015
<b>Totals:</b>	<b>4</b>	<b>3</b>	<b>3</b>	<b>\$56,719</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>\$21,015</b>

The U.S. national interests in Samoa are related to the U.S. government's national security interests in regional stability. Samoa is a close neighbor of American Samoa, with which it has long-standing ties. International Military Education and Training (IMET) funding supports Samoa's efforts to develop effective maritime security capabilities, as well as enhance its disaster relief and peacekeeping capabilities.

As a means of strengthening ties with Samoa, the United States welcomes its continued participation in the Asia-Pacific Center for Security Studies' (APCSS) courses, designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Samoa. No Samoan officials were available to attend APCSS courses in FY 2009, but at least one student is expected to attend in FY 2010.

## Singapore

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	1199	1079	427	\$107,321,299	0	0	0	\$0.00

Regional Centers	14	14	9	\$7,706	13	13	10	\$24,310
Service Academies	10	10	4	\$142,874	0	0	0	\$0.00
<b>Totals:</b>	<b>1313</b>	<b>1193</b>	<b>445</b>	<b>\$107,665,793</b>	<b>13</b>	<b>13</b>	<b>10</b>	<b>\$24,310</b>

Singapore's prosperous economy and extensive cooperation on a broad range of issues have made it an important U.S. security partner and an important force for stability and economic progress in Southeast Asia. In 2005, President Bush and Prime Minister Lee Hsien Loong signed the Strategic Framework Agreement (SFA), which formalized and enhanced an already robust security relationship. The SFA serves as a statement of principles to guide our bilateral security relationship and reflects the convergence of strategic views between our two countries. The value of the familiarity, interoperability, and access afforded by our close military relationship was apparent during the rapid and successful mobilization of U.S. forces for the Indian Ocean tsunami relief operation in 2005. Singapore has supported efforts to bring stability and security to Iraq. The Singaporean government has deployed a C-130 transport plane and continues to rotate Landing Ship Tanks and KC-135s to provide logistics support for the multinational Iraq stabilization effort. Singapore deployed a dental team and bridge construction team to Afghanistan in support of a Provincial Reconstruction Team (PRT) in 2007. In 2009, Singapore opened a regional Command and Control (C2) center that will facilitate effective C2 for exercises, contingency operations and Humanitarian Assistance/Disaster Relief efforts.

Singapore has been unfailing in its support for continued U.S. forward deployment in the region, including the provision of ready access to its military facilities following closure of U.S. bases in the Philippines. Singapore augmented at its own expense its pier at the Changi Naval Base to accommodate U.S. aircraft carriers. Singapore has provided staunch military support for U.S. overseas contingency operations since the September 11 attacks, including blanket overflight clearance and tanker fueling to form an air bridge in support of Operation Enduring Freedom. Approximately 150 U.S. logistics personnel stationed in Singapore support regular combined air exercises and more than 100 U.S. ship visits in a typical year. Singapore turns to the United States for approximately 85 percent of its total imports of military equipment. Our robust collaborative partnership stretches across all services and into the respective national labs in pursuit of mutually beneficial technologies.

Strengthening our defense ties with Singapore has included Foreign Military Sales (FMS) training, participation at U.S. Service Academies, and improved interoperability through combined exercises with U.S. forces. Significant accomplishments in these areas were noted in FY 2009, and the United States proposes further strengthening of our ties with Singapore in all these areas in FY 2010.

Singapore is a major FMS training customer and has training detachments in the continental United States. It has 48 open FMS training cases supporting 1,000 students a year. Singapore's new F-15SG detachment should be in place in FY 2009. The US Navy will provide qualification training for Singapore to use its new S70s as well as helicopter-ship integration training between the S70s and Singapore's newly acquired French Frigates. Singapore's High Mobility Artillery Rocket System (HIMARS) purchase is also likely to involve on-the-job training in FY 2010 at Fort Sill, Oklahoma, to improve interoperability with U.S. forces.

The United States welcomes the continued participation by Singapore in the Asia-Pacific Center for Security Studies (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international

**Volume I Section III-II - East Asia and Pacific**

relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Singapore.

## Solomon Islands

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	8	5	8	\$64,241	0	0	0	\$0.00
Regional Centers	1	1	1	\$10,591	3	3	3	\$36,220
<b>Totals:</b>	<b>9</b>	<b>6</b>	<b>9</b>	<b>\$74,832</b>	<b>3</b>	<b>3</b>	<b>3</b>	<b>\$36,220</b>

U.S. national interests in the Solomon Islands emphasize strengthening the nation's capabilities to secure its maritime borders, advancing the process of truth and reconciliation, encouraging its democratic institutions, and preserving its biodiversity. Continued U.S. engagement in the Solomons is all the more important as it works with its Pacific Island neighbors to revitalize its security capabilities and rebuild systems of governance. We also have an interest in destroying extensive caches of WWII explosives, arms and materiel which threaten safety and discourage development; we will work with the Regional Assistance Mission to the Solomon Islands (RAMSI) and Royal Solomon Islands Police (RSIP) on arms destruction matters.

Continued International Military Education and Training (IMET) will ensure meaningful U.S. participation in the international effort to bring the Solomon Islands back from the brink of economic collapse. It also increases the country's ability to maintain control of its own fishery resources. To these ends, IMET-funded courses in FY 2008 and FY 2009 have focused on maritime security issues.

The United States welcomes the continued participation of the Solomon Islands in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from these islands.

## Taiwan

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	489	394	237	\$7,714,126	0	0	0	\$0.00
Regional Centers	13	13	6	\$6,022	6	6	5	\$5,425
Service Academies	12	12	5	\$142,874	0	0	0	\$0.00
<b>Totals:</b>	<b>514</b>	<b>419</b>	<b>248</b>	<b>\$7,863,022</b>	<b>6</b>	<b>6</b>	<b>5</b>	<b>\$5,425</b>

Consistent with the Taiwan Relations Act of 1979, it has been long-standing U.S. policy to make available to Taiwan defense articles and services to enable Taiwan to maintain a sufficient self-defense capability. This policy also seeks to reinforce regional stability. Training of Taiwan armed forces personnel can play a major role in the enhancement of Taiwan's security. For senior Professional Military Education (PME), Taiwan has been approved in principle for slots at the Naval, Army, and Air War Colleges; one slot each at the Army, Navy, Air Force, and Marine Corps Command and General Staff Colleges; and one National Defense University (NDU) International Fellow for Academic Year 2010-2011.

During FY 2009, Taiwan officers completed courses at the National Defense University, Army War College, Air War College, and Naval Command College. Additional officers completed courses at the Army, Air Force, Naval, and Marine Corps Command and Staff Colleges. These programs increase awareness and understanding of U.S. policies, leading to increased trust, transparency and confidence.

Taiwan cadets graduated from the Air Force Academy in 2008, and have cadets in the Classes of 2010, 2012, and 2013. West Point attendees include graduates in the Classes of 2008 and 2009, and members of the Classes of 2012 (two) and 2013. Naval Academy attendees include graduates in the Classes of 2008 and 2009, and member of the Classes of 2010 and 2012. Attendance of U.S. academies figures prominently in the development of junior officers in the Taiwan military.

## Thailand

Service Academies	6	6	4	\$358,721	0	0	0	\$0.00
<b>Totals:</b>	<b>1407</b>	<b>1326</b>	<b>207</b>	<b>\$6,565,339</b>	<b>388</b>	<b>388</b>	<b>18</b>	<b>\$3,007,712</b>

The United States has significant security, commercial, and political interests in Thailand. One of five treaty allies in Asia, Thailand hosts over 40 joint military exercises, provides crucial access to Thai facilities, and has contributed troops to United Nations peacekeeping and U.S.-led coalition operations. Thailand hosts Cobra Gold, our largest multi-national exercise in Asia, and, by so doing, allows us to engage with not only the Thai military, but also the militaries of Singapore, Japan, Indonesia, and others. Thailand has made critical contributions to U.S. overseas contingency operations, including allowing access to its airspace and bases for Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) as well as deploying military engineers and medical personnel to Iraq and Afghanistan. In December 2003, Thailand was designated a Major Non-NATO Ally. Thailand permitted the United States to use Utapao Naval Air Station as the hub for relief operations in response to the December 26, 2004 tsunami that devastated the Indian Ocean region in Operation Unified Assistance, as well as the 2008 response to Cyclone Nargis in Burma. Thailand has traditionally had a robust International Military Education and Training (IMET) program. IMET graduates dominate the top levels of Thailand's Defense Ministry, Supreme Command headquarters, and all of the services. The majority (60%+) of the FY 2008 and FY 2009 IMET funds were devoted to Professional Military Education courses, as these schools claim much of the credit for the Thai officers' attainment of top level positions. IMET assistance and training funded by the Global Peace Operations Initiative (GPOI) has helped to develop and maintain a professional Thai military that is capable of participating in international peace support operations. Two U.S. educated and trained Thai Generals served as United Nations Transitional Administration in East Timor (UNTAET) force commanders. The Thai General who served as Deputy Chief of the EU-ASEAN Interim Monitoring Mission in Aceh was an IMET graduate.

The FY 2009 Regional Defense Combating Terrorism Fellowship Program (CTFP) provided important training and education to assist Thailand in integrating its approach to combating terrorism. This program brings together counterparts from different countries and agencies across the Counterterrorism (CT) spectrum. CTFP resources are used to engage the Royal Thai Government at the highest levels (such as the Director of the National Security Council) as well as at the decision-maker and action officer level. Efforts are focused on niches perceived to be weak points, including interagency cooperation, information sharing, and institutional knowledge bases in specific areas related to countering terrorism. Every effort is made to ensure that CTFP resources are not duplicative with other USG programs and resources, and instead synergistic, focusing on areas not otherwise addressed. As a result, CT cooperation with Thailand is consistently rated by

## **Volume I Section III-II - East Asia and Pacific**

USG officials as excellent and, with continued CTFP assistance, the Royal Thai Government (RTG) capacity to support greater cooperation with more skilled personnel with increased interagency coordination can be improved even more.

Thai officers have traditionally attended U.S. service academies. Service academy attendance has traditionally provided an invaluable means to foster long-standing ties with the Thai military and to provide in-depth exposure to the U.S. system of civil-military relations, military law, and related issues. The Thai military has expressed interest in participating in the Office of the Secretary of Defense (OSD)-sponsored Defense Resource Management Study (DRMS). This program's intent is to work with the host-nation military to design a multi-year resource management model tailored to the specific requirements and unique aspects of that country. OSD is considering this request.

The United States welcomes the continued participation by Thailand in the Asia-Pacific Center for Strategic Studies' (APCSS) senior executive, junior executive, and Comprehensive Security Responses to Terrorism (CSRT) courses, which are designed to focus on the non-warfighting aspects of security and international relations. The courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Thailand as well as bridge differences among civil and military leaders from participating countries.

**Timor-Leste, Democratic Republic of**

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$10,000	0	0	0	\$0.00
IMET-1	10	38	10	\$270,568	0	0	0	\$0.00
Regional Centers	3	3	3	\$19,201	15	15	8	\$108,255
<b>Totals:</b>	<b>45</b>	<b>40</b>	<b>14</b>	<b>\$238,086</b>	<b>15</b>	<b>15</b>	<b>8</b>	<b>\$108,255</b>

Timor-Leste has established a modest defense force, Falintil-Forças de Defesa de Timor Leste (F-FDTL), comprised of about 730 active duty personnel. Although Timor-Leste's security will ultimately depend in large measure on good relations with neighboring countries, the country requires armed forces with a defined mission and basic equipment for defense, support, communication, disaster management, humanitarian relief, and transportation. As the military is less than ten years old and is rebuilding after the security crisis of April-May 2006, the F-FDTL needs training for its new officers.

International Military Education and Training (IMET) funds supported English-language training in FY 2009 that will help build the pool of qualified candidates for further training in the United States. FY 2010 IMET will provide opportunities for civilian and F-FDTL attendance at courses that discuss transparent, efficient, and effective budgeting, logistics, acquisition, and resource management processes. It will also provide opportunities for civilian and F-FDTL attendance at courses that emphasize the principles of a civilian-led military, respect for human rights, and the law of war - as well as a special focus on coastal and port security. This training will help institutionalize these concepts in the Ministry of Defense and the military, and assist the Government of Timor Leste in establishing effective and sustainable defense management systems.

## Tonga

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$10,000	0	0	0	\$0.00
FMS	10	10	1	\$476,695	0	0	0	\$0.00
GPOI	42	42	3	\$75,219	0	0	0	\$0.00
IMET-1	17	10	17	\$236,808	0	0	0	\$0.00
Regional Centers	6	6	5	\$54,500	6	6	6	\$62,660
Service Academies	2	2	2	\$147,038	0	0	0	\$0.00
<b>Totals:</b>	<b>78</b>	<b>71</b>	<b>29</b>	<b>\$1,000,260</b>	<b>6</b>	<b>6</b>	<b>6</b>	<b>\$62,660</b>

The Kingdom of Tonga, a highly traditional society where the King and nobles dominate political life, interacts with the United States mainly in such Pacific organizations as the Pacific Community, the Forum Fisheries Agency, and the South Pacific Regional Environment Program. U.S. interests in Tonga include encouraging democratic institutions and assisting in environmental protection efforts. International Military Education and Training (IMET) is an important vehicle for pursuing U.S. interests, particularly in the area of maritime security and coastal patrol in FY 2009.

Tonga joined other regional nations (New Zealand, Australia, Vanuatu, and Fiji) in 1999 in providing unarmed peace monitors once a truce was achieved in Papua New Guinea's Bougainville. Tonga sent troops to Solomon Islands as part of the Regional Assistance Mission. In June 2004, Tonga sent a unit of 45 troops to Iraq where they supported the U.S. Marines in the conduct of security and stabilization operations. IMET and the Global Peace Operations Initiative (GPOI) provide Professional Military Education (PME) and training to Tonga's Defense Force with emphasis on respect for human rights, civilian control over the military, military peace support operations skills, and military justice. IMET in FY 2009 also helped to support Tonga's ability to contribute to regional peace support operations and contributed to Tonga's development of a maritime security capability through training in peacekeeping and international maritime search operations. GPOI also supports the development of international peacekeeping interoperability within the Tongan Land Force through assisting their participation in multinational peace support exercises conducted regionally.

The United States welcomes the continued participation of Tonga in the Asia-Pacific Center for Security Studies' (APCSS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Tonga.

Tonga has cadets in the U.S. Military Academy Class of 2011 and Naval Academy Class of 2013. Attendance of U.S. academies figures prominently in the development of junior officers in the Tongan military, and encourages future Tongan participation in coalition missions.

**Tuvalu**

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$10,000	0	0	0	\$0.00
Regional Centers	3	3	2	\$29,638	1	1	1	\$7,291
<b>Totals:</b>	<b>4</b>	<b>4</b>	<b>3</b>	<b>\$39,638</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$7,291</b>

As a means of strengthening ties with Tuvalu, the United States welcomes its continued participation in the Asia-Pacific Center For Security Studies' (APCSS) courses, designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with officials from Tuvalu. FY 2009 saw a spike in officials attending APCSS.

International Military Education and Training (IMET) funding has been requested for Tuvalu for the first time in FY 2010. These funds will be used to provide training to strengthen its maritime security capabilities.

## Vanuatu

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	9	7	8	\$90,126	0	0	0	\$0.00
Regional Centers	1	1	1	\$10,591	1	1	1	\$7,291
<b>Totals:</b>	<b>10</b>	<b>8</b>	<b>9</b>	<b>\$100,717</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$7,291</b>

U.S. national interests in Vanuatu center on strengthening the nation's role in regional security, assisting its efforts to continue liberalizing its economy, and encouraging its political leadership role among the South Pacific countries. Vanuatu is the world's smallest country to receive a Millennium Challenge Corporation (MCC) compact; its successful completion of MCC-financed road building projects have made it a regional model for enhanced government efficiency and cooperation with the U.S. Other interests include building Vanuatu's capacity to secure its maritime borders and encouraging programs that protect the island's environment and fragile natural resources. The People's Republic of China (PRC) has strengthened its bilateral partnership with Vanuatu recognizing its key political and regional strategic role.

The small Vanuatu Mobile Force (VMF) must patrol a vast area of ocean; we aim to continue to strengthen its capacities. U.S. Coast Guard training in FY 2009 supplemented Australian and New Zealand programs and helped upgrade VMF capabilities. Continued International Military Education and Training (IMET) funding for maritime officer training in FY 2010 will help improve force discipline and enhance its maritime security capabilities, as well as address the continuing need for human rights training. Our assistance also helps Vanuatu participate fully in international peacekeeping (PKO) efforts.

## Vietnam

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	3	3	2	\$23,250	0	0	0	\$0.00
FMS	1	1	1	\$0.00	0	0	0	\$0.00
GPOI	7	7	5	\$11,033	0	0	0	\$0.00
IMET-1	15	9	9	\$241,552	0	0	0	\$0.00
Misc								
DOD/DOS Non-SA	1	1	1	\$2,500	0	0	0	\$0.00
Regional Centers	59	59	8	\$90,681	10	10	6	\$110,738
<b>Totals:</b>	<b>86</b>	<b>80</b>	<b>26</b>	<b>\$369,016</b>	<b>10</b>	<b>10</b>	<b>6</b>	<b>\$110,738</b>

U.S. national security will be served by a stable, fully integrated Vietnam with increasing economic prosperity and trade relations with the United States. The United States seeks to enhance Vietnam's ability to be a constructive regional player. Evidence of success in this area is seen in Hanoi's active participation in the Association of Southeast Asian Nations (ASEAN), the ASEAN Regional Forum, the Asia Pacific Economic Cooperation (APEC) group, in its term on the United Nations Security Council in 2008-2009, in regional Search And Rescue (SAR) and humanitarian assistance and disaster relief (HA/DR) activities, and other strategic dialogues and cooperation. Vietnam chaired APEC in 2006.

The United States can also improve trust through steady expansion of military-to-military contacts, involvement of Vietnam in peace support operations training through the Global Peace Operations Initiative (GPOI), exchanges of senior military officials, and additional U.S. Navy ship visits (Vietnam hosted U.S. Navy ship visits in 2007-2009).

In June 2005, the United States and Vietnam concluded a section 505 agreement on end-use assurances under the Foreign Assistance Act of 1961, as amended, which permitted International Military Education and Training (IMET) funds for Vietnam to be spent for the first time. IMET support has primarily focused on English language instruction in FY 2007 to FY 2009. In FY 2008, IMET funds supported a very successful, in-country medical Mobile Training Team (MTT) course, which provided the Vietnamese military with the framework to train its deployable surgical assets in support of international humanitarian and peacekeeping missions. FY 2009 IMET courses included Search and Rescue for its coast guard-like security arm.

The Asia-Pacific Center for Security Studies (APCSS) will continue to invite representatives from Vietnam to reinforce our defense cooperation and foster links with other regional partners and neighbors. The executive courses are designed to focus on the non-warfighting aspects of security and international relations and increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Vietnam.

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

As one of the newest members of NATO, Albania has proven to be a staunch ally of the United States and NATO in Southeastern Europe, as well as a reliable ally in U.S. overseas contingency operations, consistently increasing the size and scope of force deployments. Albania continues to participate with the European Force in Bosnia-Herzegovina (EUFOR), KFOR in Kosovo, Iraq, and the International Security Assistance Force (ISAF) in Afghanistan, where they are undertaking their first operational combat mission without caveats alongside U.S. forces. The Government of Albania has also assisted in the fight against terrorism by resettling eight individuals who had been detained by the U.S. Department of Defense at Guantanamo Bay and determined no longer to be enemy combatants, an important humanitarian gesture. Albania has also taken a leading role in regional security issues, most visibly by embarking on an ambitious demilitarization program to rid the country of old, unstable, and excess munitions by 2013. A primary U.S. goal in Albania is to use the currently positive atmosphere to hasten Albania's integration into NATO's overall structure while helping create long-term stability in Albania and the region.

To this end, military to military will be the basis for USG assistance with continued focus to remain on capacity building and sustainability within the Ministry of Defense (MoD) and their ability to implement and execute strategic planning and force structure development. USG activities in FY 2010 will focus on providing technical assistance, training and guidance to the MoD in the form of senior leadership development, policies and procedures in the managerial process, assistance in planning, execution and analytical capabilities and increased capabilities in their ability to plan and execute logistical and budgetary development processes. USG will also coordinate efforts to provide training for their NCO and Officer Corps to better align them with NATO standards of operation and to professionalize the service as Albania completes the transition to an all volunteer force. Assistance will also be provided to improve procurement and modernization programs. USG will also continue to monitor ongoing efforts in the areas of demilitarization and defense reform.

Previous USG funded training (FMF, IMET) included mobile training teams to provide cost-effective training in-country. Courses included Basic English language instruction, lieutenant and captain basic and career courses in the infantry, military police, signal, intelligence, and quartermaster fields, as well as defense acquisition management, logistics, NCO development, and other specialties. Several Albanian officers have received advanced training at the Army and other War Colleges. Many senior officials, to include the CHOD, Deputy CHOD, and several members of the Ministry and Parliament are graduates of U.S. funded trainings and other key civilians have received Masters level education at the Naval Postgraduate School and other institutions.

Albanian military officers continue to receive training under the CTFP. This program better equips Albanian institutions to be an effective partner in the fight against terrorism. This effort will continue as long as CTFP funding is provided for this purpose.

## **Volume I Section III-III - Europe**

The New Jersey National Guard (NJ NG) is Albania's State Partner and carried out a robust program that was cited by the Albanian Minister of Defense as providing critical assistance in helping Albania gain NATO membership in 2009. The NJ NG continues to help Albanian integrate fully into NATO and is training to conduct a joint Operational Mentor Liaison Team.

Albanian soldiers and civilian defense officials also have received U.S.-funded instruction at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

The United States hopes to promote peace, stability, democracy, and economic prosperity in the South Caucasus and a stable, prosperous, and independent Armenia is critical to advancing U.S. national interests and promoting regional goals. U.S. objectives are served by assisting Armenia in reforming its military technology and armed forces to support defense reform and NATO interoperability.

Prior to 9/11, section 907 of the Freedom Support Act prohibited most USG assistance to the Government of Azerbaijan. As a matter of even-handedness, previous Administrations extended Section 907's restrictions to security assistance for Armenia. After 9/11, Congress granted the President the authority to waive section 907 on an annual basis. Most recently exercised in February 2010, the waiver has permitted USG to provide security assistance to Armenia. The Administration carefully reviews all security assistance with Armenia and Azerbaijan to ensure that it does not disturb the military balance between the two nor undermine efforts for a peaceful resolution of the Nagorno-Karabakh conflict.

As one facet of our strategic objectives, we continue to urge Armenia to expand its cooperation in NATO's Euro-Atlantic Partnership Council (EAPC) and the Partnership for Peace (PfP). Armenia ratified a PfP Status of Forces Agreement in April 2004 and agreed to an Individual Partnership Action Plan (IPAP) with NATO in December 2005. Over the last two years, Armenia has received very high marks from visiting NATO delegations. Armenia has provided troops to NATO led Kosovo Force (KFOR), Operation Iraqi Freedom (OIF) and most recently International Security Assistance Force (ISAF) in Afghanistan.

Since 2002, Armenian soldiers and civilian defense officials also have received U.S.-funded instruction at the George C. Marshall European Center for Security Studies in Germany.

## Austria

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	4	4	1	\$2,444	0	0	0	\$0.00
Exchange	3	1	3	\$0.00	0	0	0	\$0.00
FMS	15	11	11	\$49,658	0	0	0	\$0.00
Regional Centers	9	9	7	\$23,079	0	0	0	\$0.00

<b>Totals:</b>	<b>35</b>	<b>29</b>	<b>23</b>	<b>\$75,181</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>\$4,000</b>

Austria, despite its declared official neutrality, remains an important European defense and security partner for the United States. Austria approves approximately 16,000 U.S. military over-flights per year, as well as an average of 30-40 ground transits a week in support of U.S. forces stationed in Europe. It is an active participant in United Nations, European Union and NATO-led peacekeeping and humanitarian operations around the world, and the United States continues to encourage Austria to enhance and expand its military contributions further. Austria currently has more than 1,300 military personnel deployed overseas: 293 soldiers in operation ALTHEA European Union Force (EUFOR) in Bosnia; a 556-man mechanized infantry battalion to the NATO led Kosovo Force (KFOR); one staff officer to International Security Assistance Force (ISAF) in Afghanistan; and 372 soldiers to the UN Disengagement Observer Force (UNDOF) in the Golan Heights. In 2008, Austria deployed 160 soldiers to Chad as part of the EUFOR humanitarian mission to guard refugee camps near the border with Sudan. This mission ended in December 2009.

Training via Foreign Military Sales (FMS) and the Combating Terrorism Fellowship Program (CTFP), Professional Military Education (PME) opportunities, as well as engagement in DoD's Regional Centers and the Service Academies remain a critical tool for the United States to ensure Austria is engaged in international security efforts and that it is militarily capable of contributing to coalition operations.

Public Law 104-164 prohibits the United States from providing Foreign Military Financing (FMF) or International Military Education and Training (IMET) to certain high-income countries, including Austria. Therefore, Austria procures training for its Ministry of Defense officials on a cash basis, through FMS. Much of the technical training provided is in direct support of U.S. equipment sales to Austria; this includes training related to its fleet of nine Black Hawk helicopters. The Austrian armed forces are also eager to benefit from United States military experience and routinely send personnel to U.S. training events, particularly in the area of medical support and electronic warfare.

Despite its status as a self-payer, Austria continues to recognize the value of sending its personnel to various PME courses, including the U.S. Army and Air Force Staff and War Colleges, Regional Centers, as well as through a military cadet exchange program. These opportunities add an important political dimension to our military-to-military contacts and improve Austrian understanding of the social and economic factors that affect our relationship. In addition, PME promotes understanding of U.S. strategy, doctrine, leadership and tactics in the deployment of allied resources across the entire spectrum of international conflict.

## Azerbaijan

<b>Totals:</b>	<b>912</b>	<b>871</b>	<b>109</b>	<b>\$2,145,615</b>	<b>40</b>	<b>40</b>	<b>1</b>	<b>\$205,000</b>

Azerbaijan is a key partner of the United States in overseas contingency operations. Its cooperative efforts include civilian and military contributions to international efforts in Afghanistan, including contributing personnel to the NATO-led International Security Assistance Force (ISAF). Azerbaijan is a critical hub on the cargo supply line to Afghanistan, and has granted blanket over-flight rights for U.S. aircraft en route from Central Europe to the Middle East and Afghanistan. Azerbaijan has also contributed personnel to Operation Iraqi Freedom (OIF) and Kosovo Force (KFOR).

Our long-term security cooperation objectives are aimed at enhancing this mutually beneficial partnership by increasing Azerbaijan's ability to operate with coalition forces, secure its own borders and energy resources, interdict the flow of transnational threats across the Caspian Sea to the West, and promote institutional reform and democratization. To this end, we intend to take advantage of key defense engagement opportunities with Azerbaijan to improve not only their maritime domain awareness, but also their maritime response capability and to continue to improve the interoperability of the Peacekeeping Battalion as they participate in ISAF operations. The U.S. will use International Military Education and Training (IMET) to continue the education of junior military officers and border security forces in U.S./NATO tactics and procedures to ensure greater interoperability in the field and foster a generational shift in the way the Azerbaijani officers view Western concepts of a more professional, civilian-controlled military.

Azerbaijan's participation in IMET-funded training also exposes it to U.S. values and culture. The Regional Defense Combating Terrorism Fellowship Program (CTFP) program is also aimed at this objective, and additionally serves as a means for educating young Counterterrorism (CT) policy-makers on the benefits of Western-style institutional reforms. Foreign Military Financing (FMF) has been used to enhance the capabilities of Azerbaijan's peacekeepers to serve in coalition operations, as well as to enhance the capabilities of the Azerbaijani Navy and Air Force. The Oklahoma National Guard has provided training to Azerbaijan's military forces since becoming Azerbaijan's partner in the State Partnership Program in 2002. All of these initiatives are part of a broader U.S. effort to promote regional stability, democracy, and institutional reform within Azerbaijan.

Prior to 9/11, Section 907 of the FREEDOM Support Act prohibited most USG assistance to the Government of Azerbaijan. After 9/11, Congress granted the President the authority to waive section 907 on an annual basis. The President exercised this authority for the first time in 2002 and has continued to do so, most recently in February 2010. The Administration carefully reviews all security assistance with Armenia and Azerbaijan to ensure that it does not disturb the military balance between the two nor undermine efforts for a peaceful resolution of the Nagorno-Karabakh conflict.

### **Volume I Section III-III - Europe**

In FY 2010, Azerbaijani officials plan to continue participating in George C. Marshall European Center for Security Studies conferences and courses. U.S. military relations in Azerbaijan are in the development stage, but Azerbaijan has demonstrated a strong level of support for the U.S. fight against terrorism efforts, to include vital exchanges of information on international terrorism. CTFP has proven a vital tool for increasing positive results from this extensive cooperation, and it continues to help Azerbaijan build the institutional tools necessary to withstand threats posed by international terrorist organizations working in Central Asia and the Caspian Region, as well as the destabilizing influences from neighboring Iran.

Azerbaijan has sent its officials to numerous courses, to include English language training, civil-military relations, terrorism security studies, response to terrorism, and diver and underwater explosive ordnance disposal training. In the coming years, the Office of Defense Cooperation in Baku hopes to increase the number of Azerbaijani CT planners and mid-level policy makers that attend CTFP training in order to make local institutions stronger, and continue robust bilateral cooperation with the United States.

**Belarus**

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	5	5	3	\$1,210	0	0	0	\$0.00
Service Academies	1	1	1	\$70,561	0	0	0	\$0.00
<b>Totals:</b>	<b>6</b>	<b>6</b>	<b>4</b>	<b>\$71,771</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States has an interest in seeing Belarus evolve into a state characterized by democratic rule and respect for human rights. As part of the U.S. Selective Engagement Policy, adopted after the illegal electoral referendum in Belarus in 1996, the primary goal of U.S. foreign assistance is to support the country's evolution into a democracy based on the rule of law and respect for human rights. Assistance programs work to increase the capacity of civil society, strengthen independent media, support private sector growth and the development of a free market economy, and encourage improvements in health and social services.

However, mid-level military officers and officials from the Ministry of Foreign Affairs are being nominated and sent to attend George C. Marshall European Center for Security Studies courses. This is being done in order to expose potential future leadership of the respective ministries to democratic ideals and educate them on the proper interaction of the various power structures in a democracy. The Department of State also allows representatives from civil society and the democratic opposition to participate to ensure the entire spectrum of political society is represented, trained, and offered the opportunity to exchange ideas and points of view.

## Bosnia & Herzegovina

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	42	40	10	\$176,157	0	0	0	\$0.00

GPOI	145	145	3	\$113,441	0	0	0	\$0.00
IMET-1	104	69	70	\$1,600,228	0	0	0	\$0.00
Regional Centers	176	176	31	\$233,972	0	0	0	\$0.00
<b>Totals:</b>	<b>660</b>	<b>623</b>	<b>115</b>	<b>\$2,302,245</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

In 2005, Bosnia and Herzegovina (BiH) enacted a comprehensive defense reform legislative package that abolished the entity armies and Ministries of Defense (MODs) and created a unified, multi-ethnic, professional command and control structure. The legislation was drafted by the High Representative's Defense Reform Commission, which issued a report advocating far-reaching defense reforms that would enable BiH to become a credible candidate for full NATO membership. Many of those reforms remain incomplete. With passage of the defense reform law, U.S. military assistance is now being provided in direct support of implementation of its reforms, to include establishment and training of the MOD, Joint Staff, Operational Command, and other state-level assets, and integration of entity defense institutions and assets into the state structure. Additional assistance is being directed to assist BiH in deploying units to foreign peacekeeping missions, including plans to deploy infantry in support of ISAF in October 2010.

Training Bosnian forces through the International Military Education and Training (IMET) program emphasizes the professional development of junior and mid-level officers (Army advanced courses and command and general staff colleges), and non-commissioned officers (Army Sergeants Major Academy). Training is also provided for mid- to upper-level officials in the defense sector. Training activities support the development of the new state Ministry of Defense and Joint Staff, and other state-level defense structures in furtherance of efforts to meet NATO's requirements for Partnership for Peace (PfP) membership.

One of the key objectives of U.S. assistance is to help BiH develop the capability to work with other European and NATO nations in maintaining regional stability and participating in peacekeeping operations. Knowledge of English is fundamental to this effort and the Regional Defense Combating Terrorism Fellowship Program (CTFP) has provided the funding needed to obtain the equipment to support this effort. This will help to create a cadre of senior and mid-level officials capable of working with the United States in combating violent extremism. The U.S. country team is coordinating the efforts of all agencies in support of Counterterrorism (CT) training. BiH used CTFP funding for a program on terrorism security studies and a Mobile Education Team (MET) on civil-military relations. IMET-funded training focused on English language training, officer and non-commissioned officer Professional Military Education (PME), and specialized skills training. The goal is to educate the leadership of BiH CT organizations at the highest level possible. Violent extremism is a growing concern in BiH, and responsible organizations must learn how to identify terrorists and their networks. In addition, they also need to understand the legalities of CT and how to eliminate terrorist activity in BiH effectively.

BiH civilian defense officials have received U.S.-funded instruction at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

<b>Totals:</b>	<b>582</b>	<b>559</b>	<b>83</b>	<b>\$1,174,493</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>\$557,000</b>

Helping Croatia fully integrate into Euro-Atlantic institutions is vital to ensuring the long-term stability of Croatia and the entire region. Our military training efforts continue to be a valuable tool in pursuing these objectives. Croatia signed the Adriatic Charter with Albania and Macedonia in 2003, pledging to work together towards the goal of NATO membership. This effort culminated in Croatia receiving a membership invitation at the NATO Summit in Bucharest in April 2008, and then officially joining the NATO alliance on April 1, 2009. During this time, Croatian contributions to the International Security Assistance Force (ISAF) had steadily grown, from a ceiling of 200 troops in 2007 to 320 in 2010. Croatia had also deployed the only non-NATO Operational Mentoring and Liaison Team (OMLT) in ISAF from 2006 to 2009. By August 2010, Croatia plans to send an increased number of OMLTs, POMLTs and trainers to ISAF.

Previous International Military Education and Training (IMET) programs had supported Croatia's NATO ambitions and helped complete the accession process while fostering appreciation among Croatian military officials for the proper role of the armed forces in a democracy. IMET-trained officers helped initiate implementation of basic defense reforms, including enhanced civilian control of the military.

In FY 2003, the IMET program focused on the professionalization and democratization of the Croatian armed forces. In FY 2004, 2005, and 2006, IMET funds were allocated but reprogrammed because Croatia was prohibited by § 2007 of the American Service-members' Protection Act (ASPA) of 2002 (22 U.S.C. 7426) from receiving military assistance. Since ASPA was amended to remove the prohibition on IMET, Croatia began receiving IMET in FY 2007. Croatia is the only ISAF partner and new NATO member that accomplished its transformation and financed ISAF commitments without Foreign Military Financing (FMF) and IMET.

Croatia is committed to implementing the military reforms expected of a full-fledged NATO member. On January 1, 2008 Croatia abandoned military conscription and finished its transition to a fully professional army. IMET helps broaden and deepen current attitudinal changes in the Croatian military and helps build a cadre of officers and non-commissioned officers throughout the command structure ready to implement restructuring with the goal of creating a national armed forces fully integrated into NATO's collective security and expeditionary missions. It is crucially important to increase IMET and FMF funding to Croatia as NATO's newest member, particularly due to the effect of ASPA sanctions on both programs. In FY 2009-2010, IMET-funded programs will continue to focus on the objectives described above so as to continue professionalization of the armed forces, as well as assist the Ministry of Defense in meeting its NATO goals. This effort would include addressing specific NATO-member goals, such as deployable niche capabilities and personnel resource management. Foreign Military Sales (FMS) and Direct Commercial Sales (DCS) would supplement FMF to enhance NATO-compatible communications (through the continued purchase of tactical radios), interoperability, and expanding support for English language training.

## **Volume I Section III-III - Europe**

Croatian soldiers and civilian defense officials also have received U.S.-funded instruction at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

## Cyprus

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	25	25	1	\$59,787	0	0	0	\$0.00
<b>Totals:</b>	<b>25</b>	<b>25</b>	<b>1</b>	<b>\$59,787</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Cypriot officials work in partnership with the United States in many areas of national security concern. Established policy and Arms Export Control Act regulations preclude U.S. military assistance to entities on the island, which increases the militarization of the island. On a limited basis the Department of Defense has received approval for engagement activity with the Republic of Cyprus, including U.S. Coast Guard training related to port security. This activity is clearly in the U.S. national interest and does not increase the military capabilities of either side. There are plans to repeat this successful engagement in FY2010.

## Finland

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	2	1	\$5,054	0	0	0	\$0.00
FMS	63	47	24	\$1,047,689	0	0	0	\$0.00
Regional Centers	5	5	3	\$4,954	0	0	0	\$0.00
<b>Totals:</b>	<b>70</b>	<b>54</b>	<b>28</b>	<b>\$1,057,697</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Although not a NATO member, Finland is an active participant in the Partnership for Peace (PfP) program and a solid partner with the United States in many areas of national security concern. It is actively engaged in the Balkans, where Finland distinguished itself as the first non-NATO nation to lead a multi-national NATO brigade in Kosovo. Currently Finland has 247 troops in Kosovo. Troop strength is planned to be reduced to 200 in 2011 and to 100 in 2012. Finland also contributes six troops to the EU operation in Bosnia.

Finland is supporting International Security Assistance Force (ISAF) operations in Afghanistan with a force of about 80 with a Provincial Reconstruction Team (PRT) and about 20 additional members in other roles. The Government of Finland (GoF) looked to increase troop presence in 2008, with the aim of staffing at least one Operational Mentor and Liaison Team (OMLT) in 2008 and a goal of including perhaps 20 to 30 more military into the OMLT system in 2009. This did not occur, due mainly to budget constraints, but it remains a possibility. Finland actively assists the three Baltic countries' efforts to achieve military interoperability with the West, although Finland has significantly cut back on this support since the Baltics entered NATO in April 2004. Geographically, Finland shares a border with Russia, giving it strategic importance beyond its size.

With respect to the European Security Defense Identity (ESDI), Finland supports a strong EU crisis management capability where NATO is not engaged and which does not duplicate NATO structures. It is a great proponent of interoperability. In defense trade matters, Finland supports the trans-Atlantic link, although it also supports the European Defense Agency (EDA), and has a stated policy to buy defense products from Finnish industry first, Europe second, and the rest of the world third.

Most U.S. assistance is designed to promote interoperability, an essential element to increasingly close cooperation on defense matters, not only with Finland, but also worldwide. Finland annually sends 20 to 40 military students to the United States for various training opportunities. Although a relatively small program, U.S. training is Finland's largest source of foreign training. The Finnish military spends its training money carefully, and sends only handpicked candidates to the United States. Most of the courses students attend are technical in nature. They are expected to return to Finland and pass their knowledge on in a "train the trainer" capacity. U.S. training significantly helps Finland's NATO interoperability.

Finland spent \$3 billion to buy a fleet of 63 U.S. F/A-18 Hornet fighters to provide air defense for the country, taking delivery of the last one in 2001. The Finns are now investing over a billion dollars more in Foreign Military Sales (FMS) purchases to further upgrade the capabilities of those fighters.

## Georgia

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Georgia has the broadest security partnership with the United States and NATO in the South Caucasus and will become the second largest non-NATO contributor to ISAF in 2010. Its security relationship with the United States and Allied forces has continued to grow, as evidenced by combat troop deployments to Operation Iraqi Freedom (OIF), the International Security Assistance Force (ISAF) in Afghanistan, and its past support to NATO's Kosovo Force (KFOR). Georgia enjoys generally cooperative relationships with its southern neighbors, Turkey, Armenia, and Azerbaijan; however, Georgia's relations with Russia have not improved since the 2008 and continue to be tense. Georgia's foreign policy and domestic reforms are focused on Euro-Atlantic integration through pursuit of democratic reform, strategic partnership with the United States, and NATO membership.

Russia's recognition and militarization of the separatist regions of Georgia and refusal to abide its commitments under the 2008 ceasefire agreement demonstrate a continued effort to undermine Georgian sovereignty and territorial integrity. The U.S. continues to support Georgia's sovereignty, territorial integrity, and economic development. Georgia has taken positive steps toward political, democracy and governance, and economic reforms. Georgia's success ensures the continued viability of an alternate route for Caspian Basin oil and gas to reach markets in the West. United States' support for broader defense reforms enhances Georgia's progress toward NATO membership, builds effective state institutions and enhances Georgia's continued ability to support coalition efforts through expeditionary deployments.

Security cooperation between the United States and Georgia is accomplished using the Regional Defense Combating Terrorism Fellowship Program (CTFP), Foreign Military Financing (FMF), International Military Education and Training (IMET) funds, and other U.S. assistance programs. U.S. assistance is focused on supporting Georgia's defense reform and modernization, with a particular focus on institutional capacity building and enhancing Georgia's interoperability with NATO. An additional focus of assistance is border control and law enforcement.

In September 2009, the U.S. initiated the Georgia Deployment Program-ISAF (GDP-ISAF), which is a two-year training program that will develop a total of four Georgian battalions capable of conducting distributed operations in a counterinsurgency environment. Under GDP-ISAF, Georgia will send a total of four seven-month rotations to ISAF with no caveats; the U.S. Marine Corps provides pre-deployment training to each deploying unit. The Georgian 31st Battalion will deploy to Afghanistan as part of ISAF in Apr 2010. The second rotational battalion (32<sup>nd</sup>) has a tentative deployment date of 1 October 2010. Training and equipping the units is executed with FMF, Coalition Support and 1206 funds.

Georgian soldiers and civilian defense officials have also received U.S.-funded instruction at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses,

**Volume I Section III-III - Europe**

conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

## Ireland

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Exchange	1	1	1	\$0.00	0	0	0	\$0.00
FMS	7	7	7	\$140,610	0	0	0	\$0.00
Regional Centers	4	4	2	\$500	0	0	0	\$0.00
Service Academies	1	1	1	\$70,561	0	0	0	\$0.00
<b>Totals:</b>	<b>13</b>	<b>13</b>	<b>11</b>	<b>\$211,671</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Although not a NATO member, Ireland is an active participant in UN peacekeeping missions and in the NATO Partnership for Peace (PfP) programs, working as a solid partner with the United States in many areas of national security concern. Ireland currently has roughly 800 service members, approximately 94% of the limit authorized under Irish law, deployed to various peacekeeping and observer missions worldwide. In FY 2009, Ireland's largest participation was in Chad. The overall EU contingent in Chad is led by an Irish general. Ireland's contribution consists of approximately 400 troops, or half of Ireland's worldwide deployments. During FY2009, Irish service members also served in operations in:

- Afghanistan as members of the NATO International Security Assistance Force (ISAF)
- Lebanon as part of the United Nations Interim Force in Lebanon (UNIFIL)
- Bosnia Herzegovina: within the European Union Force in Bosnia-Herzegovina (EUFOR BiH)
- Kosovo: in the NATO-led Kosovo Force (KFOR)

Additionally, Ireland has in recent years deployed smaller numbers of personnel to:

- The United Nations Truce Supervision Organization (UNTSO)
- The UN Headquarters in NY (UNNY)
- The UN Observer mission in Western Sahara (MINURSO)
- United Nations Mission in the Central African Republic (CAR) and Chad (MINURCAT)
- The UN Mission in Kosovo (UNMIK)
- The UN Observer Mission in the Congo (MONUC)
- The UN Observer Mission in the Ivory Coast (UNOCI)
- The Organization for Security and Cooperation in Europe (OSCE)
- The European Community Monitor Mission (EUMM)
- The European Union (EU) Military Staff
- The European Union Military Observers (EUMO) with African Union Peacekeepers in the Darfur area of Sudan

As a member of the European Union, Ireland also participates in the European Security and Defense Policy. Training provided to Ireland is intended to increase interoperability and to strengthen the capabilities of the Irish Defense Forces in carrying out these duties and responsibilities.

On February 17, 2008, Kosovo declared its independence and its new constitution took effect June 15, 2008. As part of the continuing international role in Kosovo, an international military presence (NATO's Kosovo Force (KFOR)), will continue to contribute to a safe and secure environment and freedom of movement. Additionally, it will also oversee and train a small, lightly armed Kosovo Security Force (KSF) and civilian Ministry for the KSF.

In FY 2009, Regional Defense Combating Terrorism Fellowship Program (CTFP) funds were used to provide training on civil-military relations to 31 Kosovars. Additionally, 53 students from Kosovo participated in seminars and other courses held at, or hosted by the George C. Marshall European Center for Security Studies. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

## Macedonia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	38	37	15	\$541,554	0	0	0	\$0.00

Non-SA, UC, JCET	50	50	1	\$175,476	0	0	1	\$310,000
Regional Centers	88	88	24	\$219,631	0	0	0	\$0.00
<b>Totals:</b>	<b>238</b>	<b>223</b>	<b>72</b>	<b>\$1,696,304</b>	<b>0</b>	<b>0</b>	<b>1</b>	<b>\$310,000</b>

Macedonia is a cooperative security partner of the United States and NATO in Southeastern Europe and in U.S. overseas contingency operations. Its security relationship with the United States and Allied forces has continued to grow, as evidenced by combat troop deployments to Operation Iraqi Freedom (OIF), the International Security Assistance Force (ISAF) in Afghanistan, the European Force in Bosnia-Herzegovina (EUFOR), and its support to NATO's Kosovo Force (KFOR). A primary U.S. goal in Macedonia is to support its Euro-Atlantic integration. The Macedonian Government has stated its commitment to institute reforms and strengthen its democratic institutions within the context of the Ohrid Framework Agreement (FWA), which ended the 2001 civil war in Macedonia. Following the 2008 NATO Summit and re-confirmed at the 2009 Summit, the Alliance deemed Macedonia ready for membership following the resolution of its name dispute with neighboring Greece. In 2009, the European Union favorably assessed Macedonia's progress toward meeting EU bench marks but did not open accession talks..

U.S. military training efforts are an important tool in furthering Macedonia's Euro-Atlantic integration. In particular, training through the International Military Education and Training (IMET) program, the State Partnership Program with Vermont National Guard (VNG), Regional Defense Combating Terrorism Fellowship Program (CTFP), and Foreign Military Sales advance U.S. goals of Euro-Atlantic Integration and assist in developing capacities and capabilities that allow Macedonia to make valuable contributions to U.S. or Ally led contingency operations. As a direct result of these programs, Macedonia deployed over 1,000 soldiers in support of OIF and currently has 242 soldiers, approximately one third of whom are directly embedded with the VNG, deployed in support of ISAF - per population capita in the top five of all ISAF contributing nations. The majority of these soldiers have benefited from U.S. professional military education training courses, English language training, and achieved a higher level of interoperability through U.S. FMS purchased equipment. Macedonia plans to increase its ISAF contribution with 23 Institutional Police Trainers in 2010. Besides very visible support for contingency operations, IMET, CTFP, GCMC and trained officers occupy junior, mid-level, and senior level command and staff positions where they continue to drive reform and NATO interoperability processes. For instance, the Macedonian Armed Forces Training Command has developed and initiated Non-Commissioned Officer training courses in 2010, largely through the efforts of U.S. IMET trained Sergeant Majors (SGM), who currently serve as SGM of the Army and in many battalion and brigade units. In FY2010, we expect to continue to use funding to support Macedonia's achievement of its NATO partnership goals which address additional structural reforms as well as development and certification of NATO declared deployable units.

The George C. Marshall European Center for Security Studies in Germany continues to provide U.S.-funded training to civilian and uniformed Macedonian Defense and national security affairs officials. Through seminars and conferences, the Marshall Center instructs Central and Eastern European students in civil-military relations, ethnic conflict prevention, anticorruption measures, and defense economics. In 2010, Sixty-four Macedonians participated in Marshall Center programs either at regional seminars or resident courses at the Marshall Center in Garmisch.

## Malta

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$10,861	0	0	0	\$0.00
DOHS/USCG	105	105	4	\$0.00	0	0	0	\$0.00
IMET-1	10	7	10	\$81,695	0	0	0	\$0.00
Regional Centers	2	2	2	\$3,927	0	0	0	\$0.00
<b>Totals:</b>	<b>118</b>	<b>115</b>	<b>17</b>	<b>\$96,483</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Malta is strategically located in the central Mediterranean. It is a key forward boundary that bridges Europe, North Africa, and the Middle East. One-third of all international maritime traffic passes through Maltese ports or waters. Malta has two large ports, including a regionally important container port (Freeport) and a major ship repair facility used regularly in the past by the U.S. Navy. The threat of Weapons of Mass Destruction (WMD) and dual-use material transshipment through the Maltese Freeport is potentially serious. In 2004, the Islamic Republic of Iran Shipping Lines (IRISL) established the Freeport as its Mediterranean hub; the U.S. works closely with Malta to ensure the effective implementation of United Nations Security Council (UNSC) Resolutions pertaining to sanctions against Iranian entities such as IRISL, and Malta has successfully and effectively interdicted WMD-related cargo. Malta is also close in proximity to other states of interest (specifically Libya and Algeria).

Following national elections in March of 2008, Malta reactivated its membership in Partnership for Peace (PfP). Malta did not participate in any PfP exercises or training in 2009, but does intend to in 2010. Malta has participated in European Union (EU) and United Nations (UN) missions. The Armed Forces of Malta (AFM) have already contributed two soldiers to the EU Observer Mission in Georgia and takes part in the UN Peacekeeping Operations (PKO) in both Lebanon and the Balkans; participation in the EU's anti-piracy operations is planned for 2010. Many AFM deploying soldiers attend IMET funded courses in the U.S.

Malta is an active partner with the United States in combating terrorism and WMD proliferation. Malta also serves to promote regional security and stability by cooperating closely on a wide range of security-related activities with the United States and by sharing information on persons and activities of interest. After the entry into force of the U.S.-Malta Proliferation Security Initiative Ship-Boarding Agreement, Malta hosted the first Proliferation Security Initiative (PSI) table top exercise.

Funding through the Regional Defense Combating Terrorism Fellowship Program (CTFP) has complemented activities carried out under the IMET and Foreign Military Financing (FMF) programs in Malta, particularly in the development of effective Maritime Law Enforcement operations capabilities oriented toward detection and interdiction of WMD and dual-use materials transiting Maltese ports and waters. Malta received \$100,000 in FMF in 2009 that went towards spare parts for the Protector Class patrol vessels purchased with previous FMF funds. Malta will receive an earmarked appropriation of \$455,000 in FMF for 2010 which will be used toward aviation support.

Malta acknowledges its armed forces' limitations in the area of counterterrorism and has actively sought U.S. assistance in resolving recognized shortcomings. The current Maltese focus for Counterterrorism (CT) efforts is on increasing response capability to terrorist activity. This includes developing the capability to identify, manage, and respond to terrorist threats and logistics activities.

## Moldova

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	11	10	6	\$83,431	0	0	0	\$0.00

Service Academies	0	0	0	\$0.00	2	2	1	\$4,000
<b>Totals:</b>	<b>153</b>	<b>122</b>	<b>84</b>	<b>\$1,344,332</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>\$4,000</b>

Moldova has developed a cooperative security relationship with the United States, both bilaterally in such areas as nonproliferation and multilaterally through such avenues as NATO's Euro-Atlantic Partnership Council (EAPC). A new western-leaning Moldovan government was elected in 2009 which seeks deepened European integration and institutional reform along Euro-Atlantic lines as its primary foreign policy goal. Moldova has worked to enhance its defense relationship with the U.S. in 2010. Moldova's military is active in Partnership for Peace (PfP) activities, despite being short on resources as the country's economy continues to struggle. The Moldovan government continues to focus on peacefully reintegrating the separatist territory of Transnistria.

U.S. goals in Moldova are regional stability, economic prosperity, and the promotion of democracy. U.S.-funded military training is an important element of the strategy employed to meet these goals. U.S.-funded PfP activities contribute to regional stability by providing transparency regarding intentions and capabilities of neighboring states. These activities also lead to healthy relationships between regional military members helping erode feelings of suspicion that may exist between nations. Emergency response training provided by the North Carolina National Guard to Moldovan military units helps safeguard economic well being of the population from natural and man-made disasters. Finally, International Military Education and Training (IMET) instills a strong belief in democratic values and civilian control of the armed forces through direct training and positive examples at U.S. institutions.

Numerous Moldovan officers receive training under the IMET program, with training concentrated in developing the operational skills of officers in a wide range of specializations. Moldovan signal, medical, engineer, and finance officers, as well as air defense artillery, armor, and infantry lieutenants and captains have been trained under the IMET program. Moldova has over 320 IMET graduates to date (nearly a fifth of its officer corps), with senior officers having attended the Army and Air Force Command and General Staff Colleges, the Army War College, and the National War College. Moldovan IMET attendees also have taken more universally applicable classes, such as English language and language instruction, civil-military relations, defense resources management and planning, and information systems management. IMET funds were also used to upgrade the six English language laboratories that are operated by the Ministry of Defense. Enhanced International Peacekeeping Capabilities (EIPC) funds were used to help Moldova establish a Peacekeeping Training Center at the Ministry of Defense Headquarters in November 2006. In addition to IMET, the Moldovan military uses Foreign Military Financing (FMF) funds to obtain NATO-compatible equipment, such as communication systems, automation equipment, and various unarmored wheeled vehicles.

In 2004, Moldova participated in a United States European Command (USEUCOM)-sponsored National Defense Assessment, during which the Moldovan National Army granted unprecedented openness and transparency to U.S. military experts. Based on the Assessment, the Moldovans continued defense reform efforts in 2005 and 2006 with the assistance of the Center for Civil-Military Relations out of NPS in Monterey, California. U.S.-assisted defense reform initiatives continued in 2008-2009, resulting in the creation of a National Security Concept and the beginning of the Strategic Defense Review: a NATO Individual Partnership Action Plan (IPAP) objective. All future defense reform will be tied into chapter two of Moldova's IPAP with NATO, which they signed in 2006.

**Volume I Section III-III - Europe**

Moldovan officials benefit from instruction at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense and security personnel for countries throughout Central and Eastern Europe. To date, approximately 173 Moldovans have completed Marshall Center resident programs.

## Republic of Montenegro

Since its independence in 2006, Montenegro has placed a strong priority on developing its capacity as a cooperative security partner of the United States and NATO and developing its defense and military structures in close collaboration with the United States. Montenegro concluded a number of security and technical military agreements with the United States, including the Status of Armed Forces Agreement (SOFA) and the Acquisition and Cross Servicing Agreement (ACSA). U.S. funding supports our bilateral cooperation in areas such as destruction of small arms and light weapons. In an initial step to its growing contributions to U.S.-led and NATO operations, Montenegro donated \$1 million worth of arms and military equipment to the Afghan Army in August 2007. The Montenegrin Parliament has passed legislation governing the future deployment of Montenegrin soldiers in international missions.

In FY 2009:

- Montenegro trained a platoon in on-site security missions for deployment in FY 2010; the U.S. facilitated its preparation through providing English language and basic infantry training.
- The Maine National Guard is the State Partner for Montenegro and in FY 2009 carried out a robust program centered on enlisted Non-Commissioned Officers, and officer development.
- Officials from Montenegro also participated in a variety of seminar and executive training courses at the George C. Marshall European Center for Security Studies.

## Republic of Serbia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

As a result of democratic changes, advances in Euro-Atlantic integration, and progress in defense reform that culminated in Serbia's Partnership for Peace (PfP) membership as well as the signing of vital security agreements (most notably, a Status of Armed Forces Agreement (SOFA)), the USG took steps in 2006-2007 to establish a Security Cooperation Program with Serbia.

Fiscal Year 2010 witnessed extensive growth in the following programs:

- International Military Education and Training Program (IMET)
- Regional Defense Combating Terrorism Fellowship Program (CTFP)
- Warsaw Initiative Funding (WIF)
- Foreign Military Sales (FMS)

The Republic of Serbia has also shown a continuation of the existing involvement with the George C. Marshall European Center for Security Studies and the European Command's Military to Military program (most significantly Serbia's State Partnership Program (SPP) with Ohio). Additionally, the Serbian Ministry of Defense provided matching IMET funding in the form of a FMS blanket order training case to educate and train additional members of the Serbian Armed Forces.

## Russia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$3,250	0	0	0	\$0.00
Regional Centers	8	8	5	\$51,487	2	2	1	\$13,460
Service Academies	3	3	1	\$5,700	0	0	0	\$0.00
<b>Totals:</b>	<b>12</b>	<b>12</b>	<b>7</b>	<b>\$60,437</b>	<b>2</b>	<b>2</b>	<b>1</b>	<b>\$13,460</b>

The U.S.-Russia relationship is complex. Although disagreement remains on numerous issues, the U.S. and Russia are seeking to bolster cooperation in key areas such as preventing Weapons of Mass Destruction (WMD) proliferation (Russia participates in the Proliferation Security Initiative (PSI)), Counterterrorism (CT), and preventing the development of Iran and North Korea's nuclear programs. The U.S.-Russian military relationship deteriorated after the August 2008 conflict in Georgia. In the aftermath of that conflict, the U.S. suspended military-military engagement with Russia. We have since sought to improve relations with Russia and continue to seek ways to reinvigorate the U.S.-Russia relationship.

Russia's participation in the NATO-Russia Council (NRC), established at the Rome Summit in May 2002, deteriorated as a result of the conflict in Georgia. Russia suspended all military-to-military activities with NATO for at least the remainder of 2008, putting on hold programs that promote the ability of NATO and Russian forces to work side-by-side in the field to face the 21st century threats of terrorism and proliferation of weapons of mass destruction. NATO implemented a "no business as usual" approach to the NRC, and several projects were temporarily suspended. In the past, NRC programs have included civil emergency planning exercises, joint search and rescue exercises, counternarcotics training, and naval counterterrorist interdiction efforts. Russia has also continued, since December 2007, its unilateral suspension of implementation of the Conventional Armed Forces in Europe (CFE) Treaty, despite efforts by the U.S. and NATO Allies to resolve the impasse and preserve this important security regime.

Partnership for Peace (PfP) exercises provide opportunities for Russian officers to interact with U.S. and NATO counterparts. Russian officers can develop greater understanding of NATO doctrine and concepts of overseas contingency operations and the role of the military in a democracy. These exercises seek to increase cooperation between NATO and Russia and to reduce Russian fears that NATO threatens Russian security. Russia has contributed to Operation Active Endeavor (OAE) in the eastern Mediterranean Sea.

The International Military Education and Training (IMET) program received limited support from the Government of Russia (GoR) in FY 2008. Suspension of the Russian IMET program was lifted in October 2007; however, only one course (two participants) was accomplished in FY 2008. Additionally, the steadily decreasing IMET budget continues to limit the scope and goals of the program. Although the initial funding for FY 2008 was \$606,000, it was reduced in March to \$303,000. The overall program goals and focus continue to include professional military education, English language training, combating terrorism, Peacekeeping Operations (PKO), and medical cooperation.

Due to the August 2008 conflict in Georgia, the Russian IMET program was temporarily suspended by the Office of the Secretary of Defense (OSD). Although outstanding invitations were honored by the U.S., the GoR did not accept and/or attend an IMET funded program in FY09. For FY10, the Department of Defense and Ministry of Defense agreed that all future mil-to-mil engagements would be conducted on the principles of parity and equality. Concerning parity, the GoR is expected to pay for all participation in military courses or training to include regional security centers. As pertains to equality, activities with the GoR are to be done in partnership. ODC Moscow continues to encourage Russian self-paid participation in Professional Military Education, specialized military training and regional security centers.

Military medical cooperation and military legal training are areas of historically good cooperation with tangible results will be continued on a self-pay basis. Although it may take time to adjust, it seems that the GoR prefers to operate with respect to

**Volume I Section III-III - Europe**

the OSD policy. Funding and length of courses are often cited by RF agencies as reasons for non-participation. However, the GoR has historically not taken full advantage of IMET funding. When the GoR desires to take part in U.S. courses and training, they can come up with the funds. The GoR does participate in security conferences as an equal partner. For greater GoR participation, shorter courses and training are better, since GoR personnel are reluctant to leave their positions for long periods. IMET funds set aside for Russia for FY10 will be returned July 2010.

Non-SA, UC, JCET	0	0	0	\$0.00	20	20	1	\$280,000
Regional Centers	5	5	5	\$12,453	0	0	0	\$0.00
<b>Totals:</b>	<b>78</b>	<b>70</b>	<b>34</b>	<b>\$1,185,756</b>	<b>20</b>	<b>20</b>	<b>1</b>	<b>\$280,000</b>

Although Sweden is not a member of NATO, it is an active participant in the Partnership for Peace (PfP) program and a solid partner with the United States in many areas of national security concern. For example, Sweden is an energetic player in the Balkans, was one of the first with troops on the ground in Kosovo, and provides support to the International Security Assistance Force (ISAF) in Afghanistan. Sweden is a staunch supporter of NATO's Open Door and assisted the three Baltic countries with military interoperability issues. Sweden also donated equipment to outfit troops in the Baltics.

With respect to the European Security Defense Identity (ESDI), Sweden supports a strong European Union (EU) crisis management capability where NATO is not engaged and which does not duplicate NATO structures. The Swedish government committed to lead an EU battle group (providing 1100 of the 1500 soldiers) that was available in 2008. In FY 2007, Sweden paid for U.S. Professional Military Education (PME) opportunities at the Army career courses for infantry captains, a psychological operations officer course, and combat casualty care and advance trauma life support training. An initiative in 2007 to launch an exchange between the U.S. Army's Command and General Staff College and the Swedish National Defense College initially stranded on the difficulty of finding the right candidates, and has not since been re-addressed. More fundamentally, however, long-term U.S.- Swedish exchanges are hindered by the inability to reconcile U.S. and Swedish regulations concerning the legal status of U.S. military students in Sweden.

Sweden also remains a great proponent of interoperability and defense cooperation. It is important to continue prompting close cooperation on security issues between Sweden and the United States.

Sweden has benefited from seminars at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

## Switzerland

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	34	18	34	\$543,075	0	0	0	\$0.00

<b>Totals:</b>	<b>109</b>	<b>93</b>	<b>39</b>	<b>\$551,051</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States and Switzerland work closely to advance human rights, democracy, nonproliferation, and other issues of global concern. A traditionally neutral democratic nation, Switzerland has focused on its ability to participate in democracy-building and peacekeeping exercises since joining NATO's Partnership for Peace (PfP) in 1996. Its PfP goals focus largely on enhancing interoperability of forces and capabilities that may be declared available for PfP activities, but within self-imposed limits on participation related to the Swiss concept of neutrality.

Switzerland participates in the NATO led Kosovo Force (KFOR) with one combat service support company (logistic service) of approximately 220 plus two medium transport helicopters and some 25 personnel plus two medium transport helicopters to European Union Force (EUFOR) in Bosnia-Herzegovina. Approximately 20 officers also serve as UN observers and five officers are deployed with the Neutral Nations Supervisory Commission in Korea. Some specialized military personnel can be called up at short notice for humanitarian operations, as was done for an unarmed task force deployed to Sumatra in January/February 2005 (some 50 personnel and three medium transport helicopters). Switzerland regularly supports PfP Trust Fund projects in order to reduce stockpiles of arms, mines, and munitions. It has done so in Albania, Serbia, Montenegro, Azerbaijan, Kazakhstan, Georgia, and Ukraine. Switzerland maintains three centers focused on its security goals:

- The Geneva Center for Humanitarian Demining
- The Geneva Center for Security Policy
- The Geneva Center for the Democratic Control of Armed Forces

A strong, stable and secure Ukraine is important for the development of a Europe that is whole, free, and at peace. Due to Ukraine's size and its geo-political importance, the United States maintains a close strategic partnership with Kyiv. The United States and Ukraine began the Strategic Partnership in 2008, and held the first Strategic Partnership Commission meeting in December, 2009. In February 2010, Viktor Yanukovich was elected President, defeating the leaders of the 2005 Orange Revolution. While President Yanukovich's stated foreign policy is to balance the goals of EU integration, strategic partnership with the U.S., and improved relations with Russia, overtures to Moscow led some media and opposition figures to speculate that Ukraine is 'turning East.' Despite this, robust cooperation at the working level and within the context of the NATO-Ukraine Commission - and particularly, through implementation of the Annual National Program - continues. The United States seeks to continue its engagement and Strategic Partnership with Ukraine, and to work for the development of an independent, democratic Ukraine with a market-oriented economy. The U.S. seeks to reinforce the democratic gains made over the past several years and encourage Ukraine to continue its stated goal of integrating with Europe. U.S.-funded military training efforts are a crucial part of this effort.

Ukraine is a strategic partner of the United States in the former Soviet space and an important contributor to global and regional security. Ukraine actively participates in many NATO-led operations:

- NATO Training Mission in Iraq (NTM-I)
- International Security Assistance Force (ISAF) in Afghanistan
- NATO's Kosovo Force (KFOR)

Ukraine has deployed troops in support of U.S. operations in the Multi-National Forces - Iraq (MNF-I) and the UN missions in, Sierra Leone, Liberia, Lebanon, and in other UN observer groups. Ukraine's government has supported a commercial contribution of airlift for NATO's support operations in Darfur, Sudan, and has provided air corridors and airlift for troops and supplies from European partners participating in the International Security Assistance Force (ISAF) in Afghanistan. In Afghanistan, it has also provided three doctors for a Provincial Reconstruction Team (PRT) and one headquarters staff officer.

## Volume I Section III-III - Europe

Contrary to the NATO membership aspirations that former President Yushchenko pursued, the Yanukovich Administration legislated that Ukraine will not seek NATO membership. The legislation also explicitly states that practical cooperation with NATO will continue. In addition, it seemingly precludes Ukraine from joining the Collective Security Treaty Organization (CSTO). Highlights of Ukraine's relationship with NATO include its 1994 entry into the Partnership for Peace (PfP) - the first CIS country to do so, the signing of the Charter on Distinctive Partnership in 1997, and the establishment of the NATO-Ukraine Commission (NUC) in 2002. Ukraine requested the initiation of the Alliance's Membership Action Plan (MAP) in 2008. At the Bucharest Summit in April 2008, Allies welcomed Ukraine's aspirations for membership in NATO, and agreed that it will become a member of NATO. At the December 2008 Foreign Ministerial, Allies deferred the decision on MAP, and instead agreed to increase assistance to reform efforts in Ukraine, working within the existing NUC. Allies also agreed to allow Ukraine to develop an Annual National Program (ANP). The ANP is a key element of the MAP process, as it helps an aspirant to establish reform objectives over a range of issues, including political, economic, and defense, and obtain in depth assessment and feedback from Allies.

Numerous bilateral and multilateral military activities took place between NATO member countries and Ukraine in 2009. Short term military priorities and assistance included work to transition to a NATO-compatible defense planning system, manage the significant manpower cuts required through the Armed Forces, improve areas of training, education and social security, and improve operational readiness and capability for Peacekeeping Operations (PKO). The effectiveness of civil and democratic control of Ukraine's Armed Forces was advanced in 2009 through a combination of educational and personnel initiatives, as well as public awareness and governmental oversight programs. Budgetary cuts have delayed plans for restructuring the Ukrainian Armed Forces into an all-contract force from 2011 to 2015. These financial restrictions also threaten Ukraine's peacekeeping commitments, training efforts and equipment upgrades. The Ministry of Defense, however, remains committed to establishing a well-trained and equipped, NATO-interoperable military, to include a Joint Rapid Reaction Force of up to 29,000 regular military personnel; comprising a small Immediate Reaction Force (IRF) of up to 6,000 personnel and a larger Rapid Reaction Force (RRF) of up to 23,000 personnel, supported by a Main Defense Forces of up to 65,000 regular and reserve military and civilian personnel. Finally, Ukraine was one of the first NATO partner countries to announce its desire to contribute to the NATO Response Force, and has been invited to do so in 2015-2016.

Training received through International Military Education and Training (IMET), Foreign Military Financing (FMF), Global Peace Operations Initiative (GPOI) and other U.S. military assistance programs contributes to U.S. goals by augmenting Ukraine's ability to participate alongside NATO forces in crisis response operations, in Partnership for Peace (PfP) exercises, and other activities. Ukraine makes extensive use of the IMET program to improve Ukrainian military readiness in a broad range of functional areas. Areas of concentration include military legal training, civil-military relations, officer and NCO professional military education (logistics, signal, infantry, engineer, and military police), classes in information systems and defense resource management, strategic intelligence, human resources management, and air traffic control operations. In addition, senior Ukrainian officers have been trained at command and general staff colleges, as well as the Army War College and the Industrial College of the Armed Forces. Equipment purchased with FMF has aided Ukraine's participation in KFOR, which has led to critical, practical training through real-world peacekeeping experience for Ukrainian troops. A particular priority is communications equipment for Ukrainian units, further enhancing their interoperability when deployed with NATO forces.

Ukrainian soldiers and civilian defense officials also have received U.S.-funded instruction at the George C. Marshall European Center for Security Studies in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe.

## Algeria

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	21	18	12	\$485,823	0	0	0	\$0.00
IMET-1	44	27	44	\$1,272,207	0	0	0	\$0.00
Non-SA, UC, JCET	2	2	1	\$0.00	0	0	0	\$0.00
Regional Centers	9	9	5	\$141,238	0	0	0	\$0.00
Service Academies	5	5	3	\$70,561	0	0	0	\$0.00
<b>Totals:</b>	<b>81</b>	<b>61</b>	<b>65</b>	<b>\$1,969,829</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States has a clear interest in increasing regional stability by promoting good governance, economic reform, and security in Algeria. The merging of the Algerian terrorist group, the Salfist Group for Preaching and Combat (GSPC), with al-Qaida in early 2007 heralded a shift in tactics by Algerian extremists, including the use of suicide bombs, and led to a consequent need for the Algerian military to alter its strategy for dealing with the terrorists. By early CY 2008, the activities of the renamed al-Qaida in the Islamic Maghreb began to spill across Algeria's borders, leading the Algerian military to add a focus on collaborative programs with regional partners. In tandem with these regional partners, the Algerian military is currently working to secure its long and porous borders as well as establish the architecture for closer military and intelligence cooperation with partner countries. In addition, Algeria has since October 2004 hosted the African Union's Center for the Research and Study of Terrorism. The Center aims to provide a coordinated regional research and training venue for counterterrorism efforts in all African Union countries. The government of Algeria continues to seek to expand the scope of its cooperation with the United States in its efforts to combat terrorism and ensure stability in the Mediterranean. In recent years, Algeria has been a key partner in U.S. efforts to stem the tide of terrorist activity in North Africa and the Mediterranean and as such has seen substantial increases in the amount of United States counterterrorism cooperation. To further this burgeoning relationship, the single most important area of education for Algerian military personnel is, and will remain, professional military education of mid- and senior-level leaders in order to build a cadre of personnel who can function effectively with the United States and regional counterparts.

Participation in the International Military Education and Training (IMET) program helps Algerian military officers build contacts with U.S. counterparts, better understand U.S. policy, become more aware of international norms, and develop greater respect for the principle of civilian control of the military. IMET training promotes professionalism and reinforces the importance of a strong, cooperative political/military relationship with the United States. Those officers who participate in the IMET program will establish essential contacts with U.S. counterparts whose influence can encourage reform within the Algerian military. During the 2008 Joint Military Dialogue, the Algerians requested increased IMET training, recognizing its benefits for their own military, as well as for long-term cooperation between the U.S. and Algeria. We will continue to focus on IMET-funded English language training to expand and improve the Algerian military's interoperability with U.S. and NATO forces, facilitate interaction in potential future contingency operations such as joint counterterrorism and peacekeeping missions, and prepare Algerian military personnel for increased training opportunities.

In addition, Algerian participation in programs with the Africa Center for Strategic Studies (ACSS), the Near East South Asia Center for Strategic Studies (NESA) and the National Defense University (NDU) supports democratic governance in Algeria by offering senior African civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. Such participation helps build and maintain long-term interaction amongst participants. It also supports additional research, seminars, conferences, and other exchange activities between these participants on relevant topics in Africa, the Middle East, Europe, and the United States.

## Bahrain

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMF	7	5	6	\$50,390	0	0	0	\$0.00
FMS	165	102	71	\$6,233,227	0	0	0	\$0.00
IMET-1	96	43	77	\$646,405	0	0	0	\$0.00
Non-SA, UC, JCET	110	110	5	\$274,006	0	0	5	\$620,000
Regional Centers	39	39	7	\$78,513	0	0	0	\$0.00
<b>Totals:</b>	<b>417</b>	<b>299</b>	<b>166</b>	<b>\$7,282,541</b>	<b>0</b>	<b>0</b>	<b>5</b>	<b>\$620,000</b>

The United States has an enduring national security interest in maintaining its access to Bahraini military facilities in order to maintain our influence in the Persian Gulf and to conduct operations in the in the overseas contingency operations. Bahrain has hosted the U.S. Navy 5th Fleet for more than 50 years. The relatively open access to facilities, land, and airspace needed to support contingency operations, including joint task force, fleet, and Combined Maritime Force (CMF) operations, are critical to maintaining U.S. operations in the region. In addition, Bahrain annually hosts important exercises that involve U.S. and Coalition forces.

Our security and political relationship with Bahrain continues to be strong. Bahrain and the United States have maintained a Defense Cooperation Agreement (DCA) since 1991. Bahrain has been a steadfast supporter of our foreign policy objectives throughout the Near East region. In 2001, the President designated Bahrain a Major Non-NATO ally. Bahrain has also been a key supporter of critical U.S. regional security initiatives, including those associated with fighting the overseas contingency operations. Bahrain responded positively to all U.S. military requests connected to Operations Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF), and will remain a critical hub for the U.S. presence in the Gulf and Southwest Asia. In December 2009, 110 Bahraini policemen were deployed in Afghanistan to support U.S. site security. Bahrain has been an active participant in the war against terrorism and was the first Gulf Cooperation Council (GCC) country to sail as part of a coalition task force, providing three ships to support CTF-152 and was the first GCC country to command CTF-152, from March to June 2008. In 2009 Bahrain also contributed its sole frigate, the Sabha, to support CTF-151 in the Gulf of Aden. Bahrain has also assumed a leadership role in regional efforts to cut the flow of funding to terrorist groups, including the institution of government regulation over all Islamic charities functioning in Bahrain.

Training activities funded under the International Military Education and Training (IMET) program and approval of select Direct Commercial Sales (DCS) and Foreign Military Sales (FMS) promote the interoperability of the Bahrain Defense Forces with U.S. and GCC regional forces. Through the IMET program, Bahrain sends officers to U.S. command and staff colleges, war colleges, and other key Professional Military Education (PME) and some technical courses. IMET training reinforces democratic principles of civilian control of the military, enhances interoperability with U.S. forces, promotes professionalism, and reinforces among core supporters of the regime the importance of a strong, cooperative political/military relationship with the United States. In addition, Bahrain has in the past sent students to the U.S. service academies. By improving English language skills and their understanding of the U.S. military, these training programs directly enhance the effectiveness of our bilateral and multilateral joint training programs. Lastly, IMET helps establish critical long-term professional relationships between our current and future respective military leaders.

## Egypt

Program	FY 2009				FY 2010

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

The United States has a vital interest in enhancing Egypt's national defense and in supporting its role as a vital U.S. coalition partner and regional leader - one that is secure in its own borders and at peace with its neighbors. In 1996, the President designated Egypt a Major Non-NATO Ally, recognizing Egypt's critical regional role and support for U.S. policies in the Middle East.

Egypt is one of the largest recipients of U.S. security assistance, therefore, providing military training to Egypt's armed forces through both the International Military Education and Training (IMET) program and the Foreign Military Financing (FMF) program funding is a crucial element of broader U.S. support for Egypt and its military. The technical expertise and exposure to U.S. doctrine and personnel that U.S.-funded training provides enhances Egypt's counterterrorism (CT) capability, improves the military's professionalism and readiness, and strengthens ties between the U.S. and Egyptian militaries. Professional Military Education (PME) courses give the future leaders of Egypt's armed forces opportunities to refine their leadership skills and improve cross-cultural communication between our respective militaries. The George C. Marshall European Center for Security Studies, Near East South Asia Center for Strategic Studies (NESA), and the Africa Center for Strategic Studies (ACSS) seminars offer Egypt's senior civilian and military leaders practical instruction in civil-military relations, national security strategy, and defense economics and create opportunities for further exchange and strategic regional cooperation. The full range of FMF and IMET supported training will enhance U.S.-Egyptian military ties and cooperation.

<b>Totals:</b>	<b>285</b>	<b>225</b>	<b>112</b>	<b>\$2,977,875</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

In his February 27, 2009 speech at Camp Lejeune, President Obama defined his major goals for Iraq: a sovereign, stable and self-reliant Iraq that contributes to the peace and security of the region, and with whom the United States can forge a long-term security partnership. With the shift to Operation NEW DAWN in September 2010, the preponderance of military efforts shifted to the functions of training, equipping, advising and assisting the Iraq Security Forces (ISF). As the ISF continues to improve their ability to provide security for the Iraqi people and territory against internal and external threats, American security assistance and security cooperation efforts focus on continuing to build the capacity of its Iraqi partner toward a minimum essential capability.

As U.S. Forces-Iraq (USF-I) continues its drawdown in accordance with the Strategic Framework Agreement and withdrawal agreement, it will transition or complete its existing missions. This effort includes the standing up of a security assistance and security cooperation organization, the Office of Security Cooperation-Iraq, which will implement foreign military sales and funding program support, as well as the IMET program, inside Iraq.

Iraq defense gaps will still exist after that minimum essential capability is met, particularly in air sovereignty. Iraq has inquired about purchase of a multirole fighter. This potential FMS case will not affect current training requirements but may affect the size of the security assistance footprint in Iraq.

The Iraqi PM, Minister of Defense, and Minister of Interior are particularly supportive of IMET, and US Professional Military Education (PME) in general, that supports mobile training teams, and will work to maximize training possibilities under such a framework.

IMET-funded training helps Iraqi military personnel learn democratic principles of civilian control of the military, as well as how to operate with U.S. forces. This training also promotes professionalism, and reinforces among core supporters of the new government the importance of a strong, cooperative political/military relationship with the United States. IMET-funded training is vital to advancing the capability of the Iraqi Security Forces (ISF) as it now assumes leadership and control of counterinsurgency and CT operations in Iraq.

## Israel

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	1	1	1	\$8,300	0	0	0	\$0.00

Non-SA, UC, JCET	0	0	0	\$0.00	0	0	1	\$238,000
Regional Centers	66	66	19	\$8,047	0	0	0	\$0.00
<b>Totals:</b>	<b>688</b>	<b>650</b>	<b>207</b>	<b>\$1,788,839</b>	<b>0</b>	<b>0</b>	<b>1</b>	<b>\$238,000</b>

The United States has a vested interest in promoting a stable, democratic, and militarily strong Israel that is secure at home and at peace with its neighbors. President Obama has reiterated the United States' steadfast commitment to Israel's security, to the maintenance of Israel's qualitative military edge, and to strengthening Israel's ability to both defend itself and deter potential aggressors. Promoting Israel's security helps protect a valuable, democratic ally in the region and prevents regional conflict.

The United States has provided Israel with over \$100 billion in economic and military assistance since 1949 and Israel continues to receive the largest worldwide share of U.S. security assistance. Foreign military training, both as a portion of the State Department-provided Foreign Military Finance (FMF) program and DoD-funded Non-Security Assistance, is important to maintaining Israel's qualitative military edge, enhances Israel's security, and strengthens our bilateral ties. Training for Israeli personnel regularly includes participation in the various Service War Colleges, the National Defense University (NDU), Service Command and General Staff Colleges, flight simulator and flight safety officer training, resource management training, and others. By providing both technical expertise and exposure to U.S. military culture and personnel, these programs significantly strengthen U.S.-Israel military ties and bolster Israel's ability to protect itself.

## Jordan

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Stability and economic prosperity in the Middle East support U.S. national security objectives. Jordan is well-positioned to play a pivotal role as a stabilizing influence in the region because of its moderate, pro-Western stance and because of the geographic and cultural borders it shares with Saudi Arabia, Iraq, Syria, the Palestinian Territories, and Israel. Continuing political stability and economic development, however, are necessary prerequisites for enhancing Jordan's ability to exert a moderate influence in the region. King Abdullah II has made significant progress increasing Jordan's governmental accountability and further integrating Jordan into the world economy. Jordan continues to lead the region in its quest for moderation and accountability in religious and lay institutions.

Achieving Israeli-Palestinian peace accord ranks as one of Jordan's highest priorities, especially in light of its significant Palestinian population and its peace treaty with Israel. Jordan is also in a unique position to contribute to collective regional security goals. Jordan has played a key role supporting Iraqi stability and reconstruction. Jordan has opened an Embassy and sent an Ambassador to Baghdad, and in August 2008 King Abdullah visited Iraq. In addition Jordan deployed a field hospital to Fallujah. King Abdullah has also been a strong supporter of the overseas contingency operations in Afghanistan. Jordan has deployed significant forces, including a field hospital and de-mining unit, to Afghanistan in support of coalition operations. The Jordanian staff at the field hospital in Zabul continues to mentor and train Afghanistan medical officers improving Afghanistan capability and self-sufficiency. Jordan receives Coalition Support Funding for its incremental operational costs associated with providing direct support to ongoing operations. Due to its relatively porous borders with Saudi Arabia, Syria, and Iraq, transnational terrorism is a major consideration and threat.

The Jordanian Armed Forces' (JAF) main mission is to protect against external threats. However, the JAF maintains close ties with Jordan's Public Security Directorate regarding transnational threats and has appropriately increased its focus against internal threats, which could jeopardize the security of the Kingdom. The JAF's efforts to curb transnational terrorism within the region directly support U.S. security interests within the Middle East.

The U.S.-Jordan military-to-military relationship is excellent, and Jordan has been designated a Major Non-NATO ally. The Foreign Military Financing (FMF) program helps the JAF address their readiness and sustainment requirements as well as interoperability with U.S. forces. FMF is the only source of funds for Jordanian military modernization programs as outlined in the JAF's Five-Year Plan. FMF also supports counterterrorism (CT) and border security requirements. Jordan's successful efforts at border control are critical to preventing foreign fighter entry into Iraq, illicit trafficking of arms, explosives, drugs, terrorists, and equipment for use in the production of nuclear, biological, and chemical weapons.

## **Volume I Section III-IV - Near East**

Improved security for Jordanian borders translates into enhanced domestic stability, improved security for Israel, assists U.S. interests in Saudi Arabia, and strengthens coalition forces in Iraq.

Jordan has one of the most robust combined education and training programs in the world. Through its International Military Education and Training (IMET) program, the second largest in the world, Jordan regularly sends officers to U.S. senior service schools, command and staff colleges, and other key Professional Military Education (PME), as well as to numerous resource management and some technical courses. IMET training reinforces democratic principles of civilian control of the military, enhances interoperability with U.S. forces, promotes professionalism, and reinforces with core supporters of the regime the importance of a strong, cooperative political/military relationship with the United States. Jordan is also the largest recipient in the world of Regional Defense Combating Terrorism Fellowship Program (CTFP) funding. This program has greatly contributed to the United States building long-term relations with members of JAF who are directly involved in CT operations. The exercise program is also robust, and Jordan participates in multiple bilateral and multilateral exercises annually, the largest exercise program in the Central Command region. The exercises have a major impact on U.S.-Jordan interoperability, development of Jordan's armed forces proficiency in a wide range of skills, and increased capabilities for conducting counter-terrorist/counter-smuggling operations in Jordan. In close association with exercises, component commanders use Traditional Commander's Activities (TCA) funds to augment the exercise-training opportunities. TCA events allow Jordanian units to participate in their exercises with a higher level of proficiency and achieve a greater level of benefit from them.

## Kuwait

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	530	305	269	\$12,025,173	0	0	0	\$0.00
Non-SA, UC, JCET	0	0	0	\$0.00	0	0	2	\$400,000
Regional Centers	4	4	4	\$0.00	0	0	0	\$0.00
<b>Totals:</b>	<b>534</b>	<b>309</b>	<b>273</b>	<b>\$12,025,173</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>\$400,000</b>

The United States has a demonstrable interest in maintaining access to Kuwait's facilities, land, and airspace. Kuwait faces the difficult task of securing its land and maritime borders in a volatile region, and a continuous U.S. presence has been key to Kuwait's security since the 1991 Gulf War. In January 2004, the President designated Kuwait a Major Non-NATO ally for its consistent support to our operations in the Gulf and in South Asia, as well as for its international counterterrorism efforts. Kuwait hosts the forward headquarters of U.S. Central Command's ground forces and approximately 17,000 to 21,000 U.S. military personnel operating in support of Operation Iraqi Freedom (OIF)/Operation New Dawn (OND) and Operation Enduring Freedom (OEF). The open access to facilities, land, and airspace needed to support contingency operations, including joint task force and fleet operations, are critical to the U.S. presence in the region and ongoing military operations there. Kuwait is an important ally in the overseas contingency operations.

The continued participation of Kuwaitis in military-to-military training initiatives and joint military exercises promotes interoperability with U.S. and Gulf Cooperation Council (GCC) forces, recognizes Kuwait's invaluable support for U.S. force deployments, and helps Kuwait to assume greater responsibility for its own defense and regional security by encouraging the development of its professional military command. This training and the close contact between the U.S. and Kuwaiti officer corps it facilitates pays invaluable dividends to our bilateral relationship and military partnership.

## Lebanon

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

U.S. interests lie in a free and independent Lebanon enjoying internal stability and normalized relations with its neighbors. To minimize the destabilizing influence of internal armed groups and external actors, the U.S. continues to support the development of independent Lebanese institutions, especially the security services. The mission of the Lebanese Armed Forces (LAF) has greatly expanded since the departure of Syrian troops in 2005 and the end of the 2006 summer war, with new deployments adding to the LAF's already heavy burdens. Historically, personnel costs have absorbed over 90 percent of Lebanon's military budget, leaving little funding for operations, maintenance, new acquisitions, and training. To support the LAF's greatly expanded responsibilities, the USG has reinvigorated its security assistance program in Lebanon, with over \$500M in assistance to the LAF committed since the 2006 summer war to support a train and equip program that will provide the LAF with weapons, vehicles, spare parts, ammunition, individual equipment, and a comprehensive training program.

The LAF takes full advantage of the opportunity for the International Military Education and Training (IMET) program-funded Professional Military Education (PME) and technical training. Country Team reports indicate that IMET graduates are employed in positions of command and responsibility and achieve proportionally higher rank and influence than their non-IMET peers. In addition, USG assistance to the LAF has played a critical role in the professional integration of the LAF. IMET training also provides an important alternative to military training with Syria and other countries.

The LAF has demonstrated that, as U.S. security assistance expands its capabilities, it is more willing and able to address the myriad challenges to Lebanon's sovereignty and security. In the summer of 2007, emergency U.S. security assistance helped the LAF achieve a decisive victory over Fatah al-Islam terrorists in the Nahr al-Barid refugee camp - a fight that the LAF might otherwise have shirked. To fully implement UN Security Council Resolutions 1559 and 1701, the LAF will require significant and sustained Foreign Military Financing (FMF) and IMET funding in addition to persistent USG engagement via military visits and exercises.

## Libya

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	2	2	\$29,163	0	0	0	\$0.00
<b>Totals:</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>\$29,163</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States has a clear interest in increasing regional stability by promoting democracy, economic reform, and security in Libya as the two countries enter a new phase in their bilateral relations, particularly in security affairs. Since Libya's renunciation of weapons of mass destruction and terrorism in 2003 and its rescission from the U.S. state-sponsor of terrorism list in 2006, Libya has shown itself to be an important partner in counterterrorism (CT) and regional stability. It plays a significant role in combating terrorism in North Africa, as well as in stemming the flow of foreign fighters to Iraq and Afghanistan. In addition, it constructively supports efforts to curb regional conflict in Darfur, Chad, and Somalia. Libya will have the opportunity to play an even larger and more constructive role with its 2008-2009 tenure as a non-permanent member of the U.N. Security Council. Regionally, the U.S. will work with the Arab Maghreb Union, of which Libya currently holds the presidency, to foster regional CT cooperation among its members. In addition, Libya is expected to become a phased-in member of the Trans-Sahara Counterterrorism Partnership, thereby strengthening counterterrorism efforts throughout North Africa and the Sahel region.

After decades of isolation and a combative past bilateral relationship, FY 2010 marked the first year that Libya was eligible to receive International Military Education and Training (IMET) and Foreign Military Financing (FMF) grant funds. Whereas in the 1960s and 1970s the majority of Libya's mid-level and senior leaders participated in Professional Military Education (PME), Libya's new generation of leaders lack these ties or the basic English language skills to participate in such programs. As such, IMET program funding will be used exclusively to establish an English language lab to build capacity among the eligible Libyan officer corps so that they may profit from Libyan-financed courses and/or future IMET-funded PME. Participation in PME will help Libyan military officers build contacts with U.S. counterparts, better understand U.S. policy, become more aware of international norms, and develop greater respect for the principle of civilian control of the military. Professional military training and technical training courses promote professionalism and reinforce the importance of a strong, cooperative political/military relationship with the United States. Those officers who participate will establish essential contacts with U.S. counterparts whose influence can encourage reform within the Libyan military. Moreover, such training and language capability will improve the Libyan military's interoperability with U.S. forces, facilitate interaction in potential future contingency operations such as joint CT and Peacekeeping Operations (PKO), and prepare Libyan military personnel for increased training opportunities.

In addition, Libya may participate in regional conferences and seminars, which would support democratic governance by offering Libyan civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. Such participation helps build and maintain long-term interaction among participants. It also supports additional research, seminars, conferences, and other exchange activities between these participants on relevant topics in Africa, the Middle East, Europe, and the United States.

## Morocco

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

From the start of his reign in 1999, Morocco's King Mohamed VI has encouraged economic, political, and security reforms within Morocco. However, Morocco remains poor; a lower middle income developing country, with a political system whose reforms are far from complete. Nonetheless, the government appears to be oriented in a positive political, economic, and military direction. It held free and fair parliamentary elections in September 2007 and encouraged economic liberalization by attracting foreign investment, developing its burgeoning tourist industry, and implementing both regional and bilateral trade agreements. In addition, more than 19 years after the cease fire that ended hostilities between the government and the Polisario, Morocco continues to seek a lasting resolution in United Nations-sponsored negotiations with the parties to resolve the Western Sahara issue.

Morocco remains a proven U.S. counterterrorism (CT) partner and has seen substantial increases in U.S. CT assistance. Morocco has foiled several terrorist plots directed at U.S. interests in recent years, to include an al-Qaida plot against U.S. shipping interests in the Straits of Gibraltar. Morocco has taken advantage of U.S. assistance to combat terrorist financing, and recently implemented a new anti-money laundering law. Currently, the Moroccan military is working to secure its long and porous borders. Morocco is also a steadfast supporter of the Middle East Peace process and has maintained a dialogue to increase cooperation with NATO.

Training in Morocco follows a forward-leaning approach in order to encourage Moroccan military reform, improved bilateral cooperation, and interoperability with U.S. and NATO forces. To encourage a closer U.S.-Moroccan relationship, the single most important area of education for Moroccan military personnel is, and will remain, Professional Military Education (PME) of mid-level and senior leaders in order to build a cadre of personnel who can function effectively with the United States and regional counterparts.

The International Military Education and Training (IMET) program fosters increased respect for human rights and the principle of civilian control of the military, and helps Moroccan military officers better understand U.S. foreign policies. Morocco sends students to PME courses including U.S. senior service schools, command and staff colleges, and other key training activities. IMET-funded defense management and logistics readiness courses, as well as English language training, enhance Morocco's value as a partner in multinational training exercises, peacekeeping missions, and potential future coalition contingency actions. Morocco has participated in numerous peacekeeping operations and currently has 1,537 peacekeepers deployed in the Democratic Republic of Congo and Cote d'Ivoire, and an additional 200 soldiers deployed in Kosovo under NATO command. Morocco also uses its IMET funds to benefit from acquisition planning and execution through the Naval Postgraduate School's International Defense Acquisition and Resource Management course.

The Near East South Asia Center for Strategic Studies (NESAC) in Washington D.C. encourages democratic governance in Morocco by offering senior civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. NESAC participation also helps build and maintain long-term, continuing interaction with and amongst participants, and supports additional research, seminars, conferences, and other exchange activities on relevant

**Volume I Section III-IV - Near East**

topics in the Middle East. Other regional centers include the George C. Marshall European Center for Security Studies, and the Africa Center for Strategic Studies (ACSS).

## Oman

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Oman remains a committed ally in the war against terrorism. Oman's long coastlines and borders offer significant security challenges as they are vulnerable to illegal transit by terrorists, smugglers, migrant workers, and individuals involved in the traffic and sale of illegal drugs. Currently the Omani Defense Forces, in cooperation with the U.S. Government, are working hard to address this high-level concern. Due to Oman's geostrategic position and the steady flow of illegal transit originating from Iran, Afghanistan, Pakistan, Somalia, and Yemen, it is imperative that Omani security forces receive the equipment and training necessary to provide them with increased capability to combat this particular threat. The Government of Oman increasingly uses U.S. training funds to enhance Omani capabilities that support U.S. regional efforts in the war against terrorism, such as bolstering coastal patrol efforts, modernizing Oman's coastal surveillance system, enhancing the capabilities of the Sultan's Special Force, and making Oman's remote inland borders with Yemen, Saudi Arabia, and the United Arab Emirates (UAE) less porous and more observable.

Oman controls the shipping lanes through the Strait of Hormuz, and the U.S. Naval Central Command and Omani officials regularly meet to discuss mechanisms to help ensure that this vital strait remains open. Oman's ability to monitor and seal its land borders; particularly the border with Yemen, reduces the ability of terrorists to evade government controls. Improved protection of Oman's maritime borders mitigates the vulnerability of the Sultanate to instability caused by illegal immigrants from South Asia. These illegal immigrants are often transported by Iranian smugglers into the country. The improved protection helps to counter the flow of drugs, and the possible movement of weapons and/or terrorists in the region.

As a key ally with moderate views, Oman serves as an important voice of toleration and moderation in the region, including in relations with Iran. U.S. assistance helps to ensure that Oman has the resources needed for its legitimate self-defense and security, and that it remains an able ally in the war against terrorism. The International Military Education and Training (IMET) program increases awareness of international norms regarding human rights, fosters greater respect for the principle of civilian control of the military, and helps Omani military officers understand U.S. foreign policies. Oman sends students to Professional Military Education (PME) courses including U.S. senior service schools, command and staff colleges, and other key training activities. Attending these PME courses fosters one-to-one relationships that pay invaluable dividends in the form of access, trust, improved interoperability, coordination, and mutual understanding.

**Palestinian Authority**

## Qatar

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	65	38	38	\$4,849,752	0	0	0	\$0.00
Non-SA, UC, JCET	200	200	2	\$829,089	25	25	4	\$1,490,000
Regional Centers	28	28	10	\$0.00	0	0	0	\$0.00
Service Academies	0	0	0	\$0.00	2	2	1	\$4,000
<b>Totals:</b>	<b>293</b>	<b>266</b>	<b>50</b>	<b>\$5,678,841</b>	<b>27</b>	<b>27</b>	<b>5</b>	<b>\$1,494,000</b>

Qatar remains a key regional partner. The Amir, Sheikh Hamad bin Khalifa Al Thani, continues to pursue democratic principles in governance and to strengthen ties with the United States, particularly in the military arena. Qatari support to Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) has been vital to our efforts in the region. Qatar hosts U.S. Central Command's (CENTCOM) Forward Headquarters as well as its Combined Air Operations Center and is funding the partial construction of a new facility for U.S. forces on Al Udeid Airbase at a cost that currently exceeds \$138 million.

Given Qatar's strategic location in the Gulf, it is vital the United States continue to support military-to-military cooperation and training as well as joint exercises and training. U.S. military training and education exposes the future leaders of Qatar's military to principles and doctrine that will enhance future coalition understanding, cooperation, and interoperability. Qatar hosted the regionally significant security and consequence management exercise EAGLE RESOLVE in 2002, 2003, 2005, 2006, and 2007.

The Near East/South Asia Center for Strategic Studies (NESA) in Washington supports democratic reform and good governance in Qatar by offering senior civilian and military leaders a practical program in civil-military relations, national security strategy, and defense economics. NESA participation also helps build and maintain long-term, continuing interaction with and among participants, and supports additional research, seminars, conferences, and other exchange activities on relevant topics in the Middle East.

## Saudi Arabia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
FMS	2603	1288	1412	\$56,539,618	0	0	0	\$0.00
Non-SA, UC, JCET	49	49	2	\$189,046	0	0	2	\$525,000
Regional Centers	55	55	15	\$67,001	0	0	0	\$0.00

<b>Totals:</b>	<b>2707</b>	<b>1392</b>	<b>1429</b>	<b>\$56,795,665</b>	<b>2</b>	<b>2</b>	<b>3</b>	<b>\$529,000</b>

Saudi Arabia remains an important ally in the war against terrorism and plays a central political role in all security initiatives in the region. Military-to-military relations remain positive, based on decades of cooperation and close consultation, as well as years of U.S. support to Saudi Arabia's military programs including training, joint exercises, Foreign Military Sales (FMS), and commercial arms sales.

Providing a nominal amount of International Military Education and Training (IMET) to Saudi Arabia permits it to purchase military training at the significantly reduced FMS incremental rate, ensuring a continued high level of Saudi attendance at U.S. military institutions, which enhances the technical capabilities of the Saudi military

- Enhances strategic interoperability
- Exposes all levels of Saudi military personnel and their families to U.S. values, ideas, and policies
- Increases awareness of international norms of human rights, the principle of civilian control of the military, and the rule of law.

Many of the Saudi students are either senior military leaders or those identified as future senior leaders. Continued military-to-military contacts and joint military exercises will encourage the development of a professional military command and armed forces compatible with and favorably disposed towards its U.S. counterparts. This continued cooperation will allow the Kingdom to assume a greater role in self-defense, assist the United States in achieving its policy goals in the region, and support our efforts to promote security cooperation among the Gulf Cooperation Council (GCC) members.

## Tunisia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	4	4	4	\$293,391	0	0	0	\$0.00
FMS	14	14	1	\$4,950	0	0	0	\$0.00
IMET-1	72	49	67	\$2,033,926	0	0	0	\$0.00
Non-SA, UC, JCET	16	16	1	\$4,644	0	0	5	\$1,214,000
Regional Centers	7	7	6	\$18,804	0	0	0	\$0.00
Service Academies	10	10	4	\$285,202	2	2	1	\$4,000
<b>Totals:</b>	<b>123</b>	<b>100</b>	<b>83</b>	<b>\$2,640,917</b>	<b>2</b>	<b>2</b>	<b>6</b>	<b>\$1,218,000</b>

Anchoring one end of the Mediterranean's Sicily chokepoint, Tunisia is an important regional friend that maintains safe and open Lines-Of-Communication (LOC) for daily transit of several hundred ships. These ships include up to 40 hydrocarbon carriers per day, transiting United States Navy Battle Groups, NATO-sponsored ships conducting Operation Active Endeavor (OAE), and a whole range of international commercial ships. Tunisia makes serious efforts to patrol its borders to combat clandestine immigration and smuggling, as well as to stem the flow of foreign fighters transiting to Iraq or Afghanistan. Tunisia is as a signature country to the Trans-Sahara Counter-Terrorism Partnership, and Tunisian forces have participated in over twelve United Nations-led peacekeeping operations. They currently have observers supporting the African Union's efforts in Sudan and have left in place approximately 40 observers in Congo under MONUSCO. There is a direct relationship between Tunisia's continued positive involvement in these international military activities and a stable bilateral military relationship with the United States. While in decline today, historically, the span of bilateral activities included coordinated force realignments, modernizations, joint exercises, humanitarian assistance programs, and the continued successful International Military Education and Training (IMET) program. Of note, two of the three active Tunisian Military Service Chiefs have had some form of U.S.-sponsored training, and it is estimated that up to 40 percent of their mid- to senior-level officers have been exposed to U.S. standards, values, and democratic principles. A byproduct of our military and diplomatic engagement is the Tunisian government's policy of allowing access to its airspace by transiting U.S. senior civilian officials, military leaders, and military transport aircraft.

Tunisia also occasionally welcomes opportunities to participate in the seminars sponsored by the Near East South Asia Center for Strategic Studies (NESA), the George C. Marshall European Center for Security Studies, and other programs aimed at promoting counterterrorism (CT) efforts, civil-military affairs, and national security strategy. Many of their senior civilian and military leaders are now alumni of these programs and have continued their interaction with counterparts and acquaintances through both formal and informal exchanges.

## United Arab Emirates

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	11	11	1	\$79,300	0	0	0	\$0.00
FMS	733	598	207	\$21,569,216	0	0	0	\$0.00
Regional Centers	19	19	10	\$4,115	0	0	0	\$0.00
<b>Totals:</b>	<b>763</b>	<b>628</b>	<b>218</b>	<b>\$21,652,631</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States continues its strong security relationship with the United Arab Emirates (UAE). The UAE has a capable military, which enjoys significant cooperation with the United States and other allies. The UAE is a key regional partner in the Gulf region and supports U.S. policy initiatives in the region. The UAE has cooperated with the United States in fighting the war against terrorism as well as in international Peacekeeping Operations (PKO). Providing a nominal amount of International Military Education and Training (IMET) to the UAE permits it to purchase military training at the significantly reduced Foreign Military Sales (FMS) incremental rate. This ensures a continued high level of Emirati attendance at U.S. military institutions, which enhances the technical capabilities of the Emirati military by:

- Enhances strategic interoperability
- Exposes all levels of Emirati military personnel and their families to U.S. values, ideas, and policies
- Increases awareness of international norms of human rights, the principle of civilian control of the military, and the rule of law

The UAE hosts more U.S. naval ship visits than any other port outside of the United States. The UAE is a major procurer of advanced U.S. military technologies and the Emirati military continues to make strides toward interoperability with U.S. and coalition forces. Therefore, military-to-military education opportunities are a top priority for the UAE. At the same time, attendance at training schools by UAE officers supports the Central Command's objective of forward engagement and interoperability.

## Yemen

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	31	31	3	\$258,956	0	0	0	\$0.00

Non-SA, UC, JCET	300	300	4	\$424,460	0	0	4	\$2,700,000
Regional Centers	14	14	10	\$74,539	0	0	0	\$0.00
<b>Totals:</b>	<b>429</b>	<b>424</b>	<b>45</b>	<b>\$2,063,495</b>	<b>0</b>	<b>0</b>	<b>4</b>	<b>\$2,700,000</b>

Yemen remains essential to counterterrorism (CT) and counter-piracy operations in the Arabian Peninsula. Foreign Military Financing (FMF) and International Military Education and Training (IMET) play an essential role in the progress made by Yemen in uprooting the al-Qaida presence in the country. Due to its proximity to the Bab al-Mandab, one of the world's most important shipping routes, as well as its proximity to U.S. allies Saudi Arabia and Oman, and the volatile Horn of Africa; Yemen's security has a direct effect on U.S. interests in the region.

Improved Yemeni CT capability also will improve the nation's overall security situation, positively affecting developments in Yemeni civil society and the political arena. Yemen is the second most populous and the poorest nation on the Arabian Peninsula. We are working toward an incremental process of political, economic, and social reform. Yemen held successful multiparty presidential elections in September 2006, local council and gubernatorial elections in 2007, and will hold parliamentary elections in 2011.

Yemen provides a unique location to conduct Horn of Africa operations and maritime interdiction missions in and around the Gulf of Suez, the Red Sea, and Indian Ocean areas; the Red Sea, Bab-al-Mandab Straits, and the Gulf of Aden comprise the second-busiest shipping lane in the world. Improved Yemeni counter-piracy capability will play an integral role in securing this critical sea route. U.S. policy has supported the Yemeni government's efforts to eradicate terrorism and support for terrorism as well as to create an environment that deters the return of any active indigenous or transnational terrorist elements.

FMF and IMET funds continue to directly support U.S. counterterrorism (CT) goals through the ongoing improvement of Yemen's ability to act against terrorist elements either in cooperation with the United States or unilaterally. U.S. assistance supported the on-going, three-pronged security assistance program that focuses on developing Yemeni Counterterrorism Unit (CTU) and Special Operations Forces capabilities, building a viable Coast Guard, and improving military capacity to conduct security missions. This approach is designed to improve the capability of Yemen's counterterrorism forces to uproot the al-Qaida presence in Yemen, safeguard its borders and territorial waters, and assist the United States in fighting the war against terrorism. U.S. funds went towards equipping and training the Yemeni CTU. Funds also supported training and equipment for the Yemeni Special Operations Force, which handles CT and border security, as well as supported the continued development of the Yemeni Coast Guard. Funding for U.S. military training and the professional and technical education of Yemeni military personnel helped military leaders in Yemen understand U.S. practices, increased awareness of international norms of human rights, and fostered greater respect for the principle of civilian control of the military. Our investment reaped concrete dividends in January 2009 when the CTU conducted a raid on an al-Qaida cell in San'a, resulting in the death of two suspects, and the capture of one suspect and a weapon cache, including machine guns, mortars, and rocket-propelled grenades. We have also witnessed the expansion of the Yemen coast Guard's (YCG) patrols in Yemeni territorial waters. The YCG has also partnered with private shipping firms and security services to enhance security in the Gulf of Aden and the Bab-al-Mandab Straits. Both the YCG and the CTU were founded using FMF funding and represent the program's greatest

**Volume I Section III-IV - Near East**

successes in building Yemeni counterterrorism capacity. Training provided with Non-Proliferation, Anti-Terrorism, Demining and Related Programs (NADR) funding supported Export Control and Related Border Security assistance (EXBS) efforts, Small Arms and Light Weapons (SA/LW) programs, and continued training to sustain Yemen's counterterrorism training capabilities.

The United States will continue to provide appropriate U.S. based training to assist in the continued development of the Afghan forces. Since 2001, Operation Enduring Freedom (OEF) Coalition Forces and NATO's International Security Assistance Force (ISAF) have made immense progress toward the elimination of al-Qaeda infrastructure and the regimes of Taliban and other insurgents. However, terrorism and other threats to stability continue, and a strong, sustainable Afghan security force is necessary to address these threats in the long term. The continued U.S. military and diplomatic presence in Afghanistan aims to set conditions that will permit the government in Afghanistan to establish a secure and stable environment, preventing Afghanistan from again becoming a host for terrorist organizations and operations. Key to this endeavor is establishing and maintaining an Afghan National Army (ANA) that is truly representative of the population; subject to central civilian authority; and supportive of human rights, rule of law and democracy. The ANA must also be capable of protecting the Government of Afghanistan from internal threats and ensuring regime survivability.

A strong military to support the national government will prevent dissension, regional rifts and ethnic feuds that have often spilled over Afghanistan's borders into neighboring countries. Without security protection and basic services from the government, large unemployed populations are subject to recruitment to the insurgency and the narcotics trade. A long-term and well-rounded program to build and train the ANA and extend its reach throughout the country is essential to U.S. objectives in Afghanistan and the region.

International Military Education and Training (IMET) is an integral part of the long-term ANA training program. IMET funding supports courses in logistics, vehicle maintenance, language, and professionalization. IMET funding has also provided English language labs and paid for their installation and use. IMET is also used for Mobile Training Teams (MTTs) to provide training on military equipment. Training also develops skills needed by the military to support combat forces and enhance interoperability, such as aviation training, communications, legal, medical, intelligence, and border patrol skills.

As the capacity of ANA has grown, so has Afghan participation in classes that introduce the military leadership to the concept of civilian control, a professional military ethos, and recognition of internationally accepted human rights. The ANA has sent officers to the National Defense University's (NDU) International Fellow's program, the George C. Marshall European Center for Security Studies, and the Asia-Pacific Center for Security Studies (APCSS). ANA will continue to utilize conference/seminar opportunities at the Regional Centers focusing on counter terrorism topics. In FY 2008, the ANA also sent officers to the U.S. Army Command and General Staff College and the Army War College. FY 2010 and 2011 focus will be on leader development and professional military education with increased emphasis on junior officer development, to include the implementation of a merit based system for US training selection at the National Military Academy of Afghanistan (NMAA).

The Regional Defense Combating Terrorism Fellowship Program (CTFP) directly supports U.S. strategic objectives by providing the ANA with the military training necessary to maintain the country's sovereignty in its fight against insurgency

**Volume I Section III-V - South Central Asia**

and terrorism. The current emphasis on developing in-country English language training capabilities will enable the ANA to spend less on language training in the United States and more on Professional Military Education (PME) courses that will improve ANA's interoperability with U.S. forces and increase their participation in future CTFP opportunities, as well as their prosecution of the overseas contingency operations in the South Asia region.

## Bangladesh

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

<b>Totals:</b>	<b>380</b>	<b>341</b>	<b>122</b>	<b>\$2,926,047</b>	<b>164</b>	<b>164</b>	<b>16</b>	<b>\$2,355,099</b>

The U.S. security priorities in Bangladesh are combating terrorism and increasing maritime security. Primary U.S. interests in Bangladesh are democracy, security and stability, and economic prosperity. Greater respect for human rights and the rule of law, curbing corruption, and the strengthening of democratic institutions are essential to ensuring political stability and expanding economic growth.

International Military Education and Training (IMET) funds facilitate U.S. military-to-military professional contacts through attendance at Professional Military Education (PME) courses in the United States and by participation in U.S. Mobile Training Team (MTT) training in Bangladesh. Developing an apolitical, well-trained, and professional military contributes to political stability, a closer relationship between our two countries, and increased participation in UN peacekeeping operations. Specifically, Bangladesh uses its IMET funding to send students to a variety of mid-level and senior U.S. service schools and war colleges, peacekeeping courses, and numerous courses in support of the overseas contingency operations. Peacekeeping training in the last four years has helped Bangladesh become one of the top contributors to UN Peacekeeping missions in these years. Overall training opportunities promote the U.S. goals of:

- A professional and well-trained military
- Peaceful relations with the United States and other nations
- Increased interoperability
- Respect for human dignity
- Greater familiarity within the Bangladeshi officer corps' with U.S. values and military practices

Bangladeshi military personnel also take part in courses on defense acquisition management, engineering, shipyard management, military intelligence, and the military's role in peacekeeping operations. Collectively, these courses strengthen the Bangladeshi military's ability to counter terrorism, secure its borders, and enhance its value as a peacekeeping provider and potential future partner of the United States. A particular focus area is border security/coastal patrol in 2009 and projected for 2010-2011, with the U.S. Coast Guard and other schools providing patrol operations and management training.

Bangladeshi students have participated in executive courses at the Asia-Pacific Center for Security Studies (APCSS) and at the Near East South Asia Center for Strategic Studies (NESAS). Both centers' courses are intended to focus on the non-warfighting aspects of security and international relations as an effective means of strengthening defense ties with Bangladesh. These executive courses enhance awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Bangladesh.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) provides important training and education to assist Bangladesh in integrating its interagency (military and civil-military) approach to combating terrorism. These funds focus on the counterterrorism (CT) and counter-smuggling effort in the vast inter-coastal and riverine waterways system. This effort

**Volume I Section III-V - South Central Asia**

was led by the Bangladesh Coast Guard. These waterways are the primary means of transporting people, weapons, drugs, and other goods into and out of the country. The CTFP program in FY 2008/2009 brought together counterparts from different countries and agencies across the counterterrorism spectrum, and will continue to do so in FY 2010. Through this cross-fertilization, Bangladesh is building a more comprehensive and cohesive approach to addressing its particular concerns in combating terrorism; other countries in the region are gaining an understanding of the challenges, successes, and failures of CT efforts in Bangladesh; and the United States is building Bangladesh's long-term CT capacity.

**Bhutan**

There are approximately 8,000 members of the Royal Bhutan Army; official numbers are not published. Bhutan does not have a navy or air force. While the United States has no International Military Education and Training (IMET) program with Bhutan, officials from their Ministry of Foreign Affairs and the Royal Bhutan Police participated in executive courses at the Asia-Pacific Center for Security Studies (APCSS) in FY 2008 and FY 2009, and more are expected in 2010. It is in the U.S. interest to encourage Bhutan's transition to democracy, to help its military forces attain the ability to control the nation's borders, and to encourage military professionalism and respect for human rights. Participating in seminars at the APCSS helps promote these goals.

## India

Program	FY 2009				FY 2010

The U.S.-India bilateral relationship continues to grow in a wide range of areas, including defense cooperation, counterterrorism (CT) efforts, coordination on regional conflicts, and cooperation in a growing range of multilateral fora.

International Military Education and Training (IMET) funds are used to facilitate U.S. military-to-military professional contacts and assist in training. India has used IMET funding to send students to the Army, Air Force, Navy, and Marine Command and Staff Colleges, the Army and Air War Colleges, and various other officer-training courses. These opportunities promote the U.S. goals of stability, effective civil-military relations, and defense cooperation in areas of mutual interest. They increase the Indian officer corps' familiarity with U.S. values and military practices. Indian military personnel also take part in courses dealing with areas of combat service support, all of which enhance their value as future peacekeeping participants.

As a means of strengthening defense ties with India, during the past year the United States has held numerous joint exercises with India, including several in India where U.S. forces participated, and in the United States where Indian forces took part. The United States welcomed continued Indian participation in FY 2008 at the Asia-Pacific Center for Security Studies (APCSS), the George C. Marshall European Center for Security Studies, and at the Near East South Asia Center for Strategic Studies (NESA) executive courses, all of which are designed to focus on the non-warfighting aspects of security and international relations. The executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from India. India accepted the United States' proposal for continued participation at these executive courses in FY 2009, and will likely do so in FY 2010 as well.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) provides important training and education to assist India in combating terrorism. This program brings together counterparts from different countries and agencies across the CT spectrum. Through this cross-fertilization, India is building a more comprehensive approach to addressing its particular concerns in combating terrorism; other countries in the region are gaining an understanding of the challenges, successes, and failures of CT efforts in India; and the United States is building India's long-term CT capacity.

## Kazakhstan

<b>Totals:</b>	<b>357</b>	<b>331</b>	<b>95**</b>	<b>\$4,282,623</b>	<b>1</b>	<b>1</b>	<b>1</b>	<b>\$10,587</b>

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

U.S. interests include:

- Advancing Kazakhstan's long-term political stability by developing democratic institutions and respect for human rights
- Modernizing and professionalizing Kazakhstan's military institutions and armed forces
- Improving Kazakhstan's capability to combat violent extremism.

To strengthen our mutually beneficial bilateral military relationship with Kazakhstan, our military-to-military goals include enhancing the capabilities of Kazakhstan's Peacekeeping Battalion (KAZBAT) by deepening Kazakhstan's participation in the Partnership for Peace (PfP) and in USCENTCOM regional exercises. Foreign Military Financing (FMF) and International Military and Education and Training (IMET) enhance regional cooperation by creating needed capabilities such as expanding Kazakhstan's cooperation in PfP, supporting KAZBAT and USCENTCOM regional exercises, and enhancing Kazakhstan's military interoperability with NATO forces. IMET is also used to help facilitate the professionalization of the Kazakhstani armed forces and promote a better understanding of the role of the military in a democracy and the development of appropriate civil-military relations and human rights practices. In September 2009, the seventh and largest annual exercise, STEPPE EAGLE, was held in Kazakhstan.

Military training with Kazakhstan focuses on leadership, Professional Military Education (PME) and civil-military relations. Courses related to international staff officer training contribute to PfP goals. Courses for junior infantry, intelligence, and military police officers as well as leadership training provided to non-commissioned officers further the U.S. goal of developing interoperable forces capable of coalition missions. Military and peacekeeping operations courses contribute directly to Kazakhstan's ability to meet specified PfP and coalition interoperability goals.

The primary focus for the near- and mid-term is the execution of the second Five-Year Military Cooperation plan, signed in February 2008 by the Kazakhstani Ministry of Defense and the Office of the Secretary of Defense. This plan ties mission to task in three areas of development:

- Establishing a professional armed force with rapid deployment capability compatible with NATO force standards
- Establishing a rapid-reaction military capability in the Caspian region
- Pursuing general systemic reform within the spheres of military education and training, transition to an all-volunteer force, and equipment modernization

Each of these task areas will better develop the U.S.-Kazakhstan-NATO interoperability, increasing the regional capacity to counter violent extremist organizations, as well increasing Kazakhstan's capacity to meet its own security requirements.

U.S. training has led to the establishment in Kazakhstan of a regional High Mobility Multipurpose Wheeled Vehicle (HMMWV) maintenance center, further increasing the region's capacity to modernize land forces.

## Kyrgyzstan

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	8	7	8	\$115,038	0	0	0	\$0.00
FMS	14	14	1	\$0.00	0	0	0	\$0.00
IMET-1	53	28	51	\$974,267	0	0	0	\$0.00
Regional Centers	108	108	18	\$242,173	0	0	0	\$0.00
Service Academies	1	1	1	\$73,519	0	0	0	\$0.00
<b>Totals:</b>	<b>184</b>	<b>158</b>	<b>79</b>	<b>\$1,404,997</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Our efforts to engage Kyrgyzstan in a broader security cooperation relationship that fosters professionalism and stresses civilian control of the military underscore Kyrgyzstan's sovereignty and improve its ability to mitigate the circumstances that breed terrorism. International Military Education and Training (IMET), the Combating Terrorism Fellowship Program (CTFP), and NATO's Partnership for Peace (PfP) all contribute to this effort.

Through Mountain Leaders' courses, George C. Marshall European Center for Security Studies seminars, participation in command and general staff colleges and professional military education, Kyrgyz officers and non-commissioned officers have interacted with their U.S. and NATO counterparts as well as others from Central Asia. Topics addressed have included: defense management, strategic intelligence, military peacekeeping operations, and training officers as leaders of infantry, airborne, and other related units.

A number of Kyrgyz military officers have received a full year of English language instruction and follow-on military training. Others received specialized training as English language instructors. IMET-funded English language laboratories have been established and books and audio-visual materials are being acquired using IMET funds to supplement the language training programs.

## Maldives

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	23	23	4	\$86,190	0	0	0	\$0.00
GPOI	1	1	1	\$833	0	0	0	\$0.00
IMET-1	12	6	12	\$139,920	0	0	0	\$0.00
Non-SA, UC, JCET	24	24	1	\$300,000	0	0	2	\$260,000
Regional Centers	9	9	9	\$74,232	10	10	6	\$82,509
Service Academies	3	3	2	\$147,038	0	0	0	\$0.00
<b>Totals:</b>	<b>72</b>	<b>66</b>	<b>29</b>	<b>\$748,213</b>	<b>10</b>	<b>10</b>	<b>8</b>	<b>\$342,509</b>

It is in the U.S. national security interest to maintain stability in this small island nation by strengthening its democratic institutions. Because there is no resident Mission in Maldives, the United States will continue to pursue its national interests there through regular diplomatic exchanges managed by the U.S. Embassy in Colombo, through the International Military Education and Training (IMET) program, and through Regional Democracy Fund programs.

U.S.-funded training facilitates military-to-military professional contacts and assists in training exercises. Development of an apolitical, professional military contributes to political stability. In addition, training is providing a basis for future participation by the Maldives in peacekeeping exercises. The Maldives uses its IMET funds to send students to basic officer career courses, maritime training, and various other officer and technical training courses. These opportunities promote the U.S. goals of enhancing stability and democracy, and increase the Maldivian officer corps' familiarity with U.S. values and military practices. Maldivian military personnel also take part in courses on maintenance, crisis command and control, and instructor training, all of which strengthen the Maldivian military's ability to secure its territory and waters as well as enhance its potential as possible future peacekeeping provider. A Marine expeditionary unit conducted some additional training with the Maldivian military in 2009, focusing on non-commissioned officer professional development, advanced first aid, and small-unit tactics. More assessment, training, and exercise activity is planned for FY 2010 and FY 2011.

The United States welcomed continued Maldives participation in FY 2008 in the Asia-Pacific Center for Security Studies (APCSS) and the Near East South Asia Center for Strategic Studies (NESA) executive and senior executive courses, which are designed to focus on the non-warfighting aspects of security and international relations, as well as in the Comprehensive Crisis Management and Comprehensive Security Responses to Terrorism courses. These executive courses increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from the Maldives. The U.S. Service Academy Program provides the Maldives National Defense Force increased opportunities to enroll cadets in the U.S. Army, Naval, and Coast Guard academies.

## Nepal

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	26	25	12	\$370,732	0	0	0	\$0.00
FMS	39	39	1	\$958,391	0	0	0	\$0.00
GPOI	914	914	18	\$494,794	0	0	0	\$0.00
IMET-1	82	71	23	\$938,835	0	0	0	\$0.00
Misc DOD/DOS Non-SA	1	1	1	\$8,000	0	0	0	\$0.00
Non-SA, UC, JCET	140	140	2	\$380,037	80	80	3	\$740,000
Regional Centers	151	151	25	\$575,361	14	14	3	\$111,469
<b>Totals:</b>	<b>1353</b>	<b>1341</b>	<b>82</b>	<b>\$3,726,150</b>	<b>94</b>	<b>94</b>	<b>6</b>	<b>\$851,469</b>

The United States supports Nepali efforts to entrench multi-party democracy and civil liberties, ensure professional security forces, implement economic development programs, and improve the Nepal Army's (NA) human rights record. Professional military education (PME) is particularly critical during Nepal's period of political transition.

Nepal uses International Military Education and Training (IMET) funding to send students to various officer-training courses that provide PME as well as familiarize the Nepali officer corps with U.S. values and military practices. The courses provide the opportunity for military-to-military professional contacts, and facilitate cooperation on training exercises and in peacekeeping operations. The United States has specifically tailored its IMET program to address the most pressing needs of the NA including educating NA personnel on the mechanics and importance of civilian control of the military. In FY 2008, Nepali military personnel participated in courses related to health care skills as well as civil affairs, infantry, ranger, warrior leader, and public affairs training, with a special emphasis on establishing and adhering to rules of engagement during military operations that protect human rights. This training significantly enhances the NA's capabilities as peacekeepers and in pursuing domestic stability.

The NA continues to be a world leader in participation in UN Peacekeeping Operations (PKO). The Bijendra Peace Operations Training Center established in Panchkhal provides excellent pre-deployment training for units participating in upcoming PKOs.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) provides important training and education to assist Nepal in counterterrorism (CT). This program brings together counterparts from different countries and agencies across the CT spectrum. Through this cross-fertilization, Nepal advances a more comprehensive approach to addressing its particular concerns in combating terrorism, and other countries in the region gain an understanding of the challenges, successes, and failures of CT efforts in Nepal.

As a means of strengthening defense ties with Nepal, in FY 2009 the U.S. welcomed Nepali participation at the Asia-Pacific Center for Security Studies (APCSS) and at the Near East South Asia Center for Strategic Studies (NESAS) executive courses, which are designed to focus on the non-warfighting aspects of security and international relations. These executive courses increase awareness and understanding of U.S. policies, which lead to increased trust, transparency and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Nepal. The United States proposes continued Nepali participation in APCSS executive courses in FY 2010 and beyond, as well as continuing to fund students to attend the NESAS and other institutions.

## Pakistan

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Continued strong support from Pakistan's government in the fight against terrorism, promoting stability in nuclear-armed South Asia, and advancing Pakistani political and economic reforms are all priority U.S. foreign policy interests. None can be achieved without the cooperation of the Pakistani military. For democratization and economic growth to take root, the military must become more open to transparency and accountability in budgeting and civilian decision-making.

IMET funding increases opportunities for military-to-military professional contact, improves interoperability, enhances respect for civilian rule, and improves technical capabilities. IMET courses also focus on professionalism, and expose Pakistani personnel to U.S. ethos, military doctrine, and management. In FY 2009, IMET also supported Enhanced International Military Education and Training (E-IMET) courses as a means to increase exposure to issues related to human rights and the law of war. FY 2009 IMET courses additionally included budget preparation, ammunition specialist, and advanced management.

The executive courses of the Asia-Pacific Center for Security Studies (APCSS), the George C. Marshall European Center for Security Studies, and the Near East South Asia Center for Strategic Studies (NESAC) continue to emphasize the non-warfighting aspects of security and international relations. These courses increase awareness and understanding of U.S. policies, which lead to increased trust, transparency, and confidence.

The Pakistan Regional Defense Combating Terrorism Fellowship Program (CTFP) supports current efforts in the war against terrorism by educating officers directly involved in counterterrorism (CT) efforts, thus allowing the country to develop policy and plans that support coalition efforts. Through CTFP, the Pakistanis will gain the necessary tools and capabilities to improve not only their CT abilities, but also their military capacity as a whole.

## Sri Lanka

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	14	14	9	\$437,347	0	0	0	\$0.00
FMS	1	1	1	\$719,543	0	0	0	\$0.00
GPOI	81	81	10	\$283,242	0	0	0	\$0.00
IMET-1	25	15	24	\$715,445	0	0	0	\$0.00
Non-SA, UC, JCET	51	51	2	\$199,173	0	0	2	\$470,000
Regional Centers	67	67	31	\$470,705	15	15	6	\$175,379
Service Academies	3	3	1	\$211,683	0	0	0	\$0.00
<b>Totals:</b>	<b>242</b>	<b>232</b>	<b>78</b>	<b>\$3,037,138</b>	<b>15</b>	<b>15</b>	<b>8</b>	<b>\$645,379</b>

The end of the long secessionist war with the Liberation Tigers of Tamil Eelam (LTTE) opens up opportunities for engagement on civil-military issues, economic development, and humanitarian assistance. U.S. interests in Sri Lanka are strengthening democratic institutions, increasing respect for human rights, alleviating conflict-related humanitarian crises in the north and east, improving U.S.-Sri Lankan economic ties and cooperation, and enhancing regional stability.

U.S. assistance to Sri Lanka includes funds to develop U.S. military-to-military professional contacts and assist in training exercises. Developing an apolitical, professional military contributes to political stability and allows for increased participation in peacekeeping exercises. Specifically, Sri Lanka uses its International Military Education and Training (IMET) funding to send students to the Army, Air Force, Navy, and Marine Command and Staff Colleges and various other officer training courses. These opportunities promote the U.S. goals of enhancing stability and democracy, and increase the Sri Lankan officer corps' familiarity with U.S. values and military practices. Sri Lanka's interoperability with U.S. forces improves through IMET-funded specialized English language training. During FY 2009, Sri Lankan military personnel took part in basic skills development and management courses, which enhance their value as future peacekeeping participants and increase professionalism within the force.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) brings together counterparts from different countries and agencies across the counterterrorism (CT) spectrum. Through this cross-fertilization, Sri Lanka is building a more comprehensive approach to addressing its particular concerns in combating terrorism; other countries in the region are gaining an understanding of the challenges, successes and failures of CT efforts in Sri Lanka; and the United States is building Sri Lanka's long-term CT capacity.

Sri Lanka participated at the Asia-Pacific Center for Security Studies (APCSS), the Marshall Center, and the Near East South Asia (NESAS) Center for Security Studies executive and senior executive courses and seminars, which are designed to focus on the non-warfighting aspects of security and international relations. These opportunities increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Sri Lanka.

Participation in the U.S. Service Academy Program has enabled young Sri Lankan service cadets to enter the U.S. Military Academy and U.S. Air Force Academy and receive graduate-level military education not available in Sri Lankan institutions.

In FY 2009, candidates from certain units of the Sri Lankan security forces were denied U.S. training under the Leahy human rights vetting law due to credible allegations of gross human rights violations.

## Tajikistan

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	18	18	5	\$152,382	0	0	0	\$0.00
IMET-1	18	9	16	\$378,048	0	0	0	\$0.00
Regional Centers	29	29	13	\$146,030	0	0	0	\$0.00
<b>Totals:</b>	<b>65</b>	<b>56</b>	<b>34</b>	<b>\$676,460</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Tajikistan's porous borders make it highly vulnerable as a transit point for the movement of terrorist insurgents, narcotics, and weapons that can destabilize other parts of the region. U.S. goals in Tajikistan remain the development of a strong civil society, a market economy, stable borders, and democratic rule with full respect for human rights.

International Military Education and Training (IMET) funds training on subjects including English language and Professional Military Education (PME). Spreading English-language skills more broadly remains a priority in a region where Russian is the most common second language. More widespread English language capability facilitates U.S. training, as well as furthering our goal to build interoperability with US and NATO forces, especially in support of peacekeeping operations. IMET-funded English language laboratories have been established and books and audio-visual materials are acquired annually using IMET funds to supplement local language training programs.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) helps to build strong bilateral ties between the United States and Tajikistan, critical for sustaining our collaborative.

Tajik officials also benefit from instruction at the George C. Marshall Center in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe. Attendance at Marshall Center courses and conferences exposes Tajik officers and defense officials to their peers in NATO, other former Soviet and former Warsaw Pact countries. These countries provide examples of success in defense reform, and the benefits of an open society and economy, information to which Tajik citizens otherwise have little to no access.

## Turkmenistan

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	2	2	2	\$11,550	0	0	0	\$0.00
IMET-1	6	4	5	\$172,595	0	0	0	\$0.00
Regional Centers	10	10	7	\$57,035	0	0	0	\$0.00
<b>Totals:</b>	<b>18</b>	<b>16</b>	<b>14</b>	<b>\$241,180</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States seeks a stable, independent Turkmenistan that contributes to regional stability and prosperity and enhances U.S. national security. A principle U.S. interest is enhancing Turkmenistan's ability to secure its borders since it is a key transit state in Central Asia for narcotics, weapons, and terrorists. The United States also seeks Turkmenistan's assistance in overseas contingency operations, counternarcotics (CN) efforts, and preventing the proliferation of weapons of mass destruction and associated delivery systems, materials, technologies, and expertise. The United States encourages Turkmenistan's further participation in Partnership for Peace (PfP) and related activities as part of our overall goal of introducing Turkmenistan to military cooperation regionally and fostering greater exposure.

Warsaw Initiative Funding (WIF) for participation in PfP activities furthers on-the-ground-experience, including regional cooperation, interoperability with NATO forces, and reform of Turkmenistan's military along Western, democratic lines. These activities also increase Turkmenistan's engagement with Euro-Atlantic security institutions.

Turkmenistan uses International Military Education and Training (IMET) funds to send military personnel to the United States for English language training and for Professional Military Education (PME) courses, which support Turkmenistan's military reform by exposing officers to U.S. democratic standards and values.

Turkmenistan officials also benefit from instruction at the George C. Marshall Center in Germany. The Marshall Center focuses on providing training through courses, conferences, and seminars in democratic processes and civil-military relations for uniformed and civilian defense personnel for countries throughout Central and Eastern Europe. Attendance at Marshall Center courses and conferences exposes Turkmenistan officers and defense officials to their peers in NATO, and other former Soviet and former Warsaw Pact countries. These countries provide examples of success in defense reform, and the benefits of an open society, economy and information.

Spreading English language skills more broadly remains a priority in a region where Russian is the most common second language and it facilitates U.S. training. The IMET program for Turkmenistan remains focused on language training, as well as on professional officer development for junior and mid-grade officers from all branches of service. The goal of the program is to further Turkmenistan's military professionalization and to enhance the ability of Turkmenistan's forces to participate in PfP activities and/or any future coalition contingencies.

## Uzbekistan

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	51	51	4	\$129,442	0	0	0	\$0.00
Regional Centers	28	28	12	\$147,098	0	0	0	\$0.00
Service Academies	1	1	1	\$6,100	0	0	0	\$0.00
<b>Totals:</b>	<b>80</b>	<b>80</b>	<b>17</b>	<b>\$282,640</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Uzbekistan is a strategically important country that is vital to stability in Central Asia. Uzbekistan has been an important past partner in efforts to combat international terrorism. It allowed U.S. forces access to the Karshi-Khanabad airbase until November 2005, provided blanket overflight rights until January 2006, and continues to permit Germany and other coalition partners' access to the Termez airport in support of International Security Assistance Force (ISAF) operations in Afghanistan. The Uzbek government allows Department of Defense commercial charter aircraft to overfly its territory. As of April 2009, Uzbekistan has supported transportation of materials and goods through air, ground, and rail corridors into Afghanistan in support of OEF. Counterdrug familiarization and border guard training has been conducted along the Uzbekistan and Afghanistan border since November 2009.

Uzbekistan does participate in courses at the Asia-Pacific Center for Security Studies (APCSS) and the George C. Marshall European Center for Security Studies, which exposes officers to U.S. democratic standards and values.

During 2009, Uzbekistan was ineligible for International Military, Education and Training (IMET) and Foreign Military Financing (FMF) assistance because the Secretary of State has been unable, since FY 2005, to certify Uzbekistan under the U.S.-Uzbekistan Strategic Partnership Agreement, as required by section 568(a) of the Foreign Operations Appropriation Act. That agreement calls for substantial and significant progress on issues including respect for human rights; establishing a genuine multi-party system; and ensuring free and fair elections, freedom of expression, and independence of the media.

## Antigua and Barbuda

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	21	14	18	\$152,213	0	0	0	\$0.00
Regional Centers	6	6	1	\$15,000	0	0	0	\$0.00
Section 1004	15	15	3	\$93,421	0	0	0	\$0.00
<b>Totals:</b>	<b>42</b>	<b>35</b>	<b>22</b>	<b>\$260,634</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

The United States enjoys good bilateral relations with Antigua and Barbuda. The Department has encouraged the Government of Antigua and Barbuda to participate more actively in Counternarcotics (CN) efforts and other multilateral security activities. U.S.-funded training assists in the development of a more professional and efficient security force through such exercises as Tradewinds. Participating in joint exercises and maritime training increased Antigua and Barbuda's ability to work with U.S. entities in CN operations, search and rescue operations, and other bilateral and multilateral operations. An 82-foot patrol boat that was provided by the U.S. government in 1998 and used for coastal patrolling and maritime CN missions has recently been decommissioned. Due to the small size of Antigua and Barbuda's security forces, the limited International Military Education and Training (IMET) funding available pays great dividends in training programs to develop its maritime security capabilities.

In FY 2009 Antigua and Barbuda in cooperation with U.S. Southern Command announced the start of its regional disaster relief exercise known as Fuerzas Aliadas Humanitarias (FAHUM). FAHUM is an annual disaster relief field training exercise and command post exercise involving military and civilian agencies in the region. FAHUM exercise is used to improve regional and national disaster response capabilities between the United States and the participating countries (Antigua & Barbuda, Costa Rica, Honduras, and Grenada).

As a means of strengthening defense ties, the United States welcomes participation from Antigua and Barbuda at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Antigua and Barbuda.

## Argentina

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	52	51	11	\$134,642	0	0	0	\$0.00

<b>Totals:</b>	<b>688</b>	<b>658</b>	<b>144**</b>	<b>\$2,017,320</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>\$0.00</b>

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Argentina is a democratic nation and a partner in the strategically important Southern Cone region. We have a mature relationship with the Government of Argentina (GOA) and the Argentine military actively participates in international peacekeeping and other multilateral efforts. Argentina was named a major non-NATO Ally in 1998.

To promote interoperability and knowledge of U.S. operations, the Argentine military has participated in a number of joint exercises with U.S. forces in the region, including UNITAS (blue-water and amphibious) naval exercises, the SALITRE air force exercise in Chile, the SOUTHCOM-sponsored Peacekeeping Operations (PKO)-South, Fuerzas Comandos, and PANAMAX (defense of the Panama Canal) exercises. Exercises involving U.S. troops on Argentine soil require approval by the Argentine Congress on a case-by-case basis.

International Military Education and Training (IMET)-funded and other courses on human rights, international law, peacekeeping, Counternarcotics (CN), command and general staff and air and national war colleges, and a variety of other courses provide officer and Non-Commissioned Officer (NCO) training that enhance efforts to modernize and professionalize Argentina's armed forces. They also help reinforce the concept of civilian control of the military and familiarize the Argentine military with U.S. military doctrine and practices. Supply management training for junior officers and courses in defense resources and logistics management increase Argentina's ability to maintain U.S. equipment in its inventory, thus improving Argentine interoperability with U.S. forces in bilateral and multilateral activities. As South America's third largest contributor of troops to international PKOs, training in peacekeeping further encourages Argentina's participation in these activities. As of January 2009 Argentina contributes 562 troops to the UN stabilization mission in Haiti, MINUSTAH (Mission des Nations Unies pour la stabilisation en Haïti), and contributes 893 personnel to UN PKOs worldwide. Argentina is working with Chile to establish a 1000-man joint PKO brigade to be ready for deployment in 2010.

Argentina started to receive Regional Defense Combating Terrorism Fellowship Program (CTFP) funding in FY 2004. The Argentine Police are primarily responsible for an effective counterterrorism program in Argentina. They have a strong special operations group, skilled at real world hostage rescue and good marksmanship skills. CTFP funds will assist this group to train for more effective Counterterrorism (CT) initiatives, and to strengthen the unit's ability to conduct small-to-medium scale operations. CTFP funds have also been used to train the Gendarmes and the Coast Guard, and to allow Argentina to participate in regional center seminars in the United States.

As a means of strengthening defense ties, the United States welcomes Argentine participation at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, as well as increase awareness and understanding of U.S. policies, leading to increased trust,

## **Volume I Section III-VI - Western Hemisphere**

transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Argentina.

As of December 2009, Argentina contributes 561 troops to the UN stabilization mission in Haiti, MINUSTAH, and 861 personnel to UN PKO's worldwide. In 2010 Argentina plans to deploy an additional 150 troops to MINUSTAH at the request of the UN.

## Bahamas

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Section 1004	16	13	15	\$133,113	0	0	0	\$0.00
<b>Totals:</b>	<b>69</b>	<b>65</b>	<b>36**</b>	<b>\$464,261</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

The Bahamas is a democratic nation that has good bilateral relations with the United States. International Military Education and Training (IMET) courses in basic military officer and Non-Commissioned Officer (NCO) training and a variety of maritime training courses assist the Bahamas in the development of a more professional and efficient security force. This training is tied to both operational requirements and equipment acquisitions.

The Bahamas is instrumental in assisting the United States in combating narcotics trafficking and illegal migration in the region. Training activities include instruction in operational planning and exercises with U.S. forces, such as Tradewinds. Training in maritime crisis management and vessel control verification greatly enhances the Bahamas' ability to perform law enforcement and security activities. Training on legal issues involving the military encourages continued Bahamian participation in many bilateral and multilateral activities. One result has been close cooperation with the U.S. government on a combined law enforcement effort, Operation Bahamas, and Turks and Caicos (OPBAT), which is critical for the interdiction of aliens, drugs, and terrorists en route to the United States. In addition, this training has resulted in the Bahamas placing an increased emphasis on preventing money laundering and on asset forfeiture investigations and prosecution. The Bahamas is a partner in the Enduring Friendship initiative, which is to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. It supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the Command's Theater Security Cooperation Strategy.

## Barbados

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	22	16	18	\$212,509	0	0	0	\$0.00

Barbados is a democratic nation that has good bilateral relations with the United States. International Military Education and Training (IMET) programs will assist Barbados in the development of a more professional and efficient security force through both Professional Military Education (PME) courses and technical training. Participating as an observer in the Tradewinds exercise (included maritime, Counternarcotics (CN) and Counterterrorism (CT) training and basic search and rescue) greatly enhanced Barbados' ability to assist in CN efforts. Barbados has continued its leadership role in the Eastern Caribbean by passing domestic legislation that enables it to implement maritime law enforcement agreements. U.S. government training and support has facilitated execution of cooperative bilateral law enforcement efforts in the region.

In FY 2010 Barbados had agreed to host the regional disaster relief exercise known as Fuerzas Aliadas Humanitarias (FAHUM). This exercise was canceled due to the Haitian earthquake in January 2010. FAHUM is an annual disaster relief field training exercise and command post exercise involving military and civilian agencies in the region. FAHUM exercise is used to improve regional and national disaster response capabilities between the United States and the participating countries.

As a means of strengthening defense ties, the United States welcomes participation from Barbados at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Barbados.

## Belize

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

<b>Totals:</b>	<b>187</b>	<b>167</b>	<b>63</b>	<b>\$1,867,466</b>	<b>200</b>	<b>200</b>	<b>2</b>	<b>\$100,000</b>

Belize is a democratic nation that has a strong bilateral relationship with the United States. We have encouraged the military of Belize to participate more actively in Counternarcotics (CN) and other multilateral efforts. Because of its proximity to the United States, its long coastline dotted with many islands and inlets, and its position linking Central American and Caribbean states, Belize is an ideal transit point for illicit drugs headed for the United States. Easy access to the United States and Mexico makes Belize an attractive staging area for other international crimes as well. It is a market for vehicles stolen in the United States, a potential site for money laundering, and a point of origin for smuggled wildlife and artifacts.

International Military Education and Training (IMET) and other programs provide training and equipment to maintain a small but disciplined Belize Defense Force (BDF). BDF troops served with the Caribbean Community and Common Market (CARICOM) Battalion during Peacekeeping Operations (PKO) in Haiti, and participated in regional training exercises, such as Tradewinds, with United States, British, and Caribbean forces. IMET training in the areas of mid-level officer training and equipment maintenance, as well as attendance at the U.S. Naval Academy, greatly improves the professionalism and competence of the BDF. A number of activities were conducted to help make the BDF a more effective partner when operating with U.S. forces in bilateral exercises and operations, particularly in the CN area. Belize is partner in the Enduring Friendship (EF) initiative, which aims to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. EF supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the Command's Theater Security Cooperation Strategy.

The BDF has also become an observer of the Conferencia de Fuerzas Armadas Centroamericanas (CFAC), a regional military organization comprised of Nicaragua, El Salvador, Honduras, Guatemala, and the Dominican Republic. This move will enhance sub-regional training and PKO cooperation.. Belize receives funding through the Global Peace Operations Initiative (GPOI) to support peacekeeper training to assist with the development of infantry and engineering assets for future PKO deployments.

## Bolivia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
IMET-1	7	4	7	\$161,089	0	0	0	\$0.00
IMET-X	2	2	2	\$103,424	0	0	0	\$0.00
Regional Centers	19	19	8	\$99,690	0	0	0	\$0.00
Section 1004	28	28	16	\$205,901	0	0	0	\$0.00
<b>Totals:</b>	<b>56</b>	<b>53</b>	<b>33</b>	<b>\$570,104</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Bolivia is undergoing a significant transition in its political history. It traditionally enjoyed a strong bilateral relationship with the United States. Bolivia's policy of "coca yes, but cocaine zero" has created challenges for our cooperative counter-drug efforts. While the Morales Administration has complicated USG military-to-military engagement efforts, the Bolivian military continually expresses its desire to maintain close ties with its U.S. counterparts. Bolivia contributes over 200 troops to the MINUSTAH (Mission des Nations Unies pour la stabilisation en Haïti) peacekeeping mission in Haiti. U.S. government training and participation in joint exercises had enabled Bolivia to phase out the policy of compensating individuals for drug eradication, substantially reduce the amount of coca under cultivation in the Chapare region, and increase the number of arrests and chemical seizures. This effort is hampered by resistance from those who have profited from the production and trafficking of narcotics, particularly cocaine. Special Counternarcotics (CN) forces and certain select units of the military are active participants in the drug war.

While there is heightened concern about the Morales Administration's policies that allow for increased coca cultivation, Bolivia has been certified as cooperating with U.S. counternarcotics policy, and we have provided Professional Military Education (PME) and Non-Commissioned Officer (NCO) training to continue to enhance the professionalism of Bolivia's armed forces. International Military Education and Training (IMET) and other programs include courses on human rights, NCO professional development, and battalion and brigade staff officer training, which help reinforce principles of democracy and civilian control of the military.

Bolivia has received Regional Defense Combating Terrorism Fellowship Program (CTFP) funds to send students to English language training and to regional center seminars conducted by the Center for Hemispheric Defense Studies (CHDS) and a Counterterrorism Fellows program at the National Defense University (NDU) in 2006. In FY 2007, Bolivia used CTFP funds to send a student to a U.S. Army Intermediate Level Education course, and sent students to CHDS in FY 2008.

As a means of strengthening defense ties, the United States welcomes Bolivian participation at CHDS executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Bolivia that will transcend the current political situation.

**Brazil**

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

<b>Totals:</b>	<b>271</b>	<b>223</b>	<b>135</b>	<b>\$5,107,039</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>\$623,000</b>

As a result of its geographic size and economic power, Brazil has substantial regional influence. Brazil and the United States share many common international security interests. Our militaries enjoy close cooperation and interact regularly with each other. Brazil's military actively participates in international peace operations (PKO). Brazil has led the UN-sponsored MINUSTAH peace operation in Haiti since its inception in 2003, contributing the force commander and over 1,200 troops to the effort. Brazil remains the Americas' second largest contributor, after Uruguay, of PKO troops over the past decade.

International Military Education and Training (IMET) and DoD-funded training for Non-Commissioned Officers (NCO), mid-level, and senior officers assist Brazil's efforts to modernize its armed forces. Training in security assistance management and crisis command and control also enhances Brazil's ability to maintain its inventory, and to participate in international PKO and humanitarian operations. Brazil's participation in joint exercises strengthens their relationship and interoperability with U.S. forces. In 2008, the U.S. Navy participated in the UNITAS joint exercises involving the USS GEORGE WASHINGTON Carrier Strike Group to promote interoperability, information sharing and cooperation with the Brazilian and Argentine navies.

Brazil received over \$380,000 in Regional Defense Combating Terrorism Fellowship Program (CTFP) funds in FY 2007. Students from Brazil attended the Naval Postgraduate School's Center for Civil-Military Relations and a Coast Guard incident command course. Brazil also sent students to several senior professional military education programs such as the National Defense University's Counterterrorism Fellows Program, Air War College, and U.S. Army Sergeants Major Academy. Continued engagement with Brazil using the CTFP program will allow for increased security in the Americas and for the United States.

As a means of strengthening defense ties, the United States welcomes participation from Brazil at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Brazil.

Chile is a key and increasingly strategic military partner of the United States in the Western Hemisphere. U.S. military training activities with Chile help advance U.S. interests in regional stability, interoperability with U.S. forces, and the maintenance and protection of basic democratic values and human rights. As the Chilean armed forces are modern and professional, they have expanded their participation in activities such as international peacekeeping, exemplified by their participation in both the Multinational Interim Force and subsequent UN Haitian Mission MINUSTAH (Mission des Nations Unies pour la stabilisation en Haïti), the latter routinely seeing Chilean participation of over 500 troops. They were also one of the founding members of the SOUTHCOM-funded PANAMAX exercises in Panama.

The International Military Education and Training (IMET) program has been an invaluable tool to strengthen our defense relationship and help Chile advance. Technical training has supported Chile's efforts to modernize its forces, which, combined with Chile's participation in joint training exercises with American personnel, has enhanced effective interoperability with the United States. The provision of logistics maintenance and management training for Non-Commissioned Officers (NCO) as well as mid-level and senior officers has helped Chile to further professionalize its armed forces. Overall, contacts between Chilean and U.S. military and civilian personnel through the IMET program have strengthened Chile's democracy and strengthened our defense relationship.

Increased peacekeeping readiness encourages cooperation among the Chilean services, strengthens and further motivates Chile's rationale for defense modernization, and promotes collaboration and exchanges with the United States and other regional militaries. Due in part to training programs such as these, today's Chilean military is more modern, professional, and willing and able to support the United States better than ever before. The Chileans are working with Argentine counterparts to form a joint, 1000-man Peacekeeping Operations (PKO) brigade that should be ready for deployment in 2010, which is another positive step in sub-regional integration. The Combined Chilean-Argentine Peacekeeping Operations Brigade "Cruz de Sur" will be finalizing readiness preparations and equipment acquisitions during the year 2010 with the end state of being a UN standby force by 31 December 2010. This combined brigade is an example of positive regional cooperation and commitment to crisis response.

## **Volume I Section III-VI - Western Hemisphere**

As a means of strengthening defense ties, the United States welcomes Chilean participation at the Center for Hemispheric Defense Studies (CHDS) and other executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Chile.

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Colombia is Latin America's oldest formal democracy and a major partner of the United States in the fight against international narcotics trafficking and terrorism. As the source of most of the cocaine and much of the heroin consumed in the United States, Colombia is the focus of a significant share of the U.S. government's international counterdrug effort. Prior to the passage of the FY 2002 Supplemental Appropriations Act, the largest part of the training provided to the Colombian military was in direct support of the U.S. counterdrug strategy. Since then, U.S. training has broadened to reflect U.S. support to assist the Colombian military in its unified campaign against narcotics traffickers and designated terrorist groups. Training programs and equipment acquisitions are closely tied to the operational requirements of the consolidation phase of Plan Colombia.

The FY 2002 Supplemental Appropriations Act provided State with expanded authority to use Colombian assistance funds to support the Government of Colombia (GOC) in its unified campaign against narcotics trafficking and terrorist groups such as the Revolutionary Armed Forces of Colombia (FARC), the National Liberation Army (ELN), and the United Self-Defense Forces of Colombia (AUC), and to take actions to protect human health and welfare in emergency circumstances, including undertaking rescue operations. This authority has been renewed. Foreign Military Financing (FMF) funding continued to support Colombia's unified campaign against narcotics trafficking and terrorist organizations.

In FY 2007, section 1004 (National Defense Authorization Act for FY 1991) counterdrug training for Colombia included aviation aircrew and aircraft repair training, maintenance of patrol craft, and light infantry training of Colombian police and military. All section 1004 training is provided in support of drug eradication and interdiction efforts. Extensive sustainment training occurred, as did increased support for training of aircraft mechanics, crew, and pilots for the assets provided to the GOC for Counternarcotics (CN) and Counterterrorism (CT) programs. Additionally, Colombia received in excess of \$400,000 in Regional Defense Combating Terrorism Fellowship Program (CTFP) funding for FY 2007 training programs.

The International Military Education and Training (IMET) program adds to these training efforts, and funds a broad range of courses for the Colombian military at all levels that promote mutually beneficial mil-to-mil relations and increased understanding and defense cooperation between the United States and Colombia. Center for Hemispheric Defense Studies (CHDS) and IMET-funded courses include a strong emphasis on human rights, including courses on democratic sustainment. IMET also provides technical training for Non-Commissioned Officers (NCO) and field-grade officers, as well as training in

## **Volume I Section III-VI - Western Hemisphere**

maintenance, logistics, and acquisition and resource management. These courses assist the Colombian military by increasing its abilities to better care for and maintain U.S.-provided equipment, thus increasing Colombia's ability to pursue its CN and CT efforts, as well as its efforts to reestablish security throughout Colombia. This training will also support efforts to transition operational responsibility to the GOC for programs currently supported with FMF funds.

The Urban Antiterrorism Special Forces Group, a joint unit comprised of personnel and equipment from all of Colombia's military services, formally manages Colombia's CT program. This unit has real world combat experience and excellent planning skills, and CTFP funding is geared toward giving them CT training to supplement this experience. CTFP funds have already allowed Colombians to attend courses designed to assist them to combat terrorism, manage resources, understand better the dynamics of international terrorism, and develop international and U.S. ties through senior leader attendance at U.S. senior military schools. These courses will provide Colombia's elite CT unit with a greater understanding of the international threat of terrorism and an increased ability to counter it.

As a means of strengthening defense ties, the United States welcomes Colombian participation at Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Colombia.

## Costa Rica

Program	FY 2009				FY 2010

Costa Rica is a democratic nation, a major partner in Central America and was the first Central American nation to sign and ratify a Maritime Counternarcotics (CN) Agreement with the United States. Costa Rica actively participates in efforts to reduce illegal migration, drug trafficking, and poaching of marine fisheries in the region, and has become a staunch U.S. partner in the fight against international crime, greatly expanding and complementing our law enforcement efforts in the region.

One of the main objectives of the current government in Costa Rica is to stop the illegal trafficking of drugs through its national territory. Since Costa Rica is located in the middle of the South America, it has become one of the favorite routes used by traffickers. Costa Rica has developed an international intelligence system to combat this threat, but the program requires further strengthening to be effective. It is of the highest importance for the local authorities to enhance intelligence capacities with regards to drug related issues.

Costa Rica does not have a military, relying on its Public Security Forces for defense and security matters. International Military Education and Training (IMET) training serves to professionalize the Coast Guard through courses such as counterdrug operations, rule of law and discipline in military operations, and technical training. Likewise, as the Government of Costa Rica assumes an increasingly sophisticated CN role, other training provides access to modern, state-of-the-art law enforcement methods, as well as assistance in equipment maintenance, logistics, and resource management. CN training focuses on operational skills, as well as on bilateral exercises to improve interoperability with U.S. forces.

As a means of strengthening security ties, the United States welcomes participation by Costa Rica at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Costa Rica.

## Dominica

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

<b>Totals:</b>	<b>11</b>	<b>11</b>	<b>7</b>	<b>\$54,222</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

Dominica is a democratic nation that has good bilateral relations with the United States. The Department of State has encouraged the Government of Dominica to participate more actively in Counternarcotics (CN) efforts and other multilateral security activities. International Military Education and Training (IMET) training assists Dominica in the development of a more professional and efficient security force and will enable Dominica to work with U.S. entities in CN and Counterterrorism (CT) activities, search and rescue operations, and other bilateral and multilateral operations. Dominica's participation in the Tradewinds exercise enhanced their security posture for the World Cup of Cricket in 2007.

As a means of strengthening defense ties, the United States welcomes participation from Dominica at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Dominica.

The Dominican Republic is a democratic nation and a close ally of the United States. The Department has encouraged the Dominican Republic military to participate more actively in counternarcotics operations and other multilateral efforts.

International Military Education and Training (IMET)-funded and other training in areas such as civil-military operations will contribute to the Dominican Republic's support for the principles of human rights, democracy, and civilian control of the military. Professional training and education at all levels (including Non-Commissioned Officer (NCO) training and command and staff colleges) improves the professionalism of the Dominican Republic's armed forces. Other training includes technical and Counternarcotics (CN) training to increase the Dominican Republic's ability to operate with U.S. forces, and joint exercises that promote team building and provide baseline knowledge of U.S. operations. The Dominican Republic is a partner in the Enduring Friendship initiative, which is to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. It supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the U.S. Southern Command's Theater Security Cooperation Strategy.

As a means of strengthening defense ties, the United States welcomes participation from the Dominican Republic at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from the Dominican Republic.

The Global Peace Operations Initiative (GPOI) uses Peacekeeping Operations (PKO) funds to support the development of PKO assets in the Dominican Republic. Dominican Republic troops participate in both targeted training activities for its national assets and in training activities which focus on developing the Conferencia de Fuerzas Armadas Centroamericanas (CFAC) joint peacekeeping force. Dominican Republic recently became a full member of CFAC.

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Ecuador's democracy historically has been burdened by presidential and institutional instability. President Rafael Correa, Ecuador's eighth president in ten years, was elected in November 2006 promising rapid and fundamental reform. He remains popular and a new constitution that he championed won over 60 percent of the vote in a November 2008 national referendum. However, over the past year, due to declining exports, energy rationing and the worldwide economic downturn, Correa's popularity began to decline significantly.

Ecuador's military had a great deal of independence and political influence in the past, but its senior leaders are increasingly becoming politicized by the administration of President Rafael Correa. Additionally, under new regulations imposed by Correa's government, the Armed Forces have lost some independent funding sources which increase its dependence on the budget process and reduce its fiscal and political independence.

The emphasis for the United States Military Group in training is centered on logistics and maintenance. The Ecuadorian Armed Forces cannot maintain their current fleet of vehicles, ships and aircraft. New equipment acquisitions frequently do not take into account the long term costs of equipment maintenance, spare parts, special equipment and specialized training. Additional training focuses on munitions handling, storage and destruction, peace operations, the rule of law and discipline in military operations, Junior Officer Professional development, and technical training on US procedures for operations, military planning processes and maintenance. Another principal training focus is to further Ecuador's security and patrolling capabilities to enforce their sovereignty against the threat from illegal armed groups, like the FARC, which operate in Ecuador and to aid in the fight against illegal narcotics and weapons trafficking. The United States continues to develop military relations with Ecuador in the face of an extremely challenging internal political climate.

Ecuador is designated as a major drug-transiting country and much of our bilateral cooperation focuses on Counternarcotics (CN) operations, officer training, resource management, logistics, equipment maintenance, and providing training needed to professionalize and modernize Ecuador's military. Significant training efforts in counterdrug operations have also been conducted, as Ecuador has received \$1.3 M in section 1004 counterdrug funding for 2009. Joint exercises with U.S. forces contributed to continued cooperation with US CN efforts.

## **Volume I Section III-VI - Western Hemisphere**

In November 1999, Ecuador and the United States concluded a ten-year agreement for access to, and use of, the Manta Cooperative Security Location, Ecuador, as a support base for US aircraft monitoring drug trafficking flights through the region. The agreement terminated in September 2009.

Ecuador began its association with the Regional Defense Combating Terrorism Fellowship Program (CTFP) in FY 2005, receiving \$58,000 in CTFP invitational courses. It received over \$562,000 in CTFP in FY 2007, no funding in 2008, but then \$98,000 again in 2009. Using CTFP for two mobile training teams, Ecuador received disaster planning training for 35 students and international homeland defense training for 30 students. They were also able to send an officer to the US for the Legal Aspects and Countering Terrorism course. Attendance at these and similar courses will allow Ecuadorians to analyze and plan for global threats and their various manifestations; recognize global terrorism mechanisms, including the modes, means, roots, and psychology of transnational terrorism; and evaluate the means to counter this threat within and outside Ecuador.

International Military Education and Training (IMET) funds support Ecuadorian military participation in Professional Military Education (PME) training at U.S. military colleges and school enhancing the understanding by host nation on civil control of the military, strategy, and human rights. As a means of strengthening defense ties, the United States welcomes participation from Ecuador at CHDS executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. Expanded IMET (E-IMET) courses and funding enabled increased emphasis on human rights instruction and civil military operations. All of the IMET courses allow U.S. officers to build lasting relationships with their counterparts in Ecuador. For FY2009, Ecuador received \$342,000 in IMET funding.

## El Salvador

Program	FY 2009				FY 2010

<b>Totals:</b>	<b>562</b>	<b>532</b>	<b>99</b>	<b>\$3,639,086</b>	<b>202</b>	<b>202</b>	<b>4</b>	<b>\$598,675</b>

El Salvador is a democratic country with a historically close relationship and strong mil-mil ties with the United States. Though bilateral military assistance was dramatically reduced since the end of the civil war in 1992, overall relations have flourished with the civilian government and military cooperation remaining strong. The principal U.S. interests in El Salvador are supporting democracy, fighting international crime and illegal drugs, encouraging economic development, deterring illegal immigration to the United States and promoting U.S. exports. Our bilateral relationship is further influenced by the fact that up to one-third of El Salvador's population lives in the United States, and that El Salvador was a solid troop contributor to Operation Iraqi Freedom (OIF) until December 2008.

Security cooperation is geared towards professional training programs that will sustain the dramatic improvement in civil-military relations and consequent improvement in the democratic climate and regional stability seen in recent years. Officer training at all levels, including command and staff colleges and courses in civil-military relations and democratic sustainment help reinforce the notion of civilian control of the military and reinforce the principles of human rights. El Salvador has strongly supported the war against terrorism and repeatedly sent troops to Iraq. Salvadoran troops completed their final tour in support of OIF in February, 2008, after more than five years of providing troops.

Training in international peacekeeping will allow the Salvadoran armed forces to develop expertise and participate in future peace support operations. El Salvador is a member of the Conferencia de Fuerzas Armadas Centroamericanas (CFAC) combined Peacekeeping Operations (PKO) battalion and receives Global Peace Operations Initiative (GPOI) funds to support these efforts. This initiative is providing new peacekeepers and peacekeeping units to deploy in support of global PKOs. El Salvador is currently participating in a UN peacekeeping mission in Lebanon.

In March 2000, the USG opened one of three Cooperative Security Locations (CSL) that support counterdrug operations in the Pacific corridor. The Government of El Salvador (GOES) granted the concession to base our operations in their country at great political expense, and our continued close relations with their military through International Military Education and Training (IMET) is vital to the longevity of this operation. Training, through the Regional Defense Combating Terrorism Fellowship Program (CTFP), IMET, Foreign Military Sales (FMS), and Section 1004 funds in counternarcotics operations, resource management, logistics and equipment maintenance provides assistance needed to professionalize and modernize the Salvadoran military and encourage its continued cooperation with U.S. Counternarcotics (CN) efforts. Joint training exercises with U.S. forces contribute to team building and give the armed forces exposure to U.S. counterdrug operations. El Salvador is also a transit point for illegal immigration and drugs to the United States, and IMET assists the GOES to better patrol its borders.

## **Volume I Section III-VI - Western Hemisphere**

Since the earthquakes of January and February 2001, emphasis has been given to helping the Salvadoran military carry out its disaster relief and reconstruction mission, as well as to building its disaster preparedness capabilities. The new roles of patrolling borders and disaster relief have created a needed and positive role for the military, helping to erase years of distrust of the armed forces by the population.

As a means of strengthening defense ties, the United States welcomes participation from El Salvador at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from El Salvador.

## Grenada

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Grenada is a democratic nation that has good bilateral relations with the United States. The USG has encouraged the Government of Grenada to participate more actively in counternarcotics efforts and other multilateral security activities. International Military Education and Training (IMET) training is focused on specialized skills training to assist in the development of a more professional and efficient security force that will be able to work with U.S. entities in Counternarcotics (CN) operations, search and rescue operations, and other bilateral and multilateral exercises (such as Tradewinds) and operations. Joint training and exercises with U.S. forces will contribute to greater interoperability and baseline understanding of U.S. counterdrug operations. IMET funding, though limited, pays big dividends given the small size of the Grenadian security force.

As a means of strengthening defense ties, the United States welcomes participation from Grenada at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Grenada.

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Guatemala is a democracy with a traditionally cooperative relationship with the United States. The principal U.S. interests in Guatemala include strengthening Guatemala's democracy and rule of law, fighting transnational crime and drug trafficking, and encouraging the growth of a stable market economy. In July 2004, the Guatemalan military was reduced to 15,500 personnel, the latest in a series of reductions that has cut the size of the Guatemalan Armed Forces by 66 percent between 1997 and 2004. The Guatemalan military has also carried out an extensive revision of its doctrine, training, and education and eliminated internal security as a military role. The revision also includes a strong emphasis on human rights training. Efforts to modernize the military to reflect its new role in a democratic society have been stymied by budget constraints and the Government of Guatemala is seeking foreign assistance to help fund military modernization. Because of continuing concerns regarding past human rights cases, as well as issues regarding implementation of various aspects of the Peace Accords, the Guatemalan Air Force, Navy and Army Corps of Engineers is only eligible for the full range of International Military Education and Training (IMET) courses and Foreign Military Financing (FMF) after the Secretary of State reports on human rights and judicial issues. Until that report is submitted, those entities are restricted to receiving only Expanded International Military Education and Training (E-IMET). The Guatemalan Army, other than the Corps of Engineers, is only eligible to receive E-IMET training. IMET-funded training includes Professional Military Education (PME), technical maintenance courses, rule of law and logistical courses.

Participation in Center for Hemispheric Defense Studies (CHDS) activities, and training in civil-military relations and Peacekeeping Operations (PKO) help reinforce the goal of civilian control of the military and human rights principles. Other training activities help Guatemalan forces strengthen their drug enforcement capabilities, conduct drug interdiction and eradication activities, and improve their ability to integrate their planning and execution with U.S. entities in regional Counternarcotics (CN), disaster relief, and humanitarian operations. Guatemala is also a major recipient of Global Peace Operations Initiative (GPOI) funds. This initiative is providing new peacekeepers and helping peacekeeping units to deploy in support of global peacekeeping missions. Guatemala has been the driving force and cornerstone in the formation of the Conferencia de Fuerzas Armadas Centroamericanas (CFAC) multinational peacekeeping battalion, an initiative strongly supported by GPOI funding. Guatemala is currently deployed to UN PKO in Haiti and Congo.

Guatemala is partner in the Enduring Friendship initiative, which is to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. It supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the Command's Theater Security Cooperation Strategy. As a means of strengthening defense ties, the United States welcomes participation from Guatemala at CHDS executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers

**Volume I Section III-VI - Western Hemisphere**

to build lasting relationships with their counterparts from Guatemala. Guatemala is leading the region in the development of a Regional Security Strategy to counter emerging regional threats.

## Guyana

The United States has friendly relations with Guyana, a small, poor and heavily indebted country with a wealth of natural resources. Guyana is making a slow transition to a free-market system and has held several free and fair elections over the past fifteen years. Guyana has an unresolved border dispute with neighboring Suriname. Venezuela also has an outstanding claim to approximately two thirds of Guyana's territory. However, neither border controversy is likely to lead to armed conflict in the short-to-medium term.

Although Guyana has not been identified as a major drug-transit or producing country, narcotics trafficking is increasingly a concern. The U.S. government has encouraged the Government of Guyana (GOG) to participate more actively in Counternarcotics (CN) and other multilateral security activities. International Military Education and Training (IMET)-funded and other training in Professional Military Education (PME), a variety of maritime-related courses and those which support CN and Counterterrorism (CT) efforts assist in the development of a more professional and efficient security force. Participating in joint exercises and training in maritime search and rescue increases Guyana's ability to work with U.S. entities in CN and other bilateral and multilateral operations. A Maritime Law Enforcement Agreement giving shipriders law enforcement authority was enacted in 2003.

The Haitian Coast Guard performed admirably during the period of instability leading up to former President Aristide's departure in March 2004. It remains the most stable and cooperative element of the Haitian government in recent years. Targeted support to the Haitian Coast Guard provides an opportunity to build on former achievements. Continued engagement with the Haitian Coast Guard will further increase its professionalism and interdiction capacity and help to reinforce the rule of law in Haiti's ports and territorial waters. U.S. government training and support will enable Haiti to cooperate more fully with the U.S. Coast Guard and other U.S. law enforcement agencies working to control narcotics trafficking, illegal migration, and alien smuggling. Additional grant transfers and resources will allow the Haitian Coast Guard to expand its presence on the north and south coasts of the country and to conduct self-sustained operations in areas of concern.

## Honduras

Honduras is a close partner of the United States in Central America, with traditionally strong mil-mil ties. International Military Education and Training (IMET)-funded training is geared towards Professional Military Education (PME) courses that encourage continued improvement in civil-military relations, as well as improvement in the democratic climate and regional integration/stability. Training at all levels, from Non-Commissioned Officer (NCO) professional development up to Command and Staff and War Colleges, as well as courses on civil-military relations and participation in the Regional Defense Combating Terrorism Fellowship Program (CTFP) program, helps reinforce the notion of civilian control of the military and promotes the principles of human rights. Following the Lobo government's removal of the Defense Minister and senior Honduran military officials linked to the coup and the de facto regime, the United States has started to re-engage with the Honduran military and provide military assistance. Our assistance to, and reengagement with the Honduran military is being undertaken in a deliberate and focused manner to ensure that the promotion of civilian control over an apolitical military and respect by the military for human rights and constitutional order in Honduras. Our assistance and engagement focuses on military professionalization and transformation, countering illicit trafficking and combating terrorism, and assisting the military to improve its capacity to conduct humanitarian assistance/disaster relief missions and participate in peacekeeping operations.

Training in international peacekeeping will allow the Honduran armed forces to more fully develop expertise in this area and to participate in future Peacekeeping Operations (PKO). Honduras is also one of the members of the Conferencia de Fuerzas Armadas Centroamericanas (CFAC) PKO battalion, primarily funded through Global Peace Operations Initiative (GPOI). This key initiative will provide new peacekeepers and peacekeeping units to deploy in support of global PKOs.

Because of its geographic location along illicit trafficking routes, Honduras has become a transshipment point for narcotics entering the United States. Training in counternarcotics operations, resource management, logistics and equipment maintenance, and participation in exercises with U.S. forces provides opportunities needed to professionalize and modernize the Honduran military and encourage its continued cooperation with U.S. Counternarcotics (CN) efforts. Honduras is a partner in the Enduring Friendship (EF) initiative, which seeks to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. EF supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the Command's Theater Security Cooperation Strategy.

As a means of strengthening defense ties, the United States welcomes participation from Honduras at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting

**Volume I Section III-VI - Western Hemisphere**

aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Honduras.

## Jamaica

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
CTFP	5	5	4	\$18,412	0	0	0	\$0.00

<b>Totals:</b>	<b>332</b>	<b>260</b>	<b>110</b>	<b>\$1,723,158</b>	<b>0</b>	<b>0</b>	<b>1</b>	<b>\$0.00</b>

Jamaica is a stable democracy, and the Government of Jamaica (GOJ) cooperates with the United States on a variety of international and regional issues. Although Jamaica is a major transit country for cocaine and the largest Caribbean producer and exporter of marijuana, the GOJ has fully cooperated with U.S. Counternarcotics (CN) goals. Jamaica has no serious external threats to its security and maintains a very small military.

Training in the rule of law and discipline in military operations and Non-Commissioned Officer (NCO) and junior- to mid-level officer professional development help maintain a professional military force subject to civilian control. Additionally, training in aircraft maintenance, information systems, logistics, maritime operations, and maintenance and repair of maritime equipment assists in maintaining the technical proficiencies of the Jamaican military. Maritime security training on boarding operations enhances Jamaica's ability to combat narcotics traffickers. U.S. government training and exercises have enabled Jamaica to improve its participation in bilateral counterdrug initiatives, strengthen its drug enforcement, money laundering and anti-corruption laws, and improve its CN enforcement capabilities. Jamaica is partner in the Enduring Friendship initiative, which is to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. It supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the Command's Theater Security Cooperation Strategy. Participation in the Tradewinds exercise enhanced its security posture for the World Cup of Cricket in 2007.

As a means of strengthening defense ties, the United States welcomes participation from Jamaica at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Jamaica.

## Mexico

Program	FY 2009				FY 2010

Mexico, our third largest trading partner, shares a border with the United States of more than 2,000 miles. The U.S. and Mexican governments have significantly improved cooperation across a range of common interests and concerns, including Counterterrorism (CT), Counternarcotics (CN), and the fight against corruption. The Mexican military focuses primarily on internal security, but also plays a significant role in infrastructure protection, border and airport security, disaster relief, and CN activities. Given our extensive border and close cultural and commercial ties, both governments recognize the fundamental importance of effective coordination of CT efforts. The Mexican military also plays a central role in the government's CN efforts, including interdiction and the deployment of some 20,000 troops at any one time to manually eradicate marijuana and opium poppy fields. Mexico nonetheless remains an important source of marijuana and opium poppy. Additionally, as much as 90 percent of the cocaine entering the United States from South America passes through Mexico or its surrounding waters. The U.S. and Mexican governments coordinate CN cooperation through various mechanisms, including the Senior Law Enforcement Plenary (SLEP) and the Bilateral Interdiction Working Group (BIWG).

The administration of President Felipe Calderon has taken a courageous stand against transnational crime and corruption, viewing both as fundamental threats to Mexican national security. As a result, levels of coordination and bilateral CN cooperation have reached unprecedented levels. On June 30, 2008 the President signed the appropriations bill to provide \$400 million in security assistance to Mexico, including transport helicopters, surveillance aircraft and non-intrusive inspection equipment to assist the Mexican military in their increasing involvement in combating drug trafficking and organized crime. Mil-mil relationships have steadily improved over the last several years, an area that traditionally saw little contact or cooperation.

International Military Education and Training (IMET)-funded training will strengthen the rule of law and respect for human rights in Mexico's armed forces. Mid-to-senior level officer training helps maintain the professionalism of the Mexican military. The United States conducts extensive CT and CN training, focusing its efforts on helping Mexico improve its air and sea reconnaissance capabilities to enhance their ability to detect and thwart illicit activity. Technical assistance covering a broad range of CT and CN capabilities and assets also enhances Mexico's ability to cooperate more effectively with U.S. efforts.

## Nicaragua

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
GPOI	8	8	3	\$0.00	200	200	1	\$100,000

Regional Centers	4	4	4	\$29,150	0	0	0	\$0.00
Section 1004	44	44	9	\$410,446	0	0	0	\$0.00
Service Academies	3	3	2	\$220,557	0	0	0	\$0.00
<b>Totals:</b>	<b>112</b>	<b>103</b>	<b>40</b>	<b>\$1,665,221</b>	<b>200</b>	<b>200</b>	<b>2</b>	<b>\$100,000</b>

Nicaragua's democracy has been burdened by institutional instability. President Daniel Ortega was elected on November 5, 2006, and took office January 10, 2007. Due to a split between the two leading Liberal Parties (PLC and ALN), Daniel Ortega won the presidential election with 38% of the popular vote.

The Nicaraguan National Army (EN), once the political tool of the Frente Sandista National Liberation Front (FSLN), has undergone a dramatic transformation and has become a respected democratic institution. The armed forces continue to maintain good relations with the U.S. military, following the return to power of President Daniel Ortega. Continued engagement will further contribute to this process. Training activities promote regional security and strengthen democratic institutions. Training in international peacekeeping will allow the Nicaraguan armed forces to develop expertise and participate in future Peacekeeping Operations (PKO). Nicaragua is also one of the members of the Conferencia de Fuerzas Armadas Centroamericanas (CFAC) PKO battalion, a Global Peace Operations Initiative (GPOI)-funded initiative. This initiative is providing new peacekeepers and peacekeeping units to deploy in support of global PKOs. Nicaragua is partner in the Enduring Friendship initiative, which is to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. It supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, and the Command's Theater Security Cooperation Strategy. Nicaragua signed an Article 98 agreement in 2004 and approved the Central America Free Trade Agreement (CAFTA) in 2005.

Indicative of the EN's evolution from merely an armed instrument of the FSLN Party to a professional, apolitical institution was the complete support offered by the Commander of the Nicaraguan Army for passage of the Nicaraguan Counterdrug Maritime Agreement, enacted in November 2001. The Counterdrug Maritime Agreement allows Coast Guard/law enforcement elements to conduct joint interdiction operations against narco-traffickers in Nicaraguan waters. Embassy Managua has made a concerted effort to cross-train elements of the Nicaraguan Military and Nicaraguan National Police in ship boarding, interdiction techniques, and drug enforcement operations.

The Government of Nicaragua presented its first ever white paper to President Bolanos on September 2, 2004. This paper is an important step in defining the role of the military under a civilian Minister of Defense. The white paper examines once taboo topics such as civilian formulation of the military budget, structure and size of the armed forces, national and regional emerging threats, force modernization requirements, and senior officer promotions. The white paper was signed and implemented in June 2005.

Section 1004 and International Military Education and Training (IMET)-funded training, such as civil-military relations, joint operations, and rule of law and discipline in military operations, have helped the EN make great progress in professionalizing its officer corps and supporting the leadership of a civilian president.

## **Volume I Section III-VI - Western Hemisphere**

The IMET program contains an English language component, as well as human rights training, maritime operations and aircraft maintenance, and Professional Military Education (PME) courses such as captain's career course and Air Command and Staff College.

Significant training efforts in counterdrug operations have been conducted during FY 09 and 2010; with the funds received under section 1004 counterdrug. Joint training exercises with U.S. forces improve counterdrug capabilities and enhance interoperability. As of Feb. 2010 Nicaragua sent 40 soldiers for a humanitarian assistance mission after the earthquake in Haiti.

As a means of strengthening defense ties, the United States welcomes participation from Nicaragua at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Nicaragua.

## Panama

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Panama remains important to U.S. national interests following the transfer of the Panama Canal, and our bilateral relationship is strong. Approximately two-thirds of Canal traffic originates in, or is destined for, the United States. Panama's strategic location between South and North America makes it a crossroads for international commerce, and also a center for illicit activity including drug trafficking, money laundering, arms smuggling, and illegal immigration. U.S. security engagement with Panama will become more crucial as Panama deals with any spillover from the Colombian conflict along its porous border. Cooperation with the Torrijos Administration has been excellent, with a range of new initiatives taking shape. Panama is a partner in the Enduring Friendship (EF) initiative, which aims to increase control over the waterways of the Caribbean by building maritime security capabilities for partner nations. EF supports the President's Western Hemisphere Strategy, the Proliferation Security Initiative, the Command's Theater Security Cooperation Strategy, and the U.S./Panama Secure Trade and Transportation Initiative. Panama also hosts the annual PANAMAX exercise, which focuses primarily on defense of the Panama Canal, and is the largest exercise conducted annually by the U.S. Southern Command.

As Panama has no standing military, the United States focuses on cooperative efforts with Panamanian security elements of the Public Force (law enforcement authorities) to counter transnational crime, increase border security, and address other threats. U.S. assistance supports all three services of Panama's Public Force (PPF): National Police (PNP), National Air-Naval Service (SENAN), and National Frontier Service (SENAFRONT). International Military Education and Training (IMET)-funded and other training programs provided to the PPF are used for technical and operational courses focused on security, Counternarcotics (CN), and Counterterrorism (CT).

As a means of strengthening security ties, the United States welcomes participation from Panama at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Panama.

Over twenty years after the overthrow of the Alfredo Stroessner dictatorship, the consolidation of a democratic society and state continues. Bilateral relations between the United States and Paraguay are strong, with Paraguay providing excellent cooperation in addressing transnational security challenges. As there are no serious external threats to Paraguay's sovereignty, the Paraguayan government and military are redefining the military's roles and missions in the 21st century.

The Regional Defense Combating Terrorism Fellowship Program (CTFP) strengthens counterterrorism and peacekeeping capabilities within the Paraguayan military. International Military Education and Training (IMET)-funded courses and those provided by the Center for Hemispheric Defense Studies (CHDS), along with participation in Unified Command seminars and military exercises, strengthen professional civilian capacity in Paraguay's defense ministry, support human rights principles, and maintain the rule of law and discipline in military operations. They also contribute to Paraguay's making important contributions to international peace and security. Paraguayan military observers have served in Africa under United Nations deployment since 2001. The United States and Paraguay have conducted numerous military exercises together, and the United States has provided seminars on Counterterrorism (CT), peace operations (PKO), and senior leadership. Both countries plan to continue these activities. As a partner in the Global Peace Operations Initiative (GPOI), Paraguay is developing engineer companies to deploy in support of UNPKO. Paraguay has supported several UN PKO over the last two years.

Paraguay's CT program is formally managed by its Police Special Operations Force, a branch of the Paraguayan National Police. CTFP funds have allowed this unit to train more effectively and improve its operational skills. CTFP funds allow Paraguayans to attend courses on the dynamics of international terrorism, and on the importance and application of intelligence in counterdrug operations. These courses will help Paraguay's elite CT unit toward a greater ability to counter the international threat of terrorism. Some of the courses completed include counterdrug information analysis, regional civil-military relations, the Counterterrorism Fellows Program, and special reaction team training.

As a means of strengthening defense ties, the United States welcomes participation from Paraguay at Center for Hemispheric Defense Studies (CHDS) executive courses. CHDS courses are designed to focus on the non-combat aspects of security and international relations, and increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Paraguay. Paraguay is an active participant in CHDS programs.

## Peru

\*\*Course count does not total correctly as individual courses were reported under multiple programs.

Peru maintains a strong bilateral relationship with the United States. The United States seeks to strengthen Peru's democratic institutions and its ability to interdict and disrupt narcotics production and distribution. The United States has enjoyed excellent cooperation from the Government of Peru and the administration of President Alan Garcia on Counternarcotics (CN) activities.

Training in civil-military relations, the rule of law and discipline in military operations, and comprehensive security responses to terrorism helps reinforce the notion of civilian control of the military and reinforces support for the principles of human rights. Training in port security, joint operations, maintenance management, and helicopter and outboard motor repair provide the tools needed to professionalize and modernize Peru's military and enhance its capabilities in air operations, search and rescue, and demining operations. This training is particularly important in supporting the 1998 border dispute settlement between Peru and Ecuador. Finally, significant training efforts in the area of counterdrug operations are underway. These activities include training to improve helicopter and other aircraft capabilities, as well as participation in training exercises with U.S. forces to improve interoperability. The Peruvian military continues to conduct operations against insurgents and narcoterrorists.

Professionalization of the Peruvian military will help make these operations more efficient while training the military to avoid the excesses of counterinsurgency efforts of past decades as recently reported by the Truth and Reconciliation Commission. Acting on the Commission's recommendations, which include reforming the military as an institution, will be important for Peruvian society to continue developing ongoing CN and Counterterrorism (CT) operations while respecting the rule of law and human rights. The Peruvian military's increased participation in Peacekeeping Operations (PKO) training and exercises, as well as their ongoing contributions to the UN Mission in Haiti, MINUSTAH (Mission des Nations Unies pour la stabilisation en Haïti), with hopes of gaining additional PKO capability, has also been a source of pride and has helped to improve their image. Peru has recently become a Global Peace Operations Initiative (GPOI) partner of the United States, and is training engineering and infantry PKO troops.

The Emergency Tactical Actions Group, a branch of the Peruvian National Police, formally manages Peru's CT program. Regional Defense Combating Terrorism Fellowship Program (CTFP) funds have already allowed Peruvians to attend courses designed to help them better understand international CT defense and the dynamics of international terrorism. These funds

### **Volume I Section III-VI - Western Hemisphere**

have also allowed for participation in CT military education team training, as well as courses in intelligence in combating terrorism - all geared to improving Peru's ability to counter the international threat of terrorism.

As a means of strengthening defense ties, the United States welcomes participation from Peru in the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Peru.

St. Kitts and Nevis is a democratic nation that maintains good bilateral relations with the United States. The Department of State has encouraged the Government of St. Kitts and Nevis to participate more actively in Counternarcotics (CN) efforts and other multilateral security activities. International Military Education and Training (IMET)-funded and other training assists St. Kitts and Nevis in the development of a more professional and efficient security force, which will be able to work with U.S. entities in CN operations, search and rescue operations, and other bilateral and multilateral operations. Participation in training exercises with U.S. forces augments counterdrug capabilities and enhances interoperability, while participation in the Tradewinds exercise improved its security posture for the World Cup of Cricket in 2007. IMET funding, though limited, gives the best return on the investment for this nation's small security force.

As a means of strengthening defense ties, the United States welcomed St Kitts and Nevis' participation in the Center for Hemispheric Defense Studies (CHDS) courses. This course was designed to focus on the non-warfighting aspects of security and international relations, and it increases awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The course also allows U.S. officers to build lasting relationships with their counterparts from St. Kitts and Nevis.

## St Lucia

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

St. Lucia is a democratic nation that maintains good bilateral relations with the United States. The Department of State has encouraged the Government of St. Lucia to participate more actively in Counternarcotics (CN) efforts and other multilateral security activities. International Military Education and Training (IMET)-funded and other training assists in the development of a more professional and efficient security force that will be able to work with U.S. entities in CN operations, search and rescue operations and other bilateral and multilateral operations. Joint training exercises with U.S. forces improve counterdrug capabilities and enhance interoperability, while participation in the Tradewinds exercise improved its security posture for the World Cup of Cricket in 2007. IMET funding, though limited, pays big dividends for this nation's small security force.

Due to good relations with the United States St Lucia is the first Eastern Caribbean country to receive U.S. Southern Command's Enduring Friendship package. Enduring Friendship is a multi-year maritime security assistance initiative that aims to bolster partner nation capabilities in maritime domain awareness, assist interception of illicit traffickers, and increase interoperability among participating nations in the Caribbean and Central American waters.

As a means of strengthening defense ties, the United States welcomed St Lucia's participation at the Center for Hemispheric Defense Studies (CHDS). This course was designed to focus on the non-warfighting aspects of security and international relations, and it increases awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The course also allows U.S. officers to build lasting relationships with their counterparts from St. Lucia.

## St Vincent and Grenadines

United States military security assistance objectives in Suriname are achieved through International Military Education and Training (IMET), the Regional Defense Combating Terrorism Fellowship Program (CTFP), the Humanitarian Assistance Program and SOUTHCOM's Traditional Activities Program, which assists the Surinamese Armed Forces (Nationale Leger) in becoming a more professional, apolitical service, providing external and internal security for the country, under democratic civilian control. The U.S. military will continue to assist the Surinamese Armed Forces with the development of counterdrug and Counterterrorism (CT) capabilities, with added emphasis on better systems and procedures for effective rapid response in land- and sea-based tracking and interdiction operations. Particular emphasis has been devoted to encouraging the armed forces to use their IMET budget for Professional Military Education (PME), to commit national funds to future Foreign Military Sales (FMS) purchases, and to setting up an effective Excess Defense Articles (EDA) program.

As a means of strengthening defense ties, the United States welcomed Suriname's participation in a Caribbean Defense and Security Course at the Center for Hemispheric Defense Studies (CHDS). This course was designed to focus on the non-warfighting aspects of security and international relations, and it increased awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The course also allowed U.S. officers to build lasting relationships with their counterparts from Suriname.

## Trinidad and Tobago

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value

Trinidad and Tobago is a democratic nation that enjoys strong bilateral relations with the United States. The Department of State has encouraged the Government of Trinidad and Tobago (GOTT) to participate more actively in Counternarcotics (CN) efforts and other multilateral security activities. Officer and senior Non-Commissioned Officer (NCO) training assists in professionalizing the military, while training in intelligence, crisis command and control, regional port security, and maritime maintenance help maintain the technical proficiencies of the armed forces of Trinidad and Tobago. Trinidad and Tobago continues to support its interagency coordination center that gathers narcotics-related information from multiple sources and disseminates it to military and enforcement agencies involved in drug interdiction operations. U.S. government counterdrug-funded training and support have enabled Trinidad and Tobago to improve its ability to interdict illegal drug shipments, strengthen anti-drug trafficking laws, and participate in bilateral maritime exercises. Participation in the Tradewinds exercise enhanced its security posture for the World Cup of Cricket in 2007.

As a means of strengthening defense ties, the United States welcomes participation from Trinidad and Tobago at the Center for Hemispheric Defense Studies (CHDS) executive courses. These courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence. The courses also allow U.S. officers to build lasting relationships with their counterparts from Trinidad and Tobago.

The U.S. has maintained strong bilateral relations with the Government of Uruguay. Indications are positive in the relationship with the Tabare Vasquez Administration, which recently inaugurated a SOUTHCOM humanitarian assistance program emergency operations center in Montevideo and five other departments in the interior of the country, and continues to support military-military training and exchange programs. The military is subordinate to the control of the civilian political leadership. The armed forces conduct a robust program of confidence- and security-building exercises and professional exchanges with the Brazilian and Argentine militaries that make the Southern Cone one of the least conflictive regions of the world. Among Latin American nations, the Uruguayan armed forces have been number one in overall numbers, and worldwide are the largest per capita contributor of personnel for international peacekeeping missions, having deployed over 12,000 troops over the past decade. The Uruguayan government also has been a consistent contributor of humanitarian assistance to other Latin American countries during natural disasters. The Uruguayan Air Force has flown water purification equipment, medicine, and other emergency supplies to Colombia, Venezuela, and Central America over the past eight years. The armed forces also provide all logistical and operational support for the Uruguayan scientific research station in Antarctica that is performing valuable research on environmental issues.

Civilians and military officers attending the Center for Hemispheric Defense Studies (CHDS) and participating in International Military Education and Training (IMET)-funded training help improve civil-military relations, rationalize the defense policy planning process thus making the process increasingly transparent, build civilian expertise in defense matters, and inculcate the principals of human rights in future leaders. Mid- to senior-grade officers attending professional development courses have facilitated the modernization and professionalization of the armed forces. Technical and maintenance training help Uruguay maintain and manage its defense resources, improving the Uruguayans' ability to operate with U.S. and international forces in Peacekeeping Operations (PKO), disaster relief missions and other joint operations.

## Venezuela

Program	FY 2009				FY 2010			
	Training Sessions	Individual Students	Course Count	Dollar Value	Training Sessions	Individual Students	Course Count	Dollar Value
Regional Centers	16	16	6	\$92,660	0	0	0	\$0.00
<b>Totals:</b>	<b>16</b>	<b>16</b>	<b>6</b>	<b>\$92,660</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>\$0.00</b>

President Hugo Chavez's Administration, in which many military officers occupy ministerial and other senior positions, has increasingly politicized the Venezuelan Armed Forces. Meanwhile, U.S.-Venezuelan military relations have suffered, culminating in the expulsion of the U.S. military liaison group from Venezuelan military headquarters in May 2004 and all Personnel Exchange Program officers in 2005. The military liaison group, significantly reduced in size, has relocated to the Embassy compound and retains limited contact with the Venezuelan Armed Forces. Since President Chavez personally disapproved of two counterdrug training support missions for military personnel in October 2003, their armed forces have received no U.S. training.

Any U.S. military training accepted by the Venezuelan government, especially in the areas of civil-military affairs and human rights, would help reinforce the military's responsibility to maintain democratic and constitutional order. Many Venezuelan Non-Commissioned Officers (NCO) and officers have previously benefited from U.S. training.

The only U.S. military training received by Venezuela in recent years has been the participation in seminars or conferences conducted by the Center for Hemispheric Defense Studies (CHDS). Their courses are designed to focus on the non-warfighting aspects of security and international relations, and they increase awareness and understanding of U.S. policies, leading to increased trust, transparency, and confidence.

# FMTR Course List

## ***2ND CLASS SWIMMER TEST - MASL : P129490***

This course provides U.S. Navy personnel who already possess good swimming skills with the opportunity to become certified second class swimmers. Students will be provided with abbreviated instruction on abandon ship procedures, basic swimming strokes, survival floating and second class swimmer qualifications/requirements. Students will then be administered the second class swim test.

## ***308 MSE/I - MS - MASL : P174015***

This curriculum is designed for combat officers, and will enable the student to exploit emerging technologies to achieve war-fighting advantages. The students will blend their operational experience with a thorough technical education to expeditiously integrate new technological capabilities into operational applications. The officer will be able to evolve current tactics and doctrine to expeditiously leverage imminent technological advances.

This war-fighting oriented program provides a solid understanding of the principles and applications of systems engineering, and employs these principles to gain insight into operational problems. This program includes a core of courses, in fields of modeling, simulation, weapons, and sensors that will enhance understanding and analysis of selected case studies and weapons systems.

The program is designed as a highly integrated graduate education experience. There will be lectures, team projects, and individual research as well as seminars from visiting experts. Each arriving officer is evaluated for existing knowledge, skills and competencies and an individual course of study developed.

## ***361 OPERATIONAL LOGISTICS - MS - MASL : P179918***

This program provides education in mathematics, probability and statistics, physical science, economics, logistics and computer science. These disciplines supply the theoretical background for planning and analysis of Naval and Joint logistics. Scope: The course of study develops skills in computational capability, identifying relevant information, generating decision criteria and selecting alternatives. This education enhances performance in all duties throughout a military career, including operational billets, technical management assignments and policy making positions. Requirements for entry: A baccalaureate degree with above average grades is required. Completion of mathematics through single variable differential and integral calculus with above average grades is considered minimal preparation. Students without these quantitative prerequisites will be accepted in cases where their undergraduate records indicate that they are exceptional students and there are other indicators of potential. An APC of 325 is required. Waivers may be obtained with a one-quarter refresher.

## ***369 SOFTWARE ENG PROGRAM MSSE - MASL : P179129***

This Software Engineering program at the U.S. Naval Postgraduate School provides military and government graduate students with an opportunity to learn all aspects of software development and the skills needed to efficiently and reliably plan and create large-scale software systems using the best available tools. These skills are essential for officers and civilians responsible for acquisition, development or maintenance of military software.

The MSSE offers a four-quarter full-time curriculum with entry dates in October. An accredited Bachelors degree in computer science, computer engineering, or related field, with above-average grades in mathematics and at least two years of software development or maintenance experience is required for entry.

## ***370 INFO TECHNOLOGY MGT MS - MASL : P179904***

This curriculum provides officers with the knowledge of information systems technology to include computer and telecommunications systems, software engineering, networked and distributed applications, database management systems and decision support systems in the military services. Students will also gain proficiency in information systems, economics and management necessary for the critical management decisions needed in the development and utilization of complex and evolving computer-based military systems.

Information Technology Management is an interdisciplinary, graduate-level master s program integrating mathematics, accounting, economics, statistics, computer science, information systems, communications engineering, networks and management discipline.

### **373 AIR-OCEAN SCIENCES-MS - MASL : P174235**

This curriculum provides a thorough understanding of the principles governing the physical and dynamic properties of the ocean and atmosphere.

### **399 MODEL VIR ENVIRON - MS - MASL : P179067**

This curriculum provides the student both fundamental and specialized courses in applied computer simulation technology and the application of quantitative analyses to human-computer interaction in simulation technology. Specific topics include object-oriented programming, artificial intelligence, software methodology, computer communications and networks, computer graphics, virtual worlds and simulation systems, physically based modeling, probability, statistics, stochastic modeling, data analysis and human performance evaluation.

MS DEGREE PROGRAM.

### **399 MODEL VIR ENVIRON -PHD - MASL : P179068**

Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### **526 UNDERSEA WARFARE INTL - MASL : P179911**

This curriculum provides the student with engineering fundamentals, physical principles, and analytical concepts that govern operational employment of undersea warfare sensors and weapons.

### **580 SYSTEMS ENGINEERING - MASL : P174270**

Systems Engineering at NPS provides a broad education in systems engineering methods and tools, and depth in a particular domain of application. Several domain tracks are offered, including combat systems engineering, ship systems engineering, and network-centric systems engineering. Other tracks are added, based on sponsor and student demand. The tracks consist of eight or more courses to gain depth in the domain area. These tracks complement the standard set of systems engineering courses. The curriculum is interdisciplinary and draws on courses from across campus.

Graduates will:

- Demonstrate the ability to identify, formulate, and solve operational, technical, and engineering problems in Systems Engineering and related disciplines using the techniques, skills, and tools of modern practice, including modeling and simulation. These problems may include issues of research, design, development, procurement, operation, maintenance or disposal of systems and processes for military applications.
- Demonstrate proficiency in the systems engineering process, including defining requirements, conducting functional analysis, designing and architecting a system, analyzing it against requirements, allocation of requirements to sub-systems, conducting trade-off studies, determining the cost of the system, integrating human factors into the system, designing logistical supportability, and planning for its testing and evaluation.
- Demonstrate proficiency in core skills of systems analysis, to include deterministic and stochastic modeling of systems, optimization, decision analysis, risk analysis, economic models, and lifecycle supportability analysis. This includes familiarity with combat simulations and combat modeling.
- Demonstrate the ability to work as a team member or leader in a large systems engineering project, and to provide leadership in the systems engineering management process. The graduate must be able to interact with personnel from other services, industry, laboratories and academic institutions.
- Students come from the uniformed services, civilian members of government, and from foreign military services. US Navy Engineering Duty Officers constitute a substantial portion of the students.

### **681 REG SEC STDS-(MDE,SA, SUB-SAH AFRICA) MA - MASL : P179031**

REGIONAL SECURITY STUDIES - MIDDLE EAST, SOUTH ASIA, AND SUB-SAHARAN AFRICA

Provides students with a wide knowledge and thorough understanding of the complex inter-related environments pertaining to national security affairs, as well as addresses the interface between international politics, civil-military relations, and national security objectives. This course places emphasis on the proper role of the military in a democratically elected government. Curricula focus is on the history, culture, and religion of a specific region or country and provides students with knowledge of current issues, economic and political structures and institutions, military forces, including strategic capabilities and policy implications, and geopolitical influences. Students receive extensive exposure to human rights issues. Curricula under this program include the following area studies for Middle East, Africa, South Asia.

### ***682 REGIONAL SECURITY STUDIES (FE/SEAS/PACIF)-MA - MASL : P179032***

Provides students with a wide knowledge and thorough understanding of the complex inter-related environments pertaining to national security affairs, as well as addresses the interface between international politics, civil-military relations, and national security objectives. This course places emphasis on the proper role of the military in a democratically elected government. Curricula focus is on the history, culture, and religion of a specific region or country and provides students with knowledge of current issues, economic and political structures and institutions, military forces, including strategic capabilities and policy implications, and geopolitical influences. Students receive extensive exposure to human rights issues. Curricula under this program include the following area studies for the Far East, Southeast Asia, and Pacific.

### ***684 NSA (EUR/USSR) MA - MASL : P179033***

Provides students with a wide knowledge and thorough understanding of the complex inter-related environments pertaining to national security affairs, as well as addresses the interface between international politics, civil-military relations, and national security objectives. This course places emphasis on the proper role of the military in a democratically elected government. Curricula focus is on the history, culture, and religion of a specific region or country and provides students with knowledge of current issues, economic and political structures and institutions, military forces, including strategic capabilities and policy implications, and geopolitical influences. Students receive extensive exposure to human rights issues. Curricula under this program include the following area studies for Europe and the USSR.

### ***689 C DEFENSE DECISION MAKING AND PLANNING - MASL : P179029***

This curriculum prepares future strategists and planners by providing an understanding of the domestic and international variables involved in strategic planning, and the formulation of defense and security policy. It combines the three interrelated areas of general strategic studies, joint and combined planning, and international organization and negotiation to address the dynamic challenges of the future security environment.

This inter-disciplinary curriculum emphasizes the strategic interests and objectives of the United States, its allies, and potential adversaries; the roles, structures, and effectiveness of international organizations and international law as they affect national security policy; the effects of arms control and threat proliferation; and the process of U.S., allied, and adversary strategic decision-making. U.S. students in this curriculum also have the opportunity to complete phase I JPME.

The program will accomplish its purpose by providing the specialized expertise, problem-solving skills, and management tools required by civilians and military officers (U.S. and international) to address current and emergent strategic planning problems. The NSA department is a unique environment in which to pursue this course of studies since its student body is inherently joint and combined, providing students with both a stimulating intellectual environment and an opportunity to establish networks and life-long working relationships with fellow officers from other services and countries.

Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***689 CIV-MIL RELATIONS & NATIONAL SECURITY-MS - MASL : P171403***

This five quarter curriculum (15 months) leads to the M.A. degree in INTERNATIONAL SECURITY AND CIVIL-MILITARY RELATIONS at the Naval Postgraduate School and provides the student with a comprehensive understanding of the real problems surrounding civilian oversight of a professional military in a democracy. The program is designed for military officers (O-3 to O-5) and equivalent civilian officials. International students in this curriculum are fully integrated with U.S. students at the Naval Postgraduate School. As part of the degree, the students are required to complete a thesis that deals with a significant civil-military issue for their country. The program is also designed to provide graduates with the tools they need to initiate and teach civil-military relations programs in their own countries.

Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***689B INTERNATIONAL SECURITY BUILDING POST-CONFLICT ENVIRONMENT - MASL : P179028***

This course is designed to equip military officers and civilians from post-conflict nations (and from nations and NGOs assisting them) with the specialized expertise, problem-solving skills, and the management tools to build effective security institutions. The curriculum also will focus on mechanisms to keep these security institutions under democratic control, and to strengthen security in a way that helps support economic and political development. In addition, students will gain graduate-level expertise needed to deal with terrorist threats that threaten development efforts and to meet the political, organizational, and management challenges posed by broader peace support operations (PSO).

COURSE APPROVED FOR E-IMET.

### ***689D COUNTERTERRORISM POLICY AND STRATEGY-MA - MASL : P173201***

In January 2007, the National Security Affairs Department launched a new track on Counterterrorism Policy and Strategy (689D). This five-quarter curriculum provides an understanding of the nature and dynamics of terrorist organizations, and the domestic and international variables involved in the formulation of counterterrorist policy. The curriculum allows the students to combine a regional focus with comparative courses that discuss terrorist organizations and operations, the financing of terror, legal and policing developments in counterterrorism, intelligence, and the military role in homeland defense.

The NSA department is a unique environment in which to pursue this course of studies since its student body is inherently joint and combined, providing students with both a stimulating intellectual environment and an opportunity to establish networks and life-long working relationships with fellow officers from other services and countries.

A baccalaureate degree with above-average grades, fluency in written and verbal English, and a minimum TOEFL score of 220 is required for international students.

### ***694 PHILOSOPHY IN SECURITY STUDIES - PHD - MASL : P173401***

Security Studies is an interdisciplinary field based on the traditional academic disciplines of Political Science, History and Economics. The doctoral program in Security Studies seeks to equip students with the skills and knowledge required to do work of the highest professional quality in these areas, with emphasis on understanding the challenges and characteristics of modern security and defense policy. Successful completion of the program requires a minimum of two years of in-residence study beyond the Masters degree, and the completion of a doctoral dissertation of sufficient scope and quality to constitute an original and independent contribution to knowledge.

General Degree Requirements:

- The NSA doctoral program requires approximately one year of formal course work beyond the Masters degree. Required courses include advanced courses on qualitative methods, and a core sequence of seminars in strategic theory, international relations, international political economy, and American foreign policy, supplemented by a program of directed reading intended to prepare the student to take the qualifying examination. Additional courses, chosen to assist student in developing their dissertation topic, or to satisfy specific sponsor requirements will be incorporated based on individual circumstances. Such work will normally include a field of concentration comprised of four or more related courses in a single topical or regional specialty.

### ***699 SPECIAL OPERATIONS -MS - MASL : P173200***

The Special Operations Curriculum is designed to provide a focused course of study of the conflict spectrum below general conventional war. Graduates of this curriculum will possess a close knowledge of the broad range of factors involved in the planning and conduct of these forms of conflict and a detailed understanding of the role of special operations and related forces in U.S. foreign and defense policy. The curriculum examines the sources and dynamics of inter-state and intra-state conflict, the challenge these forms of conflict have posed and are likely to increasingly pose for U.S. security planning, the doctrinal and institutional evolution of the U.S. special operations community, the recent history of political violence and small wars in Latin America, Asia, and the Middle East, the history of irregular warfare, and contemporary perspectives on low intensity conflict resolution. These curriculum specific requirements are supported by a larger program of study, which provides the graduate with

a broad background in the areas of international relations, comparative strategy, the technological revolution in military affairs, and advanced analytical methods.

### ***815 ACQUISITION AND CONTRACT MANAGEMENT - MS - MASL : P179908***

This is an interdisciplinary program which integrates mathematics, accounting, economics, finance, behavioral science, management theory, operations/systems analysis and specific courses in acquisition and contracting. Student input includes officers and civilians from all DOD services, the Coast Guard and other nations. The curriculum is designed to provide officers and civilians with the skills to serve effectively in hardware systems buying offices, field contracting offices, contract administration offices and contracting policy offices.

### ***816 SYSTEM ACQUISITION MANAGEMENT-MS - MASL : P179909***

This is an interdisciplinary program designed to integrate business principles, management theory, operations/systems analysis, and engineering applications. It is uniquely tailored to Defense acquisition management and intensive exposure to the fundamental principles of the acquisition environment. The courses in this curriculum present the structure of acquisition management, the decisions and problems facing the defense acquisition manager, the various forces at work within industry and Government, and the impact of acquisition policies and strategies. Student input includes officers and civilians from all DOD Services, the Coast Guard and other nations.

### ***819 SYSTEMS INVENTORY MANAGEMENT MS - MASL : P179907***

This curriculum provides the student with knowledge of working supply chain management techniques.

### ***A/C NDI TECH CLASS C1 - MASL : P141369***

This curriculum provides the student with knowledge of USN Aviation Structural Mechanics (Structures), and Marines MOS 6092 (E4 through E6), to perform aircraft nondestructive inspections without direct supervision afloat and ashore under all readiness conditions.

Note: must complete a pre-placement radiation medical exam as prescribed by NAVMED P-5055.

Medical History, thorough physical exam, and complete blood line study + urinalysis. No waivers.

### ***A/C STRUCT RPR CORR CONTRACTOR - MASL : D141396***

This course is designed to prepare the aircraft technician for the responsibilities and duties at an apprentice level in the aircraft structural maintenance career field. Students will learn to use tools ranging from basic hand tools to specialized tools. This course teaches them to repair, modify, and fabricate aircraft metal components and assemblies. They will also learn the theory of corrosion and to form a better understanding about common aircraft metals. Finally, students will learn the fundamentals of painting aircraft parts. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

**FUNDAMENTALS:** This block begins with a course orientation, where students learn about the academies policies, programs, and academic objective requirements. Students are given an introduction to safety doctrine and practices. They will learn the characteristics and identification of common aircraft metals. Students learn shop mathematics, how to interpret technical drawings, and tool control. Students initially learn how to use simple tools such as: rulers, scribes, and dividers to develop metal layouts and cut them with non-powered equipment. Lastly, the student will use the same metal layouts to learn how to make different types of sharp bends.

**FABRICATION OF AIRCRAFT PARTS:** In block II, students will learn about setback and bend allowance-using tables and charts to calculate the minimum and maximum radius bends that can be accomplished. They will also fabricate a Simulated Aircraft Structure (SAS) utilizing their knowledge. Afterwards, they will learn to form a metal part by hand then by machine forming.

**PREPARATION FOR STRUCTURAL ASSEMBLY:** During block III structural assembly preparation, students advance and begin to use powered equipment and tools. They learn about the power shear and band saw and how they are used to cut out sheet metal. Rivet identification, rivet pattern and rivet layout is taught followed by pneumatic drilling, countersinking, and dimpling holes using the SAS.

**CORROSION PREVENTION AND STRUCTURAL ASSEMBLY:** The students learn about technical orders and the principle of corrosion affecting common aircraft metals. They learn about hazardous materials and the importance of shelf life program for chemicals. The students learn about spray guns, spray pattern defects, chemical preservation, and application of primer on the SAS. The student is taught pneumatic riveting on the SAS. A protective coating is applied to the SAS.

**AIRCRAFT STRUCTURAL REPAIR:** The students learn about classifying damage and stop-drilling cracks. They also learn about coating and corrosion removal. Lastly, they apply non-flush repair and a combination repair on the completed SAS.

**SPECIAL ASSEMBLIES:** In the final block of instruction students learn about the most common hardware and fasteners used on aircraft. They will also learn how to manufacture aircraft tubing assemblies. The course concludes with a section on aircraft cables.

### ***A/C SUP EQUIP BAS WELDING - MASL : P141109***

This course is designed to provide formal training, certification and necessary instruction in basic welding using the GTAW process on aluminum alloys, steel alloys, stainless steel alloys and precipitating hardening nickel based alloys.

### ***A/S 32P19 FIRE TRUCK MAINTENANCE - MASL : D148180***

In this course students will learn maintenance of vehicle engine, power divide, transmission, axle assemblies, power steering, brakes, air system, dispensing system, halon system, turret systems, winterization system, electrical system, air conditioning, and organizational maintenance of the A/S32P-19 fire truck. Safety is emphasized in all areas.

### ***ACFT FUEL SYSTEM MECHANIC - MASL : D141044***

The course trains airmen to perform duties prescribed in AFMAN 36-2108 for Aircraft Fuel Systems Apprentice, AFSC 2A634. Training includes an introduction to maintenance management, technical orders, and the Core Automated Maintenance System (CAMS). Also taught are basic fuel system designs, operating principles, and maintaining aircraft fuel systems with high emphasis on safety of personnel and equipment. In consideration of the group/size constraints imposed by the aircraft fuel systems equipment, certain modules of instruction were designed to permit simultaneous training and performance on the various tasks involved using a team and/or subgroup approach.

### ***ACFT MAINTENANCE/OBS - MASL : D241010***

Student is placed beside U.S. personnel and learns by observation only. Observation experience is captured in the course title and reflected on the applicable training track line (wcn/suffix)

### ***ACFT PNEUDRAULICS SYSTEM TECHNICIAN - MASL : D141247***

This course provides training in the fundamentals of pneudraulics at the apprentice level to enable students to become proficient on hydraulic and pneumatic principles, system theory, hydraulic system and subsystem operation, on-aircraft troubleshooting techniques and related system support equipment. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

**FUNDAMENTALS AND PUBLICATIONS** This block begins with a course orientation, where students learn about the academies policies, programs, and academic objective requirements. Instruction is provided on ground, back-shop, and flight line safety. Students learn the principles of flight, hydraulics, and pneumatics. They will also receive instruction on solving equations pertaining to basic pneudraulics principles, detailed instructions on the use of technical orders, as well as maintenance manuals and illustrated parts breakdown.

**TOOLS AND AIRCRAFT HARDWARE** This block provides necessary information on the proper selection and care of hand tools and detailed instruction on the use of torque wrenches, calipers, and micrometers, allowing students to determine allowable tolerances of components. Students will receive instruction on safety devices and demonstrate proper safety procedures, learn to identify hydraulic fittings, seals, hydraulic fluids and lubricants used on aircraft pneudraulics systems. Additionally, students will fabricate a medium pressure hose assembly.

**MAINTENANCE EQUIPMENT** Block III provides students with the fundamentals and operation of shop equipment, aircraft jacks and maintenance stands. They learn to interpret support equipment schematics on the MJ-1-1 hydraulic test stand and MC-1A air compressor. They also learn to operate and adjust an MJ-1-1 hydraulic test stand to support aircraft hydraulic systems and sub-systems operational checkouts. Instruction is also provided on the operation of the MC-1A air compressor. Finally, students will operate and adjust pressure output to service aircraft pneumatic systems.

**BASIC COMPONENTS OF A HYDRAULIC SYSTEM** This block concentrates on the description and theory of operation of basic hydraulic system components. Items covered in the block include: hydraulic reservoirs, hydraulic pumps, pressure regulators, filters, accumulators, and selector valves. Students will arrange components in the required sequence to properly build an operable hydraulic system. They are instructed in the operation of an opened and closed center hydraulic system. They will also learn proper servicing procedures of aircraft hydraulic reservoirs. Troubleshooting and inspection techniques are covered and students will use techniques learned to diagnose common malfunctions on hydraulic systems, pressure regulators and accumulators.

**SUBSYSTEM COMPONENTS** During this block students will learn to use schematics and state the purpose of control valves; explain the operation of a hydraulic fuse, flow regulator, and a hydraulic flow equalizer. They will explain the purpose and operation of a pressure-reducing valve, methods for controlling sequencing valves and hydraulic system sequencing, as well as calculate three pressure settings for relief valves, and explain the operation of a hydraulic motor and how mechanical forces are developed. They will learn general procedures to overhaul and inspect a double-acting unbalance of actuating cylinders.

**OPERATION OF PNEUDRAULIC SYSTEM AND SUBSYSTEMS** Using schematics, students will learn the theory of operation of the A-37 hydraulic system and subsystems. They will perform an operational check of the hydraulic system and subsystems. Students will perform an operational check of the hydraulic system.

### ***ACQUISITION LAW - MASL : B154028***

This MASL is used when ACQUISITION LAW is programmed.

### ***ACQUISITION LOG FUNDAMENT - MASL : B151008***

Acquisition Logistics Fundamentals provides a broad overview of the role of acquisition logistics in the system acquisition life cycle and system engineering processes. Modules cover the logistics-relevant aspects of requirements identification, life cycle costing, integrated product and process development, sustainment logistics, supportability analysis, product support, contracting, and contractor support.

Students who successfully complete this course will be able to:

- Understand how today s defense systems and equipment are conceived, developed, tested, acquired, and operated
- Understand the role of the commercial sector
- Comprehend the philosophy and objectives of logistics support and attendant management functions
- Understand logistics-related disciplines and the policies, procedures, and management techniques used to establish a logistics support capability

### ***ACSC - ASSOCIATE PROGRAM - MASL : D171025***

ACSC's nonresident correspondence and seminar programs are integral to the college, paralleling the resident school curriculum with a focus on war fighting at the operational level, doctrine, jointness, and the profession of arms. While the correspondence program is based on guided self-study, the seminar program is structured around self-study but enhanced by an interactive group classroom environment.

Correspondence Program:

- This program is specifically designed to meet the needs of individuals who prefer self-paced learning opportunities. The curriculum, composed of three separate blocks (A, B, and C), covers three areas of instruction: communications, history, and foundations of doctrine; combat support, policy, and joint force planning; and operational art, campaign planning and execution, and global challenges. Students must pass a closed-book exam for each block of instruction and successfully complete a book analysis and writing assignment. The time limit for completing the correspondence program is currently 4 years. This limit is under review with a proposed 18-month completion period.

Seminar Program:

- The 40-lesson seminar curriculum covers the same three areas of instruction as the correspondence program. Student-led seminars meet weekly for approximately 3 hours to discuss each lesson. Seminar members are required to lead lessons, give briefings, complete a book analysis and writing assignment, take closed-book examinations, and contribute to

seminar discussions. Members normally complete the curriculum within 1 year of enrollment. Seminars run from August to June.

### ***ADD'L PROFICIENCY FLIGHT - MASL : B113151***

This MASL is used when ADD'L PROFICIENCY FLIGHT is programmed.

### ***ADJUTANT GENERAL OFF ADV - MASL : B171590***

In this course the primary emphasis of training will be on teaching the student tasks, skills, and knowledge needed to be an effective personnel and administrative systems management officer (AOC 42B). Training will focus on problem-solving capabilities, managerial techniques, and character attributes needed to be a good leader.

### ***ADVANCED AEROSPACE MED/FGN - MASL : D175062***

Designed for international flight medical officers/flight surgeons who have completed the Aerospace Medicine Primary Course (B30BY48G1-000) or a USAFSAM approved equivalent course in Aerospace medicine and have served at least 2 years as operational flight surgeons at base or squadron level. Not intended for those who have already completed advanced training or residency training in Aerospace medicine and are working as specialists in the field. The course emphasizes military Aerospace medicine. It also provides exposure to a wide range of Aerospace Medical topics, including civil aviation medicine and space medicine. It enables students to address clinical Aerospace, hyperbaric, and global preventive medicine problems; to evaluate and control or resolve operational Aerospace medical problems; to perform the Aerospace Medical/human factors aspects of aircraft mishap investigations and prevention, and to assume higher levels of responsibility in their Aerospace medicine careers. The USAFSAM Department of International Expeditionary Education and Training at Brooks City-Base will approve admission of all applicants based on their academic and physical qualifications and following recommendation of their respective government or air force. Formal training in Hyperbaric Medicine, as well as Occupational Medicine, will also be completed. Elective learning opportunities will be available to each student to pursue scientific projects pertinent to his or her Air Force. Oral presentations will be given by each student on his or her Aerospace Medicine system and a clinical Aerospace Medical case presentation will be made at the Annual Aerospace Medicine Association meeting.

### ***ADVANCED CALIBRATION TECHNICIAN - MASL : P148363***

This course provides technical training in advanced electronic calibration concepts including theory, application and operation of test equipment and standards. Use and calibration of test equipment and standards for resistance, impedance, voltage, current, frequency, signal generation systems, power, and attenuation, including theory pertaining to fixed and swept measurements at microwave frequencies.

### ***ADVANCED ENVIRONMENTAL PROTECTION - MASL : P174243***

This course teaches advanced principles of environmental protection for civil engineer staff officers.

### ***ADVANCED GEODETIC SURVEYING (AGS) - MASL : B174105***

Provide selected NCOs with a working knowledge of those technical skills required to perform as a topographic survey noncommissioned officer in the rank of SSG. Provide instruction to noncommissioned officers in advanced geodetic survey techniques, survey project planning, survey project execution, survey project management and survey project reporting. Provide a working knowledge of survey project planning, project management, project reporting, and advanced geodetic surveying techniques to include: satellite and inertial positioning systems; automatic integrated surveying instrument-AISI (total station); computing and adjusting geodetic figures, directions, length, and positions; survey applications using microcomputers; and precision instrumentation related to high order surveys.

### ***ADVANCED RADAR AIR TRAFFIC CONTROL - MASL : P133026***

This course provides selected Air Traffic Control personnel with advanced knowledge in airspace management, navigational equipment, basic knowledge in Terminal Instrument Approach Procedures (TERPS) and the technical knowledge and practical application of procedures used at various control positions of a Radar Air Traffic Control Facility. This course of instruction, followed by the required training at a facility, will lead to an Air Traffic Control Specialist (ATCS) Rating. The Advanced Radar Air Traffic Control Course is designed to provide air traffic controllers with advanced classroom and laboratory instruction in airspace management, Fleet Area Control and Surveillance Facility (FACSFAC), Naval Air Traffic Control, Air Navigation Aids

and Landing System (NAALS), airspace cases and criteria, obstruction evaluation, special use airspace, airspace for special use, airspace proposal, Air Installation Compatible Use Zone (AICUZ), a basic knowledge in TERPS, terminal area procedures, radar / non-radar rules and regulations.

### ***ADVANCED ENGLISH LANGUAGE PROGRAM - MASL : B177031***

This MASL will be programmed when Advanced English Language Program is required.

### ***ADVANCED INSTRUMENT SCHOOL - MASL : D119049***

This is a non-flying course of instruction in instrument procedures and techniques.

This course qualifies pilots as instrument ground school (IRC) instructors and provides unit experts to commanders on matters affecting instrument training and procedures. Consists of pre-course study, extensive academics, and various simulator profiles.

### ***ADVANCED LOGISTICS OFFICER - MASL : P179252***

The goal of this course is to provide advanced knowledge and skills required to perform the duties of an executive logistics manager. This course is designed to prepare and expose field grade officers to key executive managerial positions within the Marine Corps and DOD logistics systems. This course will also provides insight into the multifunctional areas of logistics and Combat Service Support (CSS) and their integration into the overall DOD logistics system.

- Phase I covers USMC Logistics and Support.
- Phase II overviews national organizations and operations and USMC interrelationships and interdependencies of the various components and commands of the DOD and other government agencies.
- Phase III overviews Global Logistics, focusing on NATO Logistics, United Nation Logistics/Operations/Contracting, Humanitarian Assistance, and Peace Support Operations.

### ***ADVANCED MANAGEMENT PROGRAM - MASL : B155420***

The fourteen week graduate-level Advanced Management Program (AMP) provides functional and technical information resources managers with an integrated understanding of new policies and imperatives such as the Clinger-Cohen Act of 1996, the Federal Acquisition Streamlining Act (FASA) and the Federal Acquisition Reform Act (FARA). Graduates will be able to form effective managerial partnerships to effectively justify, allocate, and apply information resources to mission requirements in compliance with regulatory, policy, and ethical standards.

The AMP core provides comprehensive coverage of the key competency areas required of the Chief Information Officer and other senior IRM officials. These competency areas include application of governing IRM policies, laws and reporting requirements; information resources strategic planning that links the agencies vision, mission, and programs with performance standards and budgets; information planning strategies using BPR and modeling; capital planning and selection and evaluation of investments using established criteria; benchmarking and process analysis to ensure performance and results based management; assessing technology trends and identifying organizational technology needs; applying standards and guidelines for designing architectures to align technology with organizational structure, processes, and human resources; acquiring technologies using acquisition reform to support efficient and effective government operations; and leading the organization through changes necessitated by this new way of doing business.

Specialty Tracks provide two weeks of in-depth education related to the CIO competencies covered in the core to meet the specific IRM-related learning needs of students. Students select one of the following Tracks: Critical Frameworks Underlying Public Policy, Emerging Information Technologies, Best Practices in Change Management, and Information Systems Acquisition. The Domestic Field Studies provide students the opportunity to observe corporate and government information resources practices and discuss strategic and technological considerations with organizational leaders. The Electives Program also allows each student to do additional study in areas of particular professional interest. Students may select courses related to information strategies, information operations, information technologies, or acquisition management.

The AMP primarily serves the DOD community (both civilian and military), but the IRM College is also dedicated to promoting government-wide capability and professional partnering. To this end, the class composition includes students from other federal agencies, state governments, and international governments. Private industry students also have the unique opportunity to attend the AMP, contributing to and learning from the depth and breadth of professional expertise brought together in this forum.

The goals of the AMP are to:

- Develop senior leaders who can effectively work in partnership at all levels to meet agency, Department, and national goals relative to information resources.
- Develop leaders with decision-making skills and capabilities to effectively apply regulatory requirements to further organizational missions.
- Prepare graduates to plan, manage, and integrate IRM tasks in support of the Chief Information Officer to ensure appropriate allocation of resources complying with regulation, policy, and ethical standards.
- Develop individual skill in assessing, selecting, and introducing innovative technologies for mission effectiveness.

### ***ADVANCED MANAGEMENT PROGRAM - MASL : P162255***

Due to contractual considerations, tuition cost includes lodging and meals. Students receiving living allowance will be paid the incidental rate plus any meals not provided.

Course is six days a week for three weeks

Advanced Management Program (AMP) is a visionary management course that provides tools to high-potential managers that are necessary in today's challenging workplace. This three-week residential program challenges participants beyond their current capabilities. Strategic thinking is the focus in this dynamic learning environment. This program is designed to equip senior officers with the tools necessary to formulate and implement strategy, develop and manage networks of people, and incorporate experiences into a broadened policy-level perspective. AMP incorporates workshops and traditional learning to develop key competencies needed for higher levels of strategic leadership. Topics include Enterprise Resource Planning (ERP), e Business, Supply Chain Management, Information System Solutions, Cost Management, Activity Based Costing (ABC), Activity Based Management (ABM), and Metrics Management. AMP is modeled after the Executive Training Programs at civilian universities, but at a fraction of the cost. The faculty is from the University of North Carolina, and the facilities are at the Tench Francis School of Business on the campus of the Navy Supply Corps School. MASL cost includes lodging, and breakfast, lunch and dinner 6 days a week. Class requires an 80 ECL score, and the student will be expected to participate in group discussions and team presentations. Carries post-graduate college credit.

### ***ADVANCED MILITARY STUDIES - MASL : B171764***

The goal of this course is to provide advanced knowledge in military science and theory, military art and doctrine, preparing for war, joint and combined operations. This course:

- Studies the history and scope of war from antiquity to the present.
- Examines current and future issues of operational concepts and doctrine across the spectrum of conflict.
- Examines military science and theory, military art and doctrine, preparing for war, joint and combined operations.
- Studies the history and scope of war from antiquity to the present. Examines current and future issues of operational concepts and doctrine across the spectrum of conflict.

### ***ADVANCED OPERATIONAL STUDIES FELLOWSHIP - MASL : B171765***

This course focuses on the art and science of war at the operational level and the operational to strategic interface. The students are provided a challenging Senior Service College curriculum.

The major parts are:

- Conducts seminars about military classics, theory, campaigns and strategy
- Meets periodically with the Advanced Military Study Program students
- Prepares a monograph; travels to major headquarters worldwide and through interviews with key personnel
- Enhances an appreciation of regional strategic and operational issues

The students complete the following courses: Foundations of Military Theory and Doctrine, Contemporary Operational Art, Evolution of Operational Art, Preparation for War, Military Classics Colloquia, Strategic Studies, and Regional Assessments.

### ***ADVANCED TEMPEST TESTING - MASL : D164011***

DOD interagency course for engineers/technicians in the advanced skills required for conducting TEMPEST testing. Training includes: communications theory, intermediate TEMPEST analysis, developing TEMPEST test plans, TEMPEST test documentation, TEMPEST test execution, and the rationale for limits and requirements.

### ***ADVANCED TRAUMA LIFE SUPPORT - MASL : B175481***

The Advanced Trauma Life Support (ATLS) (this is a registered trademark of the American College of Surgeons), provides a 3-day course located at Fort Sam Houston, Texas in conjunction with the Combat Casualty Care Course (C4). The content and skills presented in the materials are designed to assist doctors in providing emergency care for the trauma patient. The Advanced Trauma Life Support Course provides the essential information and skills that a physician may apply to the identification and treatment of life-threatening or potentially life-threatening injuries.

### ***AEGIS COMBAT SYSTEMS MTTK2 JMSDF - MASL : P179343***

This course is designed to provide officer and enlisted personnel the knowledge and skills required to perform the duties of the Combat System Maintenance Manager aboard JMSDF CLASS GIS DESTROYER.

This course covers an introduction to and theory of the GIS COMBAT SYSTEMS management, including readiness assessment, CS system tests, combat system operability test, CSOSS, support equipment, CS status and alarms, combat system alignment, CSOOW, CSOSS supervisory areas, GIS Combat Training System ( ACTS), and CS Casualty Control Exercise Development.

### ***AEGIS COMBAT SYSTEMS OFFICER JMSDF - MASL : P179342***

The purpose of this training is to train personnel to direct warfare area operations, and to operate the GIS Display System and C&D System consoles. This course covers the general, physical, and functional descriptions of the JMSDF Combat System elements, computer programs, CSOSS, and integration descriptions of elements with the Combat System for a specific hull. Training provides the management level information required to direct the operation in anti-air, anti-surface, and anti-submarine warfare, and to manage combat system maintenance. Students direct all warfare area operations, operate the GIS Display System and C&D System Consoles, and construct, enter, and manipulate operational doctrine to participate in multi-warfare scenarios, which simulate underway conditions. Hands-on instruction (approx. 40% of the course) includes operational scenarios.

Method of Teaching: Classroom lessons and hands on training for available and applicable equipment to the AWS. Simulations used as appropriate, with differences explained. Prerequisites: Designated as CSO, TAO. Graduate of Surface Warfare Officer School or equivalent. Security Clearance of SECRET.

### ***AEGIS COMPUTER NETWORK TECHNOLOGY (NO) - MASL : P179348***

This course is specific to NORWAY and trains technicians in recognition and interpretations of malfunctions, documented fault isolation procedures, techniques to employ when procedures fail to isolate the malfunction and remove and replace procedures. This course covers the physical and functional description required to support all operation and maintenance of the AN/UYK-43 Computers, Rack Based Console (RBC), TAC X DTS, GIS Conversion Equipment System (ACES), Embedded Processor System Group, Network Routers, Rack Based Console OJ-721/UYQ (V), OJ-719/UYQ-70 Command and Decision Consoles, OJ-720/UYQ-70 GIS Display Consoles and the ATES, ATOE, UNIX operating system and Advanced Analog Signal Distribution System. To include the use of special tools and test equipment; scheduled preventive maintenance tasks; operational tests; alignments and adjustments.

### ***AEGIS COMPUTER NETWORK TECHNOLOGY (KS) - MASL : P179512***

The purpose of this course is to train technicians in recognition and interpretation of malfunctions, documented fault isolation procedures, techniques to employ when procedures fail to isolate the malfunction, and remove and replace procedures.

This course covers the physical and functional description required to support all operation and maintenance of the GIS processors, GIS Conversion Equipment Group (ACEG), Mission Critical Switches, MCEs, Rack Based Console OJ-721/UYQ(V), OJ-719/UYQ-70 Command and Decision Consoles, OJ-720/UYQ-70 GIS Display Consoles and the UNIX operating system. This includes the use of special tools and test equipment; scheduled preventive maintenance tasks; operational tests; alignments and adjustments.

Method of Teaching: Classroom lessons and hands-on training provided on available and applicable equipment to the AWS. Simulations used as appropriate with differences explained.

### ***AEGIS COMPUTER NETWORK OPERATION AND MAINTENANCE (KS) - MASL : P179366***

Through Classroom presentation with simulations and tactical equipment use where appropriate this course provides the student a detailed knowledge of the GIS element Advanced Processing Services (APS), enclosures, and AN/UYQ-70 based tactical display equipment theory, operation, and maintenance. The course covers the physical, functional, and operational elements of the GIS Advanced Processing Services (APS). Also included, are the Mission Critical Enclosures (MCE) and Commercial-Off-The Shelf (COTS) related equipment Functional and operational description of the AN/UYQ-70 tactical display equipment will be discussed. Basic operation of the ORTS, to include Fault Detection and Fault Isolation (FD/FI) testing of the MCE cabinets will be included. Other areas covered will be ADS, ADS Command Role, and sub mode operations to support warfare operations.

### ***AEGIS CONSOLE OPERATION JMSDF - MASL : P179341***

To provide Officers and Operations Specialists (OS) personnel the knowledge and skills required to operate the GIS COMBAT INFORMATION CENTER (CIC) on JMSDF DDGs and to perform the duties of applicable watch stations. SCOPE: This course provides an operational description of the GIS COMBAT SYSTEMS, including capabilities and limitations supporting each warfare area. The CIC will be presented in detail to explain the physical and functional relationship of each warfare area including equipment, operator positions, and supporting sub modes. Trainees learn to operate display consoles, communications, and other equipment necessary to perform required tasks. The training is designed to provide maximum time in hands-on practical applications in a JMSDF REPLICATED CIC.

This course is for international customers only.

### ***AEGIS FIRE CONTROL SYSTEM/OPERATIONAL READINESS TEST /2-SPAIN - MASL : P199039***

To provide the knowledge and skill required to perform the operation and organizational-level maintenance on the MK-99 Fire Control System and the MK-7 Operational Readiness Test System.

This course covers the physical, functional, and interface description required to support all operation and maintenance including the use of special tools and test equipment; scheduled preventive maintenance tasks; alignments and adjustments; recognition and interpretation of malfunctions; documented fault isolation procedures; techniques to employ when procedures fail to isolate the malfunction; disassembly and reassembly procedures; and to function as Missile System Supervisor (MSS) in CIC, as well as Test Monitor Central Operator in Combat Systems Maintenance Central.

### ***AEGIS FCS/ORTS OPS/MT TRK2 JOINT MARITIME SELF DEFENSE FORCE - MASL : P199027***

To provide the knowledge and skill required to perform the operation and organizational-level maintenance on the MK-99 Fire Control System and the MK-7 Operational Readiness Test System.

This course covers the physical, functional, and interface description required to support all operation and maintenance including the use of special tools and test equipment; scheduled preventive maintenance tasks; alignments and adjustments; recognition and interpretation of malfunctions; documented fault isolation procedures; techniques to employ when procedures fail to isolate the malfunction; disassembly and reassembly procedures; and to function as Missile System Supervisor (MSS) in CIC, as well as Test Monitor Central Operator in Combat Systems Maintenance Central.

### ***AEGIS OVERVIEW COURSE (IP) - MASL : P199040***

The goal of this course is to provide an Overview of the GIS Combat System to include elements, equipment, interfaces, computer program, Operational Readiness Test System (ORTS) testing and readiness assessment, CIC organization and Sub mode Hierarchy, Doctrine description, Combat System Support Equipment, and AAW and ASUW Detect to Engage sequences.

This course is for international customers only.

### ***AEGIS SPY-1BD OPERATION AND MAINTENANCE/2-SPAIN - MASL : P199038***

The goal of this course is to provide the knowledge and skill required to operate and perform the organizational-level maintenance on the Radar System AN/SPY-1B(V)/D, and elements of the CG-59 and DDG-51 F-100 Class Ships MK-7 GIS Weapon System.

This course covers the physical, functional, and interface description required to support all operational maintenance including the use of special tools and test equipment, scheduled preventive maintenance tasks; operational tests, alignments and adjustments;

recognition and interpretation of malfunctions; documented fault isolation procedures; techniques to employ when procedures fail to isolate the malfunctions; and disassemble, repair, and reassemble procedures. Operational training will prepare the graduate to operate the Radar in all modes and sub modes and to function as Radar Systems Controller (RSC) in CIC.

### ***AEGIS SYP-1BD OPS/MT TRK 2 - MASL : P199026***

The goal of this course is to provide the knowledge and skill required to operate and perform the organizational-level maintenance on the Radar System AN/SPY-1B(V)/D, and elements of the CG-59, DDG-51 and DDG-173 Class Ships MK-7 GIS Weapon System.

This course covers the physical, functional, and interface description required to support all operational maintenance including the use of special tools and test equipment, scheduled preventive maintenance tasks; operational tests, alignments and adjustments; recognition and interpretation of malfunctions; documented fault isolation procedures; techniques to employ when procedures fail to isolate the malfunctions; and disassemble, repair, and reassemble procedures. Operational training will prepare the graduate to operate the Radar in all modes and sub modes and to function as Radar Systems Controller (RSC) in CIC.

### ***AEGIS WEAPON SYSTEM MK7 OP/MT F100 - MASL : P199031***

The goal of this course is to provide the knowledge and skill required to perform the operation and direct organizational level maintenance on the GIS weapon system, to provide supervision and guidance for element technicians, and to communicate weapon system status.

This course covers directing, coordinating and operating the GIS weapons system to include: SPY-1D, CND, WCS, ADS, FCS, VLS, SM2, ORTS, ACTS and GIS combat system (ACS) interfaces via local area networks (LANS) with other systems. The system level operation and maintenance of the GIS MK-7 weapon system, including system signal flow, computer programs, the use of special tools and test equipment; alignment procedures; operational tests, recognition and interpretations of system malfunctions. It includes practical application in corrective maintenance and fault isolation of the Combat System at the Combat System Officer of the Watch (CSOOW) level.

### ***AEGIS WEAPON SYSTEM MK7 TK2 JMSDF - MASL : P179335***

The goal of this course is to provide the knowledge and skill required to perform the operation and direct organizational level maintenance on the GIS Weapons System (DDG-173), to provide supervision and guidance for element level technicians, and to communicate weapon system status.

This course covers system level functional operation and maintenance of the GIS MK-7 Weapon System, including use of the Combat System Operational Sequencing System (CSOSS) for combat system initialization and casualty control. It includes system signal flow, fault detection and isolation, and computer programs. Hands-on training is provided for combat system operation, alignment procedures, use of built-in test equipment, and element fault detection and isolation.

### ***AERIAL DELIVERY AND MATERIEL OFFICER - MASL : B148371***

In this course students will learn leadership, supervision, and management skills required for inspecting, packing, rigging, recovering, storing, and maintaining air item equipment.

### ***AEROMEDICAL - MASL : D175039***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***AERONAUTICAL ENGINEERING/GRADUATE - MASL : D178013***

The Graduate Aeronautical Engineering program is a fully accredited program at AFIT leading to a Master of Science in Aeronautical Engineering. The program is designed for students from all branches of the U.S. military services as well as students from Allied foreign military services, Most students, Air Force and Navy quota students and Air Force Test Pilot

(AFTPS) students, enter in September. Objectives include: Produce graduates who are technically well prepared for their subsequent duties and responsibilities as Aeronautical engineers in DOD organizations. Such positions may range from requiring very detailed and advanced level work in a specific discipline to broad responsibilities requiring interaction among many disciplines and technical organizations.

### ***AEROSPACE CONTROL & WARNING SYSTEM - MASL : D137056***

This course trains airmen to perform the duties of a Aerospace Control and Warning Systems apprentice.

### ***AEROSPACE GROUND EQUIPMENT REPMN - MASL : D148020***

This group-paced course provides training that enables airmen to perform duties prescribed in AFMAN 36-2108 for AFSC 2A632, Aerospace Ground Equipment (AGE) Apprentice, which includes how to maintain, troubleshoot, and repair AGE systems in an on-equipment environment in support of aircraft maintenance and operations. Training includes the inspection, maintenance, troubleshooting, and repair of systems and components of frequency converters, diesel and turbine engines, generators, hydraulic test stands, bomb lifts, heaters, flood lights, air conditioners, air compressors, self generating nitrogen servicing cart, and non-powered support equipment, how to use the Integrated Maintenance Data System (IMDS) and Department of Defense Environmental Protection Agency refrigerant certification.

### ***AEROSPACE MEDICINE PRIMARY - MASL : D175002***

This course trains medical officers to perform duties as flight surgeons and to accomplish the objectives of the USAF Aerospace Medicine Program. This course provides the student with the knowledge and skills required for the treatment and proper administrative disposition of aircrew members and for assuming the responsibilities of a general preventive medical member of the bioenvironmental engineering, occupational medicine, and military public health teams.

The training includes review of the clinical medical topics important in Aerospace medicine; i.e., otolaryngology, audiology, ophthalmology, internal medicine, neurology, psychiatry, etc., with emphasis on particular applications of these specialty areas in Aerospace medicine; instruction and experience in the physiology of altitude and acceleration; employment of survival/life support principles and equipment; instruction in aircraft accident investigation; the administrative requirements of Aeromedical services and in the application of physical standards to the patient population for which the flight surgeon is responsible. Orientation to flying in a current inventory trainer aircraft and training in the human centrifuge are also provided when equipment is available.

### ***AEROSPACE MAINTENANCE APP (C-130) - MASL : D141401***

Training begins with 3 weeks of fundamental maintenance requirements, to include career progression, technical orders, general safety, hand-tool and hardware usage, CAMS/IMDS usage, Aerospace ground equipment usage and general airframe/component identification. Blocks 4 and on, C-130 aircraft systems training, includes electrical, hydraulic, landing gear, fuel, engine, propeller, auxiliary power unit, gas turbine compressor, utility, and flight control. Inspections are taught to include preflight, basic post-flight, and thru flight. Ground handling procedures are included. AFSC 2A531B will be awarded after completion of this course and course J3ABP2A531B017A, Aerospace Maintenance Apprentice (C-130), at Little Rock AFB AR.

### ***AG BASIC OFFICER LEADER - MASL : B121220***

The goal of this course is to instruct Adjutant General Corps Lieutenants in the areas of combat survival, career management, and Adjutant General specialty training.

Training includes and FTX/CPX.

### ***AH-1W SIMULATOR TRAINING - MASL : P119016***

This MASL is used when AH-1W Simulator Training is programmed.

### ***AH-64 FLIGHT SIMULATOR - MASL : B119910***

This MASL is used when AH-64 Flight Simulator is programmed.

### ***AH-64 LCT SIMULATOR - MASL : B119976***

This MASL is used when AH-64 LCT SIMULATOR is programmed.

### ***AH-64A ARMAMENT/ELECTRICAL SYSTEMS REPAIRER - MASL : B141079***

This course provides the student with skills and knowledge required to maintain, repair and troubleshoot AH-64A electrical systems, components and weapons/fire control systems, maintenance concepts, preventive maintenance, equipment check out, troubleshooting, fault detection, fault isolation, and appropriate AVUM/AVIM corrective actions using appropriate technical publications shall be included.

This course will train students in use and preparation of select forms and records applicable to Army Aviation Maintenance to include ULLS-A. Application, operation, and maintenance of all applicable Peculiar Ground Support (PGSE), Common Ground Support Equipment.

### ***AH-64A AVIATOR QUALIFICATION COURSE - MASL : B113214***

This course will teach students skills and techniques in using pilot night vision sensor system, contact flying skills, gunnery, target acquisition and designation sight, and combat skills training.

### ***AH-64A FLIGHT SIMULATOR (CMS) - MASL : B119959***

This MASL is used when AH-64A Flight Simulator (CMS) is programmed.

### ***AH-64A INSTRUCTOR PILOT QUALIFICATION COURSE - MASL : B113149***

Course consists of flight and academic instruction to qualify rotary-wing aviators who have completed qualification training in the AH-64A in methods of instruction to teach and evaluate AH-64A contact flight, night vision systems, weapon systems, and the combat mission simulator.

### ***AH-64D AQC (SUPPLEMENTAL) - MASL : B113212***

This course will provide the AH-64A qualified student with the necessary skills and knowledge to achieve pilot qualification in the AH-64D Apache/Longbow. Training focus is on the differences between the AH-64A Apache and the AH-64D Apache/Longbow aircraft. Includes training in the mental and physical skills required for the accomplishment of pilot duties through instruction in aircraft systems, communication, navigation, fire control radar, flight training, mission planning, combat skills, gunnery, crew coordination, and safety.

### ***AH-64D ARM/ELEC/AVN SYS RP - MASL : B142202***

This course will provide the skills and knowledge required to maintain, repair, and troubleshoot the AH-64D (Longbow) Attack Helicopter armament, electrical, avionics, and fire control systems/components; Maintenance concepts, preventive maintenance, system operation, troubleshooting, fault detection, fault isolation, and appropriate AVUM/AVIM corrective actions using technical manuals. Identify and maintain Peculiar Ground Support Equipment (PGSE), Common Ground Support Equipment (CGSE), and Test Measurement and Diagnostic Equipment (TMDE) as they pertain to the AH-64D (Longbow) Attack Helicopter.

### ***AH-64D ARMAMENT/ELEC/AVIONIC SYSTEMS REPAIRER - MASL : B141751***

This course provides the student with skills and knowledge required to maintain, repair and troubleshoot AH-64D Longbow Attack Helicopter electrical, avionics, weapons, missile, and fire control systems; maintenance concepts, preventive maintenance, equipment check out, troubleshooting, fault detection, fault isolation, and appropriate AVUM/AVIM corrective actions using appropriate technical publications shall be included. Application, operation, and maintenance of all applicable Peculiar Ground Support Equipment (PGSE), Measurement and Diagnostic Equipment (TMDE).

### ***AH-64D ATTACK HELICOPTER REPAIRER BNCOC - MASL : B141018***

Technical training in the aircraft maintenance management field is oriented toward developing skills and knowledge of aircraft maintenance management principles and procedures. The student is provided with the training required to successfully perform the supervisory and technical inspector (TI) duties required of MOS 67R30Y1.

### ***AH-64D ATTACK HELO RPR - MASL : B141765***

Course trains the student in the use and preparation of selected forms and records applicable to Army Aviation Maintenance using the Unit Level Logistics System - (ULLS-A); to perform AVUM and AVIM tasks, to include component removal, inspection, and

requisitioning of repair parts; To perform visual inspections to identify common, precision and special tools; To identify on the AH-64D Attack Helicopter; and to train the student in the facets of shop and flight line safety procedures.

### ***AH-64D ATTACK HELO RPR TRAN - MASL : B142201***

This course will provide the student with a hands-on working knowledge of the differences between the AH-64A and the AH-64D major assemblies, subassemblies, and line replaceable units. Fault detection, fault isolation, and applicable corrective actions and the use of peculiar ground support equipment will be included. The student will receive Environmental Protection Agency (EPA) certification training for the recovery and handling of refrigerants.

### ***AH-64D AVIATION QUALIFICATION - ALL - MASL : B113210***

This course imparts the knowledge for skill development in contact flight, fire control radar/target acquisition, gunnery, combat skills training, crew coordination, and safety.

### ***AH-64D AVIATION SPECIFIC PREP (FMT) - MASL : B113167***

This MASL is used when AH-64D AV SPEC PREP (FMT) is programmed.

### ***AH-64D AVIATOR QUALIFICATION - EN - MASL : B113217***

This course consists of flight and academic instruction to qualify rotary wing aviators who have completed qualification training in the AH-64D in methods of instruction to teach and evaluate AH-64D contact flight, night vision systems, weapon systems, and the Longbow Crew Trainer (LCT).

### ***AH-64D INSTRUCTOR PILOT-ALL - MASL : B115031***

Course consist of the flight and academic instruction necessary to qualify rotary wing aviators who have completed qualification training in the AH-64D methods of instruction to teach and evaluate contact flight, pilot night vision system (PNVS), fire control radar and target acquisition and designation system (TADS), gunnery, and combat skills, crew coordination, and safety training in the AH-64D aircraft.

### ***AH-64D IP MOI - ALL - MASL : B115038***

Course consists of flight and academic instruction to qualify rotary wing aviators who have completed qualification training in the AH-64D in methods of instruction to teach and evaluate AH-64D contact flight, night vision systems, weapons systems, and the Longbow Crew Trainer (LCT).

### ***AH-64D MAINTENANCE TP - ALL - MASL : B141832***

To provide information and training on AH-64D Longbow Apache maintenance troubleshooting and test flight procedures.

### ***AH-64D MAINTENANCE TP - EN - MASL : B141850***

To provide information and training on AH-64D Longbow Apache maintenance troubleshooting and test flight procedures.

### ***AIC FLIGHT SUPPORT - MASL : P179401***

This MASL is for AIC flight support.

PROGRAM THIS MASL FOR USE ONLY WITH P121006, P121023 AND P129126.

### ***AIC PROFICIENCY MAINTENANCE - MASL : P121006***

The goals of this course are to provide the facilities, air services, tactical simulation, and classroom instruction required for current and qualified air intercept controllers to maintain their proficiency during fleet in-port periods or while billeted ashore. The course also provides facilities for airborne AIC s to maintain their proficiency. This course consists of actual air intercept control, conventional or NTDS, along with tactical ACM simulation to enhance control proficiency.

### ***AIR COMMAND + STAFF COLLEGE - MASL : D171002***

Air Command and Staff College (ACSC), the Air Forces intermediate professional military education (PME) school, prepares field grade officers of all services (primarily majors), international officers, and US civilians to assume positions of higher responsibility within the military and other governmental arenas. Geared toward teaching the skills necessary to conduct air and

space operations in support of a joint campaign, ACSC focuses on shaping and molding tomorrow's leaders and commanders. The college's academic environment stimulates and encourages free expression of ideas as well as independent, analytical and creative thinking. The curriculum meets requirements and guidelines for Phase I of the Program for Joint Education (PJE).

Further details of the ACSC program course descriptions and other curriculum information may be found at <http://www.wacsc.au.af.mil>.

### ***AIR DEFENSE ARTILLERY BASIC OFFICER LEADER - MASL : B121225***

Presenting, developing, and refining basic skills needed by all Field Artillery Officers. Course consists of three blocks of instruction that all Lieutenants receive in Platoon Leader, Fire Support, and Fire Direction skills. Course has weapons system training on Light/Towed artillery systems.

### ***AIR DEFENSE ARTILLERY BNCOC - MASL : B171802***

This course is conducted in a 24 hour a day NCO Academy environment and includes training on leadership, tactics, communications, nuclear, biological and chemical, and training management.

### ***AIR DEFENSE ARTILLERY CAPTAINS CAREER - MASL : B171603***

Topics on Air and Missile Defense (AMD) Doctrine, Tactics, Techniques, and Procedures, staff functions, threat, combined arms/war fighter, leadership/training management, military history/communicative skills, research, battery command and threat presented in conference and small group instruction modes.

### ***AIR FORCE TACTICAL RECEIVE SYSTEM (AFTRS) - MASL : B172623***

The course provides an Integrated Broadcast Service (IBS) orientation and an Air Force Tactical Receive System (AFTRS) system overview. It provides hands-on practical experience to setup, configure, and operate the AFTRS hardware and software; creating and using data filtering strategies; establish and maintain connectivity with associated Tactical Data Processors (TDP) using both UHF SATCOM broadcast data and network centric broadcast data; and troubleshooting the AFTRS from antennas through the output cables to associated TDPs. Students are taught to ensure the data from the AFTRS is present at the TDPs by bringing up the specific comms trace and through display of data on the maps.

### ***AIR INTERCEPT CONTROLLER - MASL : P121023***

The goals of this course are to train selected senior enlisted personnel in the duties, responsibilities, and skills required of Combat Air Intercept Controllers, especially to: analyze and transmit to the interceptor aircrew the necessary tactical information required to perform their mission in both the combat and training environments in accordance with current fleet doctrine and directives; advise command during the planning stages of Air Defense anti-air warfare on the capabilities, limitations, and employment of current U.S. and threat aircraft and associated weapon systems in accordance with current tactical manuals and threat intelligence; and, inform command of mission progress and aircraft status on a continuing basis using standard Navy phraseology and appropriate brevity code words.

This course consists of classroom instruction reinforced by practical training in communication with aircrews; duties and responsibilities of Combat Air Intercept Controller; aircraft characteristics; sources of flight and tactical information; Air Defense anti-air warfare; airborne threats; friendly air-to-air weapons; intercept geometry; the air combat arena; equipment operations; emergencies and search and rescue operations; and, non-intercept air control.

### ***AIR TRAFFIC CONTROL CENTER CARRIER - MASL : P133028***

The goals of this course are to provide selected air traffic control personnel with basic knowledge and skills necessary to perform carrier air traffic control center team member air operations readiness, watch station and system operation functions during carrier air operation evolutions.

### ***AIR TRAFFIC CENTER RADAR APP - MASL : D122100***

The instructional design for this course is Group-paced. This course trains airmen to perform the duties prescribed in AFI 36-2108 for Air Traffic Control Operations Apprentice, AFSC 1C131. Training includes application of air traffic control principles and procedures for Radar Approach Control Operations. This is a follow-on course; Air Traffic Control Fundamentals must be taken first.

### ***AIR TRAFFIC CONTROL AC A1 - MASL : P133025***

Provides selected Navy enlisted and Marine Corps aviation enlisted and officer personnel with the basic tower and radar control knowledge to meet the requirements of the Federal Aviation Administration (FAA) for certification and the technical knowledge which, when followed by the appropriate practical application and experience, will lead to the fulfillment of the technical requirements at the apprentice entry level for the air traffic controller. This course covers the fundamentals and systems of air traffic control and provides the basic simulated operational application experiences that are prerequisite to functioning as an apprentice air traffic controller in a base operations, control tower and/or terminal radar environment.

The course of instruction sequentially covers/provides for:

- FAA Certification study material and administration of the FAA Airman Written Test (Control Tower Operator)
- Control Tower Operations
- Terminal Radar Procedures
- Base Operations.

### ***AIR TRAFFIC CONTROL - MASL : D122013***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the students country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***AIR TRAFFIC CONTROL OPEATOR - MASL : D122029***

The instructional design for this course is Group-paced. This course is a prerequisite for attendance in the E3ABR1C131R-00RB, Air Traffic Control Radar Apprentice, and E3ABR1C131T-00TB, Air Traffic Control Tower Apprentice. Training includes aviation-related weather, air traffic control principles and procedures, control tower environment, control tower operational requirements, and radar approach control operational requirements.

Physical training requirements have been added for E3AQR1C231 students only.

### ***AIR TRAFFIC CENTER TOWER APP - MASL : D122099***

The instructional design for this course is Group-paced. This course trains airmen to perform the duties prescribed in AFI 36-2108 for Air Traffic Control Operations Apprentice, AFSC 1C131. Training includes application of air traffic control principles and procedures for Radar Approach Control Operations.

This is a follow-on course, Air Traffic Control Fundamentals must be taken first.

### ***AIR TRANSPORTATION SPECIALIST - MASL : D153005***

This course trains personnel in the techniques, functions, responsibilities, and duties pursuant to air cargo and air passenger handling. Instruction incorporates training on manual and automated cargo, mail, and passenger processing systems. Covers originating, in-transit, and terminating cargo and passenger processing operations; storage and warehousing of general cargo, mail, and hazardous material; aircraft loading and off loading procedures for cargo, passengers, and baggage; originating, in-transit, and terminating aircraft fleet services operations; scheduling of cargo and personnel for air movement, and principles of customer relations and communications are introduced.

This course includes preparation and maintenance of records for all cargo and passenger movement activities. Operator maintenance and inspection of 463L material-handling equipment (MHE), and passenger/baggage-handling equipment is introduced.

### ***AIRBORNE - MASL : B121182***

Ground week-Don and adjust the main and reserve parachutes, identify components inside a C130/C141/C17 aircraft and respond to actions inside the aircraft using the "mock door", exit the 34-foot tower, execute parachute landing falls, execute parachute

landing falls off the lateral drift apparatus, perform methods of recovery. Tower week-Respond to jump commands (C130/C141/C17) and execute individual and mass exits using the mock door, demonstrate proficiency in fixed-wing aircraft exits from the 34-foot tower wearing combat equipment, demonstrate techniques for deploying the reserve/mirps, control the risers from the suspended harness, execute parachute landing falls correctly from the swing landing trainer, execute a drop from the 250-foot free tower. Jump week-correctly don and adjust the parachute, mirps and combat equipment, respond to jump commands inside an aircraft, control body position after jumping from an aircraft until parachute opening shock, control the parachute during descent, execute a parachute landing fall, controls the parachute upon landing while making five parachute jumps from an air force aircraft.

### ***AIRBORNE SYSTEMS TEST AND EVALUATION (SHORT) - MASL : P118413***

This is the capstone course for the Canadian Forces School of Aerospace Studies' Avionics Systems Course (ASC) and represents a consolidation of the knowledge of the various avionic systems used in military aircraft, systems integration and systems engineering in order for the ASC students to conduct Flight Test and Evaluation. The course provides the practical knowledge needed to plan and execute a flight test program to evaluate system performance. Developmental and operational test & evaluation domains are emphasized in the syllabus. Flight test processes, principles, methods, and practices are covered. The course material is presented in two parts through the use of lectures, case studies, visits, laboratories, and flight exercises.

The first part introduces the Canadian Forces (CF) air force test & evaluation organization, structure and process and discusses a variety of topics central to test & evaluation. The second part is provided by the USN Test Pilot School and focuses on test planning, specific test methodologies, flight test safety, data acquisition, actual flight system testing and presentation of results. This portion of the syllabus also includes a one systems test flight, one systems integration test flight, and one fixed-wing or helicopter flight evaluating NVG/FLIR systems as well.

Staff and CMs participating in the flight test phase require current aircrew medicals. Additional medical requirements may be necessary to meet US Navy Test Pilot School requirements, such as HAI and Sea Survival.

### ***AIRBORNE SYSTEMS TEST AND EVALUATION NFO/WSO - MASL : P118407***

To provide experience in actual testing of modern aircraft and airborne systems and reduction and reporting of the data obtained. The airborne mission systems curriculum prepares pilots, Naval Flight Officers/Weapons Systems Operators, and engineers to test airborne mission systems and flight systems in addition to aircraft flying qualities and performance.

### ***AIRCRAFT PNEUDRAULICS RPR (SP)-PCO - MASL : B141735***

In this course students learn to remove, repair, replace, adjust and tests pneudraulics systems, subsystems, assemblies, and components according to technical manuals, directives, and safety procedures. The student will also learn techniques for the fabrication of tubes and hoses, the diagnosis and troubleshooting of malfunctions in pneudraulics systems and subsystems or components.

The student will performs operator maintenance on common and special tools, learn to maintain and stores hydraulic fluids and other flammable materials. Other course areas include requisitions and maintenance of shop and bench stock for repair of aircraft pneudraulics systems, prepare forms and records, and using the Unit Level Logistics System-Aviation (ULLS-A).

### ***AIRCRAFT ACCIDENT INVESTIGATION - MASL : P169227***

In civil aviation, investigating aircraft accidents is the responsibility of the National Transportation Safety Board (in the United States) or a similar government agency in any country that is a signatory to the ICAO Conventions. Nonetheless, under ICAO Annex 13 and in the US CFR Part 830, every operator of a civil aircraft has certain responsibilities in the event of an accident or incident.

These responsibilities include proper reporting, preservation of evidence, and support of the investigation team. In addition, agencies or organizations actively involved in the accident may be invited by the NTSB to participate in the investigation. This would include the operator, airframe and engine manufacturers, and other technical experts. To be qualified to join the investigation, invited participants must have the technical expertise to support the investigation as well as an understanding of the accident investigation process in order to provide accurate and timely support.

These are the regulatory reasons for understanding the aircraft accident investigation process and techniques. There is also another very important reason for understanding accident investigation. The NTSB and the FAA only become involved in those

events (accident or incidents) that are reportable under Federal Regulations. But, many events occur that are not reportable which under slightly different circumstances could easily have been an accident and reportable. An effective aviation safety program must be able to identify, investigate, and correct the factors that create near accidents so that a real accident can be prevented.

It is for these two reasons that SCSA has designed and offers this Aircraft Accident Investigation (AAI) course. In this course you will become familiar with the regulatory requirements for investigating and reporting, not only those requirements applicable to the United States, but also those of ICAO Annex 13 upon which almost all modern individual reporting and investigating requirements are based regardless of nation. Once you understand the reporting requirements you will learn about how to comply with the operator's responsibilities to preserve evidence and support the investigation. You will learn how to set up an interim response team that will collect and preserve evidence. You will learn what evidence to preserve and how to preserve it. You will also learn about the hazards at an accident site and how to protect yourself.

You will learn the process of investigation from initial actions and set up to how to investigate each area of specialty, systems, structures, engines, and operations. You will be introduced to the areas of aircraft performance and structures that contribute to aircraft accidents and how they can be identified. You will also learn about specialized areas of investigation such as fire, midair collision, and in-flight explosion. You will learn how the use of recording devices and simulation have enhanced and improved the process of finding accident causes.

Human error is estimated to be a major cause in 85% of all aircraft accidents. You will learn Human Factors to help investigate possible human error. This portion of the course will examine the role of psychological and physiological effects as well as the role of the ro-medical investigator.

It has been said that a picture is worth a thousand words. Accident photography is used to document evidence and to illustrate the investigator's conclusions. There are many choices of media today, both chemical and electronic. In this course you will receive instruction in the use of both chemical and digital photography systems and have hands on experience with digital photography systems using the crash lab. Although digital cameras will be provided, you may bring your own cameras.

Recent technology advances enable investigators to use the global positioning satellite (GPS) system during aircraft accident investigations.

#### ***AIRCRAFT ELECTRICIAN (SPAN) - MASL : B141784***

Instruction in Spanish based on tasks that are specified for Skill Level I training; also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in Electrical Repair and Troubleshooting.

#### ***AIRCRAFT ELECTRICIAN (SPAN) - MASL : B141775***

Based on tasks that are specified for Skill Level I training; also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in Electrical Repair and Troubleshooting.

Foreign Military Latin American and selected National Police Personnel. Information on this course can be obtained by calling Training Operations Division, USAALS at DSN 826-6474 ext 3359 or com 757-878-6474 ext 3359.

#### ***AIRCRAFT ELECTRICIAN REPAIRER SUPV BNCOC - MASL : B141818***

This course teaches technical training in the field of aircraft maintenance; tasks, skills, and knowledge of aircraft maintenance management principles and procedures that will enable the student to successfully perform the supervisory and technical inspector duties of MOS 68F30. Technical training in the field of aircraft maintenance; tasks, skills, and knowledge of aircraft maintenance management principles and procedures that will enable the student to successfully perform the supervisory and technical inspector duties of MOS 68F30.

#### ***AIRCRAFT MAINTENANCE - MASL : D141020***

This course offers Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***AIRCRAFT MAINTENANCE OFF - MASL : D141019***

This course provides training for Air Force Officers (new accessions), Air Reserve Forces (AFR/ANG), and International Officers entering the Aircraft Maintenance Officer career field without regard to background, or prior skills, or training other than specified by AFI 36-2223.

Fulfills the requirement for award of AFSC 21A1.

Graduates perform duties as Aircraft Maintenance Officers in worldwide assignments.

### ***AIRCRAFT PAINT/FINISH - MASL : P141013***

The course content will include the following Units of Instruction:

- Introduction to the course
- Painting equipment, paints, Application Techniques, and Aircraft Markings
- Students are required to have a current respirator physical/fit test completed prior to convening of classes. Work in a corrosion control billet.
- Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.)

Students must show evidence of current paint physical in accordance with COMNAVIAIRLANTINST 4750.5C/COMNAVIAIRPACINST 4750.4.

Students must provide personal respirator with current Fitness Test Card.

Students must bring safety shoes and coveralls suitable for working with paints and sealants. Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.

### ***AIRCRAFT PNEUDRAULICS REPAIRER SUPV BNCOC - MASL : B141025***

This course provides technical training in the aircraft maintenance management field, skills and knowledge of aircraft maintenance management principles and procedures, training required to successfully performing the supervisory and technical inspector duties required of MOS 68H/15H30.

### ***AIRCRAFT POWER PLANT REPAIRER - MASL : B141750***

This course provides the aircraft power plant repairer, MOSC 68B10, with the skills and knowledge required to perform removal, replacement, servicing, cleaning, preservation, storage, disassembly, assembly, repair, adjustment, diagnostic testing and troubleshooting, or aircraft power plant systems, sub-systems and components.

This course also provides the knowledge required to prepare forms and records, to include ULLS-A, requisition bench stock, repair parts, and engine component; assist in rigging engine controls.

### ***AIRCRAFT POWER PLANT REPAIRER SUPV BNCOC - MASL : B141090***

In this course emphasis is placed on technical training in the field of aircraft maintenance. It is oriented toward the training of tasks, skills, and knowledge of aircraft maintenance management principles and procedures that will enable the student to successfully perform the supervisory and technical inspector duties of MOS 68/15B30.

### ***AIRCRAFT POWER PLANT RPR-SP - MASL : B141781***

Based on tasks that are specified for Skill Level 1 training; this course also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in Power plant Repair.

### ***AIRCRAFT POWER TRAIN REPAIRER - MASL : B141752***

Based on tasks that are specified for Skill Level 1 training; this course also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in power train repair and nondestructive inspection skills.

### ***AIRCRAFT POWER TRAIN REPAIRER SUPERVISOR BNCOC - MASL : B141050***

This course will provide the student with skills and knowledge required to maintain, repair and test power train components, maintenance concepts, preventive maintenance, fault detection, fault isolation and appropriate AVUM/AVIM corrective actions using appropriate technical publications shall be included. Course instruction will also be in areas of application, operation, and maintenance of all applicable Peculiar Ground Support Equipment (PGSE), Common Ground Support Equipment (CGSE), Test Measurement and Diagnostic Equipment (TMDE).

### ***AIRCRAFT POWER TRAIN RPR (SPAN) - MASL : B141774***

Based on tasks that are specified for skill level I training; this course also covered subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in power train repair and non-destructive testing skills.

Special Information:

- Foreign Military Latin American and selected National Police Personnel: Course covers the systems for the OH-58A/C, UH-1H and UH-60. The OH-58 is similar to the Bell 206; UH-1H is similar to the Bell 204, 205 and to a lesser extent, the 212 and 214 series aircraft, this course will only be trained with military manuals. Information on this course can be obtained by calling Training Operations Division, USAALS at DSN 826-6474 ext 3359 or comm 757-878-6474 ext 3359.

### ***AIRCRAFT STRUCTURAL REPAIR (SPAN) - MASL : B141776***

This course provides instruction in Spanish based on tasks that are specified for Skill Level I training; also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in structural metal.

### ***AIRCRAFT STRUCTURAL REPAIRER SUPERVISOR BNCOC - MASL : B141843***

This course provides technical training in the field of aircraft maintenance management principles and procedures. The student is provided with the training required to successfully perform the supervisory and technical inspector duties required of a 68/15G30 NCO.

### ***AIRCRAFT STRUCTURAL REPAIR -SP - MASL : B141783***

Based on tasks that are specified for Skill Level I training; also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in structural metal.

### ***AIRCRAFT STRUCTURE REPAIR - MASL : B141755***

This course teaches techniques in maintenance, repair and fabrication of aircraft structural members, sheet metal, stress panels, fiberglass and helicopter rotor blades; identification, usage and maintenance of common, special and precision tools.

### ***AIRCREW EGRESS SYSTEM REPAIR - MASL : D148016***

This course provides formal training in aircrew egress systems career field fundamentals, introduction to maintenance management, introduction to egress systems maintenance, F-16 egress systems maintenance, ACES II seat maintenance, and F-15 egress systems maintenance/CAMS.

### ***AIRCREW LIFE SUPPORT SPEC - MASL : D122018***

This course provides training in protective helmets and breathing equipment, environmental protection, chemical defense equipment and operations, parachutes, preservers and rafts, survival components including vest and kits, and aviators night vision imaging systems.

### ***AIRDROP LOAD INSPECTOR CERTIFICATION - MASL : B148369***

The goals of this course are to qualify and provide airdrop load inspector certification for commissioned officers, warrant officers, and enlisted personnel whose duties require the performance of final joint inspections of airdrop loads to be airdropped from aircraft.

### ***AIRFIELD MANAGEMENT APR - MASL : D121077***

This course provides initial skills training for personnel entering the airfield management career field. Personnel are provided basic knowledge in airfield management, to include career progression, flight planning guidance, coordinating with base support agencies, Air Traffic Control structure, types of airfield inspections including airfield lighting and markings, determining the Runway Surface Condition (RSC) and Runway Condition Reading (RCR), flight safety, security, airfield response for wildlife, flight plan processing, disseminating Notice to Airman (NOTAM), emergency actions, interpreting flight information publications and deciphering weather reports. Material presented throughout the course, combined with interaction amongst yourselves, our airfield management staff, and guest speakers will help broaden your perspective on what airfield management at the three skill level (basic level) is about. We are confident that you will find the course rewarding.

Completion of this course is required for the award of the 3-Skill Level

### ***AIRFIELD OPERATIONS OFFICER - MASL : D122011***

For air traffic control, training includes procedures and skills involved in the operation of air traffic control facilities, aircraft recognition and performance, air navigation aids, weather, air traffic rules, communication procedures and operations, and terminal approach control procedures and operations.

For airfield operations, training includes Terminal Instrument Procedures (TERPS) and associated development, evaluation and management of a TERPS program. Additionally, training includes airfield management to include airfield construction procedures, airport planning and design, pavement evaluations, airfield inspections, safety programs, and Base Operations.

### ***AIRLIFT ELECTRO-ENVIRONMENTAL - MASL : D141239***

This course provides training in the knowledge and skills needed to perform maintenance on aircraft electrical and environmental systems. The course includes training on: aircraft familiarization, maintenance and inspection systems, corrosion control, DC Principles, AC Electronics, and maintenance basics.

It also includes lessons on the AF Technical order system, flight line safety, aircraft forms, maintenance data collection, troubleshooting techniques, and wiring schematics/diagrams. The course includes instruction on power generation, landing gear and warning systems, lighting, flight controls and cargo door systems, environmental systems and utility/oxygen systems.

### ***AIRPLANE FLYING QUALITIES - MASL : P118401***

Course is designed for Engineers and scientists involved in the test and evaluation of flight control systems. It provides an introduction to Airplane Flying Qualities. Course description is as follows:

- Week One: Aerodynamics Summary, Longitudinal Statics, Non-Maneuvering Flight Characteristics, Maneuvering Flight Characteristics, Flight Controls, Lateral Directional Statics, Simulation Exercises 1 Static longitudinal, non-maneuvering and maneuvering & Static lateral-directional. Longitudinal Dynamics, Longitudinal Dynamic Modes, Lateral-Directional Dynamic Modes.
- Week Two: Lateral-directional Handling Qualities / Testing. Pilot Handling Qualities Evaluation Process, Military Specifications & Standards. This course includes one demonstration flight.

Please contact the USNTPS Short Course Staff at 301-757-5044 or 301-757-5020 or the USNTPS website at [WWW.usntps.navy.mil](http://WWW.usntps.navy.mil). for further information.

### ***AM A1 CORE - MASL : P141618***

This course provides Navy and Marine Corps personnel with the basic knowledge and skills in the field of Aviation Structural Mechanics (Hydraulics and Structures). This knowledge will enable them to perform as maintenance technicians at aviation activities, both afloat and shore, under all operating conditions with appropriate supervision. Indoctrination and introduction, technical publication, source documents, corrosion control procedures, repair and inspection of simulated structural assemblies, repair procedures for nonmetallic materials and basic hydraulics fundamentals.

### ***AM GENERAL SOUTH BEND IN - MASL : B178071***

This MASL is used when Contractor Training for AM GENERAL SOUTH BEND IN is programmed.

### ***AM O LEVEL STANDARD - MASL : P141619***

This course is designed to provide Navy and Marine Corps personnel with the basic knowledge and skills in the field of Aviation Structural Mechanic (Hydraulics and Structures). This knowledge will enable them to perform as maintenance technicians at aviation organizational activities, both afloat and shore, under all operating conditions with appropriate supervision.

This course covers indoctrination and introduction, technical publications, source documents, corrosion control procedures, line maintenance and basic hydraulic fundamentals.

### ***AMEDD OFFICER ADVANCED - MASL : B171207***

This course is designed to enhance an officer's military frame of reference and to provide training in military medical service support operations with an overall working knowledge regarding the duties and responsibilities of AMEDD officers during periods of peace and hostilities.

The intent is preparation for command and staff positions of greater responsibility.

### ***AMMUNITION DEMILITARIZATION - MASL : B142935***

This course provides training for ammunition personnel in the various methods, procedures and techniques of performing ammunition demilitarization. Emphasis is placed on procedures required for open burning and detonation.

Students are introduced to the emerging technologies for resource recovery and recycling. This course includes a live explosives exercise in which each student will conduct set up and detonation using both electric and non-electric methods on the demolition range.

Training is also provided on the changing impact of environmental requirements and decontamination methods.

### ***AMMUNITION SPECIALIST - MASL : B152288***

In this course students will learn to perform ammunition issue, receipt, storage, handling, re-warehousing, transportation, and inventory operations. Operations include: operation and maintenance of rough terrain forklift, and clean burning diesel; operation and maintenance of the palletized load system; ammunition safe handling procedures; care and preservation of ammunition; the operation and maintenance of manual and automated stock control and accounting records; the processing of manual and automated transaction and the creation and transmission of reports to higher headquarters; the establishment and maintenance of SAAS-Modernization/SAAS-ASP to SAAS-MMC communication links; the operation and maintenance of the associated Automated Data Processing Equipment (ADPE), bar-coding equipment, perform individual Warrior Tasks and Collective Warrior Battle Drills and an FTX.

### ***AMMUNITION SPECIALIST BNCOC - MASL : B152297***

This course provides training in ammunition compatibility and quantity distance standards, munitions storage, re-warehousing, segregation operations, and safe handling procedures needed to effectively manage munitions operations; provide skills and knowledge of the procedures necessary to conduct inspection of munitions, small missiles, and use/maintain munitions gages, Standard Army Ammunition System (SAAS-ASP, SAAS-DAO procedures, SAAS-MMC procedures), FBCB2 and an FTX.

### ***AMMUNITION STORAGE - MASL : B142938***

This course provides basic information and training in the use and application of governing regulations and procedures for safety and security of ammunition and explosives in storage. The training includes principles in ammunition storage, Explosive Safety Standards (ESS), types of storage facilities and safety requirements for ammunition storage operations. Also included is the study of the appropriate regulations, publications and ammunition storage drawings.

### ***AMMUNITION TECHNICIAN WO BASIC - MASL : B152292***

This course provides basic information and training in the use and application of Conventional ammunition, storage operations, Standard Army Ammunition System (SAAS) level one, three, four, and Division Ammunition Office (DAO) operations, Logistics Applications of Automated Marking and Reading Symbols (LOGMARS), and Training Ammunition Management System (TAMIS).

### ***AMPHIBIOUS AIR TRAFFIC CONTROL CENTER OPERATIONS - MASL : P133027***

This course provides selected Air Traffic Control personnel with the basic knowledge and skills necessary to perform amphibious air traffic control operations readiness, watch station, and system operation functions during amphibious air operation evolutions. The course covers the organization, directives, rules, procedures, phraseology and equipment related to an Amphibious Air Traffic Control Center (AATCC) and amphibious air operations. Topics include: Overview of Amphibious Operations; Amphibious Task Force Organization and Command Relationships; an overview of Tactical Air Control Squadron (TACRON) Operations and how they relate to operations in an AATCC; Ship Organization including pre-deployment requirements; Overview of Amphibious Air Operations including OC division responsibilities to include equipment and pre-launch brief, publications, charts, and messages used during amphibious air operations including publication and use of the Daily Air Plan; Charts used in an AATCC and airspace concerns; Watch station duties and responsibilities.

### ***AMPHIBIOUS AIRSPACE OPERATIONS COORDINATION - MASL : P124054***

This course provides officers and staff noncommissioned officers/senior petty officers (E-5 to O-5) training in the organization employment considerations and functioning of airspace control systems used in expeditionary/amphibious operations. Emphasis is placed on the systems established to support the Expeditionary Strike Group (ESG) and Marine Air Ground Task Forces (MAGTFs).

This course provides instruction in the concepts for joint force use of airspace, organization of airspace control agencies of the separate DOD services, command and control responsibilities of JFACC/ACA/AADC, typical procedural control measures used during amphibious operations and an introduction to amphibious airspace planning.

The primary student population is personnel assigned to billets in the Navy Tactical Air Control System (NTACS-TACC, HDC) and Marine Air Command and Control System (MACCS) organizations and personnel who conduct fire support coordination or airspace management functions within expeditionary/amphibious forces.

### ***AMPHIBIOUS INTERNATIONAL SENIOR OFFICER PLANNING - MASL : P171007***

This course provides senior international officers with an understanding of joint Navy/Marine Expeditionary Warfare Force concepts and procedures required for planning an expeditionary warfare operation. The course includes introductory instruction in both naval and landing force expeditionary warfare organizations, doctrine, equipment, communications, employment of supporting arms and logistical support of an expeditionary warfare operation.

Follow-on instruction is then provided in joint naval/landing force expeditionary warfare planning concepts and procedures, and culminates with students developing an expeditionary plan in support of a major expeditionary warfare operation. Students also research, write and present a paper on a major amphibious operation. Prerequisites: Officers in the rank of Commander (O5) through Rear Admiral (O8), or equivalent, in the naval forces (selective waivers may be granted to limited numbers of Lieutenant Commanders/equivalent officers, and Lieutenant Colonel through Major General in the ground and air forces of those countries on the invitation list.)

### ***AMPHIBIOUS WARFARE INDOCTRINATION - MASL : P124503***

To provide a comprehensive indoctrination in amphibious operations, to include planning, ship-to-shore movement, supporting arms, tactical air, and landing force organization and functions in order to prepare officers and selected U.S. Armed Forces enlisted personnel E-5 through E-9 to carry out shipboard and staff assignments adequately and with comprehension of purpose.

This course is a comprehensive indoctrination in Amphibious Warfare. It is designed to prepare Officers and Senior Enlisted personnel (E-5 to E-9) who have been recently assigned, or are pending assignment to amphibious ships or staffs. It is also suitable for officers of other United States Forces and allied nations. Type of instruction is classroom lecture with a comprehensive final written examination.

### ***AMPHIBIOUS WARFARE INDOCTRINATION - MASL : P124250***

AMPHIBIOUS WARFARE INDOCTRINATION To provide a comprehensive indoctrination in amphibious operations, techniques, planning, ship-to-shore movement, supporting arms, tactical air, and landing force organization and functions in order to prepare officers and selected U.S. and allied Armed Forces enlisted personnel E-5 through E-9 to carry out shipboard and staff assignments adequately and with comprehension of purpose.

This course is a prerequisite for p124265, "naval gunfire liaison OFF", K-2G-0040.

### ***AMPHIBIOUS - EOD - MASL : P193137***

The goal of this course is to train selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***AN/ARC-182 (V) COMMUNICATION EQUIPMENT - MASL : P141054***

Upon completion of this course, Avionics Electronics Technicians will have sufficient knowledge/skills, including safety, system analysis, and troubleshooting techniques, to perform under minimum supervision, intermediate maintenance on the AN/ARC-182 (V) communication Equipment in the Aircraft Intermediate Maintenance Department working environment.

The course content will include the following Units of Instruction:

- AN/ARC-182 (V) Communication Equipment
- AN/ARC-182 (V) Communication Equipment Testing and Troubleshooting.
- Graduate of AV (Class A1) School or equivalent.

Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.

### ***AN/ARN-118 TAC INT MAINT - MASL : P141573***

Upon completion of this course, Aviation Electronics Technicians will have acquired sufficient skills and knowledge of the AN/ARN-118(V) TACAN System theory of operation, characteristics and troubleshooting procedures to perform, with close supervision, intermediate level maintenance on this system in the AMID/MALS working environment. Scope:

This course content includes the following Units of Instruction:

- Introduction to the AN/ARN-118(V) TACAN System
- Detailed Operation of the AN/ARN-118(V) TACAN System
- Troubleshooting and Adjustment of the AN/ARN-118 (V) TACAN System.

Graduate of AVA (Class A1) or equivalent

### ***AN/SLQ-32A(V)2 MAINTENANCE - MASL : P139069***

The goal of this course is to provide foreign national students with the knowledge and skills required to perform preventive and corrective maintenance, with supervision, on AN/SLQ-32A(V)2 Electronic Warfare System.

This course consists of classroom lectures and laboratory exercises in system operation, determination of degradation and remaining system capabilities when malfunctions occur, the use and interpretation of system diagnostic tests, operation of special purpose test equipment and tools, theory of system operation to the block diagram level and performance of preventive and corrective maintenance actions.

### ***AN/SPS-48E OP & MT - MASL : P137147***

The goal of this course is to provide FC (A) School graduates or other Electronic Type (A) School graduates with equivalent digital fundamentals, with the necessary training to effectively perform AN/SPS-48E radar system corrective maintenance. Performance of these actions may require the assistance of personnel trained and experienced in the maintenance of the radar. Training encompasses maintenance on any installed system, ashore or afloat, under non-emergency conditions.

Covers the basic operation, testing and maintenance of the AN/SPS-48E radar system, including proper utilization of controls, indicators, and test equipment; casualty analysis; fault isolation; component replacement; alignment and adjustment procedures for RF, IF, amplifier circuits, transmitter, receiver and associated AN/SYS-2(V) and AN/USQ 93 equipment.

### ***AN/SPS-49A 5,7,8 & MT TECH - MASL : P137162***

This course is designed to provide selected Electronic Technicians (ET) and other equivalent personnel with the training required to maintain the AN/SPS-49(V)5,7, 8 and A(V)1 Radar Sets under all shipboard readiness conditions, using the Built-In Test Equipment (BITE) and other associated test equipment, with no supervision. Students will be provided sufficient knowledge and skills required to perform the associated alignments, test, corrective and preventive maintenance. Performance tests,

troubleshooting, corrective and preventive maintenance will be limited to the modular repair concept. The maintenance and checkout will include the ability to recognize, analyze, locate and correct malfunctions occurring in the AN/SPS-49(V)5,7,8 and A(V)1 Systems following the procedures defined in the current equipment technical manuals.

Graduate of Electronic Technician Class (A) School or other maintenance personnel with equivalent qualifications.

***AN/SPS-55 RADAR SET MT - MASL : P137044***

The goal of this course is to provide maintenance and repair training for the AN/SPS-55 Radar Set.

Provide selected students with the knowledge and skill training necessary to operate and maintain the AN/SPS-55 Radar Set without supervision. Students will be provided sufficient knowledge and skills required to perform the associated alignments, test, corrective and preventive maintenance. Performance tests, troubleshooting, corrective and preventive maintenance will be limited to the modular repair concept.

Graduate of Electronic Technician Class A School or other maintenance personnel with equivalent qualifications.

***AN/SPY-1D RADAR SYSTEMS OPERATION AND MAINTENANCE (KS) - MASL : P179363***

Through classroom presentation with simulations and tactical equipment use where appropriate this course provides the student a detailed knowledge of the functional theory, operation, and maintenance of the AN/SPY-1D (V) Radar. The course covers a detailed description of the Advanced Signal Processor (ASP), Transmitter, Antenna, and associated Auxiliary equipment. Emphasis is placed on Fault Detection/Fault Isolation (FD/FI) procedures, utilizing the Integrated Sub-Element Testing System (ISETS)/Radar Interactive Built-In Testing (RIBIT) and ORTS, Discussions of radar system-level functions, interfaces, radar console operation, and computer program functional analysis are also provided.

***AN/SPY-1D(V) OPERATION AND MAINTENANCE (KS) - MASL : P179520***

To provide the knowledge and skill required to perform the operation and direct organizational level maintenance on the AN/SPY-1D RADAR System, to provide supervision and guidance for element technicians and to communicate weapon system status.

This course covers the organizational level operation and preventive and corrective maintenance of the AN/SPY-1D (V) RADAR System signal flow; the use of special tools and test equipment; alignment procedures; operational tests, recognition and interpretations of system malfunctions; and operation of system consoles in support of the ship's combat system in a tactical environment and during test and evaluation.

Classroom lessons and hands-on training provided on available and applicable equipment to the AWS. Simulations used as appropriate with differences explained. Actual equipment used will include Computers, Signal processor, DTS, Q-70 equipment and transmitter.

***AN/SWG-1A(Deact-SeeTCC) - MASL : P134280***

This course provides designated maintenance personnel with an understanding of principals of operation, knowledge and skills necessary to perform shipboard maintenance of the HARPOON Weapon System, AN/SWG-1A, Surface Application.

Training includes practical application in identification of the interrelationship and function of system components, casualty analysis, and troubleshooting. The course also covers performance of tests and adjustments in accordance with procedures and standards contained in applicable publications and maintenance requirement cards.

***ANG ADV ALFT TACTICS 22FH - MASL : D116128***

In this course the Air National Guard provides advanced tactics training for MR C-130 crews in combat/hostile environment mission planning and flying. Training includes low-level navigation training, threat analyses, heavy equipment and CDS airdrops, assault landings, aircraft maneuvering, and low altitude awareness training. Flying hours: 22.

***ANG INT'L BASIC COURSE (BVR) - MASL : D111121***

In this course the Air National Guard will produce qualified F-16C pilots with basic proficiency in Air to Air and Air to Surface mission tasks.

### ***ANG INTL BASIC COURSE BVR/BA - MASL : D111128***

In this course the Air National Guard will produce qualified F-16C pilots with basic proficiency in Air to Air and Air to Surface mission tasks.

### ***ANG INTL BASIC COURSE -ADVANCED (POLAND)( F-16C/D) - MASL : D111154***

In this course the Air National Guard will produce qualified F-16C pilots with basic proficiency in air-to-air and air-to-surface mission tasks.

Upon graduation students will be qualified in the F-16 to include transition, emergency, and instrument tasks. Students will be proficient in:

- Air refueling
- All Aspect Missile Defense (AAMD) and intercept
- engagement, or defense against one adversary when flying single ship, or two adversaries when flying as a wingman
- Low and medium altitude day VFR attacks on preplanned targets and delivery of ordnance using visual deliveries
- Medium altitude Paveway II deliveries
- Buddy-Lase Procedures

Graduates will have limited proficiency in night air refueling, Air Combat Tactics (ACT), night intercepts, Close Air Support (CAS), basic night operations, and night radar trail formation procedures. They will be familiar with medium-altitude Paveway III deliveries, and Inertially Aided Munitions (IAM's), mission planning and deliveries. Upon completion graduates will be qualified LOWAT Category I (500 feet AGL).

To attend students must be:

- A graduate of an approved military pilot training course. 162 FW/CC is the approval authority for non-USAF undergraduate pilot training.
- Graduate of USAF Courses: T-38C Qualification Track 1 Poland (F-V5A-Q Track 1) and Introduction to Fighter Fundamentals T-38 (B/F-V5A-K)
- English Comprehension Level (ECL) of 85. Oral Proficiency Interview (OPI) score of 2/2. Specialized English Terminology (SET) training required.
- Physiological training is complete and valid through the end of the course.
- F-16 profile centrifuge training completed before the class starting date. Completed Basic and water survival (desired, not required).
- Appropriate security clearance.
- USAF validated flight physical examination.

Pilots not meeting entry requirements will require a waiver to enter this course. NGB/A3 is the waiver authority.

### ***ANG INTL TRNST COURSE (BVR) - MASL : D111098***

In this course the Air National Guard will produce qualified F-16C pilots with basic proficiency in Air-to-Air and Air-to-Surface mission tasks.

### ***ANG QUALIFICATION COURSE - MASL : D111122***

In this course the Air National Guard will produce qualified F-16C pilots with basic proficiency in Air-to-Air (except DACT) and Air-to-Surface mission tasks.

### ***ANIMAL CARE SPECIALIST - MASL : B175253***

The goals of this course are to provide training for enlisted veterinary personnel to assist in the care, management and treatment of animals in veterinary service teams, veterinary treatment facilities, and/or research facilities. Subjects include administration,

basic sciences and diagnostic laboratory procedures, anatomy, physiology, radiology, pharmacology, veterinary pathology and disease, laboratory animals, anesthesiology, surgical procedures, and the handling, care and management of animals.

Participation in a minimum of 72-120 hour, scenario-driven, tactical Situational Training Exercise to demonstrate MOS and Common Task reinforcement and evaluation.

### ***AOC IQT AIR SPACE COURSE - MASL : D121102***

This course trains personnel assigned to a Falconer AOC weapon system (AN/VSQ-163) or augmenting manpower forces unit how to perform airspace manager duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on joint and Service doctrine; JAOC organization and processes; basic airspace control doctrine, procedures, planning and coordination; and Theater Battle Management Core Systems (TBMCS) applications and other associated AOC command and control (C2) systems tools. Training consists of academic lectures, seminars, computer application labs, practical exercises, performance evaluations and a comprehensive end-of-course exercise simulating a JAOC environment.

### ***AOC IQT DEFENSIVE COURSE - MASL : D121098***

This course trains personnel, O5 and below, assigned to an AN/USQ-163 AOC weapon system or augmenting manpower forces unit how to perform defensive combat plans/operations duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on joint and Service doctrine; JAOC organization and processes; air tasking order air defense planning, coordination and execution; and Theater Battle Management Core Systems (TBMCS) applications and other associated AOC command and control (C2) systems tools. Training consists of academic lectures, seminars, computer application labs, practical exercises performance evaluations and a comprehensive end-of-course exercise simulating a JAOC environment.

### ***AOC IQT ISR OFFICER COURSE - MASL : D121099***

This course trains personnel, O5 and below, assigned to an AN/USQ-163 AOC weapon system or augmenting manpower forces unit how to perform ISR duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on joint and Service doctrine; JAOC organization and processes; predictive battle space awareness; ISR division integration, coordination and execution; and Theater Battle Management Core Systems (TBMCS) ISR applications and other associated AOC command and control (C2) systems tools. Training consists of academic lectures, seminars, computer application labs, practical exercises performance evaluations and a comprehensive end-of-course exercise simulating a JAOC environment.

### ***AOC IQT, INTERFACE CONTROL OFFICER - MASL : D121110***

This course trains personnel, O5 and below, assigned to an AN/USQ-163 AOC weapon system or manpower forces unit how to perform Interface Control Officer (ICO) duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on fundamental JAOC organization, air tasking order processes and Theater Battle Management Core Systems (TBMCS) and other associated AOC command and control (C2) systems. Personnel receive specific education and training on multi-service Tactical Data Link (TDL) systems and capabilities, and how to design joint multi-TDL architecture. Students will then design a limited Operational Tasking Data Links (OPTASKLINK). Training consists of academic lectures, computer application labs, practical exercises performance evaluations and a comprehensive end-of-course exercise simulating a JAOC environment.

### ***AOC IQT, INTERFACE CONTROL TECH - MASL : D121111***

This course trains personnel assigned to an AN/USQ-163 AOC weapon system or manpower forces unit how to perform ICT duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on fundamental JAOC organization, air tasking order processes and Theater Battle Management Core Systems (TBMCS) and other associated AOC command and control (C2) systems. Personnel receive specific education and training on JAOC interface control organization, duties and responsibilities; and Tactical Data Link (TDL) theory, equipment and processes for planning joint multi-TDL architecture, and building a Operational Tasking Data Links (OPTASKLINK). Training consists of academic lectures, computer application labs, practical exercises and a comprehensive end-of-course exercise simulating a JAOC environment.

### ***AOC IQT, ISR TECH COURSE - MASL : D121105***

This course trains personnel assigned to an AN/USQ-163 AOC weapon system or manpower forces unit how to perform ISR technician duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on fundamental JAOC organization, air tasking order processes and Theater Battle Management Core Systems (TBMCS) and other associated AOC command and control (C2) systems. Personnel receive specific training on Unix and PC-based TBMCS ISR applications and

other AOC ISR C2 tools. Training consists of academic lectures, computer application labs, practical exercises and a comprehensive end-of-course exercise simulating a JAOC environment.

### ***AOC IQT, STRATEGIC OPERATIONS COURSE - MASL : D121107***

This course trains personnel, O5 and below, assigned to an AN/USQ-163 AOC weapon system or augmenting manpower forces unit how to perform Strategy Division duties in a Joint Air Operations Center (JAOC). Personnel receive education and training on how to plan, coordinate and assess air operations at the operational level of war. Personnel learn strategy development; air battle planning; operational assessment; and related software applications. Training consists of academics, practical exercises, performance evaluations, seminars, and computer labs.

### ***AOC-FAM - UAE SPECIFIC - MASL : D302046***

This course training teams are composed of DOD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a countries capability. It should be requested only after full consideration has been given to in-country capability and other DOD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***AOC-FAM COURSE DESIGN - MASL : D302047***

In this course training teams are composed of DOD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a countries capability. It should be requested only after full consideration has been given to in-country capability and other DOD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***APN194V RADAR ALTIMETER INTERMEDIATE MAINTENANCE - MASL : P141576***

Upon completion of this course, Aviation Electronics Technicians will have sufficient knowledge/skills, including operational testing, troubleshooting, and repair procedures, to perform, under supervision, intermediate maintenance on the AN/APN-194(V) Electronic Altimeter Set, in the Intermediate Maintenance Level working environment.

AT Course (Avionics Technicians Course)

### ***APPLIED MAINTENANCE MGT CONCEPTS - MASL : D178119***

This course provides maintenance managers and supervisors with an array of executive skills which can be applied to the management functions that support operational units. The course exposes practitioners to the latest policies and initiatives, and challenges them to apply both theory and techniques to current management problem scenarios which confront base-level maintenance managers. Application of current concepts in management science is emphasized through seminars, informal lectures, guided discussions, case studies, exercises, and group projects. Current topics examine production excellence, group decision-making dynamics, theory of constraints, capacity requirements planning, general scheduling theory, the logistics environment, and repair cycle processes. The applications of statistical concepts, statistical process control, and reliability and maintainability measures are illustrated through practical exercises.

### ***APX-72/APX-100 IFF TRANSPONDER INTERMEDIATE MAINTENANCE - MASL : P141150***

Upon completion of this course, the Aviation Electronics Technician will have acquired sufficient skills and knowledge of the AN/APX-72 and AN/APX-100(V) IFF Transponder System theory of operation, operating characteristics, and troubleshooting procedures to perform, with close supervision, intermediate level maintenance on these systems, in the AIMD/MALS environment.

The course content will include the following Units of Instruction:

- Introduction to the Identification Friend of Foe (IFF) System
- AN/APX-72 Transponder System Operation

- AN/APX-72 Intermediate Maintenance Procedures
- AN/APX-100 (V) Transponder System Analysis
- AN/APX-100 (V) Intermediate Maintenance Procedures
- Graduate of AV (Class A1) school.

Security clearance may vary by location based upon area/building in which taught.

### ***AIRCRAFT STRUCTURE MAINTENANCE APPR - MASL : D141339***

This course provides training in career field structure, shop mathematics, maintenance management, maintenance and inspection, use of drawings, technical orders, and Air Force Publications; metal characteristics, equipment construction features, corrosion control program, hand tools, shop and flight line safety, paint removal from metal, metal identification, characteristics of composites, corrosion principles, corrosion inspection, mechanical and chemical corrosion removal and chemical surface treatment, composition of coatings, care and use of coating equipment, mechanical paint removal from advanced composites, fiberglass surface preparation, Aerospace equipment marking, and application of coating systems and markings.

Students will gain skills in:

- Repair replacement and modification of aluminum aircraft and missile airframe structures, corrosion resistant steel, titanium, and fiberglass
- Development of layouts for repairs and fabrications; identification and selection of fasteners and nonmetallic repair materials; replacement and modification of parts; fabrication of cable assemblies and tubing assemblies
- Operation of dimpling equipment, squaring shears, sheet metal brakes and rollers, grinders, drill presses, contour cutting saws, stretching and shrinking machine, turret punches, micro shaver, arbor presses, sanders, lever shears, pneumatic drills, rivet guns, pull guns, tube cutting and flaring equipment, routers, and vacuum pumps

### ***ARMAMENT SYSTEMS MAINTENANCE (WOBC) - MASL : B142303***

In this course the Armament Repair Technician will be instructed in warrant officer professional development subjects, common technical subjects, ordnance common subjects, and technical subjects to include small arms, towed artillery, turret and self-propelled artillery, and fire control systems.

### ***ARMOR BASIC OFFICER LEADER - MASL : B121230***

This course covers risk Management; 9mm Pistol Qualification; history of cavalry and armor, safety in training; M42A1 protective mask; combat stress; risk management; mounted land navigation and plunger training; tank familiarization, and the Army writing program.

Armor Crewman Skills: Preventive maintenance checks and services and pre-gunners skills on the M1A1 tank (turret - armament, controls and equipment; tank machine guns; prepare to fire checks; bore sighting, and conduct of fire trainer (COFT)); Tank Crew Gunnery Skills Test (TCGST); property accountability; platoon maintenance operations; maintenance management; tank specific nuclear, biological, and chemical defense, and SINCGARS.

Tank Gunnery: COFT sustainment and simulated Tank Tale VII; tank weapons gunnery simulation system (TWGSS) and fire control maintenance precede the tank crew proficiency course (TCPC) and live fire exercise where the officer conducts selected engagements from tank tables VI, VII, and VIII (FM 17-12-1) from the gunner and tank commander position; tank range operations; stability and support operations (SASO); media relations; unit cohesion; FBCB2 awareness training, and adjust indirect fire.

Tank Platoon Offensive Operations: Command and control; intelligence preparation of the battlefield (IPB); threat organizations and defensive tactics; fundamentals of platoon offensive operations; the relationship of troop leading procedures at the platoon level and the production of a platoon offensive operations order; movement techniques and formations; assembly area operations; tactical road marches; quartering party activities; battle drills; actions on contact; platoon tactical tasks; direct fire planning and platoon fire distribution and control; breaching operations; combat support (engineers and field artillery); Combat Service Support assets which support offensive operations; Close Combat Tactical Trainer (CCTT) used to reinforce planning, preparation, and execution phase.

Tank Platoon Defensive Operations: threat offensive tactics and fundamentals of platoon defensive operations; the relationship of troop leading procedures at the platoon level and the production of a platoon defensive operations order; engagement area development; occupation of battle positions; platoon defensive missions; combat support and combat service support capabilities in the defensive, and use of the CCTT to reinforce the planning, preparation, and execution phase.

Company/Team Operations: fundamentals of company/team operations; BOS capabilities; company/team tactical operations; combat service support; fratricide and battle command identification system (BCIS); CCTT used to reinforce planning, preparation, and execution of four days of company/team tactical operations conducted in a shared mode with students attending the Armor Captains Career course (AC3). AC3 students function as company commander and executive officer. Tactics instruction concludes with an Armor Terrain board and written tactics exam, and MOUT with Armor.

Field Training Exercise: force-on-force, free-play, offensive and defensive exercise with Opposing Forces; evaluates the officers ability to conduct Troop leading procedures (plan, prepare, and execute) while leading a tank platoon in a company level exercise. Pre- and Post-deployment operations are conducted to reinforce the use of operational security, pre-combat inspections, troop leading procedures, unit maintenance, and environmental laws and regulations. Students conduct four days of shared training with officers attending the AC3 and 19K ANCOC. The captain's functions as company commander/executive officer while ANCOC students gain experience as tank platoon sergeants.

### ***ARMY ACQUISITION QUALIFICATION - MASL : B151808***

This graduate-level course is designed to provide a broad spectrum of knowledge pertaining to the materiel acquisition process. It covers legal and regulatory policies and objectives that shape the acquisition process and the implementation of these policies and objectives by the U.S. Army. Areas of coverage include: program management, contracting, acquisition logistics, information technology, test and evaluation, and requirements generation. Purpose: To train officers and civilians in the Army Acquisition Workforce. Successful completion of this course will prepare officers and civilians for entry-level positions in the Army Acquisition Workforce (AAW). Further, this course emphasizes Army-unique system acquisition procedures and organizations throughout its curriculum.

### ***ARMY MAINTENANCE MANAGEMENT - MASL : B151778***

This course provides detailed instruction, covering maintenance policies and programs from the development of the Item's Management Concept to the demilitarization requirement necessary to remove the item from the logistics system.

This course utilizes the Life Cycle Management Model service as a frame of reference.

### ***ARMY RECRUITER - MASL : B162000***

The curriculum is divided into seven segments; Analysis, Mission Planning, Prospecting, Sales, Accession/Ship, Technology and ARC Support. These are the training modules assigned to this course. The largest segment is devoted to the study of sales techniques and communication skills designed to equip the Army Recruiter with the skills, knowledge and techniques necessary to enlist qualified men and women into the US Army. The course uses conceptual, analytical, and procedural applications in all aspects of training.

### ***ARMY WAR COLLEGE FELLOW - MASL : B171800***

In this course students study the role of land power, as part of a unified, joint or combined force, in support of the U.S. national military strategy.

This course prepares selected military officers and civilians for leadership responsibilities in a strategic security environment during wartime and peacetime. Curriculum focuses on national security and strategy issues, concepts and processes; military strategy, plans and operations; theater level warfare and campaign planning; and command, leadership and management.

### ***ARNG PRE-RANGER COURSE - MASL : B121179***

The purpose of the Pre-Ranger Course (PRC) is to prepare soldiers to assess, prepare and train soldiers to succeed at the U.S. Army ranger school. Soldiers must graduate the ARNG PRC immediately prior to attending the ranger school. PRC accomplishes this by:

Assessing the soldier's physical and mental capabilities during a six day evaluation phase. This mirrors the assessment phase at ranger school.

Training the soldiers on troop leading procedures, combat orders and reconnaissance/combat patrols to the same standards conducted at the school in order to better prepare them for the challenges they will be undergoing.

Verify that medical, dental, and administrative paperwork is complete for ranger school attendance.

Conducting physical fitness training daily. Minimum standards are 49 correct pushups, 59 sit-ups, six chin-ups (palms facing in), two - mile run in less than 15:12 minutes, and the five - mile run in 40 minutes or less.

Soldiers may be released from PRC for the following reasons:

- Reporting without current dental records, health records (including a current medical examination with lab slips), and battalion commanders proficiency statement.
- Failure to pass the initial APFT or CWST.
- Lack of motivation.
- Medical release.
- Failure to pass 50% of patrols or leadership positions.
- Failure of any assessment phase critical task.
- Special observation report.

### ***ASP I-HAWK UNIT TRAINING - MASL : B199940***

This MASL is used when requesting ASP I-HAWK UNIT TRAINING

### ***ASP PATRIOT UNIT TRAINING - MASL : B199945***

This MASL is used when ASP PATRIOT unit training is programmed.

### ***ASSAULT AMPHIBIAN CREWMAN - MASL : P144002***

The course focuses on preventive maintenance checks and services, operation of the vehicle system and controls to include land and water driving and usage of the technical manual. A basic understanding of mechanized tactics and maneuvering are introduced with practical application in multiple field exercises.

The course is divided and delivered in five phases. They are:

- Data and Description
- Communication
- Operating systems and controls
- Tactical land and water
- Weapons

### ***ASSAULT AMPHIBIAN VEHICLE OFFICER - MASL : P144802***

The course focuses on an introduction to Assault Amphibian training on employment of the AAV platoon in support of a Marine Expeditionary Unit during amphibious operations to include tactical planning and conduct of the ship-to-shore movement and operations ashore, unit communications, weapons employment, first echelon maintenance and vehicle logistical support of deployed units, maintenance management and threat tactics.

### ***ASSAULT AMPHIBIAN REPAIRMAN BAS - MASL : P144803***

This course is designed to present entry level instruction in maintenance skills required to repair Assault Amphibian Vehicles at the organizational level. Emphasis is on vehicle operation, maintenance for electrical, hydraulic, fuel and suspension systems, power plant and weapon station maintenance, vehicle inspections and use of the AAVR7A1.

### ***ASTRONAUTICAL ENGRG (GRAD) - MASL : D178166***

The Graduate Astronautical Engineering program is designed to provide astronautical engineering specialists for the Air Force. This program provides the student with a broad education in the scientific and engineering disciplines associated with

Astronautical engineering. It is expected that our graduates will be prepared to Make direct contributions to the area of astronautical engineering Evaluate, monitor, and administer astronautical research and development projects Synthesize their professional expertise with the needs of the Air Force to produce new systems in the space arena.

### ***ASW EVALUATION - MASL : P129340***

The purpose of this course is to train junior surface warfare officers assigned to Anti-Submarine Warfare (ASW) platforms to function as ASW evaluators during all phases of the ASW problem. Training will include underwater acoustics, ASW weapons and sensors, Russian and world threat, active sonar detection and localization techniques, Passive target motion analysis, sonobuoy plotting, ASW aircraft capabilities and limitations, internal and external ASW communications, SAU procedures, and new developments in ASW. Various scenarios using trainers to simulate shipboard environments reinforce classroom instruction. Scope: This course covers a broad introduction to the skills involved in the function of ASW evaluator, including an overview of the weapons and sensor suites available on each type of ASW capable ship. Classroom and trainer periods emphasize tactics which apply to evaluators on any ASW capable unit.

Officers should have orders to an ASW capable ship. Course is also open to enlisted members serving in the Sonar Technician or Operation Specialist rating E-7 and above.

Working uniform or equivalent

Some information taught in the course is classified Secret NOFORN and will not be available for international students attending the course.

### ***AUTO ORGANIZATIONAL MAINTENANCE - MASL : P143803***

The purpose of this course is to provide lectures and practical application exercises for entry level students, allowing them to perform 2nd and 3rd echelon maintenance tasks of inspection, service and repair of tactical wheeled vehicles, including shop procedures, introduction to tools and test equipment, fuel and electrical systems, troubleshooting and diagnosis, component replacement, power trains, chassis, brakes, steering and suspension systems, diesel engines, motor vehicle operation, preventive maintenance checks and services, and tactical vehicle air conditioning.

This course is designed to impart the technical knowledge and develop the functional skills that will enable the graduate, with normal supervision, to effectively perform the inspections, diagnostic tests, adjustments, services, and repairs to tactical motor transport equipment that are required to be accomplished at the second and third echelon maintenance levels. The program of instruction is designed to be fully MOS qualifying; therefore, Marines who successfully complete the course are assigned a 3521 MOS.

This course provides training on Marines Corps maintenance and management systems, technical publications, maintenance related forms and records, tools, automotive test equipment, principles of automotive mechanics, specific vehicle maintenance responsibilities related to engines, engine accessory systems, transmission systems, brake systems, suspension systems, steering systems, removal and installation of major automotive assemblies and scheduled preventive maintenance checks and services, and tactical vehicle air conditioning maintenance. The course also includes driver training. Students who successfully complete this training will be issued a shop use only license to operate the 2-1/4-ton (M1123) HMMWV and the 7-ton (MK23) MTRV vehicles.

Male or female, approximately 18 to 21 years of age. No physical handicaps; Normal motor skills.

Normal color vision and depth perception. High school graduate. Possesses automotive technology interests.

Private - sergeant; MOS 3500; score of 95 or higher in aptitude area MM; must possess the physiological qualifications and driving record required for licensing as a government motor vehicle operator (USMC TM 11240-15/3); minimum of 18 months obligated service remaining upon completion of the course.

Students report to Commanding Officer, Marine Corps Combat Service Support Schools, Training Command, PCS Box 20041, Camp Lejeune, (Camp Johnson), North Carolina 28542-0041. During working hours report to the Personnel Officer at Bldg. M130, phone DSN 750-0779 or coml. (910) 450-1135; after working hours report to the AOOD at Bldg. M131, phone DSN 750-0779 or coml. (910) 450-0779. Government messing and billeting are available. POV S are not authorized for entry level students.

### ***AUTOMATED LOGISTICS SPECIALIST - MASL : B152463***

In this course students will gain familiarity with Fed Log CD-ROM; Prescribed Load Lists (PLL), The Army Maintenance Management System (TAMMS); Unit Logistics System-Ground (ULLS-G); Standard Army Retail Supply system-Objective (SARSS-O); basic warehousing functions; Material Release Order Control System (MROCS); care and preservation of supplies and equipment; and subsistence supply in support of the Army field feeding system.

### ***AUTOMOTIVE ELECTRICAL SYSTEMS REPAIRER - MASL : B143325***

This course provides Skill level 1 and 2, DS/GS maintenance training emphasizing maintenance publications, tools, TMDE, maintenance safety and discipline, troubleshooting, and repair of automotive electrical components.

### ***AV8B A/C ELECT SYS TECH IO - MASL : P141520***

Upon completion of this course, the Aviation Electrician will have sufficient knowledge and the skills necessary to operate and maintain the Electrical, Lighting, Environmental, Fuel, Power Plant, Hydraulic, Landing Gear, Flight Controls, Stability Augmentation, Inertial Navigation, ADC, Pitot Static, and Instrument Systems, under close supervision, in the squadron organizational maintenance department.

This course covers Introduction, Aircraft Indoctrination & Safety; Electrical, Lighting & Environmental Control Systems; Pitot Static, ADC, INS & Memory Inspect; Hydraulic, Landing Gear & Related, Flight Control Systems, & SAAHS; Fuel & Power Plant Systems.

Graduate of (A) School and Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.

### ***AV-8B AIRCRAFT ORDNANCE TECHNICIAN - MASL : P141521***

Upon completion of this course, the AV-8B Aviation Ordnance Technician will have sufficient knowledge and the skills necessary to operate and maintain the AV-8B Armament and Gun Systems, under close supervision, in the squadron organizational maintenance department.

The course content will include the following Units of Instruction:

- Introduction, Aircraft Indoctrination and Safety
- Armament Systems Operational and Maintenance Procedures
- Electronic Countermeasures and Gun Systems
- Graduate of AO (A) school or equivalent.

Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.

### ***AV-8B A/C SAFETY EQUIPMENT MECHANIC OMA - MASL : P141517***

Upon completion of this course, the Safety Equipment Mechanic will have sufficient knowledge and the skills necessary to operate and maintain the Safety Equipment and Environmental Control Systems, under close supervision, in the squadron organizational maintenance department.

This course covers:

- Introduction, Aircraft Indoctrination and Safety
- Cabin Cooling and Defog, and Cabin Pressurization Systems
- Forward Avionics Cooling, Canopy Seal/Anti-G and On-Board Oxygen Generating Systems
- Rear Equipment Cooling System and Scheduled Maintenance
- Waveguide Pressurization and Radar Liquid Cooling Systems
- Canopy and Ejection Seat Systems

Graduate of AM(E) School or equivalent. Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.

### ***AV-8B AIRCRAFT MECHANIC ORGANIZATIONAL MAINTENANCE - MASL : P141515***

Upon completion of this course, the Aircraft Mechanics will have sufficient knowledge of Fuel and Power Plants Systems of the AV-8B aircraft, including system analysis and troubleshooting, to perform, under close supervision, organizational maintenance in the squadron working environment.

The course content will include the following Units of Instruction:

- Introduction
- AV-8B Aircraft Fuel Systems
- AV-8B Engine and Related Systems
- AV-8B Aircraft and Engine Servicing, Maintenance, Inspections, and Plane Captain Duties

Graduate of AD (A) school.

### ***AV-8B AIRFRAMES INTEG O/M - MASL : P141599***

Upon completion of this course, AV-8B Aircraft Airframes Mechanics will have acquired sufficient knowledge of the Hydraulic Systems, Structures, Landing Gear and related systems, Flight Control Systems, and the skills necessary to perform, under close supervision, organizational maintenance in the squadron working environment.

The course content will include the following Units of Instruction:

- Introduction
- Airframes Systems
- Hydraulic Systems
- Flight Control Systems
- Aircraft Practical
- Landing Gear Systems

Graduate of AM(A) school.

### ***AV-8B COM/NAV/IDEN/ECM W/S - MASL : P141519***

Upon completion of this course, Aviation Communication, Identification, Electronic Countermeasures, Weapons, Automatic Target Handoff, Radar Systems Specialists will have sufficient knowledge and skills necessary to operate and maintain the Aviation Communication, Navigation, Identification, Electronic Countermeasures, Weapons, Automatic Target Handoff and Radar Systems, under close supervision, in the squadron organizational maintenance department.

This course covers Introduction, Aircraft Indoctrination and Safety; Mission Computer System (MCS), Integrated Controls and Displays; Navigation and Identification Systems; Communication System; Electronic Countermeasures; Weapons Systems; Night Attack; and Automatic Target Handoff System (ATHS) and Radar System.

AT Course (Avionics Technicians Course)

### ***AV-8B CONVENTIONAL WEAPONS LOADING - MASL : P141585***

Upon completion of this course, Ordnance Technicians will have sufficient knowledge/skills to perform Weapon Systems Functional Release and Control Checks, Weapon Inspections, Loading/Downloading Procedures, Arming/De-arming Procedures, and Gun Jam Clearing Procedures, under close supervision, in the squadron working environment.

The course content includes the following Units of Instruction:

- Introduction to AV-8B Conventional Weapons Loading
- AV-8B 25MM Gun Loading/Downloading and Gun Jam Clearing

- AV-8B Peculiar Airborne Weapons Description and Airborne Weapons Support Equipment
- AV-8B Weapons Systems Release and Control Check (S)
- AV-8B Conventional Weapons Loading/Downloading

Graduate of AO(A) School or Equivalent

### ***AVENGER SYSTEM REPAIRER - MASL : B195170***

This course provides instruction in AC, DC, and resonance circuits; transistors, soldering, symbolic logic, and microprocessors; inspecting, testing, and adjusting components to specific tolerances; and in determining shortcomings and malfunctions in electronic, electrical, mechanical, hydraulic, and cryogenic assemblies, subassemblies, modules, and circuits elements using system associated test equipment. Repair, serviceability, disposition, and safety procedures are taught throughout the course.

### ***AVIATION MAINTENANCE MANAGER -EN - MASL : B141849***

The Aviation Maintenance Manager Course is designed to provide the skills and knowledge required to efficiently and economically manage AMC and ASC aviation maintenance management programs. The course contains in depth instruction on aviation maintenance and supply management; instruction on component shop operations, manning, capabilities, basics of electricity, ULLS-A SCP-6, managing the field level maintenance of PLL/SSL, and bench stock repair parts.

This includes: forecasting repair parts and manpower requirements for unit OPTEMPO; the management and disposition of aircraft operational and historical forms and records; completion of Aviation readiness reports, Periodic and Phase Maintenance Programs at the AMC and ASC; Battle Damage Assessment and Repair (BDAR); aircraft systems inspection, troubleshooting and repair procedures; and various Standard Army Maintenance Information Systems (STAMIS) to include Unit Level Logistics System Aviation SCP-6 (ULLS-A SCP-6), Standard Army Maintenance Systems Enterprise (SAMS-E), and Standard Army Retail Supply System (SARSS).

### ***AVIATION ORDNANCE SYSTEMS TECHNICIAN CORE COURSE - MASL : P142050***

Upon completion of this course, Aviation Ordnance Systems Technicians will have sufficient knowledge/skills to perform under supervision, maintenance of Aircraft Armament Equipment, and Armament/Weapons Support Equipment as well as munitions assembly/disassembly, ammunition accountability and Station Ordnance operations in the Marine Aviation Logistics Squadron and Station Ordnance environment.

This Course Content Includes the Following Units of Instruction:

- Introduction
- Armament/Weapons Support Equipment
- Ammunition Management
- Ammunition Operations
- Airborne Weapons
- Common Missile Launchers/Ejector Racks

### ***AVIATION ORDNANCE SYSTEMS TECHNICIAN COURSE - MASL : P142051***

Upon completion of this course, Aviation Ordnance Intermediate Maintenance Technicians will have sufficient knowledge/skills to perform under supervision, maintenance of Aircraft Armament Equipment, Aircraft Gun Systems and Armament/Weapons Support Equipment in the Marine Aviation Logistics Squadron.

This Course Content Includes the Following Units of Instruction:

- Introduction to the Course
- M272 Hellfire Missile Launcher (HML)/TOW Missile Launcher (TML)
- RO-7 Series Ejector Rack Assembly
- BRU-20/21/22/23 Series Ejector Rack Assemblies

- BRU-36 Series Aircraft Bomb Ejector Rack
- Aircraft Store Ejector Rack
- Introduction to Aircraft Guns and General Gun Safety
- A/A49E-10 25MM Aircraft Gun System
- A/A49-E-7 (V4) 20MM Point and Suppressive Fire System
- M89E1 Declutching Feeder and M197 20MM Automatic Gun
- Crew Served Weapons

### ***AVIATION PRE-COMMAND-EN - MASL : B114051***

The goals of this course are to:

- Update command selectees on branch doctrine and refine his/her capability to fight the force.
- Teach the command selectees the principals and techniques of training management.
- Ensure knowledge of organization, capabilities, branch perspectives, trends, and policies of his/her branch.
- Provide training or familiarization on new and current systems and equipment as applicable to his/her branch.

### ***AVIATION RADAR REPAIR CRS - MASL : P132826***

This course provides technical instruction on the AN/TPS-59V(3) and AN/TPS-63 radar sets, ancillary and associated equipment organic to ground elements of Fleet Marine Force Aviation units. Included are installation, testing, adjustment and organizational maintenance on the radar sets. Instruction encompasses the overall concept of operation, assembly and disassembly, operational adjustments, use of built-in status devices and special tools, and the interrelation of subassemblies and circuitry peculiar to the AIMS equipment, AN/TPS-59V(3), AN/TPS-63 radar sets and associated equipment. Instruction includes corrective and preventive maintenance, reading and interpretation of schematics, logic diagrams, servicing block diagrams, flow charts, and maintenance publications.

E-1 through E-5. Complete the AIMS Maintenance Course/Radar Fundamentals Course (P132819).

Although this course is unclassified, a secret clearance is required to access the facility where the training is conducted. ITO must include security clearance.

### ***AVIATION SAFETY COMMAND (ASC) - MASL : P171411***

The purpose of this course is to indoctrinate aviation squadron commanding officers, executive officers, officers in charge, officers screened for command and major aviation staff safety officers, in the policies, philosophy, and techniques of an effective command safety program. Students should be O-4/O-5.

Note: students will be involved in a fast paced course consisting of seven hrs of classroom work per day for five to six days. In addition to the classroom presentations, students will be required to read course materials and prepare written reports to be presented to the class.

Actual or prospective commanding officers, executive officers, officers-in-charge, major aviation staff officers, and aircraft carrier safety officers who are designated naval aviators or naval flight officers of the rank of Lieutenant Commander, USN, or Major, USMC and senior.

Exceptions and requests from other services or organizations shall be coordinated with the Director, School of Aviation Safety.

### ***AVIATION SAFETY SCHOOL - MASL : B114006***

The goals of this course are to teach Army aviation air and ground accident prevention with emphasis on:

- Safety management
- System safety
- Human factors
- Accident investigation

- Prevention and safety office automation.

### ***AVIATION WARFARE APPRENTICESHIP - MASL : P131389***

This course is designed to provide selected Navy and Marine personnel with basic knowledge and skills in Aviation fundamentals. This knowledge and skill level will enable new aviation personnel to continue their aviation maintenance training to the apprenticeship level.

Topics include electrostatic principles, discharge/electromagnetic interference principles/ procedures, safety wiring procedures, and CPR.

### ***AVIATOR OPERATIONS SPECIALIST - MASL : B114044***

This course combines Aviation related subjects and five modules of MOS specific training. Aviation related subjects include Sexual Assault Prevention Training and Information System Security.

- Module 1 of the MOS specific training includes flight plans and overdue aircraft procedures.
- Module 2 includes aircraft designations, weather, DOD Flight Information Publications and Aeronautical charts.
- Module 3 includes both manual and automated flight records and flight orders.
- Module 4 consists of training on operations overlays, the Single Channel Ground to Airborne Radio System (SINCGARS), Automated Net Control Device (ANCD), high frequency radio, Aviation Mission Planning System (AMPS), Precision Lightweight GPS Receiver (PLGR) and extracting information from Airspace Command and Control documents.
- Module 5 includes operating a Tactical Operations Center (TOC) and installing Antenna Group OE-254/GRC.

Training culminates with a Field Training Exercise (FTX).

### ***AVIONIC COMMUNICATIONS EQUIPMENT REPAIRER - MASL : B137438***

Upon completion of the course students will be able to perform:

Aviation intermediate maintenance on avionic communications equipment, to include very high frequency, amplitude modulated, frequency modulated, ultra high frequency

Aircraft intercommunications control systems, and radio sets with frequency hopping capabilities

Troubleshoot malfunctioning equipment, using common and specialized hand tools and test equipment.

### ***AVIONIC MECHANIC SPAN-PLAN CO - MASL : B141733***

Restore avionic systems and subsystems, to include troubleshooting and repair of aircraft wiring on communications; navigation; stabilization; radar and night vision imaging systems; basic electronics theory; common soldering and systems installation practice with use of associated tools and test equipment.

Latin American personnel only.

### ***AVIONIC MECHANIC - MASL : B137441***

This course teaches how to restore avionic systems, and subsystems, to include troubleshooting and repair of aircraft wiring on communications, navigation, stabilization, and night vision imaging systems, basic electronics theory, common soldering, and systems installation practices with use of associated tools and test equipment.

Personnel not meeting prerequisites of DA Pam 611-21 will be returned to their unit. Soldiers will attend a 5-day End of Course Situational Training Exercise (EOCSTX). Reclassification soldiers attending this course must have in their possession DA Form 873, Certificate of Clearance and/or Security Determination to attend this course.

### ***AVIONIC MECHANIC SPANISH - MASL : B141732***

This course teaches how to restore avionic systems and subsystems, to include troubleshooting and repair of aircraft wiring on communications; navigation; stabilization; radar and night vision imaging systems; basic electronics theory; common soldering and systems installation practice with use of associated tools and test equipment.

Latin American personnel only.

***AVN CAPTAINS CAREER - ALL - MASL : B171630***

This course provides training instruction and practical exercises in Army operations; professional military subjects in common functional areas; unit leadership, doctrinal base, tactical decision-making; aviation maintenance and logistics; aviation operations, and military writing.

***AVN CAPTAINS CAREER - EN - MASL : B171633***

This course provides training instruction and practical exercises in Army operations; professional military subjects in common functional areas; unit leadership, doctrinal base, tactical decision-making; aviation maintenance and logistics; aviation operations, and military writing.

***AVN MAINTENANCE LEADERS COURSE (AMLC) - ALL - MASL : B141853***

The Aviation Maintenance Leaders Course (AMLC) is designed to provide the basic skills and knowledge required to understand the maintenance management programs.

The AMLC provides a broad overview of aviation maintenance and supply management; instruction on such systems as:

- Combat Maintenance
- Two Level Maintenance (2LM) Field and Sustainment
- Standard Army Maintenance Information Systems (STAMIS)
- Periodic and Phase Maintenance Programs
- Forecasting repair parts and manpower requirements for unit OPTEMPO
- Managing the Aviation Maintenance Company (AMC) and Aviation Support Company (ASC) Prescribed Load List/Shop Stock List (PLL/SSL)
- Bench stock repair parts
- The management and disposition of aircraft operational and historical forms and records
- Completion of aviation readiness reports at the AMC and ASC
- Aircraft systems inspection
- Troubleshooting, repair procedures; and various Standard Army Maintenance Information Systems (STAMIS)
- Including Unit Level Logistics System Aviation (ULLS-A ), Standard Army Maintenance Systems Enterprise (SAMS-E), and Standard Army Retail Supply System (SARSS) .

***AVN MAINTENANCE LEADERS COURSE (AMLC) - EN - MASL : B141854***

The Aviation Maintenance Leaders Course (AMLC) is designed to provide the basic skills and knowledge required to understand the maintenance management programs.

- The AMLC provides a broad overview of aviation maintenance and supply management; instruction on such systems as:
- Combat Maintenance
- Two Level Maintenance (2LM) Field and Sustainment
- Standard Army Maintenance Information Systems (STAMIS)
- Periodic and Phase Maintenance Programs
- Forecasting repair parts and manpower requirements for unit OPTEMPO
- Managing the Aviation Maintenance Company (AMC) and Aviation Support Company (ASC) Prescribed Load List/Shop Stock List (PLL/SSL)
- Bench stock repair parts

- The management and disposition of aircraft operational and historical forms and records
- Completion of aviation readiness reports at the AMC and ASC
- Aircraft systems inspection
- Troubleshooting, repair procedures; and various Standard Army Maintenance Information Systems (STAMIS)
- Including Unit Level Logistics System Aviation (ULLS-A ), Standard Army Maintenance Systems Enterprise (SAMS-E), and Standard Army Retail Supply System (SARSS) .

### ***AVN MAINTENANCE SUPERVISOR SPAN-PLN CO - MASL : B141728***

This course teaches aircraft engine maintenance and repair; aircraft electrical system/avionics maintenance and repair; rotor system maintenance and repair; airframe maintenance and repair; hydraulic system maintenance and repair; fuel systems maintenance and repair; technical inspections requirements and procedures; aircraft maintenance forms and records; troubleshooting and fault isolation; tools; test sets, and diagnostic equipment; aviation maintenance quality and production control procedures; maintenance scheduling.

### ***AVN MAINTENANCE TECHNICIAN WO BASIC - MASL : B141825***

This course teaches aircraft engine maintenance and repair; aircraft electrical system maintenance and repair; rotor system maintenance and repair; airframe maintenance and repair; hydraulic system maintenance and repair; fuel systems maintenance and repair; technical inspections requirements and procedures; aircraft maintenance forms and records; troubleshooting and fault isolation; tools; test sets, and diagnostic equipment; aviation maintenance quality and production control procedures, and maintenance scheduling.

### ***AVN MAINTENANCE MANAGER - ALL - MASL : B141823***

This course teaches aircraft maintenance management and aviation supply instruction; instruction on systems such as Combat Maintenance/Battle Damage Repair (BDR), Standard Army Maintenance Information System (STAMIS), the Aircraft Ground Power Unit (AGPU), and the Periodic and Phase Maintenance Programs.

### ***AVTRA ADV HELO TH-57 - MASL : P113301***

The purpose of this course is to teach the skills necessary for flying rotary-wing aircraft, to qualify student naval aviators for a standard instrument rating and to qualify student military aviators for rotary-wing and naval aviator designations. This course includes ground training: for 14.5 hours to include Indoctrination, use of Helicopter Emergency Egress Device (HEEDS), Safety, and Global Positioning System (GPS). Flight Support: 93.0 hours of Flight Support Lectures and Computer Based Training in TH-57 Systems, Helicopter Aerodynamics, Preflight Procedures, Crew Resource Management (contact and instruments), Course Rules, Portable Flight Planning System, Tactics Flight Procedures, Basic Instrument Flight Procedures, Visual Flight Rules Navigation, Low-Level Navigation, Formation Procedures, Emergency Procedures, Instrument Procedures, Radio Instrument Procedures, Shipboard Operations/SAR, Night Vision Device Training.

### ***AVTRA ADVANCED MULTI-ENGINE MPTS A/F - MASL : P112305***

The mission of this course is to develop multi-engine flight skills while emphasizing instrument flying and crew coordination. At the successful completion of this phase of aviation training, the flight student will be designated a USAF pilot qualified in multi-engine aircraft, and will have earned a standard instrument rating.

Navy Multi-Service Pilot training System Q-2A-0030

MPTS Intermediate Multi-Eng Q-2A-0033 or T-37 JT Spec Under Grad Pilot, P-V4A-A/J.

### ***AVTRA ADVANCED MULTI-ENGINE MPTS NAVY - MASL : P112304***

The mission of ADVANCED MULTI-ENGINE MPTS is to develop multi-engine flight skills while emphasizing instrument flying and crew coordination. At the successful completion of this phase of aviation training, the flight student will be designated a naval aviator qualified in multi-engine aircraft, and will have earned a standard instrument rating.

Navy Multi-Service Pilot Training System Curriculum, Q-2A-0030

MPTS Intermediate Multi-Eng, Q-2A-0033 or T-37 Joint Spec Undergrad Pilot Trng, P-V4A-A/J (T37).

### ***AVTRA ADV NFO STRK FIGHTER - MASL : P114036***

Advanced NFO S/F training is designed to further refine navigation, communication, and aircraft systems management skills developed in Advanced Core NFO/AF NAV training.

The focus of Module 1 is to teach overall situational awareness both in and out of the cockpit by emphasizing extensive strike planning, real world timing problems and crew coordination.

In modules 2-6 emphasis shall be placed on teaching the principles, rules and concepts necessary to conduct aggressive air-to-air intercepts by requiring the pilot to fly the assigned aircraft throughout a mission profile to engage in simulated enemy aircraft from a correct missile firing position.

In module 7, the Advanced Tactical Maneuvering (ATM) module, major emphasis is placed upon teaching basic skills to safely navigate visually and operate in a high "G" environment. High "G" adaptation will be achieved by operational tactics training in an Advanced Jet Trainer (AJT) aircraft.

Crew coordination and mission priorities are stressed in this teach-to-objectives curriculum.

Successful completion of this phase of training qualifies graduates for designation as NFO.

### ***AVTRA INSTRUCTOR - MASL : P115002***

This program is designed to assist the U.S. Navy's Undergraduate Jet Pilot training program by using USN trained international Jet Pilots as flight instructors at Training Air Wing One (CTW-1) at NAS Meridian, MS. The course provides vital assistance to the U.S. Navy for training both U.S. and international students as flight officers and affords the opportunity to gain valuable knowledge and experience for the international instructor in training operations, manpower management, officer responsibilities, and aviation safety. Basically, the only MASL cost associated with this program is the initial cost of light gear issue.

### ***AVTRA INSTRUCTOR - MASL : P115003***

This program is designed to assist the U.S. Navy's undergraduate aviation training program by using USN trained international pilots or flight officers as aviation instructors at various Training Air Wings. Instructor candidates, once satisfactorily completing the prescribed Instructor Under Training (IUT) syllabus or Flight Instructor Curriculum, may provide assistance to the U.S. Navy for training both U.S. and International Military Students (IMs) as aviators. When qualified, international instructors are afforded the opportunity to gain valuable knowledge and experience in training operations, manpower management, officer responsibilities, and aviation safety. Flight gear costs are the responsibility of the instructor candidates' home country.

### ***AVTRA INSTRUCTOR - MASL : P115001***

This program is designed to assist the U.S. Navy's Undergraduate Naval Flight Officer (NFO) training program by using trained international flight personnel (pilot/NFO) as flight instructors at Training Air Wing Six (CTW-6) at NAS Pensacola, FL. Provides vital assistance to the U.S. Navy for training both U.S. and international students as flight officers and affords the opportunity to gain valuable knowledge and experience for the international instructor in training operations, manpower management, officer responsibilities, and aviation safety. Basically, the only MASL cost associated with this program is the initial cost of light gear issue.

### ***AVTRA INTERM MS NFO T-6 - MASL : P114006***

Intermediate NFO/NAV training is designed to provide student flight officers/navigation with the skills and knowledge required to safely aviate, navigate, communicate, manage aircraft systems, and describe two-plane formation maneuvers in aircraft in both visual contact and instrument conditions. Skill and performance levels required are outlined by particular course instructions. Successful completion of this phase of training qualifies graduates for entrance into Advanced Syllabus Strike, Strike Fighter, or Airborne Tactical Data System (ATDS) Training.

### ***AVTRA PRE-FLIGHT INDOCTRINATION - MASL : P119301***

This course provides commissioned officers in the U.S. Navy, U.S. Marine Corps, U.S. Coast Guard, U.S. Air Force and selected International Military Officers (IMO) with basic knowledge needed for primary flight training and basic naval flight officer training.

Academic instruction totaling 84.5 hours includes instruction in Flight Rules and Regulations, Meteorology Theory, Air Navigation, T-34 Engines, T-34 aerodynamics, Aviation Safety, Aviation Student Information and Aircrew Coordination Training. Survival training totaling 146.5 hours includes the subjects of aviation physiology, swimming, land and sea survival, and physical fitness.

Students should be able to pass U.S. Navy Physical Fitness Test (PFT) and Red Cross 2nd Class Swim.

### ***AVTRA PRIMARY MULTI-SERVICE PILOT TRAINING SYSTEM - MASL : P112306***

This course provides training to student aviators in the T-34C Primary phase of flight training. To qualify graduates of this course for follow-on advanced flight training and prepare them for their future responsibilities as military officers.

### ***AVTRA PRIMARY MS NFO T-6 - MASL : P114005***

The objective of this course is to provide commissioned officers in the U.S. Navy, Marine Corps, Air Force and International services skills and knowledge required to safely aviate, navigate, communicate, and manage aircraft systems and aircraft in visual and instrument conditions. Successful completion of this phase of training qualifies graduates for entrance into Intermediate Naval Flight Officer Training or Inter-service Undergraduate Navigation Training.

### ***AVTRA T-45A TOTAL SYSTEM STRIKE FLIGHT TRAINING - MASL : P111310***

This course is designed to provide commissioned officers in the U.S. Navy, U.S. Marine Corps, other DOD personnel, and selected foreign nationals with further training in areas associated with tactical jet aircraft and to develop airmanship skills prerequisite for transition to operational fleet aircraft.

### ***AVTRA T-45C TOTAL SYSTEM STRIKE FLIGHT TRAINING - MASL : P111309***

This course is designed to provide commissioned officers in the U.S. Navy, U.S. Marine Corps, other DOD personnel, and selected foreign nationals with further training in areas associated with tactical jet aircraft and to develop airmanship skills prerequisite for transition to operational fleet aircraft.

### ***AVTRA T-45C TOTAL SYSTEM STRIKE FLIGHT TRAINING - MASL : P111326***

This course is designed to provide commissioned officers in the U.S. Navy, U.S. Marine Corps, other DOD personnel, and selected foreign nationals with further training in areas associated with tactical jet aircraft and to develop airmanship skills prerequisite for transition to operational fleet aircraft.

### ***AVTRA TH-57 SIMULATOR - MASL : P113314***

This MASL was established to program TH-57 simulator training. Training is tailored for individual country requirements.

### ***AWACS MCC CRSS TRAINING COURSE - MASL : D117137***

The purpose of this course is to train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the mission crew commander crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI 11-2E3/TC-18, Vol 1. Cross training course length is 49 training days divided into 2- GTDs and 29 FTDs.

### ***AWC ASSOCIATE PGM (NONRES) - MASL : D171018***

The Air War College Nonresident Program offers senior developmental education to DOD officers and civilians unable to attend AWC in residence. The mission, objectives, and philosophy of the nonresident program are the same as those in the resident program. The curriculum mirrors the Air War College resident program and emphasizes the knowledge, skills, and attributes required of all Air Force senior officers as they prepare for leadership positions with institutional responsibilities.

The nonresident program can be completed in a seminar study group, by independent correspondence study, or through some combination of these two. Examinations and writing requirements, as well as course materials, are identical regardless of completion method. Students may transfer from one study mode to the other. Seminar study groups generally have 4 to 20 members, and meet at a time, location, and frequency of their choice. Seminar members conduct and participate in group exchanges of ideas and opinions, analyzing subjects in the AWC curriculum.

Seminars are typically of 10 months duration and are offered at about 50 locations worldwide. Independent study is an option for those not near a seminar study group or who desire greater scheduling flexibility. Over 90 percent of AWC nonresident students learn through correspondence, and can complete their self-paced program in 6-18 months.

### ***AWC-CORRESPONDING STUDIES - MASL : B179020***

This course closely parallels scope of resident course. Curriculum consists of eleven correspondence courses, two two-week resident phases, and an optional writing program. Like the resident course, it focuses on the study of the role of land power, as part of a unified, joint or combined force, in support of the U.S. national military strategy.

This course prepares selected military officers and civilians for leadership responsibilities in a strategic security environment during wartime and peacetime. Curriculum focuses on national security and strategy issues, concepts and processes; military strategy, plans and operations; theater level warfare and campaign planning and command, leadership and management.

### ***AWC-CORRESPONDING STUDIES - MASL : B179021***

This course closely parallels scope of resident course. Curriculum consists of eleven correspondence courses, two two-week resident phases, and an optional writing program. Like the resident course, it focuses on the study of the role of land power, as part of a unified, joint or combined force, in support of the U.S. national military strategy.

The course prepares selected military officers and civilians for leadership responsibilities in a strategic security environment during wartime and peacetime. Curriculum focuses on national security and strategy issues, concepts and processes; military strategy, plans and operations; theater level warfare and campaign planning and command, leadership and management.

### ***BASE REALIGNMENT, CLOSURE AND ECONOMIC REDEVELOPMENT - MASL : P174260***

This course focuses on the economic concepts used in selecting military facilities for closure, realignment and to promote economic redevelopment. Case studies will be used to illustrate the link between strategic plans, military capabilities and program budgets. Cost-Effectiveness analysis, estimating environmental costs, risk analysis and the process of economic redevelopment will be discussed in a wide variety of international settings.

Examples of successes and failures will be examined in order to develop a set of principles that can be applied in the context of the participant's own nation.

### ***BASIC FREIGHT TRAFFIC - MASL : B153723***

This course focuses on transportation officer functions; motor, rail, water and air carrier industries; routing; tariffs and tenders; transportation security; hazardous cargo; loss and damage; freight documentation; detention and demurrage; carrier performance program; CONUS Freight Management - Field Module (CFM-FM) System; and the role of the Transportation Component Commands.

### ***BASIC GEODETIC SURVEYING (BGS) - MASL : B125101***

This course focuses on operating equipment to observe horizontal, vertical and electronic distances and differences in elevation; recording observed data; observing and recording astronomic and solar azimuth data; operating analytical photogrammetric positioning system; computing universal transverse mercator grid information; computing geodetic information; computing instrument calibration data; operating hand held programmable calculators; observe and compile data to produce large scale plane table maps.

### ***BASIC INFORMATION SECURITY INDEP - MASL : P279222***

This course provides a basic overview of the DOD Information Security Program including policy for classifying and declassifying information, and the requirements and techniques for ensuring that classified information is clearly marked, controlled, handled, stored and destroyed.

Target audience: DOD military and civilian personnel with little or no experience working with classified information.

Estimate 16 hours to complete.

### ***BASIC INSTRUCTOR COURSE - MASL : D166047***

In this course the instructional design for this course is group paced. Training includes roles of an instructor, qualities of an instructor, group dynamics, learning theory, counseling theory, instructional methods, multimedia, student measurements, ISD,

questioning techniques, communicative process, lesson plan development, delivering presentations and student administration which includes an introduction to TTMS.

### ***BASIC INSTRUCTOR COURSE - MASL : D166049***

In this course the Basic Instructor Course (BIC) trains personnel to instruct in technical training courses in the Air Education and Training Command. The instructional design is group-paced and the course is taught in four blocks of instruction:

- Fundamentals of Instruction
- Instructional Development
- Counseling
- Presentations

### ***BASIC INSTRUCTOR COURSE - MASL : D166048***

This resident course is tailored to train personnel who have been selected to instruct in technical training courses in the Air Education and Training Command. The instructional design for this course is group-paced.

The course is divided into four blocks of instruction.

The first block of instruction addresses the fundamentals of teaching. Information is presented on the qualities of an instructor, instructor roles, group dynamics, the communicative process, the developmental approach to instruction, the six Laws of Learning, various instructional methods, questioning techniques, the use of traditional as well as technology-based multimedia in the classroom, and outlining lesson plans. Also during the first block of instruction, students have the opportunity to begin fine-tuning their instructional techniques by giving an impromptu speech as well as a 10-12-minute presentation.

The second block of instruction concerns topics that are related to TC training policies and procedures. These topics include organizational design, Instructional Systems Development, Course Control Documents, the development of lesson plans, introduction to evaluation, and student administration to include the Technical Training Management System (TTMS) for student accounting. Students are also given an opportunity for instructional practice by preparing and presenting a 20-24-minute lesson.

The third block of instruction concerns counseling. Students receive information concerning counseling definitions, human behavior and adjustment mechanisms, the Cognitive, Affective, and Behavioral approach to counseling, the actual counseling and referral process, and conducting a counseling interview. Students practice these skills by role-playing in counseling scenarios.

The fourth block of instruction deals solely with training methodology. Students prepare and present various lessons to demonstrate their understanding of knowledge and achievement of skills taught in earlier course objectives regarding lesson preparation and presentation.

Student presentations include the lecture and the demonstration/performance methods of instruction. Other training methodologies may be added in order to meet wing-specific needs.

### ***BASIC LITHOGRAPHER - MASL : B125102***

Course consists of two phases:

(Pre-press) trains students in basic skills and technical knowledge needed to operate a process camera and produce line, halftone and contact negatives using tray processing techniques, film processors, filters and densitometers. Further training includes basic computer operations, and a desktop publishing system to produce camera-ready copy; familiarization with computer-to-digital duplicator theory, and photolithographic film and chemistry. Also, teaches the production of simple, combination and book-work and multi-color flats and proofing systems; and offset plate making processes used in the reproduction of various types of printed maps, charts and related products.

Students learn operation of photo-direct image plate makers, digital and standard duplicators, medium-sized offset presses and bindery equipment.

Throughout the course, students receive an orientation on recommended maintenance, safety and security procedures.

### ***BASIC LOADMASTER COURSE - MASL : D153003***

This is one of two locations for the 3-level awarding course for the 1A2X1 career field. In addition to the Little Rock location taught by the ANG, the course is also taught by the 97 TRS at Altus AFB. (Refer to the BLM AL listing in the TC section for the Altus AFB location, and ANGBLM in the Air National Guard section for other than active duty students attending the course at Little Rock AFB).

Individual students will be assigned to a BLM course location based primarily on best progression into their follow-on initial qualification training, although cross-flows to the alternate location may sometimes occur. Graduates progress to follow-on training and qualification as an aircraft loadmaster.

The course is presented in five blocks of instruction. Areas of training include the loadmaster career ladder, security, customer relations, passenger briefings, customs requirements, publications, principles of airdrop, and transportation of hazardous materials. Students learn formulas for calculating vehicle and aircraft center of gravity, as well as the effects of load shifts and removing cargo.

Also emphasized are shoring requirements, cargo restraint, and chart "E" familiarization, as well as concentrated and palletized load planning. A final portion of the course focuses on aircraft loading and actual task performance on aircraft or load training device. An acceptable score on each end-of-block examination is required for graduation.

### ***BASIC OFFICER COURSE USMC - MASL : P179250***

The purpose of this course is to provide newly commissioned officers a basic professional education and to instill in them the esprit and leadership traditional to the Marine Corps in order to prepare them to assume the duties and responsibilities of company grade officers in the field and in garrison. Additionally, the Basic Officer Course provides a basic understanding of infantry skills so that the graduate can properly support ground combat operations and can also perform infantry duties.

### ***BASIC OFFICER LEADERSHIP - MASL : B121010***

This course provides training in combined arms tactics (tactical doctrine and operations, military operations on urban terrain, artillery, and engineer operations, and field training exercises); staff subjects (intelligence, operations, logistics, and training management); general subjects (military leadership, land navigation, legal subjects, medical subjects, physical training, and special presentations); communications/electronics; unit/materiel readiness; weapons (individual).

### ***BASIC OFFICER LEADERSHIP - MASL : B121000***

This course provides training in combined arms tactics (tactical doctrine and operations, military operations on urban terrain, artillery, and engineer operations, and field training exercises); staff subjects (intelligence, operations, logistics, and training management); general subjects (military leadership, land navigation, legal subjects, medical subjects, physical training, and special presentations); communications/electronics; unit/materiel readiness; weapons (individual).

### ***BASIC OPERATIONAL LAW TRAINING (BOLT) - MASL : P176039***

The goal of this course is to provide basic operational and law of war training to newly assessed Marine Corps Judge/advocates. The course specializes in instruction in the areas of public international law, the legal basis for the use of force, means and methods of warfare, Hague and Geneva Conventions, war crimes and command responsibility, human rights, code of conduct, Rules of Engagement, non-combatant evacuation operations, homeland security, Status of Forces Agreements, fiscal law, deployment claims, information operations, intelligence law, and the role of the operational lawyer in MAGTF operations.

This course is by invitation only.

### ***BASIC PUBLIC AFFAIRS SPECIALIST-BROADCASTER - MASL : B164589***

This course provides knowledge/skills needed to train broadcast journalists to support public affairs journalism and broadcast missions throughout the Armed Forces. Designed to train the student to assume the role of a military broadcaster in an AFRTS outlet or on a ship, post, base or station public affairs office. Instruction is provided in the theory and principles of external and internal information, release of information to the public, research methods, service unique categories, detailed and complex instruction in radio and television operations, broadcast writing, voice and diction and the use and practical operation of the electronic news gathering system.

### ***BIONED EQUIP MAINTENANCE SPECIALIST - MASL : D175016***

This course provides training for biomedical equipment personnel to include anatomy and physiology, electronic principles, clinical applications, operation, inspection, maintenance and troubleshooting of a wide variety of biomedical equipment systems used in field environments and peacetime facilities and the related administrative duties. (Does not apply to NPS Students)

Students will bring a copy of their Information Assurance (IA) certificate. This is necessary for computer usage. Failure to do so will delay the student starting class.

### ***BOARDING OFFICER (MLE-01) - MASL : P173101***

This course is for the lead officer in a maritime law enforcement boarding team. The course is designed to provide a basic foundation in applicable legal concepts; practical experience in fundamental and advanced boarding procedures and techniques stressing teamwork and officer safety; and practical exercises involving administrative inspections, search, seizure, arrest, use of force, crime scene processing, case file preparation and courtroom procedures, communication, and intoxication identification. Students are assigned to 2 and 4-person teams. Teamwork is strongly emphasized throughout the course to foster the team approach to problem solving. E-IMET APPROVED

Students must be service pistol qualified. Students must complete the physical fitness test that is described on Page III-47 of this Handbook satisfactorily. Students will be tested on the first day of the course, with one physical fitness retest (if necessary) within the first week. Students failing retest or not meeting the weapons qualification requirement will be dis-enrolled from the course.

Students need soft-soled gym shoes and gym clothes, athletic supporter with cup for males, at least one padlock, and work uniforms. Students should be prepared for and expect a physically demanding course and should be in good physical condition.

### ***BOARDING TEAM MEMBER E-IMET - MASL : P124401***

This course is designed to prepare students for their role as Maritime Law Enforcement (MLE) boarding team members. The major subject areas are: defensive tactics techniques, use of force, administrative inspections, authority and jurisdiction, identification of possible violations of U.S. law, personal searches, initial safety inspections, and boarding procedures.

Students must complete the physical fitness test described on Page III-47 of the International Training Handbook satisfactorily. Students will be tested on the first day of the course, with one physical fitness retest (if necessary) within the first week. Students failing retest or not meeting the weapons qualification requirement will be dis-enrolled from the course.

### ***BSC TARGET MOTION ANALYSIS - MASL : P121311***

This course is designed to supplement the instruction of the Australian Submarine Warfare Officers Course. The first week of the course is primarily classroom instruction followed by a week of practical application in Attack center trainers.

The primary topics covered are:

- Basic Target Motion Analysis
- Mk 48 ADCAP Employment/Tactics
- Time Frequency Target Motion Analysis
- Towed Array Operations/Employment
- Submarine Coordinated Operations
- BYG-1 FCS Familiarization/Employment
- Coordinated Operations Planning Exercise
- Current Intelligence Briefs

Classification: Secret

### ***BUDGET PREPARATION, EXECUTION AND ACCOUNTABILITY - MASL : P156600***

This course provides the foundation for preparing and executing the defense budget. Generic PPBES will be used to illustrate how planning and programming support national defense objectives and priorities. Case studies will be used to illustrate how

programming and budget guidance are integrated to create a budget, implement funds control, performance management and accountability in the resource allocation process.

Students should report two days prior to class convene.

### ***DS/DIVE/PREP TRAINING - MASL : PDET016***

The goal of this course is to prepare international officers and enlisted personnel to successfully complete the U.S. Navy Basic Underwater Demolition/Seal Training program.

### ***BU-SCH JOURNEYMAN - MASL : P174209***

This course provides the advanced technical skills and principles of job management necessary to qualify for assignment as a trade crew leader on a construction project. Includes advanced instruction in mathematics; mixing, placing, finishing, curing, and testing concrete. Form construction; masonry construction; foundation construction; framing of floors, walls, stairs, and roofs; installation of interior and exterior trim; preparation of surfaces and painting; application and maintenance of hot and cold roofing; erection of water front, heavy timber and advance base structures; operation and maintenance of shop tools and equipment; shop management and layout; job planning; estimating, and material take off; construction safety and first aid; and techniques of foremanship.

### ***C130 LOADMASTER - MASL : D302040***

In this course training teams are composed of DOD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a countries capability. It should be requested only after full consideration has been given to in-country capability and other DOD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***C130 PILOT INITIAL QUALIFICATION - MASL : D117119***

In this formal school course pilots (SUPT graduates) qualify in initial aircraft qualification operations in the C-130E aircraft IAW AFI 11-2C-130, Vol. 1 prerequisites.

The course includes academic, simulator, and flying training.

### ***C-130/T-56 B/E/H ENG TECHNICIAN - MASL : D141260***

The course is designed to provide advanced operating principles and theory of the T-56 engine to establish a solid maintenance foundation for journeymen. Students will be given thorough instruction to evaluate conditions and make proper repair decisions of engine operating systems and subsystems. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

- **Block 1 T-56 Engine Familiarization:** This block begins with a course orientation, where students learn about the academies policies, programs, and academic objective requirements. This block provides lecture and discussion on ground safety related to in-shop and flight line maintenance. They receive detailed information and characteristics of the engine reduction gearbox, compressor, combustion and turbine sections. Also different components of the T-56 engine are discussed in detail in this block. The block concludes with a written examination.
- **Block 2 T-56 Systems Operation:** During this block, principles and theory of oil, pneumatic, fuel, temperature datum, ignition, and fire/overheat systems are lectured and discussed. Students are taken to the engine shop and aircraft to compliment the instruction. They are given thorough instruction to evaluate different engine conditions and make proper repair decisions of engine operating systems and subsystems. This block concludes with a written examination.
- **Block 3 In-Shop Maintenance:** This block covers the in-shop aspect of engine maintenance. Procedures for engine removal and installation, hot section disassembly and reassembly, as well as accessories removal and installation are taught in this block. Students learn inspection procedures and engine adjustments. They will also learn the use of troubleshooting diagrams, and technical orders for each system. This block concludes with a written examination.

### ***C-130B/E/H PROPELLER TECHNICIAN - MASL : D141261***

This course is designed to provide C-130 B/E/H propeller technicians advanced operational theory and hands-on maintenance training in order to establish a solid craftsman foundation. With the extensive knowledge furnished by the curriculum, the students are able to analyze facts and draw conclusions related to operation and troubleshooting of the propellers systems and subsystems. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

- **Block 1 Propeller Familiarization:** This block begins with a course orientation, where students learn about the academies policies, programs, and academic objective requirements. This is followed by a comprehensive overview of ground safety related to in-shop and flight line maintenance. Students receive general information, construction characteristics, and operational theory of the 54H60 propeller and its major components. Items discussed include the dome assembly, low-pitch stop assembly, pitch-lock regulator assembly, the barrel and blades, and the propeller control assembly including the pump and valve housings. This block of instruction concludes with a written examination.
- **Block 2 Propeller Electrical Systems:** The students receive information about the operational theory and troubleshooting of the propellers electrical systems. Systems taught include anti-icing, de-icing, and the syncrophaser systems. The use of technical orders to troubleshoot propeller electrical system problems is stressed throughout the block. Students receive fundamental knowledge on how to read electrical schematics in order to troubleshoot different propeller malfunctions. This block concludes with a written examination.
- **Block 3 Flight line And In-Shop Maintenance:** The purpose of the third and final block of instruction is hands-on maintenance training. Propeller complete disassembly and assembly are discussed throughout this block. Inspection of the propeller blades, barrel halves, contact ring, pump housing and dome assemblies are also discussed in detail. The instructor demonstrates all propeller maintenance procedures to the student in order to introduce the use of technical orders and special tools. The students perform maintenance procedures following technical orders and safety guidelines.

### ***C130J PILOT FORMATION QUALIFICATION - MASL : D112038***

This course initially qualifies pilots in the C-130J aircraft. This course Includes academic, CRM, simulator and flying training. Graduates will be C-130J MPD MPs.

### ***C-17 AEROMEDICAL EVACUATION - MASL : D175166***

This course trains flight nurse and Aeromedical technicians on C-17 medical evacuation procedures. It provides academic ground and flight training to include in-flight nursing considerations, medical equipment, and personal requirements in a train the trainer format.

### ***C-17 ENGINE CHANGE PROC - MASL : D149523***

This course integrates theory of operation with the hands-on procedures for removing and installing the engine. Proper TO procedures and safety precautions are stressed throughout the course.

### ***C-17 LOADMASTER INITIAL QUALIFICATION (AT) - MASL : D117150***

This course qualifies aircraft loadmasters in the C-17 aircraft. The program consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

### ***C-17 PILOT INITIAL QUALIFICATION (AT) - MASL : D112040***

This course qualifies pilots in the C-17 aircraft and mission. It includes instruction on basic aircraft flight procedures, low-level flight, aircraft systems, air refueling operations, and SKE/VFR formation flying procedures. Training consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

### ***C-17 PILOT SENIOR OFFICER COURSE (PARTIAL) - MASL : D112042***

This course qualifies selected senior officers of C-17 units in the C-17 aircraft. The training consists of Air Force-conducted flight training from FTU only.

### ***C-17A AVIATION MAINTENANCE COURSE-INTL - MASL : D141420***

This course provides theory of operation, removal and replacement, operational checks, and inspections of selected components on the C-17A Aircraft. Systems include: Aircraft General Information, Mechanics Familiarization, Communications Systems, Navigation Systems, Instruments and Flight Control Systems, Mission Computing/Central Display System, Electrical Systems, and C-17 Inspections. Proper technical order procedures and safety precautions are stressed throughout the course.

### ***C-17A GENERAL AIRCRAFT SYSTEMS\*FTD - MASL : D149517***

This course is designed for flight line supervision and management. It delivers an introduction to the following C-17A systems: Technical Data Numbering, Electrical, Mission Computing/Electronic Display, Hydraulic, Primary Flight Controls, Secondary Flight Controls, Landing Gear, Cargo Door and Ramp, Engine, Auxiliary Power Unit, Environmental, Fuel, and On Board Inert Gas Generating.

### ***C17A MAINTENANCE OJT (AT) - MASL : D141421***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the students country provides justification accompanied by specific training objectives.

Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***C4 PLANNING OFFICERS CRS - MASL : P132201***

The objective of the Advanced Communications Officers Course (ACOC) is to provide formal skill progression training for captains (O-3) in the communications and systems control military occupational field.

The course increases these Marines effectiveness as they move into communications and systems control staff billets (G-6/S-6) by providing them with technical C4 planners training. The course includes detailed practical applications that enable the student to better understand, plan, and manage significant quantities of increasingly complex communications equipment and command and control (C2) systems in support of the marine component of a Joint Task Force, including external connectivity to theater (combatant commander s) and national-level communications systems. The course consists of sub-modules covering the C4 planning process, transmission systems, voice switching systems, data communications networks, communications system management, and the development of the Communications and Systems Control Annex to an operational order or operational plan.

The course is intended for captains (O3) who have successfully completed the Basic Officer Course (MASL 179250), the Basic Communications Officer Course (MASL 139400) or equivalent host-nation courses; and have served in a progression of billets (4 to 5 years of MOS experience) in the communications field in preparation for assignment to C4 planning billets. Chief Warrant Officers that have served in a progression of billets (10-12 years of MOS experience) in the telephone systems, tactical communications planning and systems engineering, or network operations and systems fields in preparation for assignment to military department of ministry of defense level staffs (G-9/J-6) are encouraged to attend this course. Collegiate-level communications courses are not an acceptable alternative, as they do not adequately prepare international military students for this course. A thorough understanding of the Marine Corps command relationships and organizational structure is mandatory.

### ***CADET LEADERSHIP DEVELOPMENT-INFANTRY - MASL : B176230***

Basic light infantry tactics; techniques, and skills; tactics portion includes basic light infantry squad and platoon operations; air-assault operations planning, and how to conduct military operations in urban terrain; mandated minimum of eight hours of instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***CAPTAINS CAREER-SPANISH - MASL : B171420***

Foundation-building instruction in the fundamentals of leadership; training management; communications; land navigation, and military laws; extensive study of the battle operating system, to include intelligence preparation of the battlefield; logistics; combat engineer employment; use of indirect fire and close air support; civil affairs; tactical level of war and plan combat

operations at the company and battalion level; brigade, airborne and air assault operations; tactical exercises without troops, supported by the JANUS combat simulations system, designed to reinforce the concepts of combined arms operations in a tactical environment under the law of land warfare; mandated 16 hours of instruction on human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***CARGO SPECIALIST - MASL : B153740***

This course provides training in operating ships cargo-handling gear; operating material-handling equipment (MHE), and cranes; loading procedures for shipment by air, rail, and motor; and lift-on/lift-off and roll-on/roll-off stevedoring operations aboard ship for vehicles, heavy lifts, containers, and general cargo.

### ***CASUALTY TREATMENT FOR OFF - MASL : P175658***

This course provides casualty treatment training to all Dental Corps Officers of the Navy and a refresher course at five year intervals. The training prepares Dental Corps Officers to assist in the health care support effort during national and local emergencies. Students assist in providing casualty assistance until definitive treatment is available where mass casualties may occur.

The five day course provides didactic lectures and simulated exercises.

### ***CASUALTY TREATMENT TRAINING - MASL : P175662***

This course provides casualty treatment training to Dental Technicians. The training prepares Dental Technicians to assist in the health care support effort during a combat or civil emergency situation. Course material reviews practical shipboard and field mass casualty management procedures, how to assess patients, provide effective emergency care using minimum equipment and stabilize personnel for evacuation.

### ***CATB OJT KUWAIT - MASL : B119923***

This MASL is used when CATB OJT - Kuwait is programmed.

### ***CAVALRY LEADER - MASL : B144293***

Tactical employment of cavalry troops and squadrons in the role of economy of force and reconnaissance and security missions, planning and directing these operations; integration and synchronization of combat power and combat service support.

### ***CAVALRY SCOUT BNCOC - MASL : B144581***

In a combat simulated cavalry scout platoon environment: mine warfare; secure communications; tactical movements; demolitions; NBC; maintenance; safety; troop leading procedures; physical fitness training; training management; tactics; conduct of fire training (COFT); Bradley Fighting Vehicle (BFV) gunnery; Field Training Exercise (FTX); Common Leader Training (CLT); Common Military Training (CMT); and tactical seminars in a 24-hour a day NCO Academy environment. Small Group Instructional (SGI) model is employed throughout the course.

### ***CC-AWC DISTANCE ED PROGRAM - MASL : P164009***

AWSDEP is offered through correspondence courses and has been designed to parallel the resident AWS curriculum. The two phase program, emphasizing Marine Air-Ground Task Force (MAGTF) Organization, command and control, combined arms operations, and amphibious and expeditionary operations prepares officers to be commanders and staff officers at the battalion and squadron level. The Program of Instruction for AWSDE consists of six courses of study which include:

- Warfighting
- Command and Control
- MAGTF in Offensive Operations
- MAGTF in Defensive Operations
- Expeditionary Operations
- Military Operations Other Than War

Each course consists of individual lessons, practical exercises, and examinations. Courses must be purchased using a Foreign Military Sales case.

### ***CD - COMB STRATEGY SECURITY OPERATIONS - MASL : P171493***

Each of the core courses is available as a Correspondence Course. The modules/blocks and associated topics are listed below for each of the core courses which are also offered separately.

#### **STRATEGY AND POLICY:**

- Policy, Strategy, and War
- The American Revolution and Maritime Theory
- The Russo-Japanese War
- Capstone Module: The Peloponnesian War

#### **JOINT MARITIME OPERATIONS - P171492**

- Course Foundations and Operational Concepts
- Law and the Use of Force
- Military Organization
- Introduction of Military Operations Other Than War (MOOTW)
- Planning Concepts
- Operations Order (OPORD) Development

#### **NATIONAL SECURITY DECISION MAKING - P171491**

- National Security Processes
- Military Strategy and Force Planning

During this course of study, the student will submit a variety of written assignments in the form of assessments, answers to multiple choice questions, and essays. Time limits for submission of written materials are specified in individual syllabi. Normally they are required in not more than 60-day intervals. Partial submissions are not acceptable. Simultaneous multiple submissions of written assignments are discouraged unless operational commitments require it. If any circumstances preclude timely submission of written requirements, students must notify their instructors as soon as possible. Students who do not meet submission deadlines will be dis-enrolled from the program.

The College will complete review of student work as quickly as possible following receipt. Unless specifically directed otherwise, do not wait for instructor feedback on written assignments before proceeding with the rest of the course. Written requirements are evaluated first to determine if the student has demonstrated an understanding of the basic principles and concepts the course is designed to convey. They will then be evaluated in terms of logical development and, in some cases, depth of analysis. These reviews are intended to be a continuation of the learning process for all students. Study materials for each module/block should not be returned to the College until these reviews are received.

An online application must be completed in order to apply for a CD-ROM Based correspondence course. The application will require student information. All applications should be filled out accurately and completely for proper consideration. Applicants will be notified by letter of their status within 30 days. Enrollment will be limited to 200 naval officers in FY-2005 IAW the following priorities:

### ***CDLMS MAINTENANCE - MASL : P139233***

This course is designed to provide personnel with basic knowledge of Link-16 and skills to perform Common Data Link Management System (CDLMS) system operations, troubleshooting, and maintenance procedures. CDLMS maintenance training will familiarize trainees with overall knowledge of the Purpose, Characteristics, Features of Link-16, and Network Management. Additionally, CDLMS training will describe the Link-16 Hardware, Interfaces and Support Equipment. The trainee will also be presented with familiarization of the CDLMS hardware and software components and provide an introduction to the system, operations, troubleshooting, preventive/corrective maintenance and emergency procedures.

### ***CE WORK PLANNING - MASL : D148189***

This course provides training for Air Force personnel performing planner or estimator duties. Training includes planner responsibilities, facility file contents, work authorization, material and equipment, technical aspects of engineered performance standards, lump sum estimates, and Work Information Management (WIMS) (FEJE) estimation system.

### ***CEC CONSTRUCTION BATTALION OPERATIONS - MASL : P174080***

This course prepares the Officer and Seabee Chief Petty Officer for duty with a Naval Construction Force operating unit or training command. This intensive two week course covers Naval Construction Force mission, organizational structure and command relationships; planning, executing, and balancing mission requirements; leadership and the officer/chief relationship.

The course culminates with a group planned and presented Airdet sized deployment execution plan in support of contingency operations.

### ***CEC OFFICER BASIC QUALIFICATION - MASL : P174052***

This course is designed to orient the new CEC officer to the role of the CEC in the Navy and to prepare them to be immediately effective upon assuming the duties of their first CEC billet. During four weeks of the course, subject matter common to all BASIC students is covered to provide knowledge of fundamental principles intrinsic to any CEC billet. Topics included are: engineering management, CEC officer orientation, financial management, organization and responsibilities of NAVFAC, construction technology & scheduling, professional development military/civilian personnel considerations, and leadership/human relations. One week is designated as the Military Training phase, where students are subjected to small-arms training and a field exercise which gives the overview of Seabee operations.

### ***CENTRIFUGE-BASED FLIGHT ENVIRONMENT - MASL : P128101***

This course is required initial training per OPNAVINST 3710.7 series for all tactical jet aircrew flying AV-8, EA-6, F-5, F-14, F-16, or F/A-18 aircraft prior to reporting for FRS training. Per General NATOPS, tactical jet aircrews that have not received dynamic CFET training shall receive this course as soon as operationally practical.

Scope: Classroom and laboratory presentations covering the physiological effects of acceleration and the counter measures employed in the high G environment. Training device evolution includes the centrifuge (device 9A16) and is accomplished ONLY at ASTC Lemoore prior to reporting to FRS.

### ***CH-46 SIMULATOR TRAINING - MASL : P119380***

CH-46 simulator training.

### ***CH-47 FLIGHT SIMULATOR - MASL : B219951***

This MASL is used when CH-47 Flight Simulation training is required.

### ***CH-47 FLIGHT SIMULATOR - MASL : B119991***

This MASL would be programmed when CH-47 Flight Simulation training is required.

### ***CH-47 FLIGHT SIMULATOR - MASL : B119963***

This MASL is used when CH-47 Flight Simulator is programmed.

### ***CH-47 HELO RPR (TRANS) - MASL : B141008***

In this course the student learns to perform the duties of mechanic and crew chief; which include maintenance on the CH-47 Helicopters at AVUM, AVIM level facilities; removes, installs and inspects subsystem assemblies components; services and lubricants helicopter subsystems; performs scheduled inspections, safety practices and procedures; uses ground support equipment required for helicopter maintenance; identifies and maintains common, special and precision tools; uses technical manuals and other applicable publications associated with helicopter maintenance.

Soldiers selected for training must meet service-remaining obligation in accordance with AR 614-200, Chapter 4, para 4-6, J.

### **CH-47 HELO RPR SUPV BNCOC - MASL : B141842**

This course is technical training in the aircraft maintenance management field is oriented toward developing skills and knowledge of aircraft maintenance management principles and procedures. The student is provided with the training required to successfully perform the supervisory and technical inspector (TI) duties required of MOS 67U/15U30.

### **CH-47A/B/C MAINTENANCE MANAGER/TP-TR - MASL : B141772**

This course is based on tasks that are specified for Skill Level 1 training; also covers subjects (Not found in the trainer's guide.) considered necessary for student understanding and proficiency in Power plant Repair.

### **CH-47D AVIATOR QUALIFICATION - ALL - MASL : B115007**

This course is designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification in the CH-47D helicopter. Includes training in the mental and physical skills required for this accomplishment of pilot duties through instruction in aircraft systems, navigation and command instrument systems, combat skills, flight training, mission planning, and safety. Aviators who are not night vision device (NVD) qualified will receive NVD qualification in the CH-47D. Aviators not NVD qualified will receive NVD familiarization based on proficiency.

### **CH-47D AVIATOR QUALIFICATION - EN - MASL : B115012**

This course is designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification in the CH-47D helicopter. Includes training in the mental and physical skills required for this accomplishment of pilot duties through instruction in aircraft systems, navigation and command instrument systems, combat skills, flight training, mission planning, and safety. Aviators who are not night vision device (NVD) qualified will receive NVD qualification in the CH-47D. Aviators not NVD qualified will receive NVD familiarization based on proficiency.

### **CH-47D FLIGHT ENGINEER INSTRUCTOR - MASL : B115030**

This course provides flight and academic instruction in preflight, in-flight, and post flight tasks; tactical flight training tasks; aircraft systems; aviation medicine; night vision goggles; and aviation safety subjects. Student will receive academic and flight methods of instruction training.

### **CH-47D INSTRUCTOR PILOT - MASL : B115006**

This course consists of CH-47D IP training and N/NVG training, flight and academic training in day VFR and night VFR tasks. The tasks will include before-flight, basic flight, approach/landings, and emergency tasks, academic instruction, and practical application of CH-47D aircraft systems subjects.

### **CH-47D IP MOI - ALL - MASL : B113018**

This course provides CH-47D IP training and N/NVG training, flight and academic training in day VFR and night VFR tasks. The tasks will include before-flight, basic flight, approach/landings, and emergency tasks, academic instruction, and practical application of principles application of CH-47D aircraft systems subjects. CH-47D IP training and N/NVG training, flight and academic training in day VFR and night VFR tasks. The tasks will include before-flight, basic flight, approach/landings, and emergency tasks, academic instruction, and practical application of principles application of CH-47D aircraft systems subjects.

### **CH-47D MAINTENANCE TP W/FL - MASL : B141804**

The goal of this course is to provide information and training on the CH-47D (712/714 engine) Maintenance Troubleshooting and test flight procedures.

### **CH-47D MTP W/O FLY - ALL - MASL : B141847**

The goal of this course is to provide information and training on the CH-47D (712/714 engine) Maintenance Troubleshooting and test flight procedures.

### **CH-47D SIMULATOR - KOREA - MASL : B119905**

This MASL is programmed when CH-47D Flight Simulation training for Korea is required.

### ***CH-47D/F HELICOPTER REPAIRER - MASL : B141760***

This course's basic emphasis is on aircraft technical maintenance training and safe maintenance practices. Instruction covers aircraft maintenance procedures to provide the student with the skills and knowledge necessary to perform CH-47 maintenance. Training includes replacing system and subsystem assemblies and components; servicing and lubricating components and obtaining oil samples; performing limited maintenance operational checks, scheduled inspections, and troubleshooting; using and maintaining ground support equipment and common, special, and precision tools required for maintenance and ground handling; using applicable forms, records and publications; and using the Unit Level Logistics System - Aviation (ULLS-A).

### ***CHAPLAIN CAPTAINS CAREER - MASL : B171652***

This course provides advanced skills and knowledge supporting the performance of critical tasks for chaplain staff supervision and brigade chaplain staff officer responsibilities. The program trains leadership, ethics, administration, staff supervision of ministry in the military environment, combat and tactical functions, appropriated and non-appropriated funds management, and other branch unique or common tasks. Training is battle focused and scenario-driven through the use of small group instruction.

### ***CHAPLAIN OFFICER BASIC - MASL : B169536***

This course provides basic skills and knowledge for assigned duty positions in battalion staff officer responsibilities, basic military skills, administration, pastoral ministry in the military environment, basic leadership, ethics, pastoral counseling and branch unique training for battalion chaplains.

### ***CHEMICAL OFFICER ADVANCED - MASL : B171660***

The goal of this course is to provide learning activities that will further officer skills and knowledge in leadership, management, written and oral communications, combined arms doctrine/fundamentals, staff procedures, nuclear, biological, chemical (NBC) reconnaissance and decontamination operations, smoke operations, radiological safety, and chemical and nuclear target analysis.

### ***CIVIL AFFAIRS QUALIFICATION - MASL : B173637***

In this course students learn to prepare, execute, and transition civil affairs (CA) activities and civil-military operations (CMO) and a field training exercise (FTX).

### ***CIVIL MILITARY OPERATIONS-SPANISH - MASL : B173015***

This course provides training in Military civic action; the proper role of the military in support of civilian authority, civil defense, disaster relief, and CMO support to counterdrug activities; various in-depth case studies which are used to enhance student awareness of effective CMO activities; each student integrates a mandated minimum 12 hours instruction of human rights; the rule of law; due process; civilian control of the military; and the role of the military in democratic society.

### ***CIVILIAN CONTRACTOR TRAINING - MASL : P179183***

This course was Initially used to program for contractor C-130 Flight Crew Refresher Simulator Training. Flight crews receive classroom instruction, simulator training, and Video Animated Systems Trainer Instruction.

Can be used for any Misc. Contractor Training

### ***CIWS MK-15 MOD 11/14 OP/MT - MASL : P134276***

This course provides the knowledge and skills necessary for the organizational maintenance, and operation incidental to maintenance of the MK-15 MODS 11-14 Close-In Weapon System. Training Includes training in Ordnance Safety procedures for the gun system, Technical Operation and Maintenance (O&M), Organizational maintenance in accordance with the maintenance concept of module replacement, Utilization of Built-In Test Equipment (BITE) in fault isolation and casualty analysis; Utilization of Special Purpose Electronic Test Equipment (SPETE), Peculiar Support Equipment (PSE), in fault isolation and casualty analysis, Digital equipment, solid state devices, RF transmission, receiving and processing, mechanical, hydraulic and pneumatic functional features as required by the maintenance concept of the Close-In Weapon System, Organizational maintenance of the 20 millimeter gun including load, reload and unloading procedures and Operator training incidental to maintenance..

### ***CIWS MK-15 MOD 11/14 OP/MT - MASL : P134171***

This course provides the knowledge and skills necessary for the organizational maintenance, and operation incidental to maintenance of the MK-15 MODS 11-14 Close-In Weapon System. Training Includes training in Ordnance Safety procedures for the gun system, Technical Operation and Maintenance (O&M), Organizational maintenance in accordance with the maintenance concept of module replacement, Utilization of Built-In Test Equipment (BITE) in fault isolation and casualty analysis; Utilization of Special Purpose Electronic Test Equipment (SPETE), Peculiar Support Equipment (PSE), in fault isolation and casualty analysis, Digital equipment, solid state devices, RF transmission, receiving and processing, mechanical, hydraulic and pneumatic functional features as required by the maintenance concept of the Close-In Weapon System, Organizational maintenance of the 20 millimeter gun including load, reload and unloading procedures and Operator training incidental to maintenance.

### ***CMBT SYSTEMS OFFICER (CSO) UPGRADE - MASL : D114047***

This course is designed to qualify USAF rated officers as Combat Systems Officers capable of entry into follow on operational aircrew upgrade training. Students must have completed N-V4C-P(Primary Combat Systems Officer), Q-2D-0055(Strike Fighter), Q-2D-0056(Strike) or N-V4R-N-1 through N-V4R-N5 (JSUNT). Students receive in depth training in the following areas: Air Defense Systems, Electronic Warfare Support, Self Protection and Suppression of Enemy Air Defenses.

Graduates are certified as Combat Systems Officers.

### ***CMBT SYSTEMS OFFICER (CSO-NAVY) - MASL : D114048***

This course provides initial Combat Systems Officer Primary syllabus training course provides basic navigational and electronic warfare skills. Training consists of academics, simulator, and flight training.

### ***CMDR AMPHIB TASK/F SURGEON - MASL : P175310***

The goal of this course is to provide experienced Medical Officers with an opportunity to develop the skills required for service as the Senior Medical Advisor to the Commander Amphibious Task Force (CATF). The program consists of training in the design of an amphibious operation and its associated medical logistics, an overview of the medical aspects of operations other than war, and a current brief on geopolitical and medical intelligence.

Graduates will be able to serve effectively as CATF Surgeons with a thorough understanding of the medical aspects of an amphibious operation.

### ***CNTRTERRORISM FELLOWSHIP PROGRAM - MASL : B17174T***

SNSEE's International Counterterrorism Fellowship Program is the flagship educational institution of the Regional Defense Counterterrorism Fellowship (RDCTF) program. Under the oversight of the Office of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (OASD SO/LIC), the program offers counterterrorism specialists a strategic perspective on a rapidly changing world. Courses address the global threat and its various manifestations including the modes, means, roots and potential responses to transnational terrorism, as well as discuss counterterrorism proponents and state sponsors of terrorism. Students, through seminar participation and independent study, develop strategies for working with the United States and other members of the anti-terror coalition to deter, preclude, minimize, respond to, combat, and defeat global terrorism. The curriculum also addresses the threat posed by weapons of mass destruction in the hands of terrorists, and allows students to devise strategies to counteract this menace. Starting in Academic Year 2006-07, the SNSEE course will be structured to award a Master of Arts in Strategic Security Studies with a concentration in counter terrorism, pending approval by the Department of Education and the requisite authorizing legislation.

### ***COLD WEATHER MEDICINE - MASL : P175228***

To provide medical personnel assigned to combat units with the necessary knowledge and practical experience to effectively participate as operations support personnel in a cold weather mountainous environment.

This course of instruction is designed to bring the students to a high standard of technical and tactical proficiency peculiar to a cold weather environment. The course subjects cover movement, survival, bivouacs, leadership and discipline, diagnosing, treating and preventing high altitude, cold weather related illness and injuries, and techniques of transporting casualties in a snow covered mountainous environment.

Notes: Students attending this course must be military medical personnel. They must not be on cardiovascular medication or have sickle cell anemia traits, and must score an outstanding on their most recent physical fitness test, and be free of chronic or acute orthopedic injuries.

### ***COMBAT CASUALTY CARE - MASL : B175281***

The Combat Casualty Care Course (C4) is a tri-service, continuing medical education course designed to enhance medical readiness of physicians, physician assistants, nurses, and dentists by providing training in field leadership, knowledge and skills that may be necessary for direct medical support in conditions related to any combat condition. The course contains training on Contemporary Operational Environment and humanitarian issues. Training is based on a multi-phased scenario-based operation escalating to a high-intensity conflict testing first and second echelons of care capabilities.

### ***COMBAT ENGINEER BASIC - MASL : P121018***

The course focuses on teaching basic combat engineering skills to entry-level enlisted students. U.S. Marine Corps students are not expected to have prior knowledge of combat engineering or practical experience. They are expected to have completed basic training and the Marine Combat Training course. General engineering topics covered include wood frame construction; concrete mixing and placement; and concrete block construction. Students are introduced to engineer hand tools and equipment, including chainsaws. Combat engineering topics covered include the use of pneumatic and hydraulic tools; the construction of log and wire obstacles; bunker construction; military demolitions; mine warfare; and basic mine detector operation.

During the course, students receive classroom training followed by instructor demonstration and practical application periods. For the majority of lessons within the course, each student is tested for proficiency through either a practical examination or a written examination.

Corporal (E4) and below.

Hazardous duty required. Because of the nature of this course, must be able to pass the Marine Corps PFT.

This course is a physically demanding course.

### ***COMBAT ENGINEER NCO COURSE - MASL : P121017***

The course consists of instruction in engineering subjects relating to mobility, counter-mobility, survivability, and general engineering. Instruction includes: reconnaissance, engineer equipment, bridging, demolitions, mine warfare, obstacles, field fortifications, horizontal and vertical construction, and management techniques.

Because of the nature of this course, must be able to pass the Marine Corps PFT. This is a physically demanding course. IMS must be authorized to participate in Hazardous Duty.

Corporal through staff sergeant (E-4 - E6).

It is necessary to be a graduate of the basic combat engineer course (MASL M03ACS2, P121017) or have prior equivalent experience. This is not a basic course. Because of the nature of this course, must be able to pass the Marine Corps PFT.

This is a physically demanding course. IMS must be authorized to participate in Hazardous Duty.

### ***COMBAT ENGINEER OFFICER USMC - MASL : P121802***

This course provides Military Occupational Specialty (MOS) training for basically trained Marine officers in order to produce combat engineer officers. Instruction in supervisory level operational and planning skills, tactical and technical training in mobility, counter-mobility, demolition survivability, and general engineering operations is provided.

Second Lieutenant - Captain (O-1 - O-3).

This is a physically and mentally demanding course.

Hazardous duty required. Because of the nature of this course, must be able to pass the Marine Corps PFT and have the equivalent of six months of Military training in leadership and basic military operations.

The focus of this course is on engineering operations in support of expeditionary operations, it is most appropriate for engineers of ground components.

### ***COMBAT LOGISTICS - MASL : D178144***

This course addresses the roles and responsibilities of logisticians in support of combat, peace, and humanitarian operations. The focus is on logistics at the operational and tactical levels of war. The course addresses how Air Force logisticians, together with other combat support forces, create and sustain capability in a joint theater of operations. This course is designed for personnel assigned to maintenance, supply, transportation, contingency contracting, and logistics plans positions at base-level through joint and unified commands. The course is also suited for personnel in other positions (i.e. civil engineering, services, security, intelligence, and operations planning) who must have knowledge of or interact with combat support and combat sustainment operations.

The course is not designed for personnel in the wholesale acquisition career field. The course combines combat logistics history with current issues and dynamics. Methods of instruction include informal lecturers, guided discussions, a planning exercise, and a literary analysis.

The course is structured to achieve the following objectives:

- Provide an orientation of wartime roles and responsibilities of Air Force logisticians
- Provide an overview of these roles and responsibilities integrated into the larger context of DOD and USAF wartime preparation
- Analyze and discuss the application of the principles of logistics in combat, peace, and humanitarian operations
- Investigate how the application of the principles of logistics support the principles of war
- Provide an anchor for subsequent on-the-job training and professional education for the Air Force logistician

### ***COMBAT SIGNALER - MASL : B132461***

Students in this course perform aviation intermediate maintenance on avionics communications equipment, to include very high frequency, amplitude modulated, frequency modulated, ultra high frequency, and aircraft intercommunications control systems, and radio sets with frequency hopping capabilities. Troubleshoot malfunctioning equipment, using common and specialized hand-tools and test equipment.

### ***COMBAT SURVIVAL TRAINING - MASL : D121001***

The goal of this course is to train aircrew and other designated personnel in parachute descent procedures and employment of principles, procedures, techniques, and equipment that enhance survival, evasion, resistance, and escape (SERE) prospects, regardless of climatic conditions or hostile environments. Its objective is to facilitate their return with honor to friendly forces without rendering aid or comfort to an enemy, with or without organized recovery.

### ***COMBAT SYSTEM INDOCTRINATION (KS) - MASL : P179361***

Through classroom presentation, this course covers the functions of all GIS Combat System elements, as well as high-level overview of each warfare area, regarding detection, control and engagement of air, surface, and subsurface targets. Emphasis is placed on anti-air warfare (AAW), including the Radar System, C&D and WCS. This course provides the context for subsequent classroom and non-classroom training.

### ***COMBINED LOGISTICS CAPTAINS CAREER - MASL : B171727***

Doctrine and instruction in rail operations, motor transport, and marine terminal operations, movements management and power projection.

### ***COMBINED LOGISTICS CAPTAINS CAREER - MASL : B171240***

This course provides ordnance branch specific training that is required for the types of positions that they will be filling upon completion of CLOAC. The program includes maintenance and class IX management, wholesale logistics overview, and technical department training.

### **COMBINED LOGISTICS CAPTAINS CAREER - MASL : B171360**

Phase 3 equips students with skills and knowledge necessary to perform duties as a staff officer on a multifunctional logistics staff. Concentration is on CSS functions (supply, field services, human resources, transportation, combat health support, maintenance, ammunition and explosive ordnance disposal) and logistics support operations.

### **COMBINED LOGISTICS CAPTAINS CAREER - MASL : B171546**

Phase 3 equips students with skills and knowledge necessary to perform duties as a staff officer on a multifunctional logistics staff. Concentration is on CSS functions (supply, field services, human resources, transportation, combat health support, maintenance, ammunition and explosive ordnance disposal) and logistics support operations.

### **COMBINED LOGISTICS CAPTAINS CAREER - MASL : B171545**

This course provides branch specific technical functions in the area of materiel management; logistics automation; petroleum management; subsistence management; airborne and field services; mortuary affairs operations; officer professional development, and Military Operations Other Than War (MOOTW).

### **COMBT CONTROL S/A TRAINER - MASL : P121310**

The goal of this course is to provide Combat Control Training to submarine Section and Fire Control Tracking Parties.

Students will learn to Input scenarios for submarine units to track, trail and engage targets, as well as provide communication and equipment operations simulating actual submarine control centers.

Student must possess a Secret Clearance in order to access the facility where training takes place.

### **COMM BATTLESPACE MGMT CRS - MASL : D132110**

The Advanced Comm Officer Training (ACOT) seminar is the professional development school for intermediate-level C&I officers and civilian equivalents in the 33S career field. The course provides knowledge and skills necessary to perform duties of Communications and Information Officer at the field grade level. It presents current and emerging communications and information programs, initiatives and technologies impacting the Department of Defense total force concept for the communications and information warrior in a fixed and deployed environment. Refer to AFCAT 36-2223 for attendance criteria.

Upon graduation students will be able to:

1. Communications Issues
  - a. Develop an executable Annex K that explains the war fighters use of communications and information systems in expeditionary operations.
  - b. Discuss Air Force, Joint, and Information Operations doctrine and resulting issues.
  - c. Discuss the Communications Squadron Commanders role and issues they face.
  - d. Discuss C4 organizations, systems and networks supporting base ops in an in-garrison environment and resulting issues.
  - e. Discuss the base level and unit level budgeting process and resulting issues.
  - f. Discuss the functions and responsibilities of STEMs and resulting issues.
  - g. Discuss the roles, responsibilities and employment of ANG and AFRC and resulting issues.
2. Information Operations
  - a. Discuss information operations and network security operations issues.
3. War-fighting Integration and Architectures
  - a. Discuss emerging technologies, communications integration and interoperability issues.
  - b. Discuss spectrum management concepts and the roles of various agencies involved in spectrum management.
4. Expeditionary Warfare Support

- a. Discuss communications and information issues involved in the deliberate and crisis planning process.
  - b. Discuss issues involved within the C4 organizations, systems and networks supporting base ops in a deployed environment.
  - c. Discuss the issues of consolidating the sensors, systems and components that form the Air Picture within the Joint Air Operations Center (JAOC) to speed up the kill chain (F2T2EA).
  - d. Discuss the issues faced in providing SatCom to deployed forces to include the impact of command, control, communications computers, intelligence surveillance and reconnaissance (C4ISR).
  - e. Discuss the issues faced by the Joint Interface Control Officer (JICO) in providing Tactical Data Interface Links (TADIL).
  - f. Discuss communications and information issues when working in joint, combined and coalition operations.
5. Scope Falcon
- a. Discuss issues related to Scope Eagle level concerns.
    - 1. Speakers are to discuss issues facing them as commanders.
    - 2. Speakers are to provide a strategic view of what is happening to the C&I career field in general.

***COMM CABLE/ANTENNA SYS APP - MASL : D132113***

The course trains students to perform duties prescribed in AFMAN 36-2108 for Communications Cable and Antenna Systems Apprentice. Training includes an introduction to cable and antenna systems fundamentals; installing, maintaining, reconstituting, removing and modifying copper core, coaxial and waveguide for cable and antenna systems; antenna principles; antenna tower assembly, erection, alignment and maintenance; splicing and sealing communications cables using splice closure methods; fabrication, installation, and maintenance of antenna guys; splicing meteorological and coaxial cables; installation, splicing and testing procedures for trial, underground and buried cable systems; R-F transmission line installation and maintenance; cable fault location; cable pressure systems; cable plant performance testing; installing and maintaining LAN/WAN Distribution Systems including interior wiring; fiber optic splicing procedures; Communications link troubleshooting and restoration; and Certification in pole and antenna climbing.

***COMM/NAV SYS SPECL - MASL : D133066***

This course trains students in the following areas: Introduction to the 2A5X3A career field, general aircraft maintenance practices, safety, security, technical order systems, supply principles, and avionics systems. It also provides training on the fundamental theory of operation and maintenance on avionics systems power distribution, communication systems, dependent navigation systems, independent navigation systems, on-board built in test equipment, system control and displays, computational/mission systems, radar systems, photographic and sensor systems. The course depends heavily on the practical application of technical orders (TO), systems trainers, and grounded instructional training aircraft (GITA) to reinforce basic system principles and maintenance practices. This is a course number conversion of Sheppard AFB, TX course J3ABR2A533A 003, Communication/Navigation/Mission Systems Apprentice, PDS Code C70.

***COMMAND AND STAFF COLLEGE USMC - MASL : P171801***

The goal of this course is to provide intermediate, advanced intermediate and senior level professional military education for field grade officers of the Marine Corps, other services and foreign countries; to prepare them for command and staff duties with Marine Air-Ground Task Forces with emphasis on amphibious operations and for assignments with joint and combined organizations. The intent of the curriculum based on the mission statement is to provide officers with an understanding of the interrelation of the strategic, operational and tactical levels of war within a joint and/or a combined environment and by adapting doctrine and techniques to the changing conditions of warfare, the ability to out-think and out-fight any opponent.

The course is presented in the setting of a "Field Grade Officers Workshop" wherein the emphasis is on producing a well rounded, physically fit, combat ready officer. It includes programs in health and physical fitness (both team and individual), leadership, history and amphibious operations and confronts the students with situations requiring them to solve problems of the type they can expect to encounter in assignments both in and out of the Fleet Marine Force. Formal instruction is primarily of the integrated problem type requiring individual or group application. The course stresses the planning for and the conduct of force-in-readiness operations by the Marine Air/Ground Task Force in all environments and in limited high intensity war situations.

The focus is the development of an officer who understands the capabilities and potential roles of the MAGTF at the operational level of war and how to best task organize, deploy and employ these forces in any tactical environment across the spectrum of conflict. The role of the Marine Corps landing force in amphibious operations as a component of the balanced Fleet is emphasized. In addition, the course addresses staff, joint and amphibious planning; warfighting philosophies, concepts and strategy; military justice; low intensity conflict; computer use and simulations; oral and written communications; and includes a guest lecture program.

### ***COMMAND LEADERSHIP - MASL : P171030***

The goal of this course is to reinforce the fundamental tenets of naval leadership and provide an improved decision making foundation for officers assuming the responsibilities of command. This course is designed for O-5/O-6 en route to their first command tour. The course is conducted using a seminar format with facilitated group discussions and case studies supported by reading and writing assignments. The class size is a maximum of twenty-four students.

### ***COMMUNICATION INFORMATION SYSTEMS OFFICER - MASL : P139400***

The Basic Communication Officer Course (BCOC) is a 23-week program of instruction that provides leadership and professional training in the planning and employment of tactical communications systems in order to prepare company-grade officers for entry-level billets in the Operating Forces. Core curriculum areas include communications theory, single-channel radio networks, tactical telephone switching systems, tactical data networks, tactical multi-channel radio systems, and communications planning.

BCOC is designed for company grade officers (O1 to O3) that have completed the Basic Officer Course (MASL 179250) or an equivalent host-nation course and will fill tactical communications billets (S-6).

A waiver is required for officers in grades higher than O3.

### ***COMMUNICATIONS - MASL : D133022***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***COMPUTER ENG COURSE - MASL : D155049***

This course is designed to provide education for Air Force personnel with AFSC 33SXA and international officers trained under the provisions of the Air Force Security Assistance Program in the knowledge and skills necessary to perform duties of Communications Engineering Officer. It presents current and emerging communications and information programs, initiatives and technologies impacting the Department of Defense total force concept for the communications and information warrior in a fixed and deployed environment. Upon graduation students will be able to:

- **ENGINEERING FACTORS:** Predict reliability and maintainability of communication systems. Design communication links to achieve a specified grade of service by applying basic queuing theory.
- **COMMUNICATIONS LINK ENGINEERING:** Calculate parameters required to set up a high frequency communication link. Calculate parameters required to set up a microwave communication link. Calculate parameters required to set up a troposcatter communication link. Calculate parameters required to set up a satellite communication link. Identify the primary wing communications and information requirements to support a typical theater air base in a deployed environment. Demonstrate site survey and equipment siting techniques required to establish a reliable tactical communications link. Create a multiplexing plan using current Air Force tactical transmission assets for typical expeditionary wing operation. Create a communications package to support operation in a typical theater air base contingency in a deployed environment.
- **NETWORK ENGINEERING AND ANALYSIS:** Design a secure network enclave within a non-secure network. Describe the primary hardware and software tradeoffs associated with designing a base backbone network within a limited budget, to include consideration of quantity, capability and capacity of associated subsystems. Apply modeling

and simulation software/ methods to evaluate performance of a proposed network technical solution. Isolate and correct network problems using network analysis tools and techniques. Construct a technical solution for a user's requirements using network engineering principles.

- **ENGINEERING AND INSTALLATION:** Perform an engineering site survey for a user communications requirement. Write a Project Support Agreement to satisfy a user requirement. Construct an installation project package to fulfill a user requirement. Explain the functions and responsibilities of the STEM B/C. Explain the purpose and processes of the base C&I blueprint.

### ***COMPUTER TECH/SYSTEMS/GRAD - MASL : D178096***

This course is for the student seeking a major in Computer Engineering is provided with a concentration across a wide range of courses including formal computer languages, object-oriented programming, structural programming, data structures, algorithm design, complexity analysis, computer operating systems, computer graphics, optimization techniques, artificial intelligence, distributed and parallel software design, and the spectrum of applications. This curriculum encourages the student to pursue a variety of specialties which are covered in depth with additional special-study courses to study emerging technology and its application to problem solving. Applicants for the computer engineering program should hold an ABET-accredited Bachelor of Science degree in electrical engineering (with a digital emphasis).

### ***COMSEC MT (Deact-SeeTCC) - MASL : P137158***

The goal of this course is to provide Electronics Technicians, Cryptologic Technicians (Maintenance), Aviation Electronics Technicians, selected Department of Defense (DOD) civilian personnel and foreign military personnel with the knowledge and skills required to perform limited maintenance on the AN/USC-43V(), TSEC/KY-57&58, and the TSEC/KG-84 Family equipment at an organizational maintenance level.

SCOPE:

- Training includes the operation, preventive and corrective maintenance, and the replacement of equipment, assemblies, and subassemblies as specified in related operation and maintenance manuals and security of classified materials as specified in OPNAVINST 2221.3 series.

### ***CONTR C3 TRNG - MASL : P179504***

Contractor provided C3 training.

### ***CONTR E2 OJT - MASL : P179584***

The purpose of this course is to provide E-2C on-the-job operation and maintenance training at Northrop-Grumman Corporation.

### ***CONTR E2 S/W - MASL : P179511***

E-2C HAWKEYE MISSION COMPUTER SOFTWARE TRAINING PROGRAM.

### ***CONTR FLIGHT SAFETY TRAINING - MASL : P179970***

Training at various locations to include: B-300 King Air 350; PA-31 (NAVAJO 325); Turbo Commander 840; and Bell 412.

### ***CONTR HARPOON PROG-WEAP ST - MASL : P179458***

Contractor HARPOON PROG-WEAP ST

### ***CONTR JCPTS TRAINING - MASL : P179302***

Contractor JCPTS training.

### ***CONTR SH-2G(E) FLIGHT TRAINING - MASL : P179461***

The purpose of this course is to provide flight training to the aircrews and pilots of the SH-2G helicopter.

### ***CONTR TRNG - MARCORPS - MASL : P179950***

Miscellaneous contractor support training.

***CONTRACT ATTORNEYS COURSE - MASL : B176567***

The focus of the symposium is to update government attorneys on significant changes in government contract law and policy by providing attendees the opportunity to obtain the view of prominent individuals from the government and private sectors. The course features guest speakers and seminars with emphasis on the following: new developments; reiteration of selected contract topics; and policy insights. The symposium serves as the focal point for the continuing education needs of program manager attorneys and includes seminars designed to meet the interests of senior military and civilian attorneys.

***CONTRACT/SPECIAL (ECL70SR) - MASL : D147054***

Contractor provided training that requires a 70 ECL with required Specialized English Training (SET). Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix)

***CONTRACT/SPECIAL (ECL75) - MASL : D147052***

Contractor provided training that requires a 75 ECL. Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix)

***CONTRACT/SPECIAL (ECL80) - MASL : D147051***

Contractor provided training that requires a 80 ECL. Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix)

***CONTRACT/SPECIAL (ECL80SR) - MASL : D147055***

Contractor provided training that requires a 80 ECL with required Specialized English Training (SET). Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix )

***CONTRACT/SPECIAL (ECL85) - MASL : D147058***

Contractor provided training that requires a 85 ECL. Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix)

***CONTRACT/SPECIAL TRAINING - MASL : D147056***

Contractor provided training. Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix)

***CONTRACTING OFFICER REPR - MASL : B154825***

This course provides the student with an overall view of the contracting process, with the major emphasis in contract administration. ALMC DOES NOT CERTIFY individuals to be CORs.

***CONTRACTOR SUPPORT - PSW - MASL : P366CS6***

Contractor Support - PSW

***CONTRACTOR SUPPORT TRAINING - MASL : P179020***

Miscellaneous contractor support training.

***CORROSION CONTROL TECHNICIAN - MASL : D141282***

This course is designed to train maintenance personnel in the fundamentals of corrosion control. Students learn procedural requirements for the detection, prevention, and treatment of corrosion on aircraft and equipment. Focus is placed on safety, proper technical order usage, and surface preparation. Finally, students will learn the fundamentals of painting aircraft parts. Students are required to pass a written and performance progress checks at the end of each block prior to advancement to the next block of instruction.

- **BLOCK I FUNDAMENTALS** This block begins with a course orientation, where students learn about the academy's policies, programs, and academic objective requirements. They will learn the fundamentals of ground safety, personal protection, fire prevention, use and storage of chemicals. Students are taught how to identify and use technical orders. Students will learn of the environmental impact of improper corrosion control practices. They will discuss the

characteristics of metals. Additionally, students will learn the factors, types of corrosion, and the effects of corrosion on all aircraft structural surfaces.

- **BLOCK II CORROSION REMOVAL AND SURFACE TREATMENT** Cleaning methods are explained and taught according to technical orders. Students are taught treatment of metals, inspection techniques and corrosion removal procedures using mechanical and chemical methods. Additionally, students will discuss the correct procedures and methods of storage and disposal of chemicals.
- **BLOCK III APPLICATION OF COATINGS** Students will learn about the compatibility and composition of coatings. They will practice the care and correct usage of painting equipment along with the latest painting techniques. Finally, according to technical order procedures students will apply polyurethane coating on training parts.

### ***COUNTERDRUG INFO ANALYST - MASL : B129202***

This course provides training for basic intelligence duties and responsibilities in tactical intelligence; intelligence preparation of the battlefield; internal defense and development; security of operations; analysis techniques; operate in a joint intelligence center; mandated minimum of 12 hours of instruction on human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***COUNTERDRUG OPS-SPANISH - MASL : B121427***

This course provides comprehensive and specialized training in counterdrug interdiction operations at the detachment, platoon, and company level; emphasizes staff planning and command and control during effective execution of counterdrug operations against realistic targets and objectives; advanced marksmanship with both rifle and pistol; precision operations in urban environments; riverine operations; development of intelligence packets in support of counterdrug operations; intelligence preparation of the area of operations; physical fitness; unarmed restraining and disarming techniques; explosive and ballistic building entry techniques; land navigation; communications; staff organization and planning; special infiltration and exfiltration techniques; clandestine airfield interdiction techniques; drug laboratory destruction and safety considerations; evidence handling; treatment and handling of suspects; tactical patrolling operations; leadership; planning; command and control in urban or rural permissive counterdrug environment; Minimum 12 hours instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***COUNTRY LIAISON OFF-SPANIS - MASL : B179110***

This MASL is used when training is programmed for liaison officer.

### ***CPO ACADEMY – COAST GUARD - MASL : P171302***

This course teaches management of organizational behavior, management principles, leadership, personal and physical development, written and oral communications, interpersonal relationships, teambuilding, and human resource development. This course is required before USCG E-7s can be promoted to E-8. Students typically have 12-14 years service including positions with supervisory experience. Classroom instructional methods include lectures, discussion, role-playing, case studies, and problem solving.

### ***CREW RESOURCE MANAGEMENT INSTRUCTOR - MASL : P115025***

The Crew Resource Management (CRM) Instructor Course provides the Required knowledge and skills for selected mission qualified flight crew Members (O-3 and E-6 or above) to function as CRM curriculum model Managers. The course includes training in the implementation, instruction, and development of type/model/series specific CRM programs and is designed to satisfy OPNAVINST 1542.7 requirements. Scope: Basic instruction includes CRM history, seven critical skills, CRM methodology, computer aided curriculum development, contract administration, CRM instruction and evaluation, case study and scenario development, facilitation, instructional techniques, program management and administration, fatigue countermeasures, and OPNAVINST 1542.7 (Series).

It is proposed that students be mission qualified flight crew members (O-3 and E-6 or above) and have at least 18 months remaining on current PCS tour upon completion of the course.

### ***CRIMINAL INVESTIGATION - MASL : B173580***

This program trains enlisted personnel to the level of probationary CID special agents in the subjects of criminal law, crime scene processing, testimonial evidence, investigations of crimes against persons and property, physical evidence, drug investigation, fraud and waste, investigative reports, special investigative techniques, protective services, and the provisions of CIDR 195-1. Trains enlisted personnel to the level of probationary CID special agents in the subjects of criminal law, crime scene processing, testimonial evidence, investigations of crimes against persons and property, physical evidence, drug investigation, fraud and waste, investigative reports, special investigative techniques, protective services, and the provisions of CIDR 195-1.

### ***CRIMINAL LAW NEW DEV CRS - MASL : B176555***

Scope: This course focuses on developments during the past term of court in the following areas: military criminal procedure; substantive criminal law; professional responsibility; evidence; and advocacy.

### ***CRITICAL CARE AIR TRANSP - MASL : D175141***

The Critical Care Air Transport Team Course is a 10 day course which is designed to prepare AD, ANG or AFRES commissioned officers and enlisted personnel performing duty in AFSC 46XX, 45XX, 44XX, and 4H0X1 and assigned to Critical Care Air Transport Team Unit Type Codes to meet wartime mission of caring for critically ill and injured patients in the medical evacuation environment.

### ***CRITICAL CARE NURSING - MASL : B175305***

Course instruction is presented through lectures, conferences, discussion, practical exercises, examinations, and clinical practicum. Major areas of instruction include fundamentals of Critical Care to include the aspects of nursing in the following areas: respiratory, basic cardiovascular, advanced cardiovascular, acute renal failure, hepatic disorders, hematology/oncology, neurological and endocrine, trauma management, pediatrics, infectious disease, OB/GYN and genitourinary, eye, ear, nose and throat, musculoskeletal, environmental, integumentary, psychological/psychiatric, and core emergency care across the life span in any critical care setting. Portions of this course are jointly instructed with the 6F-F6 Emergency Nursing Course at BrookeAMC. The courses (6F-F5 and 6F-F6) run concurrently and are jointly resourced.

### ***CRITICAL INFO SYS TECH - MASL : B155425***

This course probes the rapid advances in all aspects of information systems technology from the perspective of both the functional and the information resources manager. The course provides an overview of both the current state-of-the-art and the trends in information systems technology with particular attention to software development technologies, data management, computer systems hardware, human-computer interfaces, voice recognition, natural language understanding, collaborative technologies, telecommunications technologies, and electronic commerce technologies. It concludes with a group exercise designed to determine how a CIO can address the issues these technologies introduce within an organization.

### ***CSCDEP FINAL RESIDENT SMNR - MASL : P171851***

This the FINAL resident portion of the 1-year program. Other MASLs required: P171850 and P471850.

The intent of the CSCDEP program is to provide officers with an understanding of the relationship among the strategic, operational, and tactical levels of war within a joint/multinational environment. In conjunction with the application of Marine Air-Ground Task Force (MAGTF) doctrine and techniques for the changing conditions of warfare, this understanding provides officers with the tools necessary to defeat opponents. The focus of the program is to develop officers who understand the capabilities and potential roles of a MAGTF in a joint/multinational environment.

MAGTF Expeditionary Operations (8906): Marine Air-Ground Task Force (MAGTF) Expeditionary Operations focuses on the concepts, considerations, and procedures attendant to the task organization, deployment, and employment of a MAGTF. It provides an overview of offensive and defensive operations and inserts a case study on the Korean War. The course provides an understanding of expeditionary maneuver warfare, the organization and types of Marine air-ground task forces (MAGTFs), operational concepts, single-battle, and force deployment planning and execution, as well as logistics, command and control, intelligence, and fire support to the MAGTF. A sound knowledge of the Marine Corps concept of warfighting, its organization, and how it conducts operations, provides the basis for understanding Marine Corps contribution to joint operations.

Amphibious Operations (8907): Amphibious Operations examines the different types of amphibious operations and current joint landing force doctrine. The course discusses the MAGTFs role in a joint environment within the context of operational and

strategic planning in support of amphibious operations. The goal of this course is to enable you to become competent and confident enough to participate in a planning cell of any type (joint, combined, Service, etc.) and discuss and plan for amphibious operations. You will be able to understand the kinds of interactions that will occur between planners of different staffs, to identify amphibious planning considerations, to understand the amphibious planning process, and to contribute immediately to the joint planning and execution effort.

Operations Planning (8908): The Operational Planning course is the culminating course for the CSCDEP. It teaches military operational planning using the Marine Corps Planning Process (MCPPE), which is based on the MCWP 5-1 (Marine Corps Planning Process) and MCDP 1-0 (Operations). Operational Planning offers the student the most current information on Marine Corps planning and real world planning lessons learned. The main focus of this course however, is the opportunity each student is given to develop planning products for an operations plan, based on a realistic operational scenario, using everything learned in the program. The practical exercise is imbedded throughout the course.

Graduation: The graduation ceremony for this program is conducted in conjunction with the resident Command and Staff College graduation ceremonies. Each student from both the resident school and this program will have their diplomas presented by the distinguished guest, the Director of the college, and the President of the Marine Corps University.

### ***CSCDEP INIT RESIDENT SMNR - MASL : P171850***

This is the initial resident portion of the 1-year program. Other MASL s required: P471850 and P171851.

The intent of the CSCDEP program is to provide officers with an understanding of the relationship among the strategic, operational, and tactical levels of war within a joint/multinational environment. In conjunction with the application of Marine Air-Ground Task Force (MAGTF) doctrine and techniques for the changing conditions of warfare, this understanding provides officers with the tools necessary to defeat opponents. The focus of the program is to develop officers who understand the capabilities and potential roles of a MAGTF in a joint/multinational environment.

Theory and Nature of War (8901): This course introduces students to important military theory and describes its impact on how we conduct war. The student will read selected works of history's greatest military theorists and then compare and contrast their theories. By applying these theories to selected eras and events in military history, students will be able to analyze the evolution of warfare from the 17th century to the present, and recognize and describe the nature of change in the characteristics of war in selected time frames. This course also discusses the concept of an "American way of war" and how it helped frame how Marines think about and conduct war.

National and International Security Studies (8902): This course imparts in students the requisite knowledge of the national security structure expected of field grade officers operating in a joint environment. Officers at this level can expect assignments that require not only knowledge of the national security environment, but the ability to synthesize that knowledge (the means) in order to develop and convey strategies (the ways), which lead to the accomplishment of complex tasks (the ends). The Theory and Nature of War course provided the foundation for this course, while the Operational Level of War course will utilize what is learned here to facilitate a better understanding of the application of the military instrument of national power.

Graduation: The graduation ceremony for this program is conducted in conjunction with the resident Command and Staff College graduation ceremonies. Each student from both the resident school and this program will have their diplomas presented by the distinguished guest, the Director of the college, and the President of the Marine Corps University.

### ***CSCDEP ON-LINE SEMINAR - MASL : P471850***

COMMAND & STAFF DISTANCE EDUCATION PROGRAM, NON-RESIDENT SEMINAR

This is the ON-LINE portion (or Non-Resident) of the one-year program. Other MASL s required: P171850 and P171851.

The intent of the CSCDEP program is to provide officers with an understanding of the relationship among the strategic, operational, and tactical levels of war within a joint/multinational environment. In conjunction with the application of Marine Air-Ground Task Force (MAGTF) doctrine and techniques for the changing conditions of warfare, this understanding provides officers with the tools necessary to defeat opponents. The focus of the program is to develop officers who understand the capabilities and potential roles of a MAGTF in a joint/multinational environment.

Operational Art (8903): Operational Art focuses on the analysis of strategic guidance provided by the President and Secretary of Defense and on the translation of that guidance into operational direction in the form of a campaign plan designed to achieve military objectives. The course examines the concept of operational (theater level) warfare and the relationship among the three

levels of war: strategic, operational, and tactical. It explores the organization of joint forces, other Service warfare, information operations, and cultures affect on operations. Lastly, it examines, the considerations associated with operational planning in a joint/multinational environment and war termination.

**Joint Warfighting (8904):** Joint Warfighting is primarily designed to give you a more robust knowledge of competency, joint planning systems and tools, joint operational capabilities, joint targeting, specialized joint operations, multinational operations, and your potential role in homeland security/defense in coordination with the interagency community. This course focuses on promoting sound operational planning which relies upon a firm grasp of the types of joint planning tools, forces, and specialized operations taught in this course.

**Small Wars (8905):** Small Wars discusses the aspects of military operations that focus on deterring war and promoting peace and stability in an environment characterized by other than large-scale combat operations. It offers study in culture and ethics and focuses on those very difficult aspects of stability and reconstruction operations. Insurgency and counterinsurgency are also key topics within the course. Small Wars explores how the U.S. becomes involved in entangling situations then must use all elements of national power to accomplish national goals and aspirations. This course provides a foundation on which to assess a situation, decide whether military response is appropriate, and justify the validity of that decision.

**PREREQ:** Offered to Officers O-4 and above, active and reserve, civilians employed by DOD GS-12 and above, and approved IMS.

**DURATION TOTAL OF ALL THREE SEMINARS:** One year.

### ***CT-COMBATING TERROR/DEMOC - MASL : P179018***

The Center for Civil-Military Relations (CCMR) conducts a two-week Regional Defense Counterterrorism Fellowship Program (CT Fellowship) course entitled Civil-Military Responses to Terrorism. Programs for global audiences will be conducted in Monterey, CA. The key objectives of the course of instruction are to: (1) support international understanding of the politico-military components of combating international terrorism; and (2) enhance the capabilities of coalition partners to develop effective short- and long-term programs to combat terrorism that are consistent with democratic principles. The Civil-Military Responses to

Terrorism course provides a thorough understanding of terrorism in all its forms, with considerable emphasis on strategy formulation and international cooperation. The program utilizes case studies and simulation exercises to stimulate thoughtful discussion, providing participants with the insight needed by decision-makers and their advisors to design successful strategies to contain or defeat modern terrorism. The Monterey program is conducted annually in April.

Participating countries are identified by Regional Combatant Commanders and issued invitations by the Office of the Secretary of Defense. Within each participating country, an even balance of military officers and civilian officials will be ideal. Seniority will vary with the size of a country's defense forces, but the course will resonate best with mid-senior grade officials involved in combating terrorism. The Civil-Military Responses to Terrorism course will be offered in residence at the Naval Postgraduate School, Monterey, once a year. A second course can be scheduled depending on demand.

Overseas versions of this course can be delivered to single countries by Mobile Education Teams under MASL#P309069, or to regional groupings of countries under the MASL#P273011. **SPECIAL NOTE:** Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***CURRICULUM DEVELOPMENT - MASL : D305011***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***CUSTOMIZ COMPREH MISSILE - MASL : P193142***

**CUSTOMIZABLE COMPREHENSIVE MISSILE TRAINING**

This course will provide EOD procedures on approved missile systems using the current 60 series publications on the following missiles: AMRAAM, Dragon, HARM, Harpoon, Hawk, Hellfire, Javelin, Maverick, Patriot, Phoenix, Penguin, Redeye, Roland, Rolling Airframe Missile (RAM), Sea Sparrow, Shrike, Sparrow, Sidewinder, Slam, Snapper, Standard, Standard-ARM, Stinger, Tartar, Terrier, Tomahawk, TOW

Prerequisite is successful completion of International EOD Phase 2 (Surface), CIN: A-431-0019, MASL: P123300 within the preceding five years. Length of course is nine (9) days.

### ***DAMAGE CONTROL, SM CUTTER - MASL : P129700***

This course is designed to train students to act as team members in fire fighting and damage control. Classroom instruction covers damage control equipment, procedures and principles, dewatering, post-fire atmospheric testing, fire fighting, fire science, repair kits, and investigation.

### ***DAMAGE CONTROL MAN "A" - MASL : P122209***

This course teaches enlisted personnel to perform at the job entry level in the Damage Controlman rating. Subjects taught include woodworking, woodworking power tools, building maintenance, pipe fitting, residential electricity, ground tackle, sanitary systems, oxyfuel cutting, silver brazing, arc welding, fire fighting, damage control, plumbing, watertight fitting maintenance, masonry, and chemical, biological and radiological defense.

Students must have, or report with, sufficient funds (approximately USD 60) to purchase steel-toed safety shoes for participation in this course.

### ***DAMCONT REPAIR PARTY LDR - MASL : P166235***

This course is designed to train personnel in pay grades E-5 and above in advanced damage control theory and techniques so that they may fill Repair Party Leader Billets in the shipboard damage control organization, to facilitate the proper management of repair party personnel in casualty situations under all shipboard readiness conditions. A two part, multi-phased course, incorporating group-paced classroom with practical hands-on instruction in simulators. Part I, Damage Control fundamentals/systems include: Partial preliminary actions to be taken before damage occurs. Minimize and localize damage after it occurs. Accomplish emergency repairs to control fires and flooding and to preserve ship's stability and buoyancy. Part II, Chemical, Biological and Radiological (CBR) Defense include: Both technical aspects and practical applications of chemical and biological defense (i.e., individual protective clothing and equipment, shipboard decontamination and chemical agent detection). Instruction in nuclear defense includes terms and effects, countermeasures, hazards and responses, dose and dose rate instruments, personnel monitoring, shipboard surveys and radiological plotting.

PREREQUISITES: Complete the Personnel Qualification Standards for: Basic Damage Control, NAVEDTRA 43119-G (series) and Advanced Damage Control Emergency Parties 100 and 200 sections, NAVEDTRA 43119-G (series). Medical screening by parent command is required prior to arrival to ensure individuals are medically qualified to participate in the course. Orders must be stamped or typed with "Medically Qualified". An individual will be immediately disqualified if he/she: 1. Has had in the last ten days or is currently being treated for pneumonia, bronchitis, or asthma. 2. Has any fractures, sprains, splints, or casts. 3. Is greater than three months pregnant. The following conditions require evaluation by a corpsman and decision rendered regarding training suitability prior to the individual's participation: 1. History of heart disease or stress related chest pain. 2. Current nasal congestion, or an ear, nose, or throat infection. 3. Within ten days of post-operative procedure (minor surgery). 4. Taking any medications. 5. On limited/light duty or had a tooth extraction within the last seventy-two hours. 6. History of prior heat exhaustion or heat stroke. 7. Any other condition, which may affect ability to complete the course. 8. Unable to participate in or complete the PRT. This course is open to all rates.

### ***DATA LINK COMM SYS MT TECH - MASL : P139600***

#### **DATA LINK COMM SYS MT TECH**

To train selected Electronics Technicians (ET) in pay grades E1-E7 to operate, perform corrective maintenance, and selected preventive maintenance on the equipments and systems associated with CDS Data Links 4A, 11, and 16 including Joint Tactical Information Distribution Systems (JTIDS) and Command and Control Processor (C2P) and Shipboard Gridlock System.

Notes: Student must possess normal color vision.

### ***DATA SERVICES - MASL : D305035***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***DECISION RISK ANALYSIS - MASL : B151805***

This course provides a comprehensive introduction to the qualitative and quantitative methodologies, which can be applied in conducting and decision analysis of a project or program. Practical experience is gained through the use of actual case studies, which have been adapted for instructional purposes. Specific subjects include probability theory, distributions, and random variables; data collection and preliminary analysis; modern decision theory and software; and integrative practice through small group workshops based on actual case studies. (Note that the current 1-week course is roughly equivalent to the first week of ALMC's former 2-week Decision Risk Analysis Course, DRAC, formerly ALMC-DA.)

### ***DEF ACQUISITION MGMT - MASL : P159200***

#### **PRINCIPLES OF DEFENSE ACQUISITION MANAGEMENT RESIDENT COURSE**

This resident course taught at the Naval Postgraduate School in Monterey, CA provides the student with an understanding of the underlying concepts, fundamentals and philosophies of the defense acquisition management process and the practical application of the program management methods within this process to achieve international security goals. The course addresses management characteristics and competencies, control policies and techniques, systems analysis methods, risk management, and functional area concerns. Techniques for interpersonal relationships are examined in team exercise settings. Topics include the evolution and current state of defense acquisition policies and management practices in a defense environment characterized by civilian control of the military; the systems acquisition life cycle; strategic planning and implementation; business and financial management; user producer acquisition management disciplines and activities; contracting and purchasing; logistics; and program planning, organizing, staffing, directing and controlling. Case studies are used to analyze various acquisition issues. The course is taught in English (the ECL score of 80 is waiverable). This course is suitable for military officers (grades O-4 - O-6) and civilian officials (GS-11 - GS-15 or equiv.) consisting of both U.S. and foreign military and civilian officials. Professional managers engaged in a broad range of acquisition fields such as policy development, contracting, program management, defense planning, production and quality assurance, logistics, and systems analysis are examples of potential attendees. This course is approved for E-IMET funding for civilian students. Class size is limited to 20 students.

### ***DEF RES MGT CRS - MASL : P162002***

The DRMC course applies basic concepts, techniques, and analysis to enhance the understanding, competence, and capabilities of U.S. and foreign military and civilian personnel in the allocation and use of scarce resources. Within the specified eligibility, the course is suitable for professional managers working in any functional field concerned with resource allocation. This could include a broad spectrum of fields (including operations, logistics, manpower, procurement, financial management, and related fields), and a wide range of professionals (for example, program managers, planners, engineers, evaluators, and systems analysts). In addition to the general objectives for all DRMI programs, this course is designed to apply the basic concepts and techniques of allocation and use of scarce resources to illustrations of: analysis and evaluation of programs and policies; and evolution and design of U.S. defense management systems. The course emphasizes the decision makers broad perspective, which requires appreciation of the capabilities and limitations of a wide range of analytic concepts and systems, and awareness of the critical interdependence between and among such tools and specific decision making environments.

### ***DEF TECH & SYS-MS - MASL : P179039***

DEFENSE TECHNOLOGY AND SYSTEMS COURSE. Provides qualified personnel with an advanced understanding of the dynamic complexity of military warfare for exploiting emerging technologies to achieve war-fighting advantages. The joint curriculum provides a platform for the education and the integration of operational staff and defense technologists to plan, design, develop, create, operate and sustain Integrated Military Forces of the 21st Century.

The first two quarters of the joint curriculum will be conducted at National University of Singapore by faculty from NUS and NPS, and will provide a firm grounding in key technical and project management skills. The third to sixth quarters will be conducted at NPS, where the students will enter into designated specialization tracks such as Communication Systems, Sensor Systems, Operations Research, Information Assurance and Guided Weapons Systems. The students will blend their pernational experience with a thorough technical education to expeditiously integrate new technological capabilities into operational applications. Upon successful completion of the coursework, an integrated project, and thesis research, the student will be awarded a joint NPS/NUS Master of Science degree in the appropriate technical field, such as Electrical Engineering, Computer Science, Mechanical Engineering, Operations Research.

### ***DEI TRNG & CERT - MASL : P148352***

#### **DIESEL ENGINE INSPECTION (DEI) TRAINING AND CERTIFICATION**

To provide personnel in the Engineman Rating, pay grade E-7 and above, and Machinist Mate (SS) (Auxiliary) pay grade E-7 and above with training and certification to perform Standardized Diesel Engine Inspections on various Diesel Engines used for Marine Propulsion or Diesel Generator Service above 400 BHP.

Course graduates will be able to analyze, interpret, troubleshoot and provide corrective action, orally and in writing on Diesel Administrative support programs; Diesel Engine Components and System Faults or Malfunctions using applicable technical references, logs, records, TYCOM instructions, special tools and instruments. Interpret readings from logs and records to identify or pinpoint potential problem areas. Inspect, measure and interpret dimensions of engine stationary and moving components to determine serviceability. Describe common faults, inspect, interpret and determine serviceability of the following systems: Fuel oil, Lube oil, Cooling water, Intake air, Crankcase ventilation, Exhaust and Starting systems. Analyze, interpret and provide corrective actions on internal and external alignment problems. Describe pre-start and post-start checks and inspections, system and component flushing procedures and instrumentation and safety devices common faults and adjustments. Describe Diesel Engine failure analysis procedures and techniques to analyze various engine components.

### ***DEI TRNG & CERT - MASL : P148384***

#### **DIESEL ENGINE INSPECTOR TRAINING AND CERTIFICATION (DEI)**

To provide personnel in the Engineman Rating, pay grade E-7 and above, and Machinist Mate (SS) (Auxiliary) pay grade E-7 and above with training and certification to perform Standardized Diesel Engine Inspections on various Diesel Engines used for Marine Propulsion or Diesel Generator Service above 400 BHP.

SCOPE: Course graduates will be able to analyze, interpret, troubleshoot and provide corrective action, orally and in writing on Diesel Administrative support programs; Diesel Engine Components and System Faults or Malfunctions using applicable technical references, logs, records, TYCOM instructions, special tools and instruments. Interpret readings from logs and records to identify or pinpoint potential problem areas. Inspect, measure and interpret dimensions of engine stationary and moving components to determine serviceability. Describe common faults, inspect, interpret and determine serviceability of the following systems: Fuel oil, Lube oil, Cooling water, Intake air, Crankcase ventilation, Exhaust and Starting systems. Analyze, interpret and provide corrective actions on internal and external alignment problems. Describe pre-start and post-start checks and inspections, system and component flushing procedures and instrumentation and safety devices common faults and adjustments. Describe Diesel Engine failure analysis procedures and techniques to analyze various engine components.

Prerequisites: International Military Students are required to complete the prerequisite course: (MASL P145453) A-652-0320, Diesel Eng C Core and it is highly recommended that they attend the Caterpillar 6.25 Diesel Engine Course (MASL P145171) taught by U.S. Coast Guard at TRACEN Yorktown. International Military Students are required to complete a pre-test within the first 2-3 days of training.

### ***DENTAL LABORATORY SPECL - MASL : D175038***

Provides fundamental instruction for procedures accomplished in Air Force dental laboratories. Includes training on complete denture fabrication, acrylic base relines and repair, fabrication of orthodontic appliances and specialized prostheses, removable partial denture fabrication, crown and fixed partial denture fabrication and dental ceramics.

### ***DENTAL SPECIALIST - MASL : B175231***

Provides the student with the skills necessary to perform tasks required of a dental assistant in the examination, care and treatment of dental diseases and disorders. Subjects include preventive dentistry, dental records and equipment and basic dental sciences..

### ***DENTAL-ENDODONTICS - MASL : P175203***

To update skills directed at the general dentist.

### ***DEPT HEAD LEADERSHIP CRS - MASL : P171040***

DEPARTMENT HEAD LEADERSHIP COURSE

Purpose: the purpose of this course is to provide prospective department heads with the requisite naval leadership skills necessary to function as effective leaders as a department head.

Scope: the department head leadership development program consists of two subsections. The first subsection is the classroom attendance of the department head leadership course. The second subsection is recommended e-learning courses to support the department head leadership program and the course. The department head leadership course (DHLC) supports sailor's O1, and above, en route to a department head assignment. The navy leadership competency model (NLCM) assigns the following competencies to the department head development program: accomplishing mission, leading people, leading change, working with people and resource stewardship. Students will be applying leadership skill sets based on the content derived from the NLCM. Students may not return to parent command for duty or watch standing IAW NAVADMIN 033/06. All students are required to establish an NKO account at least 14 days prior to desired class convening.

### ***DEPT RESOURCE MGT-SPANISH - MASL : B169355***

Resource management concepts; principals; methods; techniques; systems analysis; and decision making skills; culminating with a practical, hands-on resource management case study; economic reasoning; management theory and group dynamics; quantitative reasoning; strategy/policy formulation; analytical decision making; and program analysis, implementation, execution, and control; additional instruction for each student integrates a mandated minimum of eight hours of instruction of human rights; the rule of law; due process; civilian control of the military, and the rule of the military in a democratic society.

### ***DEVELOPERS COURSE - MASL : P166808***

PURPOSE: To training students on the design and development of curricula in accordance with the Systems Approach to Training (SAT) Manual. This course provides the knowledge, skills and attitudes required to succeed as a Curriculum Developer. The course includes instruction and application in applying the principles of adult learning, conducting a learning analysis, writing learning objectives, developing test items, writing instructional materials and developing media. Additionally, a Master Lesson File (MLF) is assembled individually based upon assigned Individual Training Standards (ITS s). Students are also taught the processes associated with the developing and generating a Course Descriptive Data (CDD) and Program of Instruction (POI) using an Automated Instructional Management System. All materials for this course are provided by IMS.

UNIFORM/EQUIPMENT REQUIREMENTS: Students should bring appropriate service uniforms. Students will check in wearing the Utility uniform and it will be worn for all periods of instruction Monday-Friday.

### ***DIAG MGMT ORAL TRAUMA - MASL : P175679***

DIAGNOSIS AND MANAGEMENT OF DENTAL AND ORAL-FACIAL TRAUMA

To update skills directed at the general dentist. This course is designed for the dental officer who wishes to increase knowledge and expertise in treating the patient with dental and associated oral facial trauma. Various situations and injuries the general dentist is likely to encounter in a military career will be addressed. Scope: Course will include initial evaluation and stabilization of the patient, tooth borne trauma, soft tissue and hard tissue trauma of the head and neck. The didactic lectures will be augmented with hands-on laboratory sessions where the participant will have the opportunity to practice techniques to enhance confidence with these newly learned methods.

### ***DIESEL ENG C SCHOOL CORE - MASL : P145453***

Provides training to designated strikers and personnel in the Engineman rating, pay grade E-3 and above, Machinist Mate (SS), pay grade E-5 and above, and Construction Mechanic, pay grade E-5 and above, prior to attending training on specific diesel engines. Enables students to interpret readings to solve crankshaft deflections and shaft alignment problems; test/inspect

lubricating oil/fuel oil; test and treat Jacket water cooling systems; measure running clearances and other dimensions of Roots-type blowers, turbochargers and power unit assemblies; identify and correct problems related to main and accessory drive trains of diesel engines; use 3-M system documents and technical manuals to perform PMS on mechanical/hydraulic governors, diesel engines and related equipment; analyze trend analysis data to correct abnormal operating conditions of diesel engines; observe and adhere to safety precautions and equipment protection procedures when operating and maintaining diesel engines; perform engine room supervisor watch standing.

### ***DIGITAL MULTIMEDIA COURSE - MASL : B164581***

To train selected officer/enlisted personnel and civilian employees of the Department of Defense in the principles, techniques, and skills required performing the duties and functions of a digital multimedia technician. The Digital Multimedia Course (DMC) provides training in the knowledge and skills needed to create text, graphics, sound, animation and full-motion video, and then integrate these elements into multimedia and web-based packages. The course includes instruction in the operation of computer systems, input and output devices to acquire, enhance, design, manage, output, and archive digital imaging, graph design and multimedia files. Students use software to create, manage and output the following: composite layouts, graphic designs, page layouts, video productions, web pages and interactive multimedia solutions. The Digital Multimedia Course also includes theoretical and working instruction of computer fundamentals and functions, trouble shooting, networking, communications, color theory, and the principles and implementation of color management. Ethical considerations and practices are discussed as they pertain to the Department of Defense.

### ***DISAM-MTT - MASL : D305024***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***DISASTER PLANNING MET - MASL : D309041***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***DISASTER PREP OPS SPEC - MASL : P173437***

Provides officers, civilians and enlisted personnel having responsibility for disaster preparedness with the skills necessary to prepare for, defend against, and recover from major accidents and natural or man-made disasters.

### ***DISASTER PUBLIC HLTH MET - MASL : D309017***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***DIST PLANT/COND/HEAT EXCH - MASL : P145276***

Trains personnel to perform preventive and corrective maintenance on Distilling Plants, Condensers and Heat Exchanger. Scope: This course requires students to perform maintenance on Distilling Plants, Condensers, and Heat Exchangers in a laboratory environment. In addition, students will describe terminology, service use, material specifications, operating characteristics, equipment adjustments, and identification (name plate data) per applicable technical references.

### ***DIVER EXPLOSIVE ORD DISP - MASL : P179190***

Provides qualified non-diving personnel with the basic training necessary to safely and effectively perform as a dive team member in Scuba/MK-16 mixed-gas UBA diver in accordance with the U.S. Navy Diving Manual. Diving operations may be performed from surface or subsurface vessels, mobile units, detachments or other sea/shore installations as necessary.

### ***DIVER FIRST CLASS - MASL : P179011***

Trains Divers Second Class to become Divers First Class, proficient in all areas of diving, hyperbaric chamber operations and underwater permanent repairs. Includes advanced diving physics and medicine, diving supervisor training, diving systems certification and hazmat storage, handling and disposal.

"Provides prerequisite knowledge and skills needed to be assigned as a member to a surface-supplied mixed-gas diving station."

### ***DIVER SCUBA - MASL : P179125***

To provide instruction in the operational use and maintenance of open circuit SCUBA and associated diving techniques.

SCOPE: Instruction includes diving physics and medicine, basic scuba diving procedures, underwater search procedures and underwater work with open circuit SCUBA. Qualified to a maximum depth of 130 feet.

SPECIAL INFO: Report one working day prior to the convening date for administrative processing. Be prepared to participate in daily strenuous exercise for about one hour. This includes three-mile runs, 1000 yard swims and numerous calisthenics. The screening test in Exhibit 5 of MILPERSMAN 1410380 establishes the MINIMUM PHYSICAL STANDARD. This test will be given again on the first day and anyone who fails is not eligible to attend the course. Bring a good pair of running shoes and one pair of steel-toed boots. Students cannot be pregnant. Physical examination forms SF88 and SF93 should be forwarded to NAVDIVESALVTRACEN 45 days before the class convening date for review. A point of contact name should accompany each physical.

### ***DIVER SECOND CLASS - MASL : P179101***

This course is a pre-requisite for P179011.

Provides basic instruction, training and qualification in Surface Supplied Air diving equipment to a maximum depth of 190 ft and SCUBA to a maximum depth of 130 ft. Includes diving physics, medicine, SCUBA, Surface Supplied diving systems (Mk.21 and Mk.20), diving techniques and procedures, underwater mechanics and tools. This course is a pre-requisite for P179011/Diver First Class, and P719149/Diving Salvage Officer.

### ***DIVING CASUALTY RECOG/TRT - MASL : P175002***

The recognition and treatment of diving casualties course is designed to provide medical officers with the basic training necessary to safely and effectively perform as a medical advisor for hyperbaric treatments and to effectively evaluate divers and diver candidates prior to diving. Prepares medical officers in identifying diving diseases and injuries, and initiating the appropriate treatment, performing appropriate diving medical examinations and performing as an inside tender for hyperbaric chamber operations.

### ***DIVING OFF MEDICAL DEPT - MASL : P175503***

This course is an integral part of the Naval Undersea Medical Officer course (A6A-2200). The course provides training necessary to: - support fleet diving operations - diagnose and treat diving related illness/injury - support hyperbaric chamber operations - evaluate fitness for diving duty - qualify in Scuba and surface-supplied air diving. The course as designed will provide hyperbaric chamber, open circuit Scuba and surface-supplied air diving qualification. It will provide training in diving physics, decompression procedures, diving medicine, Scuba, air and mixed-gas diving. PREREQUISITE: Must pass the prerequisite physical screening test as found in MILPERSMAN 1220-100. Test will be administered the second day of training. Open to Medical Officers and Physician Assistants (PAs) providing operational support.

### ***DLA SA/FMS MANAGEMENT CRS - MASL : B151925***

This 2-day course is designed to train personnel in the following areas:

- Inventory Control Points (ICP)
- Defense Distribution Centers (DDD)

- Transportation
- Defense Contract Management Agency (DCMA)
- Defense Reutilization and Marketing Service (DRMS)
- Defense Logistics Information Service (DLIS)
- Selected Military Service participants

Participants will learn how to execute the DLA FMS mission and interface/support the foreign customer. The course covers the DLA procedures and policies for initial, as well as follow-on, support and delivery of FMS items to the foreign customer. Areas of coverage as they pertain to SA/FMS are:

- Policies, laws, and regulations
- DLA SA Program Overview
- FMS Requisition Processing
- International Logistics Program
- Waivers/Special Support Arrangements and Country/Case Suspensions
- Requirements Determinations
- Supply Discrepancy Report Procedures
- DLA Depot Policies and Directives
- FMS Warehouse Procedures
- FMS Transportation Policies and Procedures
- DCMA, DESC, DRMS, and DLIS operations in support of FMS

### ***DLI ENGLISH LANGUAGE TECH - MASL : D307011***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***DOCTRINE DEVELOPERS - MASL : B159020***

This course will provide doctrine developers with skills and knowledge to manage the doctrine development process. The course will orient students to the relationships of the various types of doctrine, doctrine processes, and life cycle management of Army doctrine. The course provides a foundation that addresses the technical aspects of doctrine development.

### ***DRILL INSTRUCTOR USMC - MASL : P166801***

The purpose of the course is to further develop the knowledge, physical condition, command presence, instructional skills, and leadership abilities of selected, noncommissioned and staff noncommissioned officers so that they will be able to successfully perform the duties of a Drill Instructor. The course provides instruction in leadership, standing operating procedures for recruit training, techniques of military instruction, marksmanship and individual weapons, individual combat skills, physical conditioning, close order drill, and general military subjects that include U.S. Marine Corps history, customs and courtesies, uniform regulations, first aid (to include cardiopulmonary resuscitation certification), sanitation and personal hygiene, and interior guard.

Note: Marine Corps Recruit Depot/Eastern Recruiting Region Parris Island SC web site - [http://www.mcrdpi.usmc.mil/di\\_main.htm](http://www.mcrdpi.usmc.mil/di_main.htm) is where students can obtain welcome information about the school to include recommended Physical Training Program and administrative information.

## ***DRILL INSTRUCTOR USMC - MASL : P166802***

DRILL INSTRUCTOR USMC

### ***DUNKER - ALL - MASL : B121138***

This training includes hazards to aircraft and personnel during over water operations; operation of safety and survival equipment requirements; pre-ditching and evacuation procedures. This course also provides the aircrew with the skills and knowledge to effectively use an Emergency Breathing Device (EBD) to egress a ditched aircraft and cope with the hazards that may be encountered with the use of a compressed air breathing device

### ***DUNKER - EN - MASL : B121139***

Training includes hazards to aircraft and personnel during over water operations; safety and survival equipment requirements; pre-ditching considerations and procedures; and emergency ditching and evacuation procedures. This course also provides aircrew with the skills and knowledge required to effectively use the helicopter emergency egress device (HEEDS) to egress a ditched helicopter and cope with the hazards that may be encountered with the use of a helicopter emergency egress device. Training includes hazards to aircraft and personnel during over water operations; safety and survival equipment requirements; pre-ditching considerations and procedures; and emergency ditching and evacuation procedures. This course also provides aircrew with the skills and knowledge required to effectively use the helicopter emergency egress device (HEEDS) to egress a ditched helicopter and cope with the hazards that may be encountered with the use of a helicopter emergency egress device.

### ***DYNAMICS OF INTL TERRORISM - MASL : D126012***

Provides selected military personnel and US Government civilian employees with no previous formal training in counterterrorism or antiterrorism a basic awareness and appreciation of the motivation, organization, techniques, operational capabilities, and threat posed by terrorist groups on an international and regional basis. Students learn protective measures government personnel and their families can employ to minimize the threat while traveling or working abroad. Completion of this course meets requirements for Force Protection Level I training. GOAL: To provide students with knowledge and a basic level of awareness to the international terrorist threat. Students will also learn and understand available techniques to minimize their vulnerability to attack.

TARGET AUDIENCE: Any military member or US Government civilian employee.

### ***E2C GRP 2 CAT 1 R/PILOT - MASL : P112105***

NOBC 8561 AIRBORNE EARLY WARNING PILOT TRAINING.

### ***E2C OFT SIMULATOR TRAINING - MASL : P119322***

To train newly assigned pilots or to provide refresher training for qualified E-2C Aviators in the proper operation, troubleshooting of the cockpit flight panel during simulated flight operations.

### ***E2-C OPER FLT TRAINER - MASL : P119701***

To provide safe and effective training for E2-C personnel in skills and techniques required for performance as qualified members of E2 flight crew.

### ***E-3 AIR SURV TECH INT QUAL - MASL : D117090***

To train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the AST crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI 11-2E-3, Volume 1, E-3--Aircrew Training.

### ***E-3 AIR WPNS OFF INIT QUAL - MASL : D117114***

To train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the Air Weapons Officer crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI 11-2E3, Vol 1.

### ***E-3 AIRBORNE RADAR TECHN - MASL : D117153***

To train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the Airborne Radar Technician crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI 11-2E-3, Vol 1, E-3--Aircrew Training.

### ***E-3 FLT ENG TRNG CRS - MASL : D117084***

To train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the flight engineer crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI 11-2E-3, Vol 1.

### ***E-3 NAVIGATOR (70.0 FH) - MASL : D114025***

To train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the navigator crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI11-2E3, Vol 1, E-3--Aircrew Training.

### ***E-3 OPERATOR INTRO CRS - MASL : D117136***

This course is a prerequisite to entering into Mission Crew Commander (E3 UP/CTMCC), Air Surveillance Officer (E3 UP/CTASO) or Electronic Combat Officer (E3 UP/CTECO) upgrade training/cross training courses. Graduates will immediately upon graduation enter into one of the previous mentioned upgrade training/cross training courses.

### ***E-3 PLT INIT QUAL TRNG CRS - MASL : D111016***

To train personnel meeting the course prerequisites to basic aircraft qualification (BAQ) status in the pilot crew position on the E-3. Graduates receive an E-3 rating of BAQ IAW AFI 11-2E-3, Vol 1.

### ***EA-C-SCH (ENGR AIDE) - MASL : P174073***

To provide the advanced technical skills and principles of job management necessary to qualify for assignment as a trade crew leader on a construction project.

- CONSTRUCTION DESIGN: Site planning and layout of Advanced Bases; structural, architectural, mechanical and electrical design of buildings. Advanced and supervisory instruction in the four major areas of the EA rating.
- CONSTRUCTION SURVEYING: Fundamentals of Geodesy and Field Astronomy, preliminary and final location surveys, mathematical computations required for route, structural and utilities layout.
- PLANNING, ESTIMATING AND SCHEDULING: Material, Labor and Equipment estimates with emphasis on construction scheduling, production control and management reporting of construction projects.
- QUALITY CONTROL: Practical soils mechanics and tests for soils, concrete and bitumens as construction materials using laboratory and field equipment. Perform Quality Control inspections and reports on construction projects. Principles and techniques of Foremanship.
- PREREQUISITES: All candidates must have credit in a course in trigonometry. Compliance with TRANSMAN Chapter 7 is mandatory.

### ***EAR, NOSE & THROAT (ENT) SPECIALTY - MASL : B175262***

Phase 2, 3 weeks Otolaryngology, 4 weeks Audiology, total: 7 weeks. To provide the student with skills to assist the otolaryngologist and audiologist in the diagnostic and therapeutic procedures such as diagnostic and audiometric testing; assisting physicians in minor surgical procedures; medical emergencies; history taking; ear, nose, and throat examinations.

### ***ECOT - MASL : D155047***

This course provides training to personnel in AFSC 33SX, civilian and international officers trained under the provisions of the Air Force Security Assistance Program in the knowledge and skills necessary to perform duties of Communications Officer. This course presents an introduction to basic communications doctrine including the objective communications squadron, future outsourcing initiatives, emerging technologies and the roles of communications officers and organizations in the Air Force enterprise structure. In addition, this course provides an introduction to key communications officer roles in deployed communications, networking, enterprise operations, information operations, executive officer duties, space operations and overall view of war fighting integration.

### ***ELEC AUTO BOILER CTR MAINT - MASL : P145262***

ELECTRONIC AUTOMATIC BOILER CONTROLS MAINTENANCE

Purpose: To provide technicians in the MM rating (E-4 thru E-9), officers, and civilians, with the knowledge and skills required to maintain and troubleshoot the Main Propulsion Electronic

Automatic Boiler Controls onboard Naval vessels.

### ***ELEC PWR PRODUCTION SPECL - MASL : D148025***

Provides knowledge and skills needed to perform as an Electrical Power Production Apprentice. The scope of training includes: Use of technical orders; American Heart Association adult CPR; Use of hand tools and electrical test equipment; career field contingency responsibilities and equipment; Inspection and maintenance of aircraft arresting systems to include the MAAS and lightweight fairlead beam; direct current (DC) and alternating current (AC) electrical principles, and electronic fundamentals; generator grounding fundamentals; generator alternator and exciter principles and operation; gasoline and diesel engine fundamentals to include lubrication, fuel, intake, exhaust, governor, and cooling systems; battery and battery charger principles and operation; generator set pre/post operational inspections and loadbank testing; reading and interpreting wiring diagrams to locate and correct electrical faults; automatic transfer panel principles and troubleshooting; engine governor adjustments; electrical protective devices principles and inspection; contingency powerplant operation, inspection, maintenance, and testing.

### ***ELECTRICAL ENGR/GRAD - MASL : D178015***

Provides a student who has a background in electrical engineering with the knowledge of optics and laser technology necessary for work in the field of electro-optics. The program is under the joint supervision of the Departments of Engineering Physics and Electrical and Computer Engineering. In general, students entering this program will have completed an undergraduate major in electrical engineering. The basic requirements for admission to the program are an overall undergraduate grade point average of at least a B (3.00), a grade point average of at least a B (3.00) in all mathematics courses, and GRE scores of at least 500 on the verbal test and 600 on the quantitative test. Waivers of some of these may be granted on an individual basis. The program is normally six quarters in length. Five quarters are devoted to course work and one quarter to thesis research. The research is conducted either at AFIT or under a cooperative research program at one of the Air Force laboratories. The course work in this program is in the areas of electrical engineering, optical and laser physics, and optical solid-state devices. It emphasizes the application of fundamental knowledge in the design, development, test, and evaluation of Air Force systems. Each student must complete an independent study or thesis in an area related to electro-optics selected from topics proposed by Air Force development organizations. This independent study may be done under the direction of either the Department of Engineering Physics or the Department of Electrical and Computer Engineering. Flexibility in the program is maintained in order to take full advantage of the varied backgrounds and abilities of individual students. The program leads to the degree of Master of Science in electrical engineering.

### ***ELECTRICIAN BASIC - MASL : P131806***

Consists of the following units of instruction: electrical theory, maintenance management, equipment operation, preventive maintenance, and field electrical systems installation. This course is designed to impart the knowledge, skills, and abilities to provide electrical support. The course consists of instruction on the characteristics, capabilities, operation, and preventive maintenance of electrical power generation and load test equipment; along with electrical distribution systems and floodlights. Instruction is also provided on safety, electrical theory, installation of electrical distribution systems (wiring and hardware), use and care of hand tools, and maintenance management. Graduates of the course are licensed, per TM 11275-15/4 (Tactical Engineer Equipment Licensing Examiner s Manual), on the following equipment:

- Load Bank, Electrical, 100kW, DE1-0001;
- Floodlight Set, Skid-Mounted w/Tower, SM-4A3-0;
- Generator Set, 2kW 60Hz, MEP-531A;
- Generator Set, 3kW 60Hz, MEP-831A;
- Generator Set, 10kW 60Hz, MEP-803A;
- Generator Set, 10kW 400Hz, MEP-813A;
- Generator Set, 30kW 60Hz, MEP-805A;
- Generator Set, 30kW 60Hz, MEP-805B;

- Generator Set, 30kW 400Hz, MEP-815A;
- Generator Set, 30kW 400Hz, MEP-815B;
- Generator Set, 60kW 400Hz, MEP-816A;
- Generator Set, 60kW 400Hz, MEP-816B;
- Generator Set, 60kW 60Hz, MEP-806A;
- Generator Set, 60kW 60Hz, MEP-806B;
- Generator Set, 100kW 60Hz, MEP-007A;
- Generator Set, 100kW 60Hz, MEP-007B.

### ***ELECTRICIANS MATE A - MASL : P122216***

This course trains enlisted personnel at the job entry level in the Electricians Mate rating. Training includes lectures and hands-on exercises on generation, control and distribution of electricity; the uses of electricity; and the maintenance/repair of electrical equipment. The following topics are covered: AC and DC circuit analysis, batteries, power distribution systems, lighting systems, generators, motors, controllers, interior communication systems, electric power tools, galley equipment, laundry equipment, scullery equipment, electric damage control equipment, small boat electrical systems, deck machinery equipment, and shore power.

Students must have, or report with sufficient funds (approximately USD 60) to purchase, steel-toed safety shoes for participation in this course.

### ***ELECTRONIC JOURNALISM COURSE - MASL : B164587***

Emphasis of training is placed on Electronic Journalism (EJ) principles and techniques needed to produce television news and feature assignments. Students will learn writing for EJ, voice-over and stand-up reporting, EJ news coverage, decisions in the sphere of military activities, operation of battery operated television camera/recorder systems, lighting, site survey procedures and video tape editing.

### ***ELECTRONIC PRINCIPLES - MASL : D131145***

Replaces E3AQR2P031 371 beginning with classes starting 06 Jun 04. It provides training in the knowledge and skills needed to perform the duties of maintenance personnel and is the prerequisite for the E3ABR2P031048A follow-on course at Keesler AFB. The scope of the training includes safety, first aid, Direct Current (DC) principles, Alternating Current (AC) principles, semiconductors, power supplies, amplifiers, wave-shaping circuits, and digital circuits.

### ***ELECTRONIC PRINCIPLES - MASL : D132112***

If you were a NPS student at the time you left Keesler you will return as a NPS student and will be placed into Phase 4 status. You will live in (Davis Manor) and complete all military training requirements. Upon arrival you are to report to (Davis Manor, bldg 6955), and contact a MTL for room assignment. If you have any delay or other problems during your travel contact CQ at 228-597-5585: the CQ office is manned 24/7. The BX and commissary have limited supplies, so bring what you need for personal items. Shopping off base is very limited. If you were here during Katrina but evacuated and left personal property behind, and have not already reclaimed it you will have access to it upon your return.

This course replaces course E3AQR2E132 431. The scope of training includes safety, first aid, Direct Current (DC) principles, Alternating Current (AC) principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer fundamentals and network theory.

### ***ELECTRONIC PRINCIPLES - MASL : D133076***

Replaces E3AQR2A533A 371 beginning with classes starting 06 Jun 04. It provides training in the knowledge and skills needed to perform the duties of maintenance personnel and is the prerequisite for the J3ABR2A533A048A follow-on course at Sheppard AFB. The scope of the training includes safety, first aid, Direct Current (DC) principles, Alternating Current (AC) principles, semiconductors, power supplies, amplifiers, waveshaping circuits, and digital circuits.

### ***ELECTRONIC PRINCIPLES (LTC - MASL : D131132***

If you were a NPS student at the time you left Keesler you will return as a NPS student and will be placed into Phase 4 status. You will live in (Davis Manor) and complete all military training requirements. Upon arrival you are to report to (Davis Manor, bldg 6955), and contact a MTL for room assignment. If you have any delay or other problems during your travel contact CQ at 228-597-5585: the CQ office is manned 24/7. The BX and commissary have limited supplies, so bring what you need for personal items. Shopping off base is very limited. If you were here during Katrina but evacuated and left personal property behind, and have not already reclaimed it you will have access to it upon your return.

This course replaces course E3AQR2E632 431. The scope of training includes safety, first aid, Direct Current (DC) principles, Alternating Current (AC) principles, semiconductors, power supplies, amplifiers, wave-shaping circuits, digital circuits, computer fundamentals and network theory.

### ***ELECTRONICS ADV DIGITAL - MASL : P131131***

This course trains electricians, pay grades E-5 through E-9, in digital electronics technology. The course will cover instruction in digital applications such as operating oscilloscopes; constructing operational amplifier circuits and digital logic gates; performing calculations in binary, octal, and hexadecimal operations; and introduction to Boolean algebra, logic functions, flip-flops, counters, shift register, transducers, system interfacing, memories, and programmable logic devices. The lab phase of each unit will enable each student to be introduced to microprocessor-based systems. Each student will program, run, and troubleshoot a microprocessor to the component level.

Completion of Electrician s Mate A (P122216) and Electronics, Advanced Analog (P131130).

### ***ELECTRONICS TECHNICIAN "A" - MASL : P131093***

This course is an apprentice-level electronics course that is divided into seven units of instruction, with each unit dealing with different aspects of electronics fundamentals. The course begins with indoctrination and includes basic theory, safety, measurement, and troubleshooting techniques. As students progress through the course, they receive instruction on DC circuits, soldering, power supplies, amplifiers, oscillators, receivers, VHF-FM and HF communications, radar, long-range aids to navigation (LORAN)-C receivers, and depth sounders. Emphasis is placed on the student s ability to diagnose and repair equipment faults. Each unit has a number of terminal performance objectives that must be mastered by the student to complete the unit successfully. All seven units must be completed successfully to complete the course of instruction. Additional work time away from class is required to complete each unit successfully.

Prerequisites: Basic algebra skills (i.e., the ability to manipulate and solve rational equations) are necessary for completion of this course.

Note: This course includes classified material. See Security Clearances on page II-3. However, students may attend the sanitized version of this course without detracting from the technical competency objectives.

### ***ELECTRONICS/\* - MASL : D303004***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***EMERGENCY MEDICAL TECH - MASL : P175209***

This course provides classroom instruction and practical experience for emergency medical care given to ill or injured persons. The practical exercises pertain to rescue techniques used in a maritime environment as encountered during Coast Guard search and rescue missions. It is a 130-hour, intensive, college-level course. Students are required to complete both written and practical examinations.

### ***ENGINEER BASIC OFFICER LEADER - MASL : B121245***

Emphasis is on leadership, combined arms tactics, weapons, equipment, and the fundamental techniques required in order to prepare the graduate for immediate assumption of the functions and duties of the Engineer platoon leader. Hands-on performance oriented exercises are stressed with a minimum of theoretical instruction. Instruction is provided in leadership and ethics, training, Engineer support of offensive and defensive operations, horizontal and vertical Construction, combat engineering and general engineering.

### ***ENGINEER OFF CPT CAREER - MASL : B171670***

Primary emphasis of training is placed on teaching the student MQS II skills and knowledge needed to be an effective BC 21-engineer officer. Completion of the tactics and engineering phases provided a Military Education Level 6 qualification. The training also develops the officer's problem-solving capabilities, managerial techniques and the character attributes needed to be an effective military leader.

### ***ENGINEER OPS-SPANISH - MASL : B174500***

Employ and breach obstacles; detect and neutralize minefields and booby traps; employ engineer assets in support of base defensive operations; use demolitions in support of narcotics interdiction operations; perform engineer assault missions; land navigation; communications; combat lifesaving measures; conventional and improvised demolitions; obstacle constructions and breaching; military operations in urban terrain, booby trap detections and destructions; engineer battle drills and situational training exercises designed to evaluate the students' abilities to perform sapper missions in tactical and counterdrug scenarios; human rights; the rule of the law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***ENGRG MGT/GRAD - MASL : D178008***

The goals of the engineering and environmental management (EEM) program are to educate mid-level managers in the theories, concepts, and techniques of environmental management and to integrate science and policy issues into a decision-making framework for enhanced management of organizations and their impact on the environment. The EEM program provides students with the opportunity to develop and apply a variety of quantitative and qualitative concepts, skills, and techniques to integrate science and policy issues into a decision-making framework for enhanced management of the environment. Upon completion, students are granted a master of science (MS) degree. A thesis is required for graduation. The curriculum includes courses in engineering management, environmental engineering and management, economic decision analysis, organizational management, and communications. The EEM program is conducted in six academic quarters. This program is designed for both the civil and bioenvironmental engineering career fields (55XX and 91XX) and meets the educational requirements for both the 1AGE and 1AGY advanced academic specialty codes. The curriculum consists of 10 core courses, 5 electives to provide needed breadth and depth, and 12 hours of thesis research. The courses provide a wide variety of quantitative and qualitative information concerned with the many facets of engineering and environmental management: environmental, fiscal, technical, behavioral, logistical, contractual, and legal. Electives are designed to broaden the student's horizons and provide more in-depth information in a specific area of interest. A heavy emphasis on environmental science and management addresses the continuing problems with the impact of base operations on the environment (air, water, and land). The thesis must address a real-world problem in an engineering and environmental management area. Principal purposes of the thesis are to demonstrate the student's ability to integrate concepts and techniques acquired through course work and to demonstrate the student's written communication skills. Many of the thesis topics are provided by DoD and Air Force agencies interested in sponsoring student research in areas of practical concern. Program graduates are assigned to engineering and environmental management duties at the base, MAJCOM, and higher levels. The output AFSC from the program is normally 55XX or 91XX.

### ***ENGRG MT(Deact-See TCC) - MASL : P145258***

#### **ENGINEERING MAINTENANCE PRINCIPLES PRACTICES AND ADMINISTRATION**

The course is designed to train and provide trainee with the knowledge and skill to retrieve specific information from various technical references about engineering principles, practices and program administration related to the maintenance of shipboard steam propulsion equipment and machineries. A-651-0064 is a segment of the Machinists Mate Steam Propulsion Maintenance Supervisor Training Program. Scope: The course of instruction provides classroom training on the following topics: Blueprints and Technical Manual Documentation; Navy Occupational Safety and Health Program (NAVOSH), Tag-Out Bill, Heat Stress, Hearing Conservation, Asbestos Control and Hazardous Material Control Programs; Pressure, Temperature and Speed

Sensing/Indicating Instruments); Measuring Tools and Machinery Alignment Computer (MAC); Static, Dynamic and Mechanical Seals; Lubrication Theory and Lube Oil Management (2190 TEP); Sliding and Rolling Contact Bearings; Fasteners and Locking Devices. The trainee will perform practical laboratory exercises on the use of measuring tools and shaft alignment using the portable MAC,

### ***ENLISTED SUPPLY BASIC - MASL : P152809***

**PURPOSE:** To provide entry-level instruction in supply administration and operations with a primary focus on Asset Tracking for Logistics and Supply System (ATLASS).

**SCOPE:** This course is designed to develop the basic technical skills required of supply clerks filling supply administration and operations billets in either automated or manual supply accounts. Instruction focuses on technical research, manual requisitioning/accounting, specialized accounting procedures, mechanized accounting for operating stocks, mechanized requisitioning, repair parts requisitioning, mechanized accounting for allowance items and financial management. Instruction focuses on daily use of ATLASS in a Fleet Marine Force using unit supply account.

**PREREQUISITES:** Private-sergeant, MOS 3000, minimum aptitude area score of CL 110. UNIFORM/EQUIPMENT

**REQUIREMENTS:** Students should bring appropriate service uniforms. Students will check in wearing the Service "A" uniform. The utility uniform will be worn for all periods of instruction Monday-Friday. The Service "C" uniform will be worn occasionally on Friday as directed by the school commander. The uniform for graduation is the Service "C" uniform. PT gear (green/green) is also required to include sweats during winter months

### ***EO-SCH JOURNEYMAN - MASL : P174072***

Provides the advanced technical skills and principles of job management necessary to qualify for assignment as a trade crew leader on a construction project. Includes principles and techniques of mathematics related to earthwork and equipment production, earthwork and equipment production effectiveness; advanced principles of earthwork; advanced principles of asphalt mixing and paving; techniques of increasing production rate; operation, adjustment, and servicing of asphalt distributors; pavers; cranes with attachments; crawler and wheel tractors with attachments; motorized graders; road rollers; scrapers, and principles and techniques of foremanship.

### ***EQUAL OPP STAFF ADVISOR - MASL : D179009***

This course replaces E5ALD3S131A 000 effective 20 Jun 05. The course content is the same; only the course number has changed. Subject areas address individual, group, and organizational behavior; equal opportunity management skills, instructor skills; the study of discrimination based upon racial, sexual, religious, and ethnic differences on individual, institutional and cultural levels; the study of cultural, historical, and socio-psychological perspectives as well as contemporary status of American minority groups; equal opportunity programs and procedures of the military services; and a practice application exercise. Student physical fitness training. Course conducted at the Defense Equal Opportunity Management Institute.

### ***ESSM THEORY OF OPS ENGRS - MASL : P195178***

EVOLVED SEA SPARROW MISSILE (ESSM) THEORY OF OPERATION FOR ENGINEERS

Provides details of ESSM Theory of Operations, missile configuration, threats and missile performance information. Missile subsystems operation is presented for guidance system, warhead, digital autopilot/control system, inertial reference system, uplink communications, and rocket motors.

**Targeted Audience:** Personnel required to have a detailed understanding of ESSM Theory of Operation.

**Prerequisites:** Participants must have knowledge of test site safety and security regulations at test site facility where individual duties will be performed.

**AVAILABILITY:** Pre-scheduled courses at PHD NSWC are available on a reservation basis. Special courses either at PHD NSWC or in country can be arranged depending on instructor availability.

### ***ET APPRENTICE TECH - MASL : P139013***

ELECTRONIC TECHNICAL APPRENTICE TRNG - SELF PACED is a Computer Aided course that includes the entire surface electronic / electricity rates. Course will include training in basic electricity/electronic theory component level troubleshooting for corrective maintenance use and interpretation of equipment manuals, operation of test/electronic equipment in accordance with

technical publications. The course is designed to provide the knowledge and skills needed to prepare for rating entry-level performance.

SCOPE: Provides knowledge and skills in basic electricity and electronics to include:

- Direct Current theory and circuit troubleshooting
- Alternating Current theory and circuit troubleshooting
- Analog Circuit theory and circuit troubleshooting
- Digital Circuit theory and circuit troubleshooting.

### ***EURO-NATOP JET PLT TNG - MASL : D111011***

Qualifies non-rated NATO officers and NCOs to perform duties and responsibilities of rated pilots. Trains student pilots toward award of aircrew rating of pilot, capable of advancing to specialized flying training courses. Air Force graduates qualified to fly Air Force jet aircraft with minimal transition and normally proceed to advance flying training course. Graduates also have desirable professional skills and knowledge required of junior Air Force officers. Approximately 260 flying hours, 300 academic hours, and 190 officer training hours.

### ***EW FOR FOREIGN MIL OFFICRS - MASL : P179175***

Master s degree program. Provides the knowledge of role information warfare as a vital, integral part of modern warfare.

SPECIAL NOTE: Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***EW OFFICER INTL - MASL : P139336***

This course is designed to familiarize officers and selected senior enlisted personnel with the basic concepts of Electronic Warfare (EW); including the divisions of Electronic Warfare, principles of radar systems, current anti-ship capable missile threat, emission control, Electronic Warfare publications, training and the role of Electronic Warfare in anti-ship missile defense. The course is not designed to enhance performance for any specific task, rather to provide background information to assist in performance of several tasks.

### ***EWO STAFF OFFICER (SATP) - MASL : D136027***

Training includes fundamentals of electronic warfare, air defense systems operations, tactical electronic warfare operations, and electronic warfare management.

### ***EXEC PRGM IN CIV-MIL REL - MASL : P170001***

The CCMR Executive Course on Defense Decision -Making is a two-week program conducted every June at the Naval Postgraduate School in Monterey, California. The program has been restructured to emphasize the impact of change on modern defense establishments. Four main themes will be covered: Development of National Security Strategy; Threat assessment; Intelligence; and Domestic Defense Challenges (e.g. terrorism, natural disaster). The course is designed for senior (0-7 and above) military officers and their civilian counterparts from legislatures, government ministries, and non-governmental organizations. Participants will have the opportunity to meet and work with leaders from around the world on issues of defense decision making common to democratic nations. The curriculum has a strong problem-solving focus and draws examples from the experiences of many different countries. Participants will be required to prepare and present briefings on civil-military relations and defense decision processes in their countries. The Executive Program is presented in English (TOEFL score standard of 80 is waiverable). Classes are held in CCMR classrooms at the Naval Postgraduate School. Class Size: 24

SPECIAL NOTE: Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***EXECUTIVE BUSINESS COURSE - MASL : P178110***

#### **EXECUTIVE BUSINESS COURSE**

The EBC course provides a collaborative and powerfully engaging opportunity for Admirals, Generals and members of the Senior Executive Service to heighten awareness and deepen personal insights related to innovation, business transformation and financial

management. Through the presentation of cutting edge business concepts and best practices, the course challenges participants to test their assumptions and discover new possibilities. Prominent speakers from private industry, government, defense, science and academia motivate participants to broaden their thinking and expand intellectual comfort zones through interaction with one another. The course design is based on classic research by Mintzberg<sup>1</sup> on the roles undertaken by senior managers, which fall into three major groups: leadership/interpersonal, informational, and decision-making. Under the rubric of leadership, we focus on leading transformational change as well as effective utilization of human capital. The sessions on informational roles address the strategic use of information technology for achieving business objectives.

Finally, the sessions on the decision making roles of senior managers provide the financial and analytical tools required for making effective decisions at the flag officer level. A highlight of the course is a set of presentations by very senior leaders from the Department of the Navy, who provide strategic direction and inspiration to course participants.

### ***EXPED MEDICAL SUP BASIC CR - MASL : D175155***

This 5 day course is designed to provide field operational training for commissioned officers and enlisted personnel assigned to the EMEDS Unit Type Codes. Students must have knowledge of and be skilled in their AFSC core competencies as outlined in their perspective Career Field Education and Training Plan and must complete their Readiness Skills Verification Program skills checklist prior to attendance. This course teaches and evaluates corps specific field situations, as well as offers updates in AFMS concept of operations and doctrine. The course promotes team performance, cohesion, and cross-training/utilization of all deployed team personnel. It also teaches setup/packing out of a field EMEDS compound, deployed operations (wartime and humanitarian), field medical, nursing and operational support equipment proficiency, and field exercises to both emphasize and evaluate learning of concepts taught.

### ***EXPED WARFARE STAFF PLNG - MASL : P124251***

To train Marine Corps and Navy officers/senior petty officers in the knowledge and skills required for the operational planning and employment of MAGTFs focusing on planning tasks.

Pre-requisite course: Amphibious Warfare Indoctrination (AWI) K- 2G-0037.

Special Note: This training is unclassified, however, International Students are required to have a Secret Security Clearance included in their travel orders in order to access the facility where training is to be conducted.

### ***EXPED WARFARE STAFF PLNG - MASL : P124507***

To provide Navy and Marine Corps officers and senior enlisted with knowledge of and experience in expeditionary warfare mission planning at the PHIBRO/MEU (SOC) level.

Instruction includes the command and staff action sequence from MCWP 5-1 and JP 3-02.

SCOPE: Designed to enable students to assist in amphibious planning at any BN/MEU/MEB staff/unit level and to provide the knowledge necessary to aid in interpreting an amphibious operation plan/order. Class instruction precedes student execution of the Marine Corps Planning Process in order to develop a generic plan for an amphibious assault. Students will be assigned principal staff positions similar to those an ESG would fill. Dependent on the class variety of experience, students will role-play a principal staff member.

PREREQUISITES: USN commissioned officers and senior enlisted personnel assigned to amphibious ships, PHIBGRU, or PHIBRON staffs, NAVBEACHGRU, SPECWARGRU, TACGRU/TACRON, or Marine Expeditionary Units. Students are required to be graduates of Amphibious Warfare Indoctrination (K-2G-0037) or have six months experience aboard an amphibious unit/staff. USMC active and reserve components: Commander, principal and special staff officers of a designated MAGTF or Major Subordinate Element (MSE). Waivers will be considered by the course manager.

### ***EXPEDITIONARY WARFARE SCH - MASL : P171818***

#### **EXPEDITIONARY WARFARE SCHOOL**

Expeditionary Warfare School (EWS) is a career-level professional military education school. EWS prepares Marine Captains to function as commanders and staff officers at the appropriate level of the Operating Forces by providing instructional emphasis on command and control, combined arms operations, war fighting skills, tactical decision making, Marine Air Ground Task Force (MAGTF) expeditionary operations, and naval operations.

### ***F15 AVIONIC TST STAT/ACFT - MASL : D141394***

This course is designed to provide airmen with the basic skills and knowledge to perform intermediate (I-level) maintenance in the F-15 Avionics Intermediate Shop (AIS). It is an AFSC awarding course. Training includes career field introduction, test station principles, Aircraft Systems Principles, Security and Safety, Technical Orders and Maintenance Systems, F-15 Antenna Test Station theory, F-15 Antenna Test Station performance, F-15 Tactical Electronic Warfare Systems (TEWS) Intermediate Support Systems (TISS) theory, F-15 TISS performance, F-15 Electronic Systems Test Set (ESTS) theory, and F-15 ESTS performance. Each person attending this course will be awarded a 3-skill level in the F-15 Avionic Systems Apprentice Career field upon graduation.

### ***F15 CONFORMAL FUEL TANK REPAIR (SOJT)-KOREA - MASL : D143010***

COURSE DESCRIPTION (If the course may be provided by module, enter module number, title, description, and number of hours) 136 Hours.

Scope of training includes use of applicable technical data and regulatory standards; safety requirements associated with repair of conformal fuel tanks (CFT); preparation procedures, to include review work control documents, obtaining applicable technical data, supplies and personal protective equipment. The SOJT covers the disassembly procedures, removal and installation of CFT from maintenance stands; the cleaning procedures required when overhauling the tank; inspection, repair, and replacement procedures that are required during the overhaul of CFTs, procedures required for assembly and leak check procedures for the tank and fuel system are outlined.

### ***FA FIREFINDER RADAR OPERATOR FULL COURSE - MASL : B121168***

Operations, communication procedures; IFSAS interface; radar registrations; use of SINCGARS equipment; preventive maintenance on the radars and ancillary equipment. Operations, communication procedures; IFSAS interface; radar registrations; use of SINCGARS equipment; preventive maintenance on the radars and ancillary equipment.

### ***FA OFF ADVANCED PREPARATORY-ALLIED OFFICER - MASL : B171131***

To provide allied officers with the fundamentals of fire direction, firing battery operations, and field artillery organizations. Allied officers also receive an orientation program designed to provide them with information and knowledge of U.S. social and government institutions, history and culture of the American people and the English language.

### ***FACILITIES INSPECTOR COURSE - MASL : P122702***

This course provides entry-level training for Coast Guard members in subjects including basic nomenclature; facility security, transfer equipment, operations, and pollution response; LNG facility inspections; deepwater port facility inspections; and intermanul freight container inspections. This course is taught using lectures, in-class and laboratory exercises emphasizing hands-on experience. Emphasis is also placed on developing the student's ability to identify and apply U.S. regulations and standards during the inspection of U.S. port facilities.

### ***FAFIREFINDERRADAROPERTPQ37 - MASL : B121147***

Operations, communication procedures; IFSAS interface; radar registrations; use of SINCGARS equipment; preventive maintenance on the radars and ancillary equipment. Operations, communication procedures; IFSAS interface; radar registrations; use of SINCGARS equipment; preventive maintenance on the radars and ancillary equipment.

### ***FFG-7/36/61(Deact-See LTB) - MASL : P149275***

Provides knowledge and skills required to maintain the central processor and peripheral equipment within this FFG-7 class CDS subsystem. Covers preventive and corrective maintenance on equipment including: AN/UYK-20 Computer Set, AN/UYK-7(V) Computer Set, OJ-172(V) DEAC Input/Output Console, CV-2953A(P)UYK Signal Data Converter, AN/UYK-43A(V) Computer Set, AN/USQ-69(V) Data Terminal Set, SYS-2(V)2, and Introduction and Maintenance of the FFG-AN/UYK-43A(V) Combat Direction System.

### ***FFG-7/36/61(Deact-See LTB) - MASL : P149276***

Trains selected Fire Controlman, or equivalently trained personnel, with skills and knowledge necessary to maintain equipment associated with the FFG-7/36/61 class ships data display group subsystem. Provides detailed theory of operation, system

interfaces, alignments, adjustments, fault isolation/detection, preventive and corrective maintenance of the FFG-7/36/61 class ships data display group subsystem.

### ***FIBER OPTIC CABLE INSTALL - MASL : D132072***

Provides training in: theory of light wave communications; fiber optic cable characteristics; fiber optic terminations; fiber optic light source/power meter; fiber optic cable installation; fusion splicing; mechanical splicing; optical time domain reflectometer; fiber optic modems and multiplexers.

### ***FIELD ARTY BASIC OFR LDR - MASL : B121250***

Presenting, developing, and refining basic skills needed by all Field Artillery Officers. Course consists of three blocks of instruction that all Lieutenants receive in Platoon Leader, Fire Support, and Fire Direction skills. Course has weapons system training on Light/Towed artillery systems.

### ***FIELD ARTY OFF ADV - MASL : B171680***

Technical and tactical skills needed to provide effective and timely fire support for Army Operations Doctrine; fire support systems for levels of command from battery to corps; combined arms operations; threat forces and doctrine; combat service support; leadership; and command and control.

### ***FIELD MEDICAL SERV TECH - MASL : P175570***

#### FIELD MEDICAL SERVICE TECHNICIAN

To train in the knowledge and skills required to care for the health care needs of U.S. Marine Corps personnel in the field. Scope: The course includes the organization of field units, procurement and issue of medical supplies and equipment for combat areas, first aid and emergency procedures, field first-aid stations, casualty evacuation, field sanitation and preventive e-medicine and specialized warfare defense medical requirements. Refer to NEC Manual (NAVPERS 18068).

Prerequisite: Academic failure of this course (FMSS) clearly demonstrates a lack of basic HM skills, knowledge or abilities and is inconsistent with the safe and effective performance of patient care. Members that academically fail FMSS shall be recommended for FORCE CONVERSION from the HM rating to another rating based on the needs of the Navy. Candidate must be physically qualified for transfer per MANMED and TRANSMAN. Physical requirements restrict pregnant service members from eligibility per OPNAVINST 6000.1 series (2003-04-29). They must complete an operational screening per MILPERSMAN article 1300-800 and found worldwide assignable for potential operational assignments with the Fleet Marine Force, Forces Afloat, isolated units or units overseas. An applicant for this program is acknowledging that, upon graduation, he/she will be available for a utilization tour assignment to any of these billets worldwide. Member s failure to maintain worldwide assign ability during or after "C" school will be justification for administrative separation per MILPERSMAN article 1910-120.

### ***FIGHTER ACFT CREW CHIEF - MASL : D141251***

This course trains aircraft maintenance technician apprentices on operational principles and theory of ground safety, aircraft systems and sub-systems, component description and operation, aircraft ground handling, inspection, servicing procedures, and operation of aerospace ground equipment. The course provides aircraft familiarization to personnel with assignments to heavy aircraft (bombers, tankers, and airlift) and/or light aircraft (fighters, trainers, and attack). Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

#### COURSE DESCRIPTION

- **BLOCK I FAMILIARIZATION** This block begins with a course orientation, where students learn about the academy's policies, programs, and academic objective requirements. Students learn the principles of safety, accident prevention, and aircraft ground safety procedures on the flight line. Students also learn how to interpret, identify, and select technical data, and the use and purpose of aircraft forms documentation and filing. Additionally, students learn the aircraft inspection system, levels of maintenance inspection, types of inspections, and identification and purpose of aircraft hardware.
- **BLOCK II AIRCRAFT GENERAL** Students learn the variety of airframe structures, reference datum numbering and aircraft markings. They are taught aircraft ground handling, marshalling procedures, parking, towing, mooring, and jacking. Students also learn the principles and use of non-powered ground support equipment, and operation of powered

ground support equipment. They receive instruction on corrosion control and prevention programs, care of aircraft, and aircraft safe for maintenance. Students also receive a diversity of training on several types of egress systems.

- **BLOCK III ELECTRICAL SYSTEM** Students learn the operational concepts and theory of electricity, circuits, and components. They learn identification and inspection procedures of the direct current systems; identification and inspection procedures of the alternate current systems, aircraft lighting systems, and operation of aircraft fire and overheat warning systems.
- **BLOCK IV UTILITY SYSTEMS** Students learn the fundamental principles, components, theory of operation, and inspection procedures of the bleed air system, air-conditioning and pressurization systems, fire extinguisher and anti-icing and de-icing systems. Additionally, the operation of the liquid and oxygen system, servicing procedures, and the inspection procedures of the utility systems are discussed.
- **BLOCK V PNEUDRAULICS SYSTEM** Students learn the aircraft pneudraulics systems, components, and operation. Students learn the aircraft's landing gear, inspection, components, and operational checks of the system. Removal and installation of wheel/tire and brake system assembly is also taught during this block of instruction.
- **BLOCK VI FLIGHT CONTROL SYSTEM**, the students learn theory and principles of flight. They identify and state the purpose of the primary and secondary flight control surfaces and components. Students also learn fundamentals of inspections, rigging, and procedures for removal and installation of flight control surfaces.
- **BLOCK VII FUEL SYSTEMS** Students learn the fundamentals of the fuel system, inspection procedures and safety precautions, components and operation of the internal and external fuel system, and inspection and servicing procedures.
- **BLOCK VIII ENGINE AND SYSTEMS** Students learn the engine technical terminology on several types of engines. They learn major engine sections, and components of jet engines and turbo propeller engines. They also learn principles of operation, inspection and component location, and subsystems. This block also covers the introduction and description of the Hamilton standard propeller.

### ***FINANCE BASIC OFFICER LDR - MASL : B121255***

Consists of three major area of instruction: branch specific training, tactical training (FTX/CPX), and functional training. Training prepares finance officers to support combat operations on the modern battlefield. The branch specific training stresses branch skills unique to the Finance Corps, such as disbursing, military pay, accounting, commercial vendor services, and travel.

### ***FINANCE MGT & COMPT SPEC - MASL : D156054***

If you were a NPS student at the time you left Keesler you will return as a NPS student and will be placed into Phase4 status. You will live in ( Smith Manor) and complete all military training requirements. Upon arrival you are to report to (Smith Manor, bldg 7315), and contact a MTL for room assignment. If you have any delay or other problems during your travel contact CQ at 228-377-3803/9976: the CQ office is manned 24/7. The BX and commissary have limited supplies, so bring what you need for personal items. Shopping off-base is very limited. If you were here during Katrina but evacuated and left personal property behind, and have not already reclaimed it you will have access to it upon your return.

This course provides training for airman to perform duties prescribed in AFMAN 36-2108 for Financial Management and Comptroller Apprentice. Training includes an overview of publications, customer service principles, accounting classification, fund certification, fiscal law, military pay, cost and economic analysis, accounting principles, travel computations, and customer service/support.

### ***FINANCE OFF (BRANCH QUAL) - MASL : B121524***

Consists of five major areas of instruction. Disbursing provides the student with a working knowledge of governing laws, functions, controls, safeguards, operating procedures, automated system inputs and products, and reporting requirements for a disbursing division. Travel and Military Pay stress governing laws, entitlements, allowances, computer software and hardware, and interpretation of pertinent regulations. Commercial Accounts centers on the Prompt Payment Act, other governing laws, discounts and interest penalty payments, the procurement process and automated systems. Accounting provides an overview of appropriated and non-appropriated fund accounting concepts, reporting requirements, legal requirements, and automated systems.

### ***FINANCE OFFICER ADV - MASL : B171690***

This course trains Finance Corps officers to identify, evaluate, and apply the latest managerial techniques plus technical, tactical and leadership skills. Required to support combat operations in the modern battlefield. Emphasis of Training will be placed on teaching student tasks, skills, and knowledge needed to be an effective Branch 44 Finance Officer. We will also develop problem solving capabilities, managerial techniques, and the character attributes needed to be a good leader.

### ***FINANCIAL MGMT SPECIALIST - MASL : B155510***

Introduction to finance operations, DJMS/JDCIII; research finance actions using DODFMR/MPPM; computing pay dates; entering input for pay election; military pay and allowances, allotments; miscellaneous adjustments; casual payments; transact public funds; prepare military pay voucher, travel vouchers, principles, rules, procedures and reporting of the operation maintenance army appropriation. Coding of expenditure, reimbursement and miscellaneous transactions and their effect on the Standard Army Finance System; budget execution and accounts payable, finance wartime doctrine.

### ***FINANCIAL MGMT STAFF OFF - MASL : D156053***

The BX and commissary have limited supplies, so bring what you need for personal items. Shopping off-base is very limited. If you were here during Katrina but evacuated and left personal property behind, and have not already reclaimed it you will have access to it upon your return.

This course provides training for Air Force personnel, in AFSC 65F4, 6FXXX, or civilian equivalent in the knowledge and skills needed to perform the duties as Financial Management personnel. The scope of training includes principles and concepts of Financial Analysis, Financial Services, Acquisition, Non Appropriated Funds, Audit, Plans and Management.

### ***FINANCIAL MGT OFF - MASL : D156052***

The BX and commissary have limited supplies, so bring what you need for personal items. Shopping off-base is very limited. If you were here during Katrina but evacuated and left personal property behind, and have not already reclaimed it you will have access to it upon your return.

This course provides training for finance officers in AFSC 65F1 in the knowledge and skills needed to perform the duties of a Financial Management Officer. The scope of training includes officer hip skills and personnel management, Air Force Financial management comptroller organization, use of legislative guidance, expeditionary operations, Financial Management systems, fiscal structure, Financial Management analysis, cost and economic analysis, acquisition operations, duties of the non-appropriated funds financial analyst, operational risk management, case studies, functions, and responsibilities of the Financial Services Officer.

### ***FIRE CONTROLMAN A STRAND - MASL : P131351***

This training prepares the personnel for entry into Fire Control Class "C" schools by providing the level of training that will be required by the technician as a prerequisite to higher learning. The course provides the type of training and the methodology which is more individualized training using Computer Aided Instruction (CAI) and VISTA Simulated equipment.

Prerequisite MASL: APPRENTICE TECH TRAINING (ATT) P139013 / CIN A-100-0106

### ***FIRE CTL SYS ORTS O&M (KS) - MASL : P179367***

FIRE CONTROL SYSTEM (FCS) OPERATIONAL READIINESS TEST SYSTEM (ORTS) OPERATION AND MAINTENANCE (KOREA)

Through use of Classroom instruction with simulations and tactical equipment operation and maintenance where appropriate, this course provides the student a detailed knowledge of the ORTS Data Terminal Sets (DTS), Fire Control System equipments, AWS element testing, Fault Detection and Fault Isolation (FD/FI) testing will be discussed. In addition, the course describes in detail, the elements of the FCS, including FCS Control and Test Interface, Digital Data Converter (DCC) MK 15, Continuous Wave Illuminator (CWI) Transmitter and the Director Group. Also covered are system testing, Built-In Test Equipment (BITE) and maintenance work packages along with alignments, adjustments and Missile System Supervisor (MSS) Submode operations. System initialization, operation, maintenance, and troubleshooting are also discussed.

Prerequisites: General knowledge of electronics. Normal Color Vision. Invitational Travel Orders required. Successful completion of the UNIX for SOLARIS/LAN Overview Course

MAX number of students per class: 24

### ***FIRE FIGHTER AND RESCUE - MASL : D309016***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***FIRE PROTECTION SPECL - MASL : D122002***

The Fire Protection Apprentice Course is a basic skills awarding training course. Training includes fire protection fundamentals; organization and safety; fire behavior; fire alarm and communications; building construction; fire prevention; emergency medical care, responder skills; emergency care plans; structural fire fighting principles; personal protective equipment; forcible entry; ropes, knots, and rescue practices; rescue activities and vehicle extrication; ladder and ventilation practices; structural fire ground operations; water supplies; hazardous materials to the awareness and operational levels; airport fire fighter; aircraft and airport familiarization; aircraft response and fire fighting principles; aircraft rescue fire fighting; live fire training; and readiness general contingency responsibilities.

### ***FIREFIGHTING ADV S/B - MASL : P129181***

The Advanced Shipboard Firefighting course is designed to train supervisory fire party personnel in advanced techniques in fire fighting and proper management of on-scene personnel. This course includes hands-on training as fire party members including Repair Locker Leader, Scene Leader, Investigator, Nozzleman, Hoseman, Access Man, and Plotter. The course also utilizes different methods and equipment to extinguish different classes of fires. The following subjects are covered: fire party duties; DC communications; de-smoking equipment and procedures; hose handling; machinery space fires; use of OBA, and selected emergency equipment; P-250; Halon 1301; special hazards fires; helo firefighting and personnel rescue.

**PREREQUISITES:** Students must have orders and medical screening in hand (no facsimiles accepted). Be an E-4 or above unless assigned as Repair Locker Leader, On-scene Leader, Team Leader, Nozzleman, or Investigator. Must have had "previous live fire fighting training. Students must be physically qualified to handle fire hoses, wear full fire fighting gear and work with various damage control equipment in hot, humid and stressful environment. Students must be clean shaven. "No shave chits" are not accepted. Students must be medically screened by their parent command no earlier than 96 hours prior to arrival at fire fighting school. Medical screening shall be completed IAW CNETINST 3541.1D. This is to ensure individuals are medically qualified to safely participate in the course. Orders must be stamped or typed with "Medically Qualified", or command medical screening form(s) must be filled out and attached to the orders. A command medical representative must verify information is accurate and affix his/her seal and/or signature to the document. Potential students who are unable to participate in or complete PRT must have specifically stated on their orders that they have been evaluated by their parent command for the specific condition(s) and are cleared for fire fighting training. PCS personnel must bring health records or have screening completed within 96 hours prior to CLCVN by medical facility. This screening and notation should be done within 96 hours prior to attending course. Students without the required medical statement on their orders will not be trained and will be returned to their parent command.

### ***FIREFIGHTING GENL SHPBD - MASL : P127006***

#### **FIREFIGHTING GENL SHPBD**

Familiarize officers and enlisted personnel with shipboard firefighting systems, procedures and equipment. The scope includes proper techniques and procedures for general shipboard firefighting. Fires including Alpha, Bravo and Charlie fires and fires involving conventional weapons. The duties of oxygen breathing apparatusmen, nozzle men, hose men, plug men, access men, and portable extinguisher supplymen are also addressed. The OPNAV damage control proficiency satisfied by this course is Level II. This course utilizes the OBA only.

**PREREQUISITES:** Students must have orders and medical screenings in hand (no facsimiles accepted). Students must be physically qualified to handle fire hoses, wear full fire fighting gear and work various damage control equipment in hot, humid and stressful environment. Students shall be clean shaven. "No shave chits" are not accepted. Students must be medically screened by their parent command no earlier than 96 hours prior to arrival at fire fighting school. Medical screening shall be

completed IAW CNETINST 3541.1D. This is to ensure individuals are medically qualified to safely participate in the course. Orders must be stamped or typed with "Medically Qualified", or command medical screening form must be filled out and attached to orders. A command medical representative must verify information is accurate and affix his/her seal and/or signature to the document. Potential students who are unable to participate in or complete the PRT must have specifically stated on their orders that they have been evaluated by their parent command for the specific condition(s) and are cleared for fire fighting training. This screening and notation should be done within 96 hours prior to attending course. PCS personnel must bring health record or have screening completed within 96 hours prior to CLCVN by medical facility. Students/teams without the required medical statement on their orders/screening will not be trained and will be returned to their parent command. This course is open to all rates.

### ***FIRST SERGEANT - MASL : B171199***

A scenario driven, performance oriented course of instruction designed to prepare sergeants first class and master sergeants for positions of responsibility as unit first sergeants. Major subject areas include: unit personnel management and administration; leadership, discipline, and morale; logistics, maintenance, and security; physical training; and operations and training.

### ***FIRST SERGEANT - MASL : B171203***

A scenario-driven, performance-oriented course of instruction designed to prepare sergeants first class and master sergeants for position of responsibility as unit first sergeants. Major subject areas include: unit personnel management and administration; leadership, discipline, and morale; logistics, maintenance, and security; physical training; and operations and training.

### ***FIXED WING PILOT - MASL : P118300***

To provide experience in actual testing of modern aircraft and airborne systems and reduction and reporting of the data obtained. The fixed wing curriculum prepares pilots and engineers to test airborne mission systems and flight systems in addition to airplane flying qualities and performance. Please contact USNTPS at our website at [WWW.usntps.navy.mil](http://WWW.usntps.navy.mil) for further information.

### ***FLD MGT OF CHEM CASUALTIES - MASL : B175320***

The Field Management of Chemical and Biological Casualties Course (FCBC) is conducted by the US Army Medical Research Institute of Chemical Defense (USAMRICD) at Aberdeen Proving Ground, Maryland.

The course is designed for Medical Service Corps officers, Chemical Corps officers and non-commissioned officers (enlisted) in medical or chemical specialties. Classroom instruction, laboratory and field exercises prepare graduates to become trainers in the first echelon management of chemical and biological agent casualties.

Classroom discussion includes: the current global threat of chemical and biological agent use, the characteristics and effects of threat agents, recognition and emergency treatment of agent exposure, principles of triage and decontamination of chemical and biological agent casualties. Small-group exercises reinforce these casualty management principles.

In the laboratory, attendees gain valuable, hands-on experience by participating in the resuscitation of a lab animal exposed to a nerve agent stimulant.

During two days of field training, attendees establish a casualty decontamination site and use the site during scenario-based exercises to manage litter and ambulatory casualties. Using this site, attendees practice principles of personal protection, agent detection, triage, emergency treatment and decontamination of chemical casualties. Students Uniform is the field uniform.

### ***FLIGHT ENGR/C-130/PH I - MASL : D121028***

Qualifies flight engineers in the C-130E aircraft. Includes academic, simulator, and flying training.

### ***FLIGHT MEDIC - MASL : B175179***

#### Course Scope

The course covers the skills and knowledge in areas of aviation subjects and basic aircrew skills, Aeromedical aspects of real flight, applied medical care in flight with special focus on Advanced Basic TraumaLife Support (BLTS), Advanced Cardiac Life Support (ACLS), Pediatric Education for Pre-hospital Professionals (PEPP), critical care management of a patient, management and care of a critically ill or wounded casualty in a medical evacuation aircraft platform. Medical skill competencies are at the EMT-I/P level. All tasks encompass skill levels 1, 2, 3, and 4 Soldiers. This distance learning course covers 34 hours of

Aeromedical and aviation subjects relevant to performing tasks required by a Flight Medic during Phase 2 of the course. Course Scope

***FLIGHT MEDICAL AIDEMAN - MASL : B175279***

This course covers the identification of MEDEVAC aircraft systems, monitor/stabilize/treat in-flight wounded, perform crash rescue and in-flight crew duties, load/unload Aeromedical evacuation aircraft, perform aircraft radio communication, conduct high performance hoist operations, and conduct pre-MEDEVAC treatment.

***FLIGHT NURSE-NON DOD - MASL : D175017***

Prepares nurses for aircrew duties at Aeromedical evacuations units. Course enables graduates to apply the tactics, techniques, and procedures to effect safe patient movement. Graduates receive the knowledge and skills required to: apply principles of altitude physiology to care for patients evacuated by air; prepare aircraft to receive patients; manage patient enplaning and deplaning; employ aircraft systems and mission equipment utilized in Joint patient movement. Students are introduced to Aeromedical evacuation doctrine, mission management, and principles of integration with specialized transport teams. The USAFSAM website will provide more guidance to potential applicants as well as class dates [http://www.brooks.af.mil/web/an/fnt\\_home.htm](http://www.brooks.af.mil/web/an/fnt_home.htm)

***FLIGHT SURGEON ACADEMIC - MASL : P175307***

To provide training leading to designation as a Naval Flight Surgeon. Students develop professional competency in Aerospace physiology and medicine, human factors in aviation, aviation safety, mishap investigation, occupational health and preventive medicine. Traditional clinical medicine specialties including internal medicine, ophthalmology, otorhinolaryngology and psychiatry are taught in the context of the aviation environment so that students learn the appropriate disposition for aviators and aircrew with medical problems. Flight training gives the student firsthand experience in the stresses of the aviation environment.

SCOPE: The course consist of three phases which are academics, aviation pre-flight indoctrination and primary flight training. The academic phase is subdivided into administrative, environmental physiology, operational medicine, and clinical medicine units. Physiology qualifications, water and land survival training, physical readiness testing and ground school subjects are completed in the pre-flight phase.

***FLORIDA INST OF TECH (FIT) - MASL : B151015***

THIS MASL IS USED WHEN OJT IS PROGRAMMED.

***FLORIDA INST OF TECH (FIT) - MASL : B170000***

THIS MASL IS USED WHEN OJT IS PROGRAMMED.

***FLT ENGR/TACT INSTR/C-130 - MASL : D121043***

Qualifies flight engineers to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. Includes academics, and flying training. Air Force policies, procedures, and instructions are studied in depth.

***FLT SAFETY OFF (SATP/FSO) - MASL : D122005***

Safety education for foreign officers assigned to manage flight safety programs. Provides students with an understanding of safety program management fundamentals, safety principles and mishap investigation techniques. Course includes applied Aerodynamics, engineering communications, management, psychology, accident prevention and investigation. Is general in nature, providing an overview of flight safety problems and useful methods of dealing with these problems. Includes a field visit to an operational USAF unit to conduct an on-scene safety survey. Designed as an educational process rather than a training tool to prepare an individual for day-to-day operations. Not intended to qualify personnel in any specific aircraft system. Upon graduation, the adaptation of this knowledge to local programs requires the personal motivation and initiative of the individual.

***FLT SURGEON T-34/TH-57 - MASL : P119024***

Provides training leading to designation as a Naval Flight Surgeon. Flight training gives the student first hand experience in the stresses of the aviation environment. The student receives T-34 ground school and flight time, and TH-57 ground school and flight time.

The mission of the Aerospace Medicine Specialist (AMS) Training Curriculum is to provide exposure to the various flight regimes and associated phenomenon of Aeromedical concern. The term Aerospace Medical Specialist includes all Bureau of Medicine and Surgery specialist that support the Naval Aviation fleet, including Residents in Aerospace Medicine, Flight Surgeon short course students, student Naval Aerospace Physiologist and student Naval Aerospace Experimental Psychologist. Each module of the instruction provides an introduction to the basic flight experiences encountered in daily training and fleet aircraft operations. Particular emphasis is place on basic motor flight skills and familiarization with the physiological stressors associated with aviation specific evolutions.

SCOPE: Primary Instructional Methods Building block approach to developing and reinforcing prerequisite airmanship skills through a steady increase in mission task loading. Central to the approach is an optimum mix of classroom (systems, Aerodynamics, etc.), simulator and flight instruction. Classroom instruction combines lecture and question/answer while simulator and flight instruction rely more heavily on a mentor relationship between instructor and student.

#### Course Objectives

- Upon completion of this syllabus, the prospective Aerospace Medicine Specialist will demonstrate:
- A working knowledge of the fundamental concepts of Aerodynamics, aircraft systems, emergency procedures and G-induced loss of consciousness.
- Proficiency in basic aviation ground operations.
- The ability to execute straight and level as well as turning flight.
- An understanding of standard operating guidelines associated with landing patterns, and instrument flight.

#### ***FLTENGR/FIXED WG ACFT PERF - MASL : D121040***

Ground instruction on mathematics, atmosphere and physics, Aerodynamics, aircraft performance and performance log, engine theory, weight and balance, basic chart reading, winds, critical field length relationships, the TOLD card, obstacle clearance, inflight and non-standard landing data, constant MACH range control, endurance, descent, and mission and AR planning worksheets.

#### ***FLYING SAFETY/\* - MASL : D122006***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the students country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

#### ***FOOD SERVICE SPECIALIST - MASL : B163001***

Introduction to cooking; small quantity cooking and baking; garrison dining facility operations, and field kitchen operations to include the Army Field Feeding System-Future (Army).

#### ***FOSCO-SUP MGT JUNIOR OFF - MASL : P152090***

##### SUPPLY MANAGEMENT NAVY - JUNIOR OFFICERS

Provides students with a complete overview of Fleet & Industrial Supply Center (FISC) operations including: physical distribution (receiving, storage, issue, packing, transportation, shipping, hazardous material handling, and receipt processing), inventory control (inventory requirements, customer service, industrial support, and technical and requisition services), contracting, comptroller, and management planning (personnel, training supply systems, and computer systems and procedures).

#### ***FREE FALL AUTO RIPCORD REL - MASL : B148403***

Personnel will receive instruction on the procedures for recovery and unit intermediate maintenance of the AR2 Automatic Ripcord Release Assembly. Personnel will receive instruction on the procedures for recovery and unit intermediate maintenance of the AR2 Automatic Ripcord Release Assembly.

### ***FRG DECONTAMINATION PROC - MASL : B121829***

Hands-on training in decontamination procedures and equipment, protective equipment, and detection procedures and equipment. Hands-on training at the CDTF simulation pads and toxic training in the CDTF training building. Training on smoke and flame employment and equipment.

### ***FSXX1 AH64-D TRACK - ALL - MASL : B113162***

Designed to provide the student with the necessary skills and knowledge required achieving pilot qualification and designation as an Army combat aviator in the AH-64D aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks, aircraft systems, navigation and command instruments systems, gunnery skills, mission planning, and safety factors appropriate to the track. Designed to provide the student with the necessary skills and knowledge required achieving pilot qualification and designation as an Army combat aviator in the AH-64D aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks, aircraft systems, navigation and command instruments systems, gunnery skills, mission planning, and safety factors appropriate to the track.

### ***FSXXI IERW (COMM CORE) ALL - MASL : B113177***

Course Scope:

Provide the student with basic rotary-wing operator skills and knowledge for qualification in the TH-67 aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight, and safety factors.

### ***FSXXI UH-60 TRACK - EN - MASL : B113157***

Course Scope:

Course is designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification and designation as an Army combat aviator in the UH-60 aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks, night/night vision goggles, command instrument systems, and safety factors appropriate to the aircraft.

### ***FUEL PROBE/CARGO DROP MT - MASL : P145758***

FUEL PROBE AND CARGO DROP REEL MAINTENANCE

To train Engineering and Deck enlisted personnel, E-1 through E-9, and (DOD) Military Sealift Command, to perform maintenance and repair of Fuel Probe and MK-II Cargo Drop Reel equipment. Course includes disassembly, inspection, assembly, repair and test of the Fuel Probe, Probe Receiver, and MK-II Cargo Drop Reel. Upon completion of this course the student will be able to disassemble and reassemble fuel probes and replace damaged parts. Students will be able to perform PMS on the fuel probes and MK II cargo drop reels.

Note: Working uniform and steel toe shoes are the required uniform. Coveralls and work gloves are recommended. WEATHER: Students are required to bring warm clothing during the winter months i.e., foul weather jacket, long underwear, gloves, watch cap, etc.

### ***FUELS APPRENTICE - MASL : D152013***

Provides training in the skills and knowledge necessary to perform tasks related to the receipt, storage, issue, and quality control of petroleum and cryogenic products. Training is also included on Air Force publications, initiating base fuels management office accounting forms; automated data processing familiarization, and the inspection, operation, and operational maintenance of storage and dispensing equipment to include fuel servicing vehicles.

### ***FUELS QUALITY CONTROL SPEC - MASL : D152025***

Trains Air Force personnel with AFSC 2F0X1 or civilian equivalent in the knowledge and skills necessary for fuels quality control specialist duties. Includes methods and procedures used to maintain quality control while receiving, storing, and issuing aviation petroleum products. Detailed training is provided on sampling and analyzing aviation fuels to determine solids, free

water, fuel systems icing inhibitor content, API gravity, flashpoint, conductivity and fiber content; care and maintenance of fuels sampling and laboratory equipment; metric system as applied to analysis; recording, reporting, and interpreting results of analysis; quality control of aviator's liquid breathing oxygen and cloud point analysis of diesel fuels; using computer systems to record and review test results. This course provides one of the prerequisites for awarding special experience identifier (SEI) 039.

### ***FUELS/\* - MASL : D152020***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***FUNCTIONAL SUPPLY CENTRAL - MASL : P152003***

SUPPLY MANAGEMENT NAVY - JUNIOR OFFICERS

The objective of this course is to provide international logistics officers with a complete overview of industrial supply center procedures.

### ***FUNDAMENTAL SYS ACQ MGT CR - MASL : B151001***

This course provides a broad overview of the DoD systems acquisition process, covering all phases of acquisition. It introduces the Joint Capabilities Integration and Development System (JCIDS) and resource allocation processes, the DoD 5000 Series documents governing the defense acquisition process, and current issues in systems acquisition management. Designed for individuals who have little or no experience in DoD acquisition management, ACQ 101 has proven very useful to personnel in headquarters, program management, and functional or support offices. Objectives: Students who successfully complete this course will be able to recognize:

- Other fundamentals of defense systems acquisition management
- Other diverse, interrelated, and changing nature in the different disciplines of defense systems acquisition management
- Other regulations and governing structures of defense systems acquisition management

This course provides a broad overview of the DoD systems acquisition process, covering all phases of acquisition. It introduces the Joint Capabilities Integration and Development System (JCIDS) and resource allocation processes, the DoD 5000 Series documents governing the defense acquisition process, and current issues in systems acquisition management. Designed for individuals who have little or no experience in DoD acquisition management, ACQ 101 has proven very useful to personnel in headquarters, program management, and functional or support offices. Objectives: Students who successfully complete this course will be able to recognize other fundamentals of defense systems acquisition management; other diverse, interrelated, and changing nature in the different disciplines of defense systems acquisition management; and other regulations and governing structures of defense systems acquisition management

### ***FUNDAMENTALS OF DEF SUPPLY CHAIN MGT (SCM) - MASL : B151789***

Supply chain management integrates supply and demand management within and across activities through the flow of materials and services, information, and financials. The course focuses on the key management principles and business processes that comprise SCM and ERP implementation. Key business processes include customer/supplier relationship management, customer service management; order fulfillment demand management, supply chain mapping and network development, developing of supply chain metrics, developing and implementing partnerships in the supply chain, and supply chain information management.

### ***FWD AIR CONT AIRBRN GROUND - MASL : P116040***

FORWARD AIR CONTROLLER (AIRBORNE) GROUND TRAINING Purpose. To provide the common academic portion of the Forward Air Controller (Airborne) syllabus as outlined by Marine Aviation and Weapons Tactics Squadron One (MAWTS-1). Scope. The course provides instruction in tactics, techniques, and procedures used for controlling mortars, artillery, naval surface fires, and close air support. The course fulfills FAC(A) training requirements contained in the Marine Corps Training and

Readiness (T&R) Manual. Prerequisites. Marine aviators and Marine naval flight officers assigned or will be assigned to squadrons whose missions include FAC(A).

### ***GCCS-M TRAINING - MASL : P122800***

This unclassified hands-on classroom course is designed to provide eight hours of overview information covering the latest version of the releasable Global Command and Control System-Maritime operational software. Topics covered include the new capabilities, differences between the current and previous version, handouts, and a question/answer period. The class is administered in a laboratory environment, one student per workstation up to ten students, workstation sharing for class sizes above ten. Maximum class size: 18-20 Students. Scheduled start time is 8:00 am, a one-hour lunch break midday, and wrap up at 5:00 pm.

### ***GEN MTR MOD 8-645E2 DIESEL - MASL : P145435***

Trains machinery technicians in the operation, maintenance, and overhaul procedures for General Motors model 567-E2 and model 8-645-E2 diesel engines.

Prerequisite: Completion of Machinery Technician A (P122219) or equivalent experience.

Note: Students must have, or report with sufficient funds (approximately USD 60) to purchase, steel-toed safety shoes for participation in this course.

### ***GENERAL ENGLISH ONLY - MASL : B177027***

This MASL would be programmed when General English Only is required. This MASL would be programmed when General English Only is required.

### ***GENERAL MAINT TECH SUPRV - MASL : D141249***

This course prepares experienced senior non-commissioned officers, selected junior officers, and civilian equivalents to perform supervisory duties and assume a greater leadership role within a maintenance complex. Additionally it provides information on organizational structure and management techniques used in the planning and developing of functional areas within a maintenance organization. The training received will increase the individuals knowledge and understanding of maintenance operations and increase their ability to function as a senior maintenance supervisor. Students are required to pass a written and or performance test at the end of each block prior to advancement to the next block of instruction.

#### **COURSE DESCRIPTION:**

- **BLOCK I ORIENTATION, SAFETY, OPERATIONAL RISK MANAGEMENT (ORM)** This block begins with a course orientation, where students learn about the academy's policies, programs, and academic objective requirements.. This block provides detailed lectures and discussions on maintenance safety doctrine, supervisory safety responsibilities and practices, in-depth fundamentals concepts of the Organizational Risk Management (ORM) program.
- **BLOCK II QUALITY ASSURANCE.** This course also provides the student with the fundamentals necessary to perform the quality assurance function. Subjects covered include: In depth fundamentals concepts to the ORM program, Safety Analysis and Inspections, the role of QA and responsibilities in evaluating and assessing personnel proficiency (including the quality and effectiveness of training programs), equipment and aircraft condition, and the management of specific programs that ultimately increase mission effectiveness. The Quality Assurance Program (QAP) is designed as a flexible feedback system for maintenance leaders, supervisors, and workers. Students learn methods to detect negative trends, problems areas, inform and prepare reports of these problems, their likely causes, and possible corrective actions. Quality assurance inspection concepts include: different types of evaluations, inspections and observations that are in the QAP.
- **BLOCK III TOTAL QUALITY MANAGEMENT** The objective of this lesson is for each student to know the evolution of Quality and its principles. Students are introduced to quality approach practices and how they differ from other management styles. The student also learns the concept of quality principles and practices in today's military environment. It also provides the student with comprehension on team dynamics and how to apply team leader skills to manage a successful team. They also have the opportunity to use selected decision tools enhancing continuous improvement efforts, as well as selected data and problem analysis tools.

- **BLOCK IV TECHNICAL ORDER SYSTEM** Students learn the purpose, authority, and use of the USAF technical manual system, and illustrated parts breakdowns. Interpret and select the proper technical data.
- **BLOCK V SUPERVISORY ON-THE-JOB TRAINING (OJT)** The student is exposed to the On-the-Job-Training Program. The students learn the structure of the program and responsibilities to the training program. It also teaches supervisors how to plan, conduct, evaluate and document training.
- **BLOCK VI WEIGHT AND BALANCE** Students are introduced to the tremendous importance of knowing weight and balance concepts in aircraft maintenance operations. Students learn and perform mathematical formulas used to calculate aircraft weight changes, practical exercises, proper forms documentation, technical data, familiarization with weighing scales, and the actual weighing of an aircraft.
- **BLOCK VII SUPERVISORY MANAGEMENT** Students are provided with working knowledge of the principles and techniques of effective personnel management to include: supervisory responsibilities, the management process, effective leadership

***GENERAL PROSTHODONTICS - MASL : P175204***

NOTE: NO LONGER OPEN TO FOREIGN STUDENTS.

A 5-day course in prosthodontics designed for the general practitioner. The course will cover a broad spectrum of treatment, from basic concepts to more advanced procedures and treatment. Throughout the course, diagnosis and treatment planning will be emphasized. Current treatment modalities and materials pertinent to prosthodontics are also presented.

***GEOSPAT DIGIT DATA USER CR - MASL : B125104***

This MASL can only be programmed if country has a co-production agreement in accordance with NGA.

***GEOSPATIAL INFO&SVCS JSOC - MASL : B125089***

Purpose: The Mapping, Charting, and Geodesy (MC&G) Staff Officer Course provides an understanding of key organizations, concepts, systems, and procedures involved in the production and use of printed and digital maps, charts and digital information. The course emphasizes areas of interest to the staff officer, the planner, and the supervisors who need to better understand DMA and its products. Target Audiences: DoD personnel in MC&G billets, supervisors whose personnel utilize DMA products, staff officers (especially S/G/J-2s and 3s) and intelligence personnel from all Services, Commands, and DoD Agencies. Topics Include:

- Fundamentals of MC&G as they impact the staff officer's planning responsibilities, an overview of DMS's products, support and technology, and an introduction to the requirements process. MC&G Fundamentals:
- Datums, Grids, and Projections - Product Accuracy
- Introduction to Global Positioning Systems (GPS)
- Geographic Information Systems (GIS)
- Remotely Sensed Imagery (RSI)
- Photogrammetry MC&G Support:
- Requirements Process
- International Agreements
- Crisis Support
- DMA MUSE Software
- Customer Support Teams DMA Products & Services:
- DMA Softcopy Catalog
- Distribution
- Standard Digital Products

- Standard Paper Products

### ***GLOBAL ANTI-TERRORISM AND OPER/READ COURSE - MASL : B121001***

Current operational intelligence and situational reports for applicable theaters (CONUS / OCONUS), new information relating to tools and equipment, US and Foreign Ordnance, Improvised Explosive Devices (IEDks), and the latest developments within the EOD Community. Various classes are conducted by external sources that represent a variety of Intelligence Agencies, EOD Technical Centers and Subject Matter Experts (Technicians) in both classroom and field environments.

### ***GROUND DEFENSE COMMAND - MASL : D173041***

. This course provides training in the knowledge and skills needed for assignment to a headquarters/Base Defense Operations Center (BDOC) staff position. The scope of training includes planning Air Base Defense (ABD) operations and the operations of the BDOC.

### ***GROUND SAFETY - MASL : D122008***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job

### ***GROUND SUPPLY OFFICER - MASL : P152801***

**PURPOSE:** To train entry level Marine officers in the skills necessary to perform the duties of a ground supply officer in the Operating Forces with an emphasis on the battalion/squadron level.

**SCOPE:** This course is designed to prepare the newly minted supply officer for duties in a variety of supply chain management responsibilities in line with emerging concepts and policies of Global Combat Support System - Marine Corps. Distribution, capacity, production, and order management are baseline concepts the officer will learn throughout this course. An understanding of automated requisitioning and supply management systems is recommended due to the technical nature of this course.

**UNIFORM/EQUIPMENT REQUIREMENTS:** Students should bring appropriate service uniforms. Students will check in wearing the Service "A" uniform. Utility uniform will be worn for all periods of instruction Monday-Friday. Service "C" uniform will be worn occasionally on Friday as directed by the school commander. The uniform for graduation is the Service "C" uniform. PT gear (green/green) is also required to include sweats during winter months.

### ***GUNNERSMATE "A" - MASL : P122210***

This course teaches enlisted personnel to perform at the job entry level in the Gunner s Mate rating. The following topics are covered: basic leadership, fundamental electricity, small arms and machine guns (less than 25mm), ammunition and magazines, administration and preventative maintenance system (PMS), Coast Guard ordnance, and the MK36 Decoy Launching System.

### ***HARPOON - EOD - MASL : P193135***

Trains selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***HARPWPN SYS(Deact-See TCC) - MASL : P122211***

This course provides designated operator personnel with an understanding of the principles of operation, knowledge and skills necessary to perform engagement planning for the Harpoon Weapon System, (Surface Applications).

**SCOPE:** Training includes practical application in Weapon Control Indicator Panel (WCIP) Activation; performance of operator tests; simulated engagements, missile initialization and launch from the Weapons Control Indicator Panel. Classroom instruction prepares students for practical application labs and also covers Weapons Control Indicator Panel operation and interface with the Harpoon Weapon System and other Fire Control Equipment.

Training sites utilize canister configuration as a core and discuss differences associated with different platforms.

**PREREQUISITES:** Must hold security clearance at least 14 days prior to class convening date.

### ***HEALTH SERVICES ADMIN - MASL : D175010***

Trains newly commissioned USAF Medical Service Corps (MSC) officers in the knowledge and skills needed to perform the duties in Health Services Administration. Prepares MSC officers for performance of administrative duty with the USAF Medical Service and emphasizes techniques for effective management of Air Force medical resources: personnel, facilities, funds, and materials. Course includes instruction in communication techniques, medical practice management, resource management, medical logistics, personnel and administrative services, medical readiness, information systems management, health plan management, core competencies and executive leadership skills. Course is designed to incorporate team interaction through case studies, role playing, problem solving, and group dynamics. The course emphasizes personal interaction within the medical facility and interpersonal relationships with all members of the Air Force community. Class is divided into specialty groups during the last 3 weeks to simulate actual work experience. Students are assigned duty as requested by their gaining commander. Students will bring a copy of their Information Assurance (IA) certificate. This is necessary for computer usage. Failure to do so will delay the student starting class.

### ***HEALTH SERVICES TECH 'A' - MASL : P175005***

This college level course teaches the student hands on sick call conditions and treatments in a clinic setting, medical laboratory skills, medical administration, nursing care of the sick and injured, preventive medicine procedures, medical asepsis and sterilization techniques, and the anatomy and physiology of the human body. The student also learns emergency medicine techniques, procedures and protocols.

### ***HEAVY CONSTRUCTION EQUIPMENT OPERATOR - MASL : B174106***

21E10 POI encompasses all skill level 1 critical tasks selected for resident training as listed in STP 5-21E12-SM-TG, providing training in: 16 hours of introduction to MOS 21E10 Heavy Construction Equipment Operator Course which introduces the facility, course procedures, and criteria for successful course completion, course safety; environmental stewardship; and The Army Maintenance Management System (TAMMS), and Accident Avoidance class. 264 hours of MOS specific training in operating a motor transport vehicle with semiautomatic transmission and low-bed trailer, a crawler tractor, a motorized scraper, a scoop loader, and a motorized grader.

### ***HELICOPTER MECH - BASIC - MASL : D141257***

This course teaches students at the apprentice level fundamental elements of inspection, servicing, functional checks, preventive maintenance, and component familiarization and function on rotary type aircraft and related equipment. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

#### **COURSE DESCRIPTIONS:**

- **BLOCK I GENERAL SUBJECTS** This block begins with a course orientation, where students learn about the academy's policies, programs, and academic objective requirements. Students are given an introduction to safety doctrine and practices. They are taught the importance of ground safety and its effects on the maintenance activity with emphasis on awareness and compliance. The student will also learn how to identify and properly use maintenance manuals and other reference materials. In addition, the student will learn about the responsibilities of the helicopter maintenance organization and the different levels of supervision. Students are also instructed on how to perform different types of preventive maintenance procedures, required inspections, and documentation.
- **BLOCK II GENERAL HELICOPTER MAINTENANCE** During this block of instruction the student is taught how to properly identify and use common and special tools. Students will learn to identify different types of aircraft hardware and aircraft tubing and hoses according to their color-coded decals. This block will teach the student how to correctly select and install safety devices. The purpose, operation, and safety for different types of powered and non-powered ground support equipment are taught during this block. The student learns to recognize and treat different types of corrosion and the procedures for corrosion control. Helicopter ground handling is also included in this block. The students learn hand signals and proper towing procedures. Step by step refueling and de-fueling procedures are discussed during this block. The student will remove, inspect and install the helicopter main landing gear. Students are familiarized with the theory and construction of the UH-1 helicopter.
- **BLOCK III HELICOPTER SYSTEMS** This block will familiarize students with the fundamental theory of operation, purpose, and component location of helicopter systems to include hydraulic, electrical, instruments, utility, and fuel

systems. Through schematics students are able to visualize the entire flow of these systems and learn the functions of various valves and pumps located within them. They will also learn the identification of different instruments and the meaning of range markings.

- **BLOCK IV HELICOPTER POWERPLANT** This block provides students with the operating principles of jet engines. It highlights and compares the T-53-L-13B engine theory to other known turbine engines. Students are taught the theory of operation for each T-53 engine system. This block also teaches the proper removal and procedure for installation of the T-53 engine.
- **BLOCK V MAIN AND TAIL ROTOR SYSTEMS** This block begins by familiarizing students with different types of main rotors and their major components. Students will remove the stabilizer bar, main rotor, and blades from a UH-1H helicopter. They will learn the procedures for the stabilizer bar damper check. Familiarization with the tail rotor system is also taught within this block. Students will remove and install the tail rotor, and the pitch change mechanism is discussed. Students are then taught about helicopter vibrations and its affects in flight.
- **BLOCK VI POWER TRAIN SYSTEM** This block is designed to familiarize students with information about the helicopter power train system. Students will remove and install the main transmission and all its major components. The removal and installation of the tail rotor drive shafts, hanger bearing assemblies, and 42 degree and 90 degree gearboxes

### ***HELO-SHIP INTF/FLT (INDIA) - MASL : P118304***

#### **HELICOPTER-SHIP INTERFACE AND FLIGHT TEST TECHNIQUES**

##### **1. Background of Trainees.**

- Experimental Test Pilots qualified from Aircraft and Systems Testing Establishment (ASTE), Bangalore.
- Average experience on helicopters 1500+
- Operational experience in ship borne helicopter operations.
- Qualified day/night ashore and afloat on twin engine helicopters.

2. Course Duration. 4-6 weeks of ground sessions with Simulated flight time of 10 hours per trainee. The trainees should be provided with adequate course material for future use.

3. Course Content and Post-Course Requirements. On completion of the course, the trainees should achieve competency in the following topics:

- Aerodynamic considerations in helicopter deck modeling, layout and relevant specifications.
- Wind Envelope definition and testing of new ships and offshore platforms.
- Flight test techniques for ship-helo dynamic interface assessment
- Flow visualization and wake-mapping around hanger/superstructure on prototype heli-decks and on addition/modification to existing decks.
- Airframe structural considerations (tie downs under ship pitch and roll conditions, for example)
- Design specifications for heli-decks.
- Ship wind effects - flow visualizations, measurement, recording and instrumentation.
- Ship motion effects - instrumentation.
- Ship helicopter operating limitation development - methods, criteria.
- Introduction to modern ship-borne landing aids and their design specifications.
- Test techniques for evaluation of ship-borne landing aids and their installation/calibration techniques.
- Wind Envelope definition/testing of Carrier decks.
- Evaluation techniques of night vision devices for marine application.
- Introduction to ship-borne Unmanned rail Vehicle (UAV) flight-testing concepts.

### ***HEMISPHERIC DEF & SECURITY - MASL : B171810***

The IADC is an international educational institution operating under the guidance and funding of the OAS and the Inter-American Defense Board. It provides a professionally oriented, multidisciplinary, graduate-level course of study. This eleven-month program provides senior military and government officials with a comprehensive understanding of governmental systems, the current international environment, structure and function of the Inter-American system, and an opportunity to study broad based security issues affecting the Hemisphere and the world. The development of these concentrations is accomplished through the detailed study of political, economic, psychosocial, and military factors of power. The College takes advantage of the unparalleled educational and research facilities in the Washington D.C. area as well as external academic visits to the Americas. Faculty and students also engage in research and publishing.

### ***HIGH ALT MNTN QUAL - ADV - MASL : B113222***

This MASL is used when High Alt Mountain Qual - ADV is programmed.

### ***HM-SCH BAS - MASL : P175504***

Teaches the basic principles and techniques of emergency medical care, operational medicine, and nursing care procedures. Prepares personnel for duties as a general service hospital corpsman to function with the fleet operating units, the Fleet Marine Force (FMF), Medical Treatment Facilities (MTF), and further training. The course includes anatomy and physiology, medical mathematics, medical ethics, emergency medical care, operational medicine, preventive medicine, pharmacology and toxicology, nursing care procedures, and military requirements.

Prerequisites: Must be a high school graduate or GED equivalent. Have normal color perception. Must be physically qualified for transfer per MANMED and TRANSMAN. Applicant must be fully qualified to perform all duties required of the rate worldwide: wherever a billet or a mobilization requirement exists. An applicant for this program is acknowledging that, upon graduation, he/she will be available for a utilization tour assignment to any one of these billets worldwide. No individual will be accepted into the medical rating who has had a history of drug or alcohol abuse or incident. Waivers may be considered on a case by case basis and must include total times used, date of first usage and date of last usage. Submit applications to Bureau of Naval Personnel (PERS 4010), on NAVPERS 1306/7 per TRANSMAN.

### ***HQWK PH III PIP OFFICER - MASL : B193658***

In this course you will learn as a Commissioned Officer to perform duties as Tactical Control Officer and Platoon Leader in a Phase III HAWK Battery. Students are taught characteristics, capabilities, and functions of Phase III HAWK System. Daily checks, PCP operator functions, Missile Transfer, preventive maintenance, air battle management and system operations.

In this course you will learn as a Commissioned Officer to perform duties as Tactical Control Officer and Platoon Leader in a Phase III HAWK Battery. Students are taught characteristics, capabilities, and functions of Phase III HAWK System. Daily checks, PCP operator functions, Missile Transfer, preventive maintenance, air battle management and system operations.

### ***HUMAN RESOURCES SPECIALIST - MASL : B165524***

Utilize software applications; prepare military correspondence; casualty reporting; prepare personnel actions; prepare strength management and accounting reports; prepare promotion actions; prepare reassignment actions; prepare personnel accounting actions; utilize query. The course also includes a 72 hour ftx.

### ***HUMAN RIGHTS INSTRUCTOR - MASL : B166150***

In-depth discussions of relevant topics followed by practical exercises, topics to be explored include a human rights core block of instruction, to include ethics; the doctrine of just war; the historical development of human rights; case law; pertinent documents and principles; the relationship between human rights and the law of armed conflict, and a case study on the My Lai massacre; performance-oriented instruction; learning analysis; test construction, and presentation techniques; seminar on current issues on human rights and practical exercises within a crisis operation center environment (all exercises are critiqued and terminated with thorough after action reviews).

### ***HYDRAULIC SYSTEMS & EQUIP - MASL : P145423***

Review of hydraulic principles, components and circuitry, operation and maintenance of hydraulically operated tools, machinery and systems.

Prerequisite: Completion of Machinery Technician A (P122219).

Note: Students must have, or report with sufficient funds (approximately USD 60) to purchase, steel-toed safety shoes for participation in this course.

### ***I LEV CALIB PHASES B&D - MASL : P141065***

Upon completion of this course, Navy and Marine Corps technicians will have sufficient knowledge/theory to perform, under limited supervision, Intermediate Level Calibration of Physical/Dimensional Test and Measuring Systems in an intermediate maintenance environment. This course covers:

- Physical/Dimensional Calibration Course Indoctrination
- Pressure and Vacuum Measurement/Inflator Instrument Calibration
- Torque/Force/Tension Measurement Instrument Calibration
- Dimensional measurement Instrument Calibration.

### ***ICAF - MASL : B171806***

The Industrial College of the Armed Forces (ICAF) is a component of the National Defense University. ICAF is the premier DoD Joint Professional Military Education (JPME) institution for national security resource management. ICAF's mission is to prepare selected military and civilians for strategic leadership and success in developing the national security strategy and in evaluating, marshalling, and managing resources in the execution of that strategy.

ICAF's 10-month academic program consists of two major components--core curriculum and electives/research. The core curriculum covers National Strategy and Resource Management for National Security. The academic year begins with a brief Introductory Thematic Term followed immediately by a full Second Term featuring National Security Policy and Strategy formulation and execution, Economics (Macroeconomics), as well as Regional Security Studies. The Third Term focuses on Military Strategy, Logistics, and Leadership. The Fourth Term provides a capstone to the years study devoted to Acquisition, Economics (Microeconomics), and Industry Studies. The Regional Security Studies, Industry Studies, and Elective programs enhance the integration of all four Terms for a comprehensive learning experience.

Upon successful completion of the Colleges requirements, qualified graduates earn a Master of Science degree in National Resource Strategy.

### ***ICAF (SPECIAL)- CANADA - MASL : B171804***

The Industrial College of the Armed Forces (ICAF) is a component of the National Defense University. ICAF is the premier DoD Joint Professional Military Education (JPME) institution for national security resource management. ICAF's mission is to prepare selected military and civilians for strategic leadership and success in developing the national security strategy and in evaluating, marshalling, and managing resources in the execution of that strategy.

ICAF's 10-month academic program consists of two major components--core curriculum and electives/research. The core curriculum covers National Strategy and Resource Management for National Security. The academic year begins with a brief Introductory Thematic Term followed immediately by a full Second Term featuring National Security Policy and Strategy formulation and execution, Economics (Macroeconomics), as well as Regional Security Studies. The Third Term focuses on Military Strategy, Logistics, and Leadership. The Fourth Term provides a capstone to the years study devoted to Acquisition, Economics (Microeconomics), and Industry Studies. The Regional Security Studies, Industry Studies, and Elective programs enhance the integration of all four Terms for a comprehensive learning experience.

Upon successful completion of the Colleges requirements, qualified graduates earn a Master of Science degree in National Resource Strategy.

### ***IE DEVICE DEFEAT IEDD-T3 - MASL : B126002***

Introduction. The purpose of the IEDD-T3 course is to train selected personnel for unit led IED Awareness Training (Train the Trainer). With a specially trained cadre of IED Awareness Instructors to conduct unit training, Commanders can be confident that Soldiers in their command will have a better understanding of how IEDs are deployed, how to identify potential IED sites and the TTPs required before, during and after an IED threat. Commanders can develop the confidence and awareness in their Soldiers and Leaders prior to, and throughout, the units deployment.

Training is relative to both OIF and OEF deploying units.

### ***IERW AVR (COMM CORE)-NTH - MASL : B113100***

Provide the student with basic rotary-wing operator skills and knowledge for qualification in the TH-67 aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight, and safety factors.

### ***IERW CH-47D TRACK - MASL : B113146***

Course Scope:

Designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification and designation as an Army combat aviator in the CH-47D aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks, flight planning, night/night vision goggles, command instrument systems, and safety factors appropriate to the aircraft.

### ***IERW OH-58A/C TRACK - ALL - MASL : B113103***

Track is designed to provide the student with the necessary skills and knowledge for qualification and designation as an Army combat aviator in the OH-58A/C aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks, and safety factors appropriate to the track. Track is designed to provide the student with the necessary skills and knowledge for qualification and designation as an Army combat aviator in the OH-58A/C aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks, and safety factors appropriate to the track.

### ***IERW UH-60 TRACK - MASL : B113145***

Course is designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification and designation as an Army combat aviator in the UH-60 aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks and safety factors appropriate to the track. Course is designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification and designation as an Army combat aviator in the UH-60 aircraft system. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, instrument flight tasks, combat skills flight tasks and safety factors appropriate to the track.

### ***IF PREPARATORY COURSE - MASL : B171805***

The International Fellows Preparatory Course prepares the Fellows for the rigorous academic programs at NWC or ICAF and transitions the Fellow and his family into living in the Washington D.C. area. The first few days are devoted mainly to in processing and briefings on the metropolitan area. During the 8 weeks program from mid June to mid August, the Fellows will receive orientation briefings from many NDU organizations as well as several days of computer training and effective writing in English Classes. The Fellows also begin their Field Studies with trips to various locations within the United States. Families are included in most of the local orientation events to include bus tours, picnics and other social gatherings.

### ***IHSAP-CAT A - MASTERS DEG - MASL : P169265***

IHSAP is a 36 semester hour non-thesis Master of Science in Hydrographic Science degree offered by The University of Southern Mississippi (USM).

Students enter the program in the fall semester and complete 15 hours of classroom and laboratory studies. Instruction continues with another 15 hours of lecture and laboratory coursework in the spring semester. During the summer semester, there are 6 hours of lecture and practical instruction that ends with a hydrographic field project.

The hydrography curriculum has received Category "A" Certification from the International Federation of Surveyors/International Hydrographic Organization Advisory Board on Standards of Competence for Hydrographic Surveyors.

Students seeking admission to the degree program must (1) meet the general admission and academic requirements for all graduate programs as outlined in USM's Graduate Bulletin, (2) complete the Graduate Record Examination, (3) complete the Test of English as a Foreign Language, (4) have a 3.0 or better grade point average for the last two years of undergraduate study, (5) have letters of recommendation sent by three individuals, and (6) submit a two to three page letter of intent expressing their academic, research, and career goals.

The classes are conducted in the USM Department of Marine Sciences facilities located at Stennis Space Center, Mississippi, which is 40 miles (64 km) east of New Orleans, Louisiana, and 35 miles (56 km) west of Gulfport, Mississippi. There is no public or government transportation available. Students should be prepared to coordinate or provide their own transportation from their billeting area to Stennis Space Center during their participation in IHSAP. Students without dependents are required to live at the Navy Construction Battalion Center, Gulfport if bachelor officer quarters are available.

### ***INDUSTRIAL FAMILIARZ (KS) - MASL : P179476***

#### **INDUSTRIAL FAMILIARIZATION**

Purpose: This course provides the knowledge, and skills that enable students to fulfill the ITT billets performance requirements.

This course provides the student AWS/ACS System Test Training on Stage 3-6 Ship Test Procedures (or Equivalent) on the KDX III Equipment and Computer Program at the PTC and CSEDS.

### ***INDUSTRL MAINT MGT/LOG 131 - MASL : D178053***

Improves the management abilities of entry- and mid-level managers and supervisors assigned to the DoD depot maintenance system. Examines industrial maintenance management principles and analytical techniques to determine how they can best be applied to enhance support of operational combat forces. Emphasizes the use of computer-based information and reports, forecasting, and human factors present in problem analysis and decision making. Evaluates activities required to determine and manage industrial workload cost, and studies their interrelationships.

### ***INFANTRY BASIC OFFICER LEADER - MASL : B121260***

Combined arms tactics (tactical doctrine and operations, air assault operations, military operations on urban terrain, artillery, engineer, and NBC operation and field training exercises); staff subjects (intelligence, operations, logistics, and training management); general subjects (military leadership, land navigation, legal subjects, medical subjects, effective writing, physical training, and special presentations); communications/electronics; unit/materiel readiness; weapons (individual, special-purpose, and crew-served weapons and anti-armor weapon systems).

### ***INFANTRY MORTAR PLATOON - MASL : B121183***

Tactical Employment of the Infantry Mortar Platoon; Fire Support Planning; mechanical training and live fire exercises; forward observation procedures; maintenance; survey techniques.

### ***INFANTRY SQUAD LEADER - MASL : P121034***

This course provides instruction in offensive, defensive and patrolling operations, land navigation, supporting arms, and close combat skills. Additionally, instruction includes the maintenance, operation and employment of the following weapons and equipment organic to the Infantry Battalion: the AN/PVS-4, AN/PVS-5 and AN/TVS-5 night vision equipment, the AN/PRC-68, AN/PRC-77, TA-1/PT and TA-312/PT communications equipment, the M16A2 service rifle, M203 grenade launcher, M249 squad automatic weapon, the M60-E3, the AT-4 and Mk 153 SMAW assault weapons, M224 60mm mortar and mines and demolitions.

### ***INFANTRY SQUAD LEADER CRS - MASL : P121035***

#### **INFANTRY SQUAD LEADER CRS**

This program of instruction provides a Marine with the knowledge and skills required of an 0311, Infantry Squad Leader. A Marine receives training in communications, train the trainer, troop leading, infantry rifle company weapons, scouting and patrolling, offensive and defensive tactics and techniques, and mobility. Upon completion of this course, a Marine is capable of performing as a rifle squad leader in an infantry rifle platoon.

Prerequisites: Student must be a Corporal or Sergeant (E-4 or E-5). A student must not have any personal, legal, or medical issues that would interfere with their ability to successfully complete the course. A student must meet Marine Corps height, weight, and body fat standards and must be capable of passing the Marine Corps physical fitness test.

### ***INFANTRY UNIT LEADER CRS - MASL : P121037***

#### **INFANTRY UNIT LEADER CRS**

A Marine receives training and education in machineguns and machinegun gunnery; mortars and mortar gunnery; anti-armor weapons and anti-armor operations; Marine Corps leadership, Marine Corps planning process, law of land warfare, anti-terrorism force protection, written communications, verbal communications, military justice, and personnel administration; section and platoon leadership; platoon/company defensive tactics; platoon/company offensive tactics; platoon patrolling; and fire support. Upon completion of this course, a Marine is capable of performing as a rifle platoon sergeant, weapons platoon sergeant, machinegun section leader, heavy machinegun platoon sergeant, 60mm mortar section leader, 81mm mortar section leader, Javelin section leader, anti-armor platoon sergeant, and anti-tank (TOW) section leader.

Prerequisites: A student must be a Staff Sergeant or Gunnery Sergeant (E-6 or E-7). A student must not have any personal, legal, or medical issues that would interfere with their ability to successfully complete the course. A student must meet Marine Corps height, weight, and body fat standards and pass the Marine Corps physical fitness test. Non-compliance with the height weight and body composition standards or PFT failure will result in recommendation for disenrollment from IULC.

An initial performance assessment is conducted upon arrival at IULC to test infantry basic and squad leader level skills. Assessment failure will result in formal counseling and establishment of a plan to bring the student to a baseline where IULC core curriculum can begin. The training schedule is aggressive with no time allotted to refresh students on prerequisite core competencies. The student is expected to dedicate his own time and effort to refresh this information with the guidance of instructors.

### ***INFANTRY UNIT LEADER CRS - MASL : P121036***

This course provides the knowledge and skills required by an Infantry Unit Leader to perform as a rifle platoon sergeant, weapons platoon sergeant, machinegun section leader, heavy machine gun platoon sergeant, 60mm mortar section leader, 81mm mortar section, leader, Javelin section leader, anti-armor platoon sergeant, and anti-tank (TOW) section leader. Student will receive training and education in machine guns and machinegun gunnery; mortars and mortar gunnery; anti-armor weapons and anti-armor operations; leadership planning process; law of land warfare, anti-terrorism force protection, written communications, verbal communications, military justice, and personnel administration; section and platoon leadership; platoon/company defense tactics; platoon/company offensive tactics; platoon patrolling; and fire support.

### ***INFANTRYMAN BNCOC - MASL : B129907***

Infantryman BNCOC is broke down into two parts: CMF 11 common Infantry training and CMF 11B specific training. CMF 11 Common Infantry Training includes: Pre-course examination; day and night land navigation; virtual and constructive simulations (CCTT, J-CATS, and the EST 2000); Advance Infantry Marksmanship Training (AIMSS); tactical employment of machine guns; FBCB2; forward observer procedures; and maintenance procedures. CMF 11B specific Infantryman training includes: Combat operations (FTX); PLGR; Javelin; squad battle drills; demolitions; and End of Course Exam.

### ***INFO SPEC (JOURNALIST) - MASL : B164592***

This course is designed to provide instruction in the theory, concepts and principles of community relations within the military public environment; the interaction of military/civilian publics; introduction to research methods; fundamentals of print journalism to include acceptable media English as it applies to news writing with emphasis on style, format and techniques; newspaper feature leads, headlines, copy structure and organization, news stories, instruction unique to each military service; newspaper production, layout and design; basic operation of the digital camera, photojournalism skills; and writing for radio broadcast.

### ***INFO SYS MT(Deact-See TCC) - MASL : P145037***

#### INFORMATION SYSTEMS MAINTENANCE TECHNICIAN

To provide journeyman level instruction on organizational and system maintenance for shipboard and ashore end-to-end information systems, including Global Command and Control System (GCCS) and Naval Tactical Command Support System (NTCSS) related components.

SCOPE: Instructional areas include Local and Wide Area Networks, desktop computers, Tactical Advanced Computer-Three (TAC-3), Tactical Advanced Computer-Four (TAC-4), Uninterruptable Power Supplies (UPS), Satellite Communications (SATCOM) peripheral devices, ON-143(V)6, Generic Front-end Communications Processor (GFCP), Link Converters, Fiber Optic repair, XYLAN OMNI switch, and Advanced Technical Information Support System (ATIS). Provides a working level knowledge of Windows NT, UNIX, Cisco Internetworking Operating Systems (IOS) and an overview of Global Command and Control System (GCCS) and Naval Tactical Command Support System (NTCSS) applications. Provides instruction on initial system setup, basic administration and operational checks on the various systems.

### ***INFO SYS OPNS PREPARATORY (53A) - MASL : B155435***

Signal organizations and hierarchy, telecommunications and electronics fundamentals, Army and Joint information systems, planning, implementation and management of data networks (computer and computer networks).Signal organizations and hierarchy, telecommunications and electronics fundamentals, Army and Joint information systems, planning, implementation and management of data networks (computer and computer networks).

### ***INFO SYS SECURITY MANAGER - MASL : P155411***

#### INFORMATION SYSTEMS SECURITY MANAGEMENT COURSE M09D3H1

This course introduces the distinct aspects of Information Systems Security (INFOSEC): confidentiality, integrity, and availability. Practical experience is provided in identifying threats and vulnerabilities associated with sensitive information stored in information systems and providing safeguards against unauthorized access, modification, destruction, and denial of services. Topics presented include: system security plan, risk assessment, contingency planning, security test and evaluation, certification and accreditation, physical security, malicious code protection, sensitive data handling procedures, incident response, multiple platform level security requirements, system auditing, user and administrator security training, and development of a security awareness program.

### ***INFO SYS TECH CLASS A - MASL : P139361***

#### INFO SYS TECH CLASS A

To provide the basic knowledge and skills required to enable personnel to perform at the "job entry" or apprentice level in the IT rating.

Execute information transfer with state-of-the-art multi-media technology such as fiber optics, digital microwave, and tactical and commercial satellites on a global basis; operate, manage and provide hardware and software support to multimedia Automated Information Systems (AIS) to include: mainframes, mini and microcomputers, Local Area Networks (LAN s), Wide Area Networks (WAN s), and telecommunication; apply diagnostic and restorable techniques utilizing knowledge of electronic and operational system theory; advise on capabilities, limitations, and condition of equipment; implement production control procedures including input/output quality control support; implement and monitor security procedures; perform assigned mission organizational level maintenance and repair of Command, Control, Communications, Computer, and Intelligence Systems.

### ***INFO TECH CAPTIAL PLANNING - MASL : B155441***

This course focuses on state-of-the-art strategies for IT Capital Planning, with an emphasis on assessing and managing information technology (IT) as a portfolio of investments. The three phases of the IT investment management process are considered: selection, control, and evaluation of proposals; on-going projects; and existing systems. The relationship of IT performance measures to mission performance measures is explored. The course examines the roles of the CIO and other managers in developing IT assessment criteria and considers how the criteria are used in planning and managing the IT portfolio. Individual and team exercises are employed, including a simulation of the operation of the Investment Review Board.

### ***INFO WARFARE APPL CRS - MASL : D121092***

The Information Warfare Applications Course (IWAC) educates students in the fundamental principles of Information Operations in accordance with AF Doctrine Document 2-5. The objective is to provide students with a broad understanding of Information Operations Doctrine and insight into how Information Operations are applied across the full spectrum of conflict from peace to war. The course is taught at the college level through lectures, seminars, practical exercises, readings and computer based lessons. Classes are offered eight times a year with an enrollment of 70 to 80 students per class.

### ***INFORMATION MANAGEMENT APR - MASL : D161005***

This course is designed to provide training for personnel in AFSC 3A031. Information presented in the E3ABR3A031 00AB course includes the following five blocks: Introduction to Information Management, Office Automation Software, Content Development and Management, Information Management Functions and Electronic Communications, and Network Infrastructure.

### ***INFORMATION OPS-SPANISH - MASL : B129201***

Common baseline of IO knowledge upon which to correctly and legally employ IO tools and techniques; five foundational elements of IO integration and coherence: intelligence and exploitation; information projection; information protection, and organization, training, and equipping; including a combination of instructor lectures; guest speakers, and guided discussions; mandated minimum of 12 hours of instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society. Common baseline of IO knowledge upon which to correctly and legally employ IO tools and techniques; five foundational elements of IO integration and coherence: intelligence and exploitation; information projection; information protection, and organization, training, and equipping; including a combination of instructor lectures; guest speakers, and guided discussions; mandated minimum of 12 hours of instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***INFORMATION SYSTEMS COURSE - MASL : D155065***

#### **COURSE DESCRIPTION:**

- **BLOCK I - INFORMATION TECHNOLOGY SECURITY:** Students will learn how to defend against tactics used by computer criminals (commonly called hackers) to infiltrate computer systems to gather personal/company information (data, video, audio). They will learn how to combat an attack on a computer network to prevent malicious programs (viruses, Spyware, etc.) from taking over a network. Customer service training will help students better understand customers to achieve a more cohesive working environment.
- **BLOCK II - COMPUTER SYSTEM BASICS:** Students will be taught the history of computers. Students will learn how computers work and how they continuously change. They will receive a brief introduction to Artificial Intelligence [(AI), neural networks, remote agents, etc.].
- **BLOCK III - WINDOWS OPERATING SYSTEMS:** Students will learn how to install and use the most common Windows operating systems: DOS, Windows 98, Windows NT, Windows 2000 and Windows XP. By the end of this block, each student will be able to independently install, configure and use each of these operating systems.
- **BLOCK IV APPLICATIONS SOFTWARE** Students will learn how to install and use Microsoft Office 2000 (Word, Excel, PowerPoint, Outlook), Adobe Reader, WinZip, Anti-Virus software, Anti-Spyware software, CD-reproduction software (also called burning or recording software), scanner software and Personal Digital Assistants (PDAs). They will also learn how to operate the Smart Board system ([www.Smarttech.com](http://www.Smarttech.com)), which allows personnel to enhance any presentation or class. In addition, the course includes a non-technical basic survival PC troubleshooting section to help students troubleshoot their computers.

### ***INFORMATION SYSTEMS OPERATOR-ANALYST - MASL : B155450***

Instruction will include the following topics: microcomputer software, operating systems, software utilities, assembly/disassembly of microcomputers, data communications, local area networks (LANS), tactical LANS, problem solving structured design techniques, database system design and development (programming), error recovery, data security, Defense Message System, computer configuration, operation and maintenance, and network configuration and troubleshooting. Instruction will include the following topics: microcomputer software, operating systems, software utilities, assembly/disassembly of microcomputers, data

communications, local area networks (LANS), tactical LANS, problem solving structured design techniques, database system design and development (programming), error recovery, data security, Defense Message System, computer configuration, operation and maintenance, and network configuration and troubleshooting.

### ***INFORMATION SYSTEMS OPERATOR-ANALYST BNCOC - MASL : B155460***

The student will receive training consisting of instruction in MOS specific technical training. The course will provide the student with MOS specific training that will consist of computer technology; data communications; communications security; routing network academy theory and practices (CISCO) Part 1-4; Window 2000 operating system domains and server functions and the Unix/Solaris operating system, system admin/network manager security; the Tactical Internet Manager system (TIMs) for the Force XXI Battle Command Brigade and Below (FBCB2), Enhanced Position Location Reporting System (EPLRS), Single Channel Ground & Airborne Radio system (SINGARS), Precision Lightweight Global Positioning System Receiver (PLGRs), the Near Term Digital Radio (NTDR); Defense Message System (DMS) with particular emphasis on Operating System Administration (OSA), problem solving using structured design techniques for a 5th generation Database Management System (DBMS); site maintenance; plans and operations.

### ***INFORMATION SYSTEMS OPNS - MASL : D156011***

This course is designed to provide personnel for AFSC 3C031. Information presented includes Communications and Information Systems Fundamentals, Computer and Network Fundamentals, UNIX Operating System Fundamentals, Client Operating System Fundamentals, Network Operating System Fundamentals, and Network Management Fundamentals. The client operating system and the networking operating system are Microsoft Windows 2003 Server with Exchange Server and Network Operating System Fundamentals Microsoft Windows 2003 Professional.

### ***INITIAL NAV AV SURV TRNG - MASL : P117432***

Required appropriate Initial Naval Survival training per OPNAVINST 3710.7S for enlisted aircrew students, prospective military/civilian Aeronautically designated personnel, exchange aircrew, and both U.S. Military and Foreign services.

SCOPE: Provides basic introductory training per OPNAVINST 3710.7S. The course includes an Overview of the Naval Aviation Survival Training Program, classroom instruction on Aviation Physiology, an appropriate Low Pressure Chamber brief/flight (exception: prospective helicopter aircrew), Stress and Human performance presentation, classroom presentation and laboratory evolution on Sensory Physiology, class and lab on Combat/Survival First (SELF) Aid, class and lab on Aviation Survival Swim Skills, class and lab on Underwater Problem Solving Skills, class and lab on Multiplace Aircraft Underwater Egress skills, class and lab on Extended Sea Survival, and a written final examination.

### ***INITIAL NAV AV SURV TRNG - MASL : P117433***

Required appropriate Initial Naval Survival training per OPNAVINST 3710.7S for enlisted aircrew students, prospective military/civilian Aeronautically designated personnel, exchange aircrew, and both U.S. Military and Foreign services.

SCOPE: Provides basic introductory training per OPNAVINST 3710.7S. The course includes an Overview of the Naval Aviation Survival Training Program, classroom instruction on Aviation Physiology, an appropriate Low Pressure Chamber brief/flight (exception: prospective helicopter aircrew), Stress and Human performance presentation, classroom presentation and laboratory evolution on Sensory Physiology, class and lab on Combat/Survival First (SELF) Aid, class and lab on Aviation Survival Swim Skills, class and lab on Underwater Problem Solving Skills, class and lab on Multiplace Aircraft Underwater Egress skills, class and lab on Extended Sea Survival, and a written final examination.

### ***INSPECTOR GENERAL - MASL : B176000***

Provides detailed inspectors general, assistant inspectors general and other qualified personnel instruction on the fundamental concepts and techniques and issues relating to the inspector general system in the army. The course examines basic policies and procedures pertaining to the mission, duties, investigations, inspections, teaching and training. Practical exercises illustrate all aspects of inspector general functions and enhance student ability to make the transition from classroom theory to operational application.

### ***INST AND FLT CONT SYS APP - MASL : D133067***

This course trains students in the following areas: Introduction to the 2A5X3B career field, general aircraft maintenance practices, safety, security, technical order systems, supply principles, and avionics systems. It also provides an introduction to

instrument and flight control systems, flight environment systems, general navigation systems, liquid quantity indicating systems, engine indicating systems, flight controls, stability augmentation systems, and automatic flight control systems. The course depends heavily on the practical application of technical orders (TO), systems trainers, and grounded instructional training aircraft (GITA) to reinforce basic system principles and maintenance practices. This is a course number conversion from J3ABR2A533B 002 as directed by HQ TC/E3P.

### ***INSTRUCTIONAL SYS MAT DEV - MASL : D166023***

The course trains personnel in educational and training activities to apply instructional systems development procedures using the AF Instructional Systems Designer (ISD) model. The scope of training includes the analysis, design, development, and implementation phases of ISD. It further incorporates quality measures that are associated with training development and presents information regarding managing ISD efforts by using information and evaluation management tools. The course curriculum involves students in working groups, peer teaching, discussion, and informal lectures based on case studies. The instructional design of this course is group paced.

### ***INSTRUCTOR - MASL : D309004***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***INSTRUCTOR COURSE - MASL : P166807***

**PURPOSE:** To train instructors in the formal implementation of instruction in accordance with the System Approach to Training (SAT) Manual. This course provides the knowledge, skills and attitudes required for each instructor to be successful. Areas covered are how to conduct a time-critical operational risk assessment, review lesson materials, prepare the instructional environment, effective communication and how to rehearse and conduct a lesson. Also included is after lesson management and how to administer a student test. **Student requirements:** A Master Lesson File containing a lesson plan that is 50-minutes in length and includes lecture, demonstration and practical application. Students are required to bring all instructional media, supplemental and student materials required to teach their 1 - 50 minute lesson. **UNIFORM/EQUIPMENT REQUIREMENTS:** Students should bring appropriate service uniforms. Students will check in wearing the utility uniform and will be worn for all periods of instruction Monday-Friday. The uniform for graduation is the Service "C" uniform.

### ***INSTRUCTOR DEVELOPMENT CRS - MASL : P166425***

The course introduces classroom instructors to performance-based, student-centered, instructor-led instructional techniques. Training focuses on comprehensive lesson planning, stresses the importance and use of performance objectives, assists in understanding adult learning behaviors, and provides helpful classroom management techniques. Students gain experience in the use of course objectives, testing, and lesson plans. Student management techniques and instructor ethics also are addressed.

**Note:** Students will be making two performance-based presentations during the course, which are to be based on training materials they currently are using or expect to be using.

### ***INSTRUCTOR PILOT - MASL : D301030***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***INSTRUCTOR TRAINING - MASL : B279913***

Covers course objectives and requirements, student and instructor roles and responsibilities, TAITC definitions, adult communications and learning theories, training session development concepts, and instructor methodologies presented by students through practical exercise and presentations.

### ***INSTRUCTOR TRAINING - MASL : B179927***

This MASL will be used when Instructor Training is programmed. This MASL will be used when Instructor Training is programmed.

### ***INSTRUCTOR TRAINING - MASL : B179920***

This MASL is used when Instructor Training at the Aviation School, Fort Rucker Alabama is programmed .This MASL is used when Instructor Training at the Aviation School, Fort Rucker Alabama is programmed.

### ***INSTRUCTOR TRAINING - MASL : B179910***

The Army Instructor Training Course (TAITC) is a comprehensive core course that trains Active and Reserve Component instructors to deliver battle-focused training in The Army School System (TASS). The TAITC is designed for delivery in the traditional classroom setting or via distance learning.

The TAITC consists of planning, preparing, and presenting Army training. The basic method for Army instructors is previewing and presenting the task, practicing the task, and performing the task to standard during evaluation. This method is enhanced during this course by applying a variety of presentation and practice methods and training techniques. The course also addresses how instructors motivate soldiers and solve soldier performance problems using positive reinforcement, on-the-spot corrections, and soldiers counseling.

The TAITC stresses standardization in format and content. The course provides the instructor with standardized references and lesson plans for presenting instruction, a Training Support Package with visuals for multi-media use, and practical exercise and presentation evaluation forms.

### ***INSTRUCTOR TRAINING - MASL : B179935***

This MASL is used for instructor training.

### ***INSTRUCTOR TRAINING - MASL : B179916***

The course is designed to teach personnel selected as instructors how to prepare and present a quality training session. The course emphasizes learning by doing. The course presents definitions, terminology, and instructional methods used to present instruction. The course contains lessons and exercises that allow students to experience, first hand, how to prepare and present an effective training session. The course also addresses how instructors motivate students and help solve performance problems using positive reinforcement and counseling.

### ***INSTRUCTOR TRAINING - MASL : B179919***

To train students in the skills required for platform classroom instructors. Instruction is given on communication skills, lesson organization, preparation of the introduction and summary, questioning techniques, use of training aids, learning principles and after action review methods. Students are evaluated on their ability to present a formal, 50-minute class, during their second week of training. To train students in the skills required for platform classroom instructors. Instruction is given on communication skills, lesson organization, preparation of the introduction and summary, questioning techniques, use of training aids, learning principles and after action review methods. Students are evaluated on their ability to present a formal, 50-minute class, during their second week of training.

### ***INSTRUCTOR TRAINING COURSE - MASL : B179907***

Instructor Training.

### ***INSTRUCTOR TRAINING COURSE - MASL : B179934***

This MASL is used when Instructor Training Course is required. This MASL is used when Instructor Training Course is required.

### ***INSTRUCTOR TRAINING COURSE - MASL : B175218***

Emphasis is placed on the Systems Approach to Training process, communication skills, audiovisual support, writing lesson plans in the ASAT format, writing objectives, writing test items, and presenting instruction.

### ***INSTRUCTOR TRAINING COURSE - MASL : B179915***

This MASL will be used when Instructor Training Course is programmed.

### ***INSTRUCTOR TRAINING COURSE - MASL : B279920***

This MASL is used when Instructor Training is programmed.

### ***INSTRUCTOR TRAINING CR - MASL : B179913***

Performance-oriented instruction on how to develop, prepare, present and evaluate instruction in a service school. Performance-oriented instruction on how to develop, prepare, present and evaluate instruction in a service school.

### ***INSTRUCTOR TRNG (JIT) AEC - MASL : P166312***

To train selected Navy, Marine Corps and DOD civilian personnel, including students of allied nations, in the techniques and principles of instruction applicable to the formal school environment. Four performance examinations are delivered by each student.

SCOPE: Course content includes the Navy training program; objective, test item, and lesson development; theories and laws of learning; instructional methods and techniques; instructional media; instructor evaluation; factors affecting learning and student motivation and academic guidance and counseling techniques.

### ***INSTRUCTOR TRNG (JIT) AEC - MASL : P166175***

INSTRUCTIONAL DELIVERY CONTINUUM (IDC) JOURNEYMAN INSTRUCTOR TRAINING (JIT) AUTOMATIC ELECTRONIC CLASSROOM (C)

Purpose: To train Navy, Marine Corps, DoD civilians (civil service), other DoD personnel and allied foreign nationals in the application of principles of learning; instructional methods, strategies, and techniques; and, the effective communication, oral questioning, and presentation techniques appropriate to basic instructional advanced technical classroom and/or other learning environments. A progressive series of performance activities allow students to demonstrate proficiency in the required knowledge and skills of an entry-level instructor.

Scope: Instructor Training (JIT) qualification course available to all DoD and AFN personnel with a demonstrated requirement for training. SNEC 9502 awarded to Navy personnel upon successful completion.

### ***INSTRUCTOR TRNG (JIT) AEC - MASL : P166313***

To train selected Navy, Marine Corps and DOD civilian personnel, including students of allied nations, in the techniques and principles of instruction applicable to the formal school environment. Four performance examinations are delivered by each student.

SCOPE: Course content includes the Navy training program; objective, test item, and lesson development; theories and laws of learning; instructional methods and techniques; role of technology; instructor evaluation; factors affecting learning and student motivation and academic guidance and counseling techniques.

### ***INSTRUCTOR TRNG (JIT) AEC - MASL : P166311***

To train selected Navy, Marine Corps and DOD civilian personnel, including students of allied nations, in the techniques and principles of instruction applicable to the formal school environment. Three performance examinations are delivered by each student and two knowledge tests are given. SCOPE: Course content includes the Navy training program; objective, test item, and lesson development; theories and laws of learning; instructional methods and techniques; instructional media; instructor evaluation; factors affecting learning and student motivation and academic guidance and counseling techniques.

Note: IT is completed on a local server through the Internet.

### ***INSTRUCTOR TRNG(JIT) (CBT) - MASL : P166309***

Instructional Delivery Continuum (IDC) Journeyman Instructor Training (JIT)

Purpose: To train Navy, Marine Corps, DoD civilians (civil service), other DoD personnel and allied foreign nationals in the application of principles of learning; instructional methods, strategies, and techniques; and, the effective communication, oral questioning, and presentation techniques appropriate to basic instructional advanced technical classroom and/or other learning environments.

### ***INSTRUCTOR-SPANISH - MASL : B179117***

Performance-oriented instruction on how to develop, prepare, and present instruction; develop plans and tests to measure learning; democracy and human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***INSTRUMENT PLT INSTRUCTOR - MASL : D301031***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***INT FIELD RADIO OPERATOR - MASL : P132825***

Field radio operators employ radio to send and receive messages. Typical duties include: the set up and tuning of radio equipment, including antennas and power sources; establishing contact with distant stations; processing and logging of messages; making changes to frequencies or cryptographic codes; and maintaining equipment at the first echelon.

Course prerequisites

E-1 through E-4. Although this course is unclassified, a secret clearance is required to access the facility where the training is conducted. ITO must include security clearance.

### ***INT OFR TAC INTEL SOUTHCOM - MASL : B172613***

Course Scope:

The training includes the tasks, responsibilities, and skills necessary to perform the basic duties of the 35D, All-Source Intelligence Officer. Subjects include: The Intelligence Cycle, Contemporary Operational Environment (COE) Overview, OPFOR Tactics, Military Intelligence Company Systems and Tactical Employment, Intelligence Preparation of the Battlefield, Targeting, Reconnaissance and Surveillance Planning, Processing, Application of the Military Decision Making Process (MDMP), Unmanned rail Vehicle (UAV) Orientation, and a Tactical Operations Center Exercise (TOCEX).

### ***INT OFR TACT INTEL - EUCOM - MASL : B172612***

The training includes the tasks, responsibilities, and skills necessary to perform the basic duties of the 35D, All-Source Intelligence Officer. Subjects include: The Intelligence Cycle, Contemporary Operational Environment (COE) Overview, OPFOR Tactics, Military Intelligence Company Systems and Tactical Employment, Intelligence Preparation of the Battlefield, Targeting, Reconnaissance and Surveillance Planning, Processing, Application of the Military Decision Making Process (MDMP), Unmanned rail Vehicle (UAV) Orientation, and a Tactical Operations Center Exercise (TOCEX).

### ***INT OFR TACT INTEL- PACOM - MASL : B172611***

The training includes the tasks, responsibilities, and skills necessary to perform the basic duties of the 35D, All-Source Intelligence Officer. Subjects include: The Intelligence Cycle, Contemporary Operational Environment (COE) Overview, OPFOR Tactics, Military Intelligence Company Systems and Tactical Employment, Intelligence Preparation of the Battlefield, Targeting, Reconnaissance and Surveillance Planning, Processing, Application of the Military Decision Making Process (MDMP), Unmanned rail Vehicle (UAV) Orientation, and a Tactical Operations Center Exercise (TOCEX).

### ***INTELLIGENCE - MASL : D302032***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***INTELLIGENCE IN COMBATTING TERRORISM - MASL : B172600***

Legal considerations in combating terrorism and force protection; background and history of terrorism; terrorist ideological motivations; terrorist organizational structures; state support to terrorist groups; terrorist strategy and tactics; analytical methods for examining terrorist groups; terrorist threat assessment for military installations and deploying units; terrorist use of weapons of mass destruction.

### ***INTELLIGENCE OFFICER - MASL : B172750***

Employment of the tactical intelligence cycle: intelligence preparation of the battlefield; use of tactical counterintelligence; security of intelligence information and operations; threat analysis; internal defense and development; and training in automated data processing in support of intelligence operations; minimum eight hours of instruction on human rights; due process; the rule of law; civilian control of the military, and the role of the military in a democratic society.

### ***INTERIOR ELECTRICIAN - MASL : B174110***

MOS specific training, and field training exercise (FTX). MOS specific training includes safety, basic mathematics, construction print reading, selection and use of electrical tools, materials, and the installation and testing of interior electrical circuits. The FTX is a reinforcement of CET and MOS specific tasks.

### ***INTERMEDIATE LEVEL EDUC - MASL : B171768***

Doctrine and principles of combat, combat support, and combat service support functions. The student will know doctrine and tactics, apply techniques, know staff procedures, and be capable of serving as a member of, or of leading, a high performing staff organization. Doctrine and principles of combat, combat support, and combat service support functions. The student will know doctrine and tactics, apply techniques, know staff procedures, and be capable of serving as a member of, or of leading, a high performing staff organization.

### ***INTERMEDIATE LVL EDUCATION - MASL : B171425***

Doctrine and Principles of combat service support functions; doctrine and tactics; apply techniques; know staff procedures and be capable of serving as a member of, or leading, a high performing staff organization; organization tour of the United States during which students visit major military installations, service schools and Washington, DC; university and post-graduate level of instruction; mandated minimum of 40 hours of instruction on human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***INTERMEDIATE SYS ACQUIS - MASL : B154011***

Intermediate Systems Acquisition, Part B, prepares mid-level acquisition professionals to work effectively in integrated product teams by understanding systems acquisition principles and processes. Both ACQ 201A and ACQ 201B are required for DAWIA certification.

Objectives: Students who successfully complete this course will:

- Enhance and apply their knowledge of the business, technical, and managerial aspects of acquisition;
- Understand and appreciate the critical role that each functional discipline plays in the acquisition process; and
- Effectively participate in integrated product teams and apply knowledge gained in ACQ 201A to develop plans and resolve problems.

### ***INTERMEDIATE SYS ACQUIS DL - MASL : B154010***

Intermediate Systems Acquisition, Part A, uses computer-based training to prepare mid-level acquisition professionals to work in integrated product teams by understanding systems acquisition principles and processes. Both ACQ 201A and ACQ 201B are required for DAWIA certification.

Objectives: Students who successfully complete this course will:

- Enhance their knowledge of the business, technical, and managerial aspects of acquisition;
- Understand and appreciate the critical role that each functional discipline plays in the acquisition process; and
- Using computer-based training, virtually participate in simulated integrated product teams to develop plans and resolve problems.

### ***INTERNATIONAL OAC PREPARATORY - MASL : B171604***

Background information concerning U.S. Army organization and structure, air defense artillery operations and tactics; air defense threat information; map reading, military symbols and terms; military communications; overview of small group instruction methodology.

### ***INTERNATIONAL OFFICER INTELLIGENCE CCC PREP - MASL : B172622***

To provide international officers with background information concerning US Army organization, battlefield operating systems, terms and symbols, Army writing and briefing, and systems information skills

### ***INTERNATIONAL SPECIAL FORCES TRAINING - MASL : B126650***

Individual physical training, Land Navigation, Obstacle course, Team events; Instruction methods and techniques, After action reviews, Risk management process; Special Forces history and organization, Army security assistance, Theater SOC operations, Civil Affairs and PSYOP, Advanced Skills overview; Hand-to-hand, Troop leading procedures, Patrolling, Advanced rifle marksmanship; Airborne operations, Special Forces Military Occupation Specialty (MOS) training. Phase

### ***INTERNATL MIL STUDENT OFF - MASL : B171619***

Tactical training and leadership by U.S. Army doctrine standards. Tactical training and leadership by U.S. Army doctrine standards.

### ***INTERPRETER - MASL : P179955***

In accordance with SECNAVINST 4950.4, qualified interpreter used for ship training.

### ***INTERPRETER - MASL : D309014***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***INTERPRETER-OFFICER - MASL : B179923***

This MASL is used when an Officer Interpreter is required. This MASL is used when an Officer Interpreter is required.

### ***INTERPRETERS - MASL : D305013***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***INTERSERVICE MECH APPR - MASL : D148027***

This course is the fundamental phase of a training program leading to the award of AFSC 2T332C. This course and the follow-on course, L3ABP2T332C00AA, must be completed before the AFSC is awarded. Training provided by the course is generic and is not designed for a specific type of vehicle. Includes fundamentals of automotive mechanics; use of special vehicle tools and test equipment. Inspecting, troubleshooting, servicing, and repairing of diesel and gasoline engines, power trains components, steering mechanisms, brakes, suspension systems. Isolating electrical system malfunctions and inspecting hydraulic components. Tracing electrical and hydraulic system diagrams or schematics. Use of commercial publications and safety.

### ***INTL - DAMCONT ASST - MASL : P129149***

#### **INTERNATIONAL - DAMAGE CONTROL ASST**

Provides billet specialty training to Officers en-route to Damage Control assignments in surface ships. Course graduates are qualified to fill the Damage Control Assistant billet in surface ships covering the following areas in-depth:

- Repair Division Administration and Responsibilities
- Damage Control Administration and Training
- Damage Control Equipment and Systems
- Damage Control Petty Officer Program requirements, equipment and maintenance procedures
- Stability and Buoyancy
- Battle Damage Evaluation and containment techniques
- Chemical, Biological and Radiological Defense management
- Gas Free Engineering.

### ***INTL 533 CMBSYS SCI/TEC-MS - MASL : P179906***

The objective of this program is to provide a broad-based, design oriented education focusing on the warship as total engineering system including hull, mechanical, electrical and combat systems. The program is for selected Naval/Mechanical Engineering, Electrical Engineering, and Combat Systems Sciences and Technology students and is structured to lead to the MSME, MSEE, or MS in Physics.

### ***INTL ADVANCED TACTICS - MASL : P122900***

To provide senior international Officers and staff officers tactical training to improve their proficiency in war fighting skills in Joint Combat and Naval Expeditionary Operations.

Special Note: Student must possess a Secret Clearance in order to access the facility where training takes place.

### ***INTL ASW AIR CONTROL - MASL : P123073***

#### **INTL ASW AIR CONTROL**

Provides training to prospective foreign naval Anti-Submarine Warfare (ASW) air controllers in the knowledge and skills necessary to effectively control ASW fixed-wing and rotary wing aircraft.

### ***INTL ASW JR OFF CRS - MASL : P123653***

Provides training to junior international officers of non-NATO nations assigned to ASW ships in ASW operations, maintenance and air control. Provides students with the basic skills and knowledge in Anti-Submarine Warfare Surface and Sub-Surface Operations, ASW Equipment, ASW Weapons and Weapons Tactics, Oceanography, Shipboard Administration and Training in sufficient detail to perform duties at the Anti-Submarine Weapons Officer level. Includes orientation tours and visits to local activities in accordance with CNO policies for military, cultural, and industrial activities.

### ***INTL AVTRA WTR/PHYS-N5/NP2 - MASL : P117402***

Provides designated pilots and other officers who are selected International Military Students (IMS) with basic skills and initial qualifications needed in accordance with OPNAV 3710.7 series, in order to complete Instructor Under Training, Aviation

Preflight Indoctrination and other programs. This course encompasses administrative processing, physical exam and water and physiology survival training (N5/NP2) at NOMI for OJT and other requirements as specified in OPNAV 3710.7 series instruction.

### ***INTL CIC WATCH OFFICER - MASL : P121022***

INTERNATIONAL COMBAT INFORMATION CENTER (CIC) WATCH OFFICER

Provides officers from allied navies with training in basic Combat Information Center operations during routine peacetime steaming. The target audience is junior officers (O-1 to O-2) WITH LIMITED OR NO AT SEA EXPERIENCE. Emphasis covering overviews of multi-threat warfare areas, CIC equipment, special maneuvering, and CIC navigation. Upon completion of this course, the student is prepared to plan, coordinate and manage the supervision of all CIC operations and training during routine peacetime steaming. NOTE: Graduates of the International Division Officer Course receive similar training and are highly discouraged from attending this class.

### ***INTL CRISIS CMD/CTRL - MASL : P162285***

CRISIS COMMAND & CONTROL COURSE (International). This course is designed to provide the skills necessary for decision-makers to manage emergency incidents. The course consists of training on risk communications, risk based decision making, best response to a disaster, contingency planning, the Incident Command System, exercise design and development, and a day of challenging hands-on media relations training. Students will take part in a two-day crisis management exercise using state of the art computer simulation software in which participants will work in groups to resolve a series of high pressure problems. The student population will consist of 20 officers from a mix of maritime nations.

### ***INTL DEF TRANSFORMATION - MASL : P171406***

INTERNATIONAL DEFENSE TRANSFORMATION.

The Center for Civil-Military Relations (CCMR) offers a two-week Expanded International Military Education and Training (IMET) approved course entitled "International Defense Transformation at the Naval Postgraduate School, Monterey, California. The course provides participants with the knowledge and skills needed by decision-makers and their advisors to effectively design and implement plans for defense transformation. The key objectives of the course are to provide instruction to:

- Support international understanding of the compelling need to transform the worlds military capabilities to meet the operational challenges of the future security environment.
- Identify transformational elements, influences and objectives to counter adversary strategies and protect national interests.
- Explore the characteristics of the emerging way of warfare and crisis resolution, to include Effects-Based Operations enabled by Network-Centric Warfare
- Frame directives to provide vision and guidance for national transformation strategy, roles and responsibilities, concept development and experimentation, and roadmaps.
- Examine how nations develop an overarching concept and subordinate/supporting concepts; for example: Joint Operations Concepts, Stability Operations, Command and Control, and Force Application.
- Answer how nations plan, design and conduct experimentation to evaluate new concepts or prototypes and solve interoperability or interagency issues seen in recent operational missions.
- Evaluate experimental derived capabilities in technological advances, organizational configurations, process improvements, and training adaptations.
- Appraise Armed Forces (Army, Navy, Marine Corps and Air Force) progress toward implementation of the transformation strategy.

The International Defense Transformation course provides an overview of innovative operational concepts, organizational structures and emerging technologies for transforming militaries to maintain competitive advantage in the 21st Century. The course will highlight Transformation Planning Guidance, Concept Development and Experimentation Campaign Plan and Defense Transformation Roadmap type initiatives for shifting the character of warfare and crisis resolution. It will expose revolutionary methods to improve command and control, fires, maneuver and logistics through concept development, technology

demonstrations, and field experiments. This course combines informational content and references along with case studies and practical exercises in aspects of defense transformation.

This course is delivered in partnership with Headquarters Allied Command Transformation (HQ ACT) and the Commander, Joint Forces Command (JFCOM) Joint Experimentation Directorate. **PARTICIPANTS:** The course is designed for international mid to senior military officers in the ranks of major to brigadier general and civilian equivalents from the Ministry of Defense, who are responsible for security and defense policy, strategic planning, programming and execution. **COURSE DATES:** Offered in-residence in December at the Naval Postgraduate School, as a Fifth Quarter event.

### ***INTL DEFENSE MGT CRS - MASL : P162003***

#### **INTERNATIONAL DEFENSE MANGEMENT COURSE**

The IDMC course applies basic concepts, techniques, and analysis of comparative resources management to enhance the theoretical knowledge, competence, and capabilities of foreign military and civilian officials. This course is suitable for managers working in any functional field concerned with resource allocation. The major curricular concept of this course is comparative resources management, i.e., the examination of theories and practices of various nations, not only those of the U.S. The Institute stresses that each country is unique and must choose resource management systems that meet its specific needs. To enhance comparative aspects of the curriculum, DRMI encourages broad national representation with a diversity of both military services/agencies and civilian government officials. A typical IDMC class has participants from 35 to 45 countries representing all services and defense and other ministries. Throughout the course DRMI encourages participants to share information and perspectives related to defense management in their own environments. This enables a critical examination of the relationships among management concepts discussed in the course and their applicability to various conditions found in other countries.

### ***INTL DIESEL SUBMARINE TRNG - MASL : P122560***

Provides instruction in diesel submarine tactics, training, and qualification disciplines/techniques, including practical training on fire control plots. Diesel submarine tactical classroom instruction is supplemented with sonar plot laboratories where students man/evaluate with various fire control party plots.

### ***INTL EOD FAMILIARIZATION - MASL : P123302***

Familiarizes experienced international EOD officers and enlisted personnel with basic U.S. EOD terminology, safety precautions, reconnaissance procedures, and tools used in the follow-on International EOD Phase II Course (CIN: A-431-0020/MASL: P123300). Course is limited to classroom instruction only and is not an entry level course.

### ***INTL EOD PH II (SURFACE) - MASL : P123300***

#### **INTL EOD PH II**

Trains officer & enlisted personnel in the best methods for performing the following Explosive Ordnance Disposal (EOD) procedures for identification, recovery evaluation & disposal of Surface Explosive Ordnance. Includes application of EOD tools & methods on placed/projected/dropped munitions & associated fuses, & aircraft explosive hazards. Includes the recognition, operation, safety precautions, hazards, rendering safe procedures & disposal of all types of SURFACE ordnance, & Chemical agents & personnel protection & radiation detection equipment & control. New: also includes training in detection & disposal of Improvised Explosive Devices (IEDs).

### ***INTL EOD PHASE I - MASL : P122060***

#### **INTL EOD PHASE I**

Trains officer & enlisted personnel in the best methods for performing the following Explosive Ordnance Disposal (EOD) procedures explosive ordnance reconnaissance, ordnance identification procedures, access & recovery, & disposal operations involving non-nuclear ordnance both foreign & domestic. Encompasses the use of Publications, Applied Physical Principles, Explosives & Explosive Effects, Safety Precautions, Introduction to Storage, Handling & Transportation of Explosives, EOD Tools & Equipment Maintenance, & Basics of Demolition. Identifies procedures for surface & underwater ordnance identification.

### ***INTL EOD PHASE II NAVY - MASL : P123301***

#### **INTL EOD PHASE II NAVY**

Trains officer & enlisted personnel in the best methods for performing the following Explosive Ordnance Disposal (EOD) procedures for identification, recovery evaluation & disposal of underwater explosive ordnance. Includes the recognition, operation, safety precautions, hazards, rendering safe procedures & disposal of all types of underwater ordnance.

### ***INTL FELLOWS ORIENTATION - MASL : B171807***

This MASL is used when INTL FELLOWS ORIENTATION is programmed.

### ***INTL HYDROG MGT & ENG PGM - MASL : P169208***

Designed to impart a practical knowledge of hydrographic and geodetic operation planning and surveying, and produce skills in conducting hydrographic tasks. Upon program completion students will be able to perform the hydrographic and geodetic function, and lead a survey operation. The training is designed for junior international Naval Officers and civilians. Subjects include Mathematics, Computer Applications, Physical Science Concepts, Geodetic Surveying Techniques, Geodetic Computations and Adjustments, Astronomic Azimuths, Satellite Geodesy, Hydrographic Positioning Systems, Depth Sounding, Sonar Sweeping and Side Scan Sonar, Automated Survey Systems, Hydrographic Survey Planning, Hydrographic Survey Operations, Tides, Currents Datum s and Harmonic Analysis, Practical Navigation, Meteorology, Photogrammetry, Remote Sensing, Nautical Chart Construction and International Law of the Sea.

### ***INTL INFO WARFARE - MS - MASL : P179222***

INTERNATIONAL INFORMATION WARFARE (MASTERS OF SCIENCE DEGREE)

A course of study appropriate for military officers who require a fundamental understanding of Information Warfare and Information Operations. Courses in the curriculum discuss the role of Information Warfare in modern warfare and the integral roles of EW, psychological operations, military deception, OPSEC, physical destruction, INFOSEC, and network attack. Mathematics, Science and Engineering fundamentals are provided to support the theoretical and experimental aspects of Information Warfare. System level understanding of Communication Systems, Electronic Warfare Systems, Radar Systems, Network Operations, Computer Network Security and Information Systems are emphasized. The System Engineering process is presented and applied in an Information Warfare team project.

### ***INTL JT MARITIME TACT DEV - MASL : P122571***

INTERNATIONAL JOINT MARITIME TACTICAL DEVELOPMENT

Provide Mid-grade warfare specialty International Officers (O-3 to O-4) with the tactical development skills required to support a Joint Force Commander or Naval Component Commander in a multi-threat environment. The course stresses joint maritime planning, and war gaming. In addition, weapon systems information will be taught in order to integrate air, surface, and submarine platforms into an effective fighting force.

### ***INTL LAW OF MIL OPS I-LOMO - MASL : P176027***

INTL LAW OF MIL OPS I-LOMO

I-LOMO promotes the rule of law by enhancing the capability of military legal advisors to give effective and accurate legal advice regarding military operations.

- What is the benefit of ILOMO?
- Promotes application of international legal standards in military operations,
- Enhances the capability of military legal advisors to provide effective guidance in military planning
- Develops professional working relationships, communication and understanding with U.S. partners

Who should participate in ILOMO?

- Although I-LOMO is designed for military legal advisors, the course is open to and useful for military commanders and staff officers who need to increase knowledge of legal issues involved in military operations or make more effective use of legal advisors.

What do I-LOMO participants learn?

- I-LOMO provides the latest information and viewpoints on legal issues applicable to modern military operations including recent developments in the Law of Armed Conflict, Rules of Engagement and the Role of the Military Legal Advisor in Operational Planning. I-LOMO is taught by instructors from the DIILS and the Naval War College. Adjunct International Faculty from U.K., Australia, Germany, Japan and other countries also provide instruction and their national perspective. I-LOMO participants attend a 3 day International Conference on Operational Law sponsored by the Naval War College. The IP program features visits in the Newport area and to Boston.

### ***INTL LEAD & MGT G-P-OLAM - MASL : P162226***

This course is designed specifically for international, mid-grade officer and senior enlisted students (military and civilian). The course objective is to enhance supervisory skills in communication for understanding and exerting a positive influence. The curriculum is designed so that each concept is introduced, discussed, and applied in a measurable fashion using the instructional systems design (ISD) process. In addition, each student is given individual feedback on strengths and weaknesses in applying these skills. The training is experiential and relies on role-playing, case studies, and group activities to facilitate the students

### ***INTL LOG/SUPPLY MGMT CRS - MASL : D152054***

This course is for personnel assigned to or projected for assignment to supply/logistics leadership positions and who already have some supply knowledge or experience. Officers in the grades of second lieutenant through major (O-1 to O-4), enlisted in the grades of master sergeant through chief master sergeant (E-7 to E-9), and civilians of equivalent grades qualify to attend this course. This course prepares students for leadership positions in the supply/logistics field by introducing them to the latest principles of logistics integration and resources management including the Foreign Military Sales (FMS) program. Additionally, the course presents and reinforces principles of management, leadership, funds management, management of reparable assets, and fuels management.

#### **COURSE DESCRIPTION:**

- **BLOCK I - INTRODUCTION TO MANAGEMENT** This block of instruction provides an in-depth look at concepts and tools used at the management level. It focuses on the traditional as well as contemporary functions of management. Topics include the concept of operations management, equipment management, budget administration, human resources and personnel management. One lesson focuses entirely on the subject of leadership and another on the Continuous Improvement Process (CIP). Another lesson is dedicated to Total Quality Management (TQM) principles, its evolution and key concepts, to include its importance to the civilian industry as well as the military field. This block of instruction will empower logisticians to improve management of resources, their logistics processes, customer support and the weapons systems they support.
- **BLOCK II - LOGISTICS ORGANIZATIONS** This block provides the principles and concepts for successful logistics management and general information on several support organizations that contribute to the overall logistics support of an operating base. Emphasis is placed on the main logistics support organizations; supply, maintenance, transportation, and contracting. Students learn about the different functions of these organizations and how they integrate to form an effective logistics support system. The US DoD and AF logistics systems are analyzed to understand their intricateness and effectiveness during peace time operations and contingencies. The functions of a logistics plans organization, specific personnel responsibilities, mobility training, and the base level deployment process are covered in detail. Scenarios are used to reinforce the mobility concepts and the how to establish and maintain effective logistical support at forward operating locations.
- **BLOCK III - SUPPLY PUBLICATIONS** This block provides an introduction to supply publications used to research data prior to requisitioning assets. This area presents five main sets of publications: MCRD, H Series, MD/I&S, Characteristics, and Technical Orders. Students learn to cross-reference part numbers to national stock numbers and vice versa using the Master Cross Reference Data. Students also search information pertaining to commercial/vendor addresses and codes related to commercial entities through the use of the H Series catalog. Students learn how to interpret codes and locate data related to a specific distributor, manufacturer or vendor. Additionally, students learn to determine the codes and information pertaining to pricing, reparability, and sources of supply, as well as identifying relationships between master, interchangeable and substitute items. The Characteristics Data publication provides details about all assets as well as applicable military specifications provided by the US Federal Logistics Information System and NATO countries. Lastly, students learn about technical orders with special emphasis on the illustration parts

breakdown to positively identify parts and provide better support for the customer. Students become 100 percent proficient in researching data by completing a series o

### ***INTL MARITIME OFF - MASL : P171575***

This program is designed specifically for international, mid-grade, officer-level students (military and civilian) with maritime experience. The dynamics of the class composition add to the learning experience as students share their various views and experiences. The course provides professional military study in the organization, planning, management and operation of a multi-mission maritime force. The program addresses the value of honor and integrity; effective leadership and management skills; and the rules, customs, and traditions that govern an officer corps. An overview of search and rescue concepts is provided. During the maritime law enforcement phase of training, students discuss international law, boarding procedures, hidden compartments, high-risk search tactics, drug identification and testing, and prisoner processing. The maritime law enforcement phase concludes with an operational planning exercise. Marine safety topics include marine environmental response, safety and occupational health, pollution response techniques, contingency planning, marine licensing, and commercial vessel inspection. Leadership and management training consists of a senior managers seminar focusing on the habits of highly effective leaders in both the military and private enterprise. The Defense Institute for International Legal Studies (DIILS) staff presents a one-week block of instruction dealing with rule of law and military operations. Each student is required to make an oral presentation during the first week of class explaining the highlights and customs of his/her home country.

Prerequisites: None; however, solid navigational skills are essential for practical exercises and group discussions. Note: This course is not appropriate for noncommissioned officer personnel.

### ***INTL MIL LAW DEV PRG-ILOMO - MASL : P176029***

#### **INTL MILITARY LAW DEVELOPMENT PROGRAM - INTERNATIONAL LAW OF MILITARY OPERATIONS**

This eleven week program offered each year beginning in April promotes the rule of law by assisting international officers and civilian officials in the development and improvement of their own national military legal systems through a comparative study of U.S. military law and through advanced studies in international and operational law.

What are the benefits of MLDP-ILOMO?

- Self-Assessment of participating students military law systems based on the "best practices" of the U.S. and other national systems of military law
- Participants' capability to provide legal advice to commanders consistent with international guidelines is improved
- Participants' improved working relations with legal counterparts through enhanced understanding and appreciation of U.S. and other nations' military law systems and English legal.

Who should participate in MLDP-ILOMO?

- Qualified participants will be licensed attorneys or those with a college or university degree in law with assignments that will benefit from advanced studies in international and operational law.

What do MLDP-ILOMO participants learn?

- Participants study military justice and administrative law with a special emphasis on international law. Participants attend classes at the Naval Justice School and participate in the DIILS Course on Conducting Military and Peacekeeping Operations in accordance with the Rule of Law (PKRL) and the International Law of Military Operations (I-LOMO) course. Participants make presentations on their national legal systems and study specific legal issues with DIILS staff. MLDP students participate in a community sponsor program and IP visits.

### ***INTL MIL STUD PREP CRS - MASL : B171766***

Attended by all international officers selected for CGSOC unless specifically exempted from all English Comprehension Level testing. Purpose is to enhance the international officers ability to participate in the CGSC environment using the English language; to familiarize the student with the small group instruction methodology and resulting classroom environment; and to gain an appreciation of the political, social, and economic factors that have a bearing on U.S. people, their traditions, and way of life.

### ***INTL MK46 MOD5 INTER MAINT - MASL : P142423***

To provide personnel with technical and practical knowledge skills required to maintain, troubleshoot, and repair MK 46 MOD 5 torpedoes.

### ***INTL NEGOTIATIONS - MASL : P179069***

#### **INTL NEGOTIATIONS**

The International Defense Acquisition Resource Management Program (IDARM) offers a two-week Expanded International Military Education and Training (E-IMET) approved course entitled "International Negotiations", at the Naval Postgraduate School, Monterey, California twice yearly.

The key objectives of this course are:

- To develop an understanding of cross cultural negotiations.
- To familiarize course participants with a structured approach to planning and preparing for negotiations.
- To examine analytical techniques and fact finding methodologies as aids to developing a negotiation position and best alternatives to a negotiation position.
- To learn and apply various negotiation strategies and tactics and understand their situational use.
- To provide an opportunity to prepare a negotiation plan and to actually negotiate complex issues in difficult negotiation situations.

The course is taught by resident faculty from the School of International Graduate Studies and Graduate School of Business and Public Policy. Faculty lectures are augmented by presentations from distinguished practitioners who are negotiation experts. The course focuses on planning and preparing for negotiations with a special emphasis on negotiation of complex issues in a multi-cultural environment. Extensive in class negotiations are conducted. Course participants learn their negotiating style preference and how and when to adapt their negotiation styles given the behavior and goals of the parties.

Topics include fact finding techniques, gathering and use of information, selection of negotiators, characteristics of good negotiators, use of teams in negotiations, strategies and tactics for effective negotiations, ethics, types of power bases, analytical methodologies, relationship building in negotiations, developing negotiation arguments and counterarguments, developing negotiation positions, timing and pace; cultural considerations, communication and language barriers, identifying best alternatives to a negotiation position, completing the negotiation, drafting and signing negotiations agreements and enforcing negotiation agreements.

A capstone multi-cultural negotiation exercise focuses on the analysis of information, preparation of a formal negotiation plan, planning for negotiations, actual negotiations and completion of a negotiation agreement

### ***INT'L OFF LOG PREP-LEDC - MASL : B159001***

The curriculum for this course includes the structure of the U. S. Army, Acronyms used in logistics, composition of TOE/MTOE, the logistics field today, communication skills, evaluation report systems, small group instruction. introduction to military publications, symbols and graphics classes of supplies and test procedures. The curriculum for this course includes the structure of the U. S. Army, Acronyms used in logistics, composition of TOE/MTOE, the logistics field today, communication skills, evaluation report systems, small group instruction. introduction to military publications, symbols and graphics classes of supplies and test procedures.

### ***INTL OFF PREP-INF OFF ADV - MASL : B171699***

U.S. Army organization and operations; staff organization and procedures; operation order; U.S. military organization and graphic representation; map reading; effective writing and speaking; legal subjects; medical subjects; weapons. U.S. Army organization and operations; staff organization and procedures; operation order; U.S. military organization and graphic representation; map reading; effective writing and speaking; legal subjects; medical subjects; weapons.

### ***INTL OFF SCH (FOR AC&SC) - MASL : D171014***

Prepares international officers in the grade equivalent to an Air Force major, or junior lieutenant colonel to participate in the Air Command and Staff College (ACSC). Instruction centers on ACSC's book-based curriculum, exploring the works of many great

thinkers and strategists and focusing on developing creative, analytical thought and a better understanding of command and application of air power to foster teamwork and team building. Instruction also includes the traditions and ideals of US society, US Defense organization, leadership topics, and language and communicative skills specific to ACSC. The purpose of the course is to develop an awareness of the organizational structure, curriculum content, terminology and instructional methods used at ACSC; an awareness of the United States military mission and organization; and an appreciation of American society, institutions, and ideals. Provides a forum for exchange of ideas, fostering a greater understanding of regional, cultural, and societal issues. Some physical training is accomplished commensurate with ACSC programs. The course is designed to meet individual needs by providing course work based on language fluency. The majority of class time is devoted to lectures and seminars with military or civilian instructors. Local and extended field trips provide students with insights into US society, institutions and ideals. A sponsor program aids students in becoming acquainted with the military and civilian communities.

### ***INTL OFF SCH (FOR AWC) - MASL : D171011***

Prepares international officers in the grade equivalent to an Air Force lieutenant colonel or colonel to participate in Air War College (AWC). Instruction centers on providing a foundation for AWC's focus on war fighting, including introductions to air power doctrine, strategic thought, and military theory. Instruction also includes the history and traditions of US society, the US defense organization, and language and communicative skills specific to AWC. Course prepares international officers to attend AWC by developing an awareness of the organizational structure, curriculum content, terminology, and instructional methods used at AWC; an awareness of the United States military mission and organization; and an appreciation of American society, institutions, and ideals. Provides a forum for exchange of ideas, fostering a greater understanding of regional, cultural, and societal issues. Some physical training is accomplished commensurate with AWC programs. The course is designed to meet individual needs by providing course work based on language fluency. The majority of class time is devoted to lectures and seminars with civilian or military instructors. Local and extended field trips provide students with insights into US society, institutions, and ideals. A sponsor program aids students in becoming acquainted with the military and civilian communities.

### ***INTL SUPPLY/WAREHOUSE PRIN - MASL : D152055***

This course is for airmen or NCOs, newly commissioned officers, or civilian personnel working in base supply or supply related functions. This course prepares supply specialists to assume entry-level supply responsibilities and perform related duties in inventory management and warehousing concepts. The students develop the necessary skills to establish and manage a supply activity, manage the inventory, and manage a warehouse. Students receive training on how to identify, inventory, account, and manage property. They also learn how to set up a warehouse and how to use material handling equipment to include training on forklift safety and how to operate it.

#### **COURSE DESCRIPTION:**

- **BLOCK I SUPPLY ORGANIZATION** Students begin this course with an in-depth view of various logistics systems. The focus is on the supply organization and functions of a base level supply unit and its interface with depot level supply. Students learn about the supply/logistics career field, duties, responsibilities, and how day-to-day functions directly affects the mission of supported operational units. Students also learn how supply fits into a complete logistic structure and how various elements of a logistics system are interdependent. The presentation of the concept of customer support relates to a base level supply unit.
- **BLOCK II SUPPLY PUBLICATIONS** This block provides students with detailed training on how to use supply catalogs and cataloging data. It begins with a solid foundation of the logistics cataloging system and a thorough examination of the national stock number. An introduction to computers provides basic terminology, system and hardware use. This block provides the use of supply catalogs and technical orders with emphasis on the Illustrated Parts Breakdown. It also includes techniques on how to use the CD ROM based catalogs to determine an items part number, cross reference to a national stock number, determining interchangeable or substitute assets, and determining administrative data such as the price of the item and availability at the depot. Students receive hands-on training on the use of the H-series catalog, Master Cross Reference Data, Management Data and Interchangeable and Substitute, Characteristics and Technical Orders.
- **BLOCK III - INVENTORY MANAGEMENT** This block provides an introduction to stock level and economic order quantity principles. It also includes stock requirements computation, requisition and validation concepts. One of the areas presents and analyzes the USAF model to illustrate the accountability of in-stock assets and provide all aspects regarding the inventory of material. The entire process covers all steps from beginning to end and includes how to

research and resolve out-of-balance conditions, inventory adjustments and determining the accuracy of the inventory maintained in the warehouse. Another area covers the automated and manual inventory procedures where students perform an inventory of a training warehouse. In the repair cycle process, students learn to identify reparable assets, determine the repair cycle time, asset control, repair cycle asset flow and the turnaround process. The last lesson of this block focuses on basic accounting procedures fundamental to the operation of a supply organization. The emphasis, placed on principles, provides critical effectiveness to the accountability of property, such as timely and accurate processing of supply transactions. Lastly, this block discusses documentation, methods for controlling documents, procedures for maintaining accountability over all transactions and procedures to control and manage accountable documents.

- **BLOCK IV WAREHOUSING AND STORAGE PRINCIPLES** This block presents methods for planning, designing a warehouse and storage space allocation. The block provides students with a working knowledge of setting up a warehouse and maintaining a location system. Students learn the process.

### ***INTRO TO AIRBORNE SYSTEMS - MASL : P118420***

Introduction to Aircraft and Systems Test and Evaluation

Description:

- The Acquisition Process
- The Test Planning Process
- Report Writing
- The Research and Evaluation Paragraph
- Types of Reports
- The DT-OT Transition Report
- Flight Clearances
- Data Collection and Instrumentation
- Fixed-wing and Rotary-wing Basics and Flight Test Techniques
- Aerodynamics
- Flight Controls
- Flying Qualities Testing
- Instrumentation
- Airborne Systems Basics and Flight Test Techniques
- Communications System Theory
- Radar Theory
- Electro-Optical Theory
- Navigation System Theory
- Software Test and Evaluation
- Naval Air Systems Command Ranges and Facilities
- Test Planning for an Integrated System and Navigation System Demo/Evaluation
- Flight Briefing
- Test Design
- Data Collection
- Safety and Technical Review
- Analysis of Results
- Data Presentation
- Flying the Test

"Each student will fly on the Airborne Systems Test and Research Support Airplane (ASTARS) and conduct an integrated systems and navigation system evaluation using radar and electro-optical sensors, and Inertial and GPS navigation systems. Medical screening will be conducted during the first week of the course. For individuals with questions concerning this process, please contact the USNTPS Short Course Staff at 301-757-2137.

Audience

The intended audience for this course is personnel involved in rotary-wing, fixed-wing, or systems flight-testing. This course is intended to provide the working level tester with the information necessary to plan, brief, conduct, debrief, analyze, and report flight test results.

Objectives:

- At the completion of this course, participants will
- Understand the testing process
- Understand the basics of airplane and helicopter flight testing
- Understand the basic theory of radar, navigation, and electro-optical systems individually and as part of an integrated system
- Design and execute an integrated systems test plan
- Report on test results

### ***INTRO TO BASE CIVIL ENGRG - MASL : D178037***

The duration of the course is thirty-six (36) academic days. Civilians attend the first eighteen (18) academic days; military personnel attend all thirty-six academic days. The first 18 academic days of the course provide officers and officer equivalent civilian personnel entering the civil engineer career field familiarization of the Air Force Civil Engineer organization, management systems, techniques, processes, and operations. Students will gain a basic understanding of the Civil Engineer organization to include doctrine, history, and related civil engineering functions. Students will also learn responsibilities of each flight within the objective squadron, how the Civil Engineer squadron and its flights interface with other organizations, and how to plan and execute various programs within the flights. The joint military/civilian portion will end with basic mechanical, electrical and civil engineering lessons required for activities both at home station and in a deployed environment. The contingency portion (military only), prepares civil engineer officers to provide and maintain expedient force bed down. Students will learn Air Force civil engineer responsibilities, assets, and team configurations, force bed down planning processes, expedient airfield criteria and pavement evaluation, infrastructure requirements, and contingency operations. The course does not address contingency planning above base level. The final seven (7) academic days at the Silver Flag Exercise Site, Detachment 1, 823rd RED HORSE, Tyndall AFB FL. At Silver Flag, the AFIT Staff and Silver Flag Cadre will conduct Officer Field Education (OFE). OFE provides "hands-on" education in the force bed down, rapid runway repair, disaster preparedness, services, fire rescue, bare base assets, and command and control.

COURSE OBJECTIVE: For each student to understand the structure, function and responsibilities of the Air Force Civil Engineer organization and comprehend the skills and engineering principles required to accomplish the mission. Military students have a further objective to understand and apply expeditionary civil engineer operations and contingency concept of operations to support the wartime mission.

### ***INTRO TO EXPED LOGISTICS - MASL : P152209***

Introduction to Expeditionary Logistics

This two-week course provides senior enlisted personnel and officers an overview of the Joint Planning Process, the Joint and Naval Logistics chain of command and specific issues and concerns related to operating in a deployed environment. The "issues and concerns" segment includes discussions on personnel management, expeditionary logistics, expeditionary contracting, petroleum management, supply support and host nation support. The course is taught as a seminar with technical experts flown in to conduct individual topic segments. Although this class is targeted toward Naval Reservists, active duty personnel are encouraged to attend, as well as personnel from other military branches.

### ***INTRO TO PERS SECURITY MGM - MASL : P279221***

Addresses the mgt practices and procedures required to administer the Personnel Security program (PSP) at the base-installation level. The course covers types of personnel security investigations and agencies; PSP administrative procedures; preparing and submitting investigation requests; using the DoD personnel security adjudication guidelines; evaluating PSP information; operating the continuous evaluation program; sources of information; granting interim security clearances; temporarily suspending access; and denying or revoking security clearances. The course is specifically designed to address the needs of those individuals requiring an overview of the PSP who are not directly responsible for managing the program.

## ***INTRODUCTION TO LOGISTICS - MASL : B159000***

The curriculum for this course includes the structure of the U. S. Army, Acronyms used in logistics, composition of TOE/MTOE, the logistics field today, communication skills, evaluation report systems, small group instruction. introduction to military publications, symbols and graphics classes of supplies and test procedures.

## ***IOSCO GRADUATION - MASL : P152087***

Used for programming students so they can return to Athens after completion of pipeline courses in order to take care of Administrative check out issues, participation in graduation ceremony and return flight to home country. One day in duration.

## ***IP INSTRUMENT PROCEDURES - MASL : D121065***

### **COURSE DESCRIPTION**

- **BLOCK I - FUNDAMENTALS OF INSTRUCTION** This unit is designed to develop instructional techniques related to the control and performance of aircraft. Topics in this unit include instructional techniques, the learning process, and performance analysis. In addition, grading scenarios and grading practices and standards are discussed. The student instructors also gain experience as instructors.
- **BLOCK II - FUNDAMENTALS OF INSTRUMENT FLIGHT** This unit is a review of basic instrument procedures such as the 60-1 rule, control and performance concepts, and instrument cross-check procedures. Additionally this unit reviews procedures on the use of navigational aides (NAVAIDS), and aircraft instrumentation.
- **BLOCK III FLIGHT PLANNING AND SPECIAL TOPICS** This unit is designed to enhance the students skills through planning instrument flight. Also, the unit introduces the student to several important "flight safety" related topics. The focus of this unit is wind shear, spatial disorientation training, and flight mishap prevention. This unit is designed to enhance the students skills through instrument flight planning. Global Positioning System (GPS), airspace and crew resource management are also taught in-depth. ICAO procedures are included with FAA rules to differentiate and provide the student with a solid instrument background and knowledge. Terminal instrument procedures and criteria are covered more thoroughly to give instructor students a solid foundation in instrument fundamentals.
- **BLOCK IV - INSTRUMENT APPROACHES PROCEDURES** This unit begins with a deep analysis of ronautical charts using Department of Defense and Jeppesen formats. Flight planning procedures and techniques are reviewed as are instructional techniques for flying precision and non-precision approaches. Also included are the factors that should be taken into consideration during the transition to landing and missed approaches. ICAO procedures are covered for the purpose of international understanding and familiarization for their area of operations solidifying their skills as prospective instructors.
- **BLOCK V - INSTRUMENT SIMULATOR** In this unit flight simulators such as the Frasca 242 (twin prop), AST Hawk (twin prop) 737 or T40 (twin jet) are used to carry out instrument maneuvers previously studied in the classroom. A total of 63 simulator hours will be flown, half as an instructor and half as a simulated student. Additionally, 60 hours of self-paced NT361 flight training device instruction are included. The application of instructional techniques required for each maneuver are explored. The simulator profiles include: basic and advanced instrument maneuvers, precision and non-precision instrument approaches, and transition to landing, and missed approaches. The primary objective of this unit is the successful application of the knowledge acquired during the classroom blocks of instruction.

## ***ISAR IMAGE INTERPRETATION - MASL : P125425***

To provide officer and enlisted personnel with the basic imagery interpretation skills in Inverse Synthetic Aperture Radar (ISAR) for the tactical employment of ISAR.

SCOPE: The students will learn to visually identify ships perceptual and gross naval classification features and classify ships to the fine naval class level by identifying and measuring the ships structural features discernible on ISAR.

## ***ISAR IMAGE INTERPRETATION - MASL : P125435***

To provide officer and enlisted personnel with the basic imagery interpretation skills in Inverse Synthetic Aperture Radar (ISAR) for the tactical employment of ISAR.

SCOPE: The students will learn to visually identify ships perceptual and gross naval classification features and classify ships to the fine naval class level by identifying and measuring the ships structural features discernible on ISAR.

### ***J/COMB AIR & SPACE OPS SR - MASL : D126053***

The Joint Air and Space Operations Senior Staff Course (JSSC) is a senior professional military training program offered by the 705th Training Squadron. The course uses presentation and discussions to provide an overview of the planning, coordination, integration, employment and implementation of air operations strategy in combined/joint operations. The program is designed to prepare Colonels and key Lt Colonels selected by their commands for senior leadership responsibilities in a Combined/Joint Air and Space Operations Center (C/JAOC). The course program consists of senior speakers from different areas of responsibility and presentations by general officers and current directors from different C/JAOC locations. Component and theater operations considerations in a C/JAOC will follow. The program finishes with specific briefings on planning, space, rules of engagement, special operations and mobility. The course is facilitated by two retired general officers in the capacity of senior mentors and is modeled after the Joint Force Air Component Commander (JFACC) course for Flag Officers. Once a year the course is held as a Combined Air and Space Operations Senior Staff Course addressing the unique aspects of air and space warfare in a coalition setting.

### ***JAVELIN - EOD - MASL : P193145***

Trains selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***JAVELIN GUNNERY - MASL : B122167***

Javelin Introduction, description, target engagement, Field Application, Maintenance, Gunner skills test, and Live fire Javelin Introduction, description, target engagement, Field Application, Maintenance, Gunner skills test, and Live fire.

### ***JET ENGINE MISHAP INV - MASL : D122007***

The scope and training includes general introduction to design and construction variations of jet engines, to include small, large, and turbo fan engines, as needed for mishap investigation. Policies and procedures of investigation, fluid system contamination, and identification of material failures. Identification and causes of engine failures in relation to compressor and turbine failures, identification of over temperature damage, identification of bearing failures, and a comparison on in-flight and post-impact fire damage. Engine power analysis procedure and temperature analysis. Inspection of crash damaged engine and components and jet engine case history studies.

### ***JMSDF INTEL TRNG - MASL : P172004***

JMSDF ICAP TRNG

### ***JNT TRM ATTK CTRL QUAL CRS - MASL : D233303***

Joint Terminal Attack Controller Qualification Course (JTACQC) The Joint Terminal Attack Controller Qualification Course provides detailed instruction in the tactics, techniques, and procedures (TTP) for planning, coordinating, and executing joint fires. Graduates possess the knowledge necessary to integrate close air support (CAS), artillery, and attack aviation into the ground commanders scheme of maneuver. In addition, graduates receive simulator training and field training where they integrate CAS missions into tactical operations on the joint battlefield. The course fulfills JTAC training as required by the Joint CAS (JCAS) Action Plan Memorandum of Agreement 2004-1 and Air Force Instruction 13-112 Volume 1.

### ***JOINT ADV WARFIGHTING SCH - MASL : P171021***

JOINT ADVANCED WARFIGHTING SCHOOL (JAWS)

The JAWS curriculum is clearly focused on "high end" operational art. This specific and concentrated focus allows for more in-depth immersion and applied rigor than is possible in many more standard military education institutions. Based in part on the existing curricula of the Joint Forces Staff College s Joint and Combined Warfighting School Senior Course, the JAWS curriculum endeavors to balance between operational and strategic studies and between warfighting and war preparation. The interrelated core courses, Foundations in Theory of War, Strategic Foundations and Operational Art and Campaigning provide the developmental framework. Blending theory foundations and historical evidence, the Foundations in Theory of War course provides the underpinning to all that follows through an aggressive series of case studies, guided seminar discussions and guest speakers. This course creates a tentative propositional inventory that enables the student to examine critically and ask the tough questions about military art and science. The Strategic Foundations course provides the necessary solid grounding in the theories

of government and diplomacy along with the complex realities of the contemporary joint, interagency and multinational operating environment. Finally, the Operational Art and Campaigning course builds upon the previous instruction to provide students with a laboratory in which to apply the ideas encountered previously. This final applicatory portion of the curriculum emphasizes education and training in aspects of decision-making, problem solving, and planning processes through a series of seminar exercises, wargames and simulations.

By emphasizing problem solving and decision-making within the context of adaptive planning, JAWS strives to produce world-class warfighters prepared to operate in a fast paced, often chaotic and multi-tasking environment. Exercises, simulations, extensive reading and research visits are key components of the JAWS program. Through simulations and automation-supported exercises, students analyze and apply joint doctrine, emerging concepts, and recent lessons learned, while also honing planning and decision-making skills. Students have ample opportunity to read and evaluate a broad range of writings throughout the course; significant nightly readings are followed by rigorous examination of authors premises and assertions in daily seminar. Case study method is employed throughout the course. In conjunction with ongoing seminar activities, students are required to write a formal thesis paper and will defend their findings as a part of a comprehensive exam.

The JAWS course includes several field research trips. A comprehensive historical staff ride to Gettysburg is conducted to allow students to develop further appreciation for the human dynamics of conflict while focusing on decision-making and senior leader competencies as evidenced in one of America's most significant battles. A weeklong experience in Washington, D.C. provides contact with senior military and governmental policy makers and practitioners. Agencies visited includes the Joint Staff, the Department of State, the U.S. Coast Guard, the Department of Homeland Security, the Central Intelligence Agency, the National Military Intelligence College and a host of others. Other visits are made to the CONUS-based combatant commands and selected supporting agencies or headquarters. Live video teleconferences (VTCs) are conducted with the U.S. European Command and the U.S. Pacific Command. Numerous visits to relevant organizations and activities dealing with military transformation and future warfighting are also conducted, primarily in the Tidewater, Virginia area.

### ***JOINT AIR TSKNG ORDER PRCS - MASL : D121112***

Trains joint personnel, O-5 and below, who may be assigned to a Joint Air Operations Center (JAOC) to perform Service liaison or other duties. Personnel receive education and training on joint and Service doctrine; Theater Air-Ground System; JAOC organization, processes and systems for planning, producing, executing and assessing an ATO. Training consists of academics, seminars, computer labs, practical exercises, and an end-of-course exercise.

### ***JOINT APPLICATIONS COURSE - MASL : P122028***

#### **JOINT TARGETING APPLICATIONS COURSE**

The applications course is a two week in-residence course designed to provide operational-level operations and intelligence personnel with a detailed background in weapons employment considerations and weaponeneering methods.

The focus is on the Weaponeneering process and concepts of weapon delivery accuracy, damage mechanisms, and damage criteria are covered along with an introduction to the software tools used for damage prediction calculations. The curriculum reinforces the use of weaponeneering software and specific methodologies through practical application exercises.

Target Audience: Mid-career officer/enlisted personnel.

### ***JOINT BATTLE DAMAGE ASSESS - MASL : P122024***

#### **JOINT BATTLE DAMAGE ASSESSMENT**

The Joint Battle Damage Assessment course provides procedures, techniques and methodology for the Battle Damage Assessment process. Methodologies employed to accurately assess and communicate the effectiveness of military force delivered against a variety of generic targets and target models which are presented in a lecture and exercise format.

Target Audience: Mid-career officer/enlisted personnel.

### ***JOINT DOCTRIN AIR CAMPAIGN - MASL : D121076***

Educates officers from joint, combined or supporting air component commands in the fundamental concepts, principles and doctrine required to publish the air portion of the joint/combined campaign plan. There are three areas of instruction built around specific learning objectives. The first area, air component planning fundamentals, examines the doctrine, strategy, organization and capabilities of forces employed in a military campaign. The second area, the Joint Air Estimate Process, covers currently

published planning procedures and historical analysis. The final area, an air component planning exercise, allows students to build an air component plan, step-by-step throughout several seminar sessions.

### ***JOINT FIREPWR CNTR CRS - MASL : D121070***

Trains concepts, doctrine, tactics, techniques and procedures for integrating combat firepower in joint operations. Emphasis is on planning and coordination at tactical operational levels and integrating Air Force support into Army operations up to and including the corps level. Air Force students receive training in tactics, techniques, and procedures of forward air control.

### ***JOINT MEDICAL PLANNERS CRS - MASL : P175555***

Purpose: Prepare intermediate level officers, senior non-commissioned officers, and DoD civilians to effectively function as medical planners at the Joint Staff, Unified or Specified commands, Joint Task Forces, Service Headquarters, Combined Commands, and COCOM component commands.

Scope: Provide the necessary skills, familiarization, and proficiency in the concepts, procedures, and applications of joint and combined planning at the operational level of war. Students will understand and be able to apply health support planning principles in joint and combined operations by using the steps in contingency and crisis action planning, preparation of OPLAN's (Annex Q), Time-phased Force and Deployment List (TPFDL) management, and medical workload estimates using the Medical Analysis tool (MAT).

### ***JOINT OPERATIONS-SPANISH - MASL : B121430***

Joint-Planning: deliberate planning (initiation, concept development, and plan-development procedures) and crisis-action planning procedures (CAP). CAP: Planning for military operations other than war (MOOTW) (counternarcotics operations and foreign internal defense). Case studies are presented to reinforce CAP planning steps. Regional Contingency Planning: mission analysis; planning guidance; staff estimates; commander's estimates; concept of operations; concept review. Plan-Development: force planning; support planning, and transportation planning. The Joint-Operations Force-Projection Exercise: capstone exercise to integrate all previous joint-operations instruction; 12 hours of instruction on human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***JOINT OPNS MEDICAL MANAGER - MASL : B175284***

Provides Senior Medical officers a better understanding of problems facing commanders, administrators, and department chiefs serving in medical treatment facilities during joint operations in low, mid, and high intensity conflicts. The course focuses on management of a large number of casualties and emphasizes medical supply transportation, communications, and site selection. COURSE IS CONDUCTED IN A HOTEL OFF POST. STUDENTS STAY IN THE HOTEL WHICH REQUIRES INCREASED LIVING ALLOWANCES.

### ***JOINT SPECTRUM MANAGEMENT - MASL : D133033***

This course provides training for inter-service personnel in the knowledge and skills needed to perform the duties of Spectrum Management. The scope of training includes the following: regulation of spectrum management; principles of spectrum management administration; mathematics of spectrum management; communication-electronics principles; spectrum planning for line-of-sight, troposcatter and satellite communications systems; navigational aids, radar and non-communications systems; electromagnetic environmental effects, spectrum management in a joint environment and training in service automated tools (SPECTRUM XXI, JACS and SPEED).

### ***JOINT TARGETING STAFF - MASL : P122025***

#### **JOINT TARGETING STAFF COURSE**

Purpose: To provide the DOD with formal joint targeting training for mid-career operations and intelligence personnel destined for Unified Commands, the Joint Staff, Defense agencies, and designated Service positions involving targeting.

Scope: The focus is on the application of the six-step Joint Targeting Cycle at the theater and operational levels of war:

- Objectives and Guidance
- Target Development
- Weaponing Assessment
- Force Application

- Execution Planning/Force Execution
- Combat Assessment.

The curriculum starts with an introduction to the organizational structures and systems employed by the four services and DOD support agencies. The remainder of the course involves the presentation of concepts and theory associated with each step of the targeting cycle, which is reinforced through practical application exercises.

### ***JOINT TRANSITION COURSE - MASL : P171016***

**JOINT TRANSITION COURSE** This is a one-week course that is a prerequisite course for all international officers prior to attending the Joint and Combined Staff Officer School except for those students coming directly from a U.S. Service school such as Naval Staff College, Newport, Rhode Island. During this course, you will have the opportunity to learn about the organization and the planning processes associated with the United States and its Department of Defense. The Joint Transition Course is a consolidation of a much broader curriculum and is intended to give you a concise overview of the subject matter. The presentations and discussions that occur in this course are intended to review, and or provide you with, the basic elements of the Joint Professional Military Education Phase I and introduce you to the subject matter that you will be studying over the following ten weeks. Joint Transition Course Schedule provides the daily schedule of events and the classes that will be presented. This course is intensive as you can see; therefore the syllabus guide outlines the lessons, their respective learning objectives, and the associated readings that need to be completed prior to each day. The Joint Forces & Operational Warfighting SMARTbook is your primary text. A hard copy of the publication will be provided on the first day of classes. Preparation for each class will allow class discussion and faculty presentations to reinforce the material. On the final day of the course, you will have an opportunity to use the information provided in the previous classes to conduct an exercise based on a complex operational contingency. The final Joint Transition Course Schedule will be available on-line the week prior to the beginning of class. **SPECIAL NOTE:** Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***JOURNEYMAN NETWORKING CORE - MASL : P155285***

To prepare technical personnel to administer a networked system with focus on the following functional areas: 1. Configuration Management: Manage changes, additions, and deletions to network system configurations. 2. System Management: Administration of network services, maintaining user accounts, access rights, and directory services. 3. Performance Management: Maintain system reliability statistics, performance checking of system communications pathways, and optimization of system and application performance. Graduates will have foundation skills for system specific follow-on training.

Provides journeyman level instruction in Local Area Networks (LAN) and Metropolitan Area Networks (MAN) with focus on network administration. Lab sessions are scheduled throughout the course to allow students an opportunity to directly apply the concepts presented. Course topic outline:

- Cisco Certified Network Associate (CCNA);
- MS Windows2000 Server;
- MS Windows 2000 Network Infrastructure;
- MS Windows 2000 Active Directory;
- MS Exchange 2000 Server;
- Solaris.

### ***JT AVIA SUPPLY MT MMGMT - MASL : P152086***

Joint Aviation Supply Maintenance and Material Management (JASMMM)

JASMMM was developed to enhance efficient interface between maintenance and supply personnel. Cooperation and teamwork are highlighted. Attendance is currently limited to Military E-6 and above; Civilian GS-6 and above, and International Students of equivalent rank. JASMMM is the Navy's sole source of aviation logistics training for supply officers and aviation maintenance officers and enlisted personnel assigned to aviation commands. During the ten days, twenty-five (25) Maintenance and Supply topics are discussed as well as case studies, practical labs and practical exercises. Guest speakers from NAVICP, DLA, and NAVSAFECEN have been incorporated into the seminar.

### ***JT/CMB C2W STAFF OFF SCHL - MASL : P171013***

ALLIED JOINT INFORMATION OPERATIONS (JINFO) ORIENTATION

The Joint, Command, Control and Information Operations School (JC2IOS) at the Joint Forces Staff College hosts an Allied Joint Information Operations Orientation Course (JIOOC) each year, which is designated as MASL P171013. In 2005, the course was redesigned and extended by one week to incorporate a practical exercise to enable students to conduct information operations (IO) planning within the context of a military operation. The course is taught at the secret releasable level, and invitations are extended to Australia, Canada, Great Britain and New Zealand. The primary audience should include military officers from O-4 to O-6 that are detailed to IO billets or cells and government civilian employees of equivalent rank. The Allied JIOOC is designed to accomplish the following objectives:

- Acquaint students with United States (US) Department of Defense (DoD) IO policy and doctrine.
- Familiarize students with IO capabilities available to support military operations.
- Familiarize students with the military planning process as it applies to IO, emphasizing practical application and recent experiences.
- Serve as an open forum for sharing and discussing each participating nation's approach to IO.

Guest speakers from throughout the US DoD help reinforce classroom instruction. Topics addressed pertaining specifically to IO may include fundamentals; national strategy and organization; interagency; intelligence support; core, supporting and related capabilities; legal issues; planning; and US military Service-specific support. One visiting student from each country is asked to provide a presentation that addresses their respective country or organization's IO activities. Additional guidance can be provided upon request.

### ***JT/COMB WARFIGHT INTERM - MASL : P171014***

JOINT AND COMBINED WARFIGHTING SCHOOL - (JCWS) Provides study in joint and combined organization, planning, and operations, and in related aspects of national and international security to enhance the preparation of selected military officers for duty in all echelons of joint and combined commands. Instruction includes:

- The characteristics, organization, and employment of the Armed Forces
- The relationships of the U.S. Armed Forces to each other with emphasis on their respective capabilities and limitations
- Principles of the U.S. Unified Command structure, the organization and procedures of joint and combined commands and staffs
- Organization, composition, and functions of joint and combined commands and staffs with respect to strategic, operational, and logistic responsibilities of the commanders
- Emphasis on planning for and the conduct of combat operations, and the organization and composition of current major combined commands in which the United States participates
- Aspects of joint and combined operations, including command relationships, organization, and planning
- Military management with emphasis on current changes in defense management environment, fundamentals of management theory, concepts of decision making, and the description of the latest tools and techniques available to the military manager
- Military, political, geographic, historical, economic, cultural, ideological, and other factors affecting U.S. national strategy and U.S./Allied security including the threat to that security.

OBJECTIVES - The JCWS course of instruction (Joint Professional Military Education (JPME) Phase II) builds on the foundation provided by the Service Colleges (JPME Phase I). The intense faculty-student and student-student interaction in the fully joint environment of the JFSC campus cements the professional attitudes and perspectives that are essential to successful military operations. JCWS curriculum addresses fifteen specific learning objectives that are taught through exercises and case studies in a joint seminar environment with emphasis on the application and higher levels of learning.

EXECUTIVE SUMMARY: JCWS is a ten-week Joint Professional Military Education (JPME) school for mid-grade and senior officers (O4-O6) who have previously attended intermediate or senior level school (JPME Phase I). CJCSI 1800.01B, Officer Professional Military Education Policy (OPMEP), dated 30 August 2004 furnishes the basis for JCWS. Only the highest quality, dedicated, and well-trained personnel with first-class leaders will be able to succeed in the complex, fast-paced, and uncertain environment of future military operations. JCWS is an essential ingredient in preparing officers to meet those challenges.

### ***JTS WEAPONS INTRO - MASL : P122026***

THE WEAPONS INTRODUCTION PORTION OF THE JOINT APPLICATIONS COURSE P122028

### ***JUDGE ADVOCATE BASIC - MASL : B121569***

Scope: The course emphasizes those areas of military law that are most likely to concern a judge advocate officer in the first duty assignment. It provides an introduction to the following areas of military legal practice: criminal law and procedure; administrative and civil law; legal assistance; fiscal law; and international and operational law.

### ***JUDGE ADVOCATE OFFICER GRADUATE - MASL : B171560***

Scope: This course prepares career military attorneys for future service in senior judge advocate positions. The course requirements equal or exceed those of graduate programs at other law schools. Students who successfully complete all Graduate Course requirements for a Master of Laws (LL.M.) degree receive an LL.M. in Military Law. The course is conducted over an academic year totaling approximately 36.5 credit hours. Core courses consist of 24.5 credit hours in criminal law; administrative and civil law; legal assistance; international and operational law; government contract and fiscal law; leadership and management; and professional writing. Electives consist of 12 credit hours (including writing requirements).

### ***JUMPMASTER - MASL : B121186***

Detailed information and training on: duties and responsibilities of the jumpmaster and safety; procedures for rigging individual equipment containers and door bundles; understanding and identifying personnel parachute components by their specific nomenclature and characteristics; procedures and standards required to conduct a jumpmaster personnel inspection; the duties and responsibilities of the drop zone safety officer; presentation of jumpmaster briefings and pre-jump training; and the execution of the duties of a jumpmaster from a USAF aircraft in-flight during a day/night combat equipment jump.

### ***KC10 BOOM OPR INIT QUAL - MASL : D119044***

None.

### ***KC10 BOOM OPR INSTR UPG/AC - MASL : D119032***

Qualifies boom operators as instructor boom operators in the KC-10 aircraft. Overall training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract, AFI 11-2KC-10V1, and AFI 11-2KC-10V2. Training is composed of: Academics//BOT (contractor administered) -24 days; and flying (Air Force administered) - 11 days (note 2).

### ***KC10 FLT ENGR BASIC PRECOU - MASL : D119048***

Provides introductory training to KC-10 flight engineer duties for student with no prior FE experience. Course is designed to allow a BFE graduate to successfully complete the KC10FIQ follow-on course. Training is conducted by the KC-10 contractor and is composed of Academics/Simulator (contractor administered) - 18 days.

### ***KC10 FLT ENGR INIT QUAL - MASL : D119045***

NONE.

### ***KC135 BASIC BOOM OPR CRS - MASL : D117124***

Ground academic instruction covering publications maintenance, aircrew training and evaluation programs, general aircraft safety, equipment and records, associated systems, weight and balance, cargo and passenger handling, crew resource management, and terminal and en route procedures. Individuals are awarded the 3-skill level for the Air Force Specialty Code 1AOX1, In-flight Refueling Operator career field upon graduation of the Basic Boom Operator Course.

### ***KC-135 INFLIGHT REFUEL OPR - MASL : D119004***

Classroom academic training, aircrew training device, and flight training in KC135R Pacer Crag aircraft systems, normal and abnormal operating procedures, weight and balance data computations, cargo loading operations, associated duties, and in-flight refueling duties. This course initially qualifies personnel IAW AFI 11-2KC135V2 to perform duties as an in-flight refueling operator. Training consists of: Academics - 7 weeks; Flying Training - approximately 7 weeks.

### ***KC135 INSTR INFLT REFUEL - MASL : D115072***

Academic, aircrew training device, and flight instruction in KC-135R Pacer Crag systems, normal and abnormal operating procedures, cargo loading operations, ground instructor role, aircrew training device instructor role, and flight instructor role. This

course prepares personnel for duties as an instructor in-flight refueling operator. FMS students must report to 97 TRS the morning prior to class start date to allow time to complete a pre-requisite test.

***KC135 PLT INIT QUAL(PC) - MASL : D111030***

Provides proficiency training to initially qualify rated pilots in the pilot position of the KC-135 Pacer Crag aircraft. Training emphasizes procedures and techniques to effectively and safely operate the KC135 in all phases of flight from both pilot seats. Teaches student pilots the duties, responsibilities and crew coordination requirements for multi-engine tanker aircraft. Training consists of: academics - 11 wks, 3 days; flying - 7 wks.

***LAND FORCE FIRE SUPT COORD - MASL : P124505***

N03APJ1 - To provide U.S. Marine Corps personnel with the skills needed to work in a battalion level Fire Support Coordination Center during amphibious operations or continuing operations ashore. The course encompasses the concepts, doctrine, principles, and techniques for the planning, coordination, and operational execution of fire support for Battalion size operations. Instruction includes an overview of the fire support planning process, the preparation of plans and orders for fire support; and the specific operational techniques required for the coordinated employment of fire support assets. Practical exercises are provided to reinforce instruction, culminating in a final exercise simulating the execution of a battalion level operation.

PREREQUISITE INFO: This course is tailored for MARINES that hold, or in the future will hold, one of the following billets: Fire Support/Assistant Fire Support Coordinators, Fire Support Chiefs, Artillery Officers, Air Officers, Artillery Liaison Officers/Chiefs, Naval Gunfire Liaison Officers/Chiefs, Rifle Company Commanders, Mortar Platoon Commanders. All other services are approved by course manager on a case-by-case basis. This course is offered to officers and noncommissioned officers/petty officers (E-6 and above). Additional information will be provided to students upon approval of individual quota requests. E4/E5 will be accepted if currently filling a liaison chief billet.

***LANDING SIGNALMAN ENL - MASL : P129101***

Provides selected personnel with training in the basic skills required for safe and expeditious helicopter operations aboard Air Capable, Amphibious Assault Aviation LPH/LHA/LHD), and Aviation Ships (CV/CVN). Classroom instruction shall include lessons on helicopter capabilities, limitations and special characteristics, Shipboard Flight Quarters Organization, Helicopter Emergencies, Aircraft Movement, Handling Procedures, Visual Signals, Helicopter Safety, Flight Deck Visual Landing Aides, and Night Vision Goggles.

***LAW OF WAR WORKSHOP - MASL : B121568***

Scope: This course is offered twice a year and addresses international customary and conventional law affecting the conduct of forces throughout the spectrum of military operations. The course focuses on The Hague and Geneva Conventions, emphasizing targeting principles and the protections accorded the wounded and sick, prisoners, detainees, and civilians. The course also examines the impact of other law of war treaties such as the United Nations Charter and the 1977 Geneva Protocols. Extensive seminar periods foster discussion and encourage practical application of these important issues.

***LCAC CRAFT CONTROL SYS MT - MASL : P145556***

**LANDING CRAFT AIR CUSHION CRAFT CONTROL SYSTEM MAINTENANCE**

Provides LCAC maintenance personnel with the necessary orientation information, skill development and practical application to operate and perform maintenance on LCAC electrical power distribution, main engine controls, fuel system, fire protection system and craft control systems. Personnel will be provided with the necessary knowledge, skills, and practice maintenance-related calibration, troubleshooting, and use of tools and test equipment. Also, repair of systems and associated subsystems at the organizational level of maintenance.

***LCAC OFF INDOC - MASL : P129475***

**LANDING CRAFT AIR CUSHION OFFICER INDOCTRINATION**

Provides Assault Craft Unit (ACU) Commanding Officer, Executive Officer, Detachment Officers-In-Charge, Naval Beach Group Personnel, CWO through O-6, with a basic understanding and knowledge of Unit Organization, Landing Craft Air Cushion (LCAC) characteristics and terminology, Safe Engineering and Operations (SEOPS) manuals, mission planning, normal operations, craft tactics and lessons learned.

## ***LCAC ORIENTATION OJT - MASL : P129480***

On the job orientation for LCAC watercraft.

## ***LCAC PROP&LIFT SYS MAINT - MASL : P145555***

### **LANDING CRAFT AIR CUSHION PROPULSION AND LIFT SYSTEM MAINTENANCE**

Provides LCAC maintenance personnel (GSM) with the necessary information, skill development, and practical application to set up, check out, maintain, and perform maintenance on the LCAC gas turbine engines, propulsion and lift system, and mechanical auxiliaries. Personnel will be provided with the technical data required for maintenance-related checkout, inspection, disassembly, assembly, troubleshooting, use of tools and test equipment, and repair of the systems and associated subsystems at the organizational level of maintenance.

## ***LCT SIMULATOR - SINGAPORE - MASL : B119977***

This MASL is used when LCT Simulator-Singapore is programmed.

## ***LDG CHF PETTY OFFR LDRSHP - MASL : P171041***

### **LEADING CHIEF PETTY OFFICER LEADERSHIP COURSE**

The purpose of this course is to provide leading chief petty officers and personnel in equivalent leadership positions with the requisite naval leadership skills necessary to function as effective leaders and managers within their job positions.

SCOPE: The Advanced Leader Development Program (ALDP) consists of two subsections. The first subsection is the classroom attendance of the Leading Chief Petty Officer Leadership Course (LCPOLC). The second subsection is the required e-learning assigned to support the Advanced Leader Development Program and the Leading Chief Petty Officer Leadership Course. Completion of both subsections is required for credit in the Advanced Leader Development Program. The Leading Chief Petty Officer Leadership Course (LCPOLC) supports Chief Petty Officers assigned to the leadership roles and responsibilities for planning and executing divisional/departmental functions; to include the professional and personal growth of those personnel assigned. LCPOLC attendance is required for personnel (E7) assigned to any comparable position. Previous completion of the ALDP or CPO LTC (CIN P-500-0051 or P-500-0021) satisfies the requirement for LCPOLC position assignment. The Navy Leadership Competency Model (NLCM) assigns the following competencies to the Advanced Leader Development Program: Accomplishing Mission, Leading People, Leading Change, Working with People and Resource Stewardship. Posted on the ALDP tab on the Leadership page will also be the Navy e-learning required to successfully complete the Advanced Leader Development Program.

## ***LDRSHIP PGM DIS. RESP. - MASL : D309011***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (WCN/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

## ***LEGAL ASPECTS CMBTERRORISM - MASL : P176028***

### **LEGAL ASPECTS OF COMBATING TERRORISM:**

1. What is a DIILS Legal Aspects of Combating Terrorism in CONUS seminar?

There may be circumstances in which a DIILS Legal Aspects of Combating Terrorism seminar will be conducted in CONUS. The same description applies as for a standard DIILS seminar except the location will be TBD in CONUS and DIILS will have many of the responsibilities that exist for a standing DIILS Resident program. The DIILS CONUS seminar addresses the multi-faceted problem of how to defeat terrorism while adhering to the rule of law. Depending on the unique circumstances in each participating country, DIILS presents a focused seminar on key legal issues. These topics include the military response to terrorism to include rules of engagement and use of force issues; the law enforcement response to terrorism including investigations, prosecution, international law enforcement money laundering, and the involvement of organized crime; maritime security and terrorism where appropriate; border security issues; defining terrorism and the differences of international terrorism

and internal armed conflicts; and how interagency cooperation can enhance the fight against terrorism. Presentations by DIILS staff and subject matter experts, case studies based on recent events, discussion problems, and host nation group and individual presentations all work together to create an effective and practical experience for the participants.

2. What will the SAO have to do?

The SAO and the DIILS team work closely to determine all details of the MET. Seminar location, number and choice of participants, timing of the seminar, translation services, gift exchange, finances, opening and closing ceremonies, and press coverage are a few topics which will need to be resolved. In addition the SAO will assist with the in-country transportation and housing for the DIILS team.

3. Who will make up the DIILS team?

Usually, a DIILS team will consist of four team members led by a DIILS staff member. A typical Legal Aspects of Combating Terrorism team consists of civilians who are employees of various government agencies combating terrorism, military operational law experts, and others with experience working in legal matters involving terrorism.

4. What is the cost of a seminar?

Per- diem and travel for the team, translation and printing of materials seminar are some of the costs involved in preparing for the seminar. Per- diem and travel for participants traveling to CONUS will be required. DIILS will arrange transportation to and from the seminar site and arrange lodging.

5. Who issues the fund cite?

DIILS will issue a fund cite for in-country costs to the SAO. Estimates for all in-country costs should be sent to DIILS as early as possible. NETSAFA manages funding, but sends all monies for a MET to DIILS for further issuance to the SAO.

6. What happens next?

Further seminars and work groups may focus on one or more key legal areas of combating terrorism and work towards a deliverable such as a plan to engage different agencies in developing common legal concepts and de-conflicting the work of the military and civilian law enforcement.

SPECIAL NOTE: Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures. Course is open to and useful for military commanders and staff officers who need to increase knowledge of legal issues involved in military operations or to make more effective use of legal advisors.

What do I-LOMO participants learn?

I-LOMO provides the latest information and viewpoints on legal issues applicable to modern military operations including recent developments in the Law of Armed Conflict, Rules of Engagement and the Role of the Military Legal Advisor in Operational Planning. I-LOMO is taught by instructors from the DIILS and the Naval War College. Adjunct International Faculty from U.K., Australia, Germany, Japan and other countries also provide instruction and their national perspective. I-LOMO participants attend a 3 day International Conference on Operational Law sponsored by the Naval War College. The IP program features visits in the Newport area and to Boston.

**LIAISON OFFICER - NAVAIR - MASL : P179070**

LIAISON OFFICER - NAVAIR

**LIAISON OFFICER - NAVSEA - MASL : P179090**

To provide a Country Liaison Officer to a NAVSEA command to assist the United States with administrative details for International Military Students from the CLOs country.

**LIAISON OFFICER - SPAWAR - MASL : P179071**

LIAISON OFFICER - SPAWAR

**LIAISON OFFICER - USMC - MASL : P179100**

LIAISON OFFICER - USMC

### **LIAISON OFFICER CONUS-NETC - MASL : P179000**

To provide a Country Liaison Officer to a CNET command to assist the United States with administrative details for International Military Students from the CLOs country.

### **LIGHT ARMORED VEHICLE LDR - MASL : P121855**

#### LIGHT ARMORED VEHICLE LEADER COURSE

Provides training of infantry officers and staff non-commissioned officers to command and supervise the operation, employment and maintenance of Light Armored Vehicles (LAV) and their associated weapons systems. The focus of this course is to train light armored unit platoon commanders and platoon sergeants to operate and supervise the employment and maintenance of the LAV-25 and its weapons systems under a variety of environmental and tactical conditions. The course provides detailed instruction on routine vehicle operations, maintenance management, communications, gunnery and embarkation. The course includes instruction on basic tactical measures; security, reconnaissance and limited offensive and defensive operations; and field logistics. Finally the course familiarizes the student with the capabilities and employment of the LAV mortar and antitank variants.

Prerequisite Info: Combat arms/combat support. Staff sergeants through captains (E-6 - O-3) who are or will be assigned to a light armored unit. Students must pass USMC PFT. Students must be able to obtain a valid driver's license and be a graduate of Basic Officer Course (P179250), Infantry Officer Course (P121008), or Infantry Platoon Sergeant Course (P121036 or P121037), or equivalent.

\*NOTE: It is highly recommended that the Basic Officer, Infantry Officer (for officers) and Infantry Platoon Sergeant (for enlisted) course be considered prior to send students to the LAV Officer and SNCO Course. This will give the students a solid background in infantry skills and tactics. All USMC officers and SNCOs go through these courses prior to attending LAV Officer and SNCO course.

### **LINK-16 NETWORK D&M - MASL : P139285**

To familiarize the student with JTIDS/MIDS network design and management procedures and configuration management.

### **LM2500 GAS TURBINE TRAINING - MASL : P145001**

#### LM2500 GAS TURBINE TRAINING

Course overview:

This course is intended for Foreign Navy personnel who utilize the General Electric LM2500 for ship propulsion and power generation. This course will teach the student the principles, construction, function, components, and maintenance philosophy of the LM2500 gas turbine.

Course Content:

- Gas Turbine Theory
- LM2500 Major Assemblies
- LM2500 Accessories
- LM2500 Secondary Systems
- Base Enclosure
- Bore- scope Inspections
- Preventative Maintenance
- Corrective Maintenance

### **LOADMASTER/C-130/TACT - MASL : D153012**

Mission qualifies aircraft loadmasters in C-130E/H aircraft; includes academic, static loading, and flying in airdrop operations.

### **LOADMASTER/C-130-INIT - MASL : D153015**

Initially qualifies aircraft loadmasters in the C-130 E/H aircraft; includes academic, static loading, and flying training.

### ***LOADMSTR TACT ALFT IN/C130 - MASL : D153020***

Qualifies loadmasters to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. The course includes academic, fuselage trainer, and flying training. Air Force policies, procedures, and directives are studied in depth.

### ***LOG INFO FUNDAMENTALS - MASL : B151921***

This course provides the fundamentals and technical knowledge necessary to understand basic cataloging principles. The four steps in item identification process will be identified: Item Name Selection, Federal Supply Classification, Reference and Characteristics Data, National Stock Number (NSN) assignment. The student will perform exercises in the accomplishment of each of the four steps.

### ***LOG INFO MGT COURSE - MASL : B151924***

The primary objective is to prepare the student to manage and operate a National Codification Bureau (NCB). It focuses on the cataloging rules and standards of the NATO Codification System used by the United States, NATO and dozens of other nations around the world. It provides a broad management overview on procedural requirements, tools and information system infrastructure necessary to implement a national codification system, and the interface and uses of codification data in logistics life-cycle applications, primary logistics functions (at both the wholesale and retail levels), and weapons systems acquisition processes. The cataloging systems used by the various US services and agencies and its application in actual field level activities will form the foundation for the program. The first phase of the program will deal with a general overview of systems acquisition, engineering data management and logistics operations related to weapons system life cycle support. The second phase will be focused more specifically on the principles of cataloging, and the application of those principles in the NCS. The third phase will provide valuable on-the-job (OJT) training in the various operations and disciplines within the Defense Logistics Information Services (DLIS) responsible for the operation of the Federal Cataloging System within the US. As a means of cultural exchange, a one-week Informational Program will acquaint students with the American way of life.

### ***LOG INFO OPERATIONS - MASL : B151922***

This course will provide the student with the "how-to" functions of performing fundamental cataloging. CFTC Week 1 provides cataloging fundamentals, Week 2 focuses on the "how to".

### ***LOGISTICS EXECUTIVE DEVELOPMENT - MASL : B151779***

Presented generally at the graduate level; this infers that the student should possess the initiative to pursue some self-developed educational goals and the willingness to share expertise and experience with classmates. This course recognizes that each student brings valuable expertise in one or more course-related areas. The class collectively has expertise in the full range of logistics management. Instruction will include accepted theory, established policy, doctrine, and applications to the management of defense logistics.

### ***LOGISTICS MANAGEMENT/GRAD - MASL : D178007***

Provides a broad, diversified curriculum that will equip students with the skills required to perform effectively as middle and upper managers in any of a variety of Air Force and defense logistics systems. Satisfactory completion of the curriculum leads to award of a Master of Science degree in logistics management.

### ***LOGISTICS OFFICER - MASL : P124355***

#### **LOGISTICS OFFICER**

**PURPOSE:** To prepare entry level and lateral move company grade officers for duty in a logistics related billet at the battalion or equivalent level where their responsibilities will encompass logistics, embarkation, combat service support (CSS), maintenance management, and motor transport operations and maintenance.

**SCOPE:** This course provides an entry-level foundation of professional knowledge in logistics and develops the skills necessary to function effectively in a logistics billet. Logistics and CSS planning functions are taught for non-deployment and deployment environments. Subject matter includes the management of ground equipment maintenance, publications control, the Marine Corps supply system, and the Marine Corps Integrated Maintenance Management System (MIMMS). Also included within the course is instruction on the Marine Air Ground Task Force (MAGTF) Deployment Support System II (MDSS II), computer-aided

embarkation planning, embarkation and strategic mobility, the manual preparation of load plans for ship and Air Mobility Command (AMC) aircraft, CSS planning, publications for CSS plans, and Maritime Prepositioning Force (MPF) requirements. Instruction is also included in operations, aviation, intelligence, host nation/inter-service support information systems, communications as they affect logistics planning and CSS operations, and a logistics case study. The course also contains specialized instruction on motor transportation operations and maintenance, vehicle fording and recovery operations, vehicle camouflage, night driving operations, and tactical and administrative convoys. A final scenario is used as the framework for a motor transport field exercise.

### ***LOGISTICS READINES OFFICER - MASL : D151025***

Provides training in: logistics fundamentals, the Air and Space Expeditionary Air Force (EAF) concept, total force, Logistics Readiness Officer (LRO) combat wing roles and responsibilities, roles and responsibilities of LROs outside of the combat wing, wing programs impacting logistics, LRO issues, introduction to the materiel management core competency, asset accountability, asset visibility, asset control, introduction to the distribution core competency, distribution operations, vehicle management processes, introduction to the contingency operations core competency, deliberate planning, deployments, and crisis action planning.

### ***LOGTOOL (LIT) - MASL : P151200***

International Logistics Internet Toolbox (ILIT) (1 Week) International Officers only, grade O-1 to O-4, waivers available for civilian and enlisted students. This course offers an in depth review of the U.S. military's internet based logistics tools, available to International Customers. ILIT will help International Customers develop a process oriented working knowledge of DOD web-based logistics systems. Instruction is modeled after training provided to U.S. DoD civilian and military personnel, working in the supply and maintenance communities. The five day course will focus on the Logistics Supply Chain, defined as Identifying Assets, Locating Assets, Ordering Assets and Tracking Assets. Course will provide attendees an expert knowledge of Weblink International (a DLA web portal), providing access to: - FEDLOG on line via LOGRUN - SAMMS, Asset Visibility of DLA stock on hand, Item Managers notes and -(LIPS) Requisition Status, including detailed shipping information (DSS) - Defense Reutilization Marketing Service (DRMS) for excess DoD stock in disposal. Students will also access the Navy's International Programs E-Business Suite and the Air Force's Security Assistance Center (AFSAC). Throughout the training curriculum, students will receive Microsoft Excel training, relating to the intelligent management of logistics data. The Logtool.net logistics web portal will be utilized to help guide students through the numerous links available. Course content is flexible, allowing for unique needs of students and updated frequently to ensure current changes in systems are included in every class. Students will work with their own country's real time data in order to demonstrate methods used to improve logistics support.

### ***M1A1 ABRAMS MASTER GUNNER - MASL : B122162***

INDIVIDUAL TRAINING: Physical fitness; tank weapons gunnery simulation system (TWGSS) operator certification. MAINTENANCE TRAINING: Maintenance procedures used to identify and troubleshoot complex malfunctions that occur in the tank turret electrical; hydraulic; armament; and fire control systems. GUNNERY TRAINING: Advanced gunnery methodology; doctrinal; and technical procedures needed to assess crew proficiency; identify crew procedural errors that cause a tank not to hit a target; provide training for crews to operate the tank to its designed capabilities. GUNNERY TRAINING MANAGEMENT: Battle focused training management procedures with the main emphasis on tank gunnery standards; preliminary gunnery training; supervised decentralized instruction; integration of training devices; assessment of units strong areas and weak areas, and development of an annual gunnery program that sustains and improves unit tank gunnery proficiency.

### ***MACHINERY TECHNICIAN MK-A - MASL : P122219***

This course teaches enlisted personnel to perform at the job entry level in the Machinery Technician rating. Students are taught principles of operation, maintenance and repair of mechanical, auxiliary steam, hydraulic, pneumatic and electrical machinery and systems. The following topics are covered: piping, tubing, hoses, manuals, leadership, hydraulics, internal combustion engines, lubrication and cooling systems, fuel handling, governors and fuel systems, diesel engine overhaul, electricity and electrical equipment, auxiliary machinery, refrigeration, clutches, gears and shafting, boat machinery and equipment, outboard engines, and pumps.

### ***MAGZ SPR (De-act-See TCC) - MASL : P145068***

To train personnel in proper operation, testing casualty analysis, preventive maintenance, and repair of salt water activated magazine sprinkler systems and associated thermo-pneumatic automatic controls. Course includes classroom and laboratory instruction including theory of operation, valves, thermo-pneumatic controls and piping. During practical sessions students operate, test, isolate casualties, and repair operational classroom mock-up sprinkler systems.

### ***MAINT DATA SYS ANALYSIS - MASL : D141012***

This course provides training for Air Force personnel in AFSC 2R0X1 with the knowledge and skills needed to perform the duties of a maintenance data systems analyst. The scope of training includes statistical methods of data analysis, computer applications, data retrieval techniques, and the operation and maintenance of management information systems. Training also includes the use of computers with remote interface and printers, the procedures for maintaining data systems, the interpretation and use of reports from management information systems, and the presentation of maintenance data.

### ***MAINTENANCE OFFICER - MASL : D141243***

This course prepares selected officers for aircraft maintenance leadership and management positions by giving them the tools and training in the essential areas of the maintenance career field. The curriculum provides maintenance management skills as well as organizational structures and management techniques used in the planning and developing of functional areas within a maintenance organization. The training received will increase the individual's knowledge and understanding of maintenance operations and increase their ability to manage at higher responsibility levels within a maintenance unit. Student officers should have experience in the maintenance career field and perform or will perform duties at squadron or equivalent level. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

#### **COURSE DESCRIPTION:**

- **BLOCK I - ORIENTATION, SAFETY, OPERATIONAL RISK MANAGEMENT (ORM):** This block begins with a course orientation, where students learn about the academy's policies, programs, and academic objective requirements. This block provides detailed lectures and discussions on maintenance safety doctrine, Supervisory Safety responsibilities and practices, and in-depth fundamentals of the ORM program; concludes with a written exam.
- **BLOCK II - QUALITY ASSURANCE:** This block provides the student with the fundamentals necessary to perform the Quality Assurance (QA) function. Subjects covered include: The role of QA and responsibilities in evaluating and assessing personnel proficiency (including the quality and effectiveness of training programs), equipment and aircraft condition, and the management of specific programs that ultimately increase mission effectiveness. The Quality Assurance Program (QAP) is designed as a flexible feedback system for maintenance leaders, supervisors, and workers. Students learn methods to detect negative trends, problems areas, inform and prepare reports of these problems, their likely causes, and possible corrective actions. Quality assurance inspection concepts include: different types of evaluations, inspections and observations that are in the QAP and the Product Improvement Program; concludes with a written exam.
- **BLOCK III - TOTAL QUALITY MANAGEMENT:** The objective of this lesson is for each student to know the evolution of quality and its principles. Students are introduced to quality approach practices and how they differ from other management styles. The student also learns the concept of quality principles and practices in today's military environment. It also provides the student with comprehension on team dynamics and how to apply team leader skills to manage a successful team. They also have the opportunity to use selected decision tools enhancing continuous improvement efforts, as well as selected data and problem analysis tools; concludes with a written exam.
- **BLOCK IV - TECHNICAL ORDER SYSTEM:** The student will learn the purpose, authority, and use of the USAF technical manual system, numbering system and filling technical orders. The students are also introduced to the illustrated parts breakdowns; concludes with a written exam.
- **BLOCK V - SUPERVISORY ON THE-JOB TRAINING:** The student is exposed to the On-the-Job-Training Program. The students learn the structure of the program and responsibilities to the training program. It also teaches supervisors how to plan, conduct, evaluate and document training; concludes with a written exam.
- **BLOCK VI - SUPERVISORY MANAGEMENT:** Students learn wing programs and operational support. This is a key element in understanding the communication within the operations and maintenance units. Students also define and

compare the organization and responsibilities of maintenance managers and sortie production units with reference to Air Force major commands guidance

### ***MAINTENANCE SCHEDULING - MASL : D162006***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***MAINTENANCE SCHEDULING SP - MASL : D162011***

Training consists of familiarization of aircraft maintenance organizations, concepts, and responsibilities; familiarization of technical orders and Air Force Instructions. Automated products and the automated management system will be used to plan and schedule the utilization and maintenance of aircraft through all phases of maintenance. Training includes engine parts tracking and the maintenance of aerospace weapon systems records, using computer remote terminals and associated equipment.

### ***MAINTENANCE/\* - MASL : D304005***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (WCN/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***MAINTENANCE/ARMAMENT/\* - MASL : D304008***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (WCN/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***MANEUVER ANCOC - MASL : B121040***

Course Scope:

Common Leader Training, subjects are: Interpret Cultural Terrain; Supervise Platoon Tactical Operations; Define Ethical Reasoning; Issue Plans, Orders, and Annexes; Supervise Detainee Operations; Supervise Platoon Training Management; Conduct a Platoon Fitness Program; Enforce the Army's Writing Style; Construct a 360 Degree Assessment; Assist Family Members of the Unit During Emergencies; Perform in a Joint Operating Environment.

CMF Common Subjects (Universal) are; Troop Leading Procedures and the Military Decision Making Process; Information Operations; Operations Orders and Operational Terms and Graphics; Fire Support Planning; Actions on Contact; Link-up and Relief in Place; Conduct Displacement; Control Platoon Fires; Assembly Area Activities; Assist in the IPB Process; Resupply, Consolidation, and Reorganization; Conduct Convoy Operations; Passage of Lines; Road Block and Check Point Operations; Cordon and Search; Patrolling; Identify and React to IEDs and VBIEDs; Combative NCOER; AR 600-9; UCMJ, Separations, and Promotions; NCOED; Duties and Responsibilities of the 1-5 Staff; Lessons Learned; Command and Control Exam and AAR; Tactics Exam and AAR; 48 hr Simulation Exercise conducted in the CCTT.

Mandatory Training Subjects are; FBCB2; OPSEC Awareness; Risk Assessment; COE/COIN; Lessons Learned; Ethical Reasoning; Sexual Assault Prevention and Response Training; Enforce the Army's Sexual Assault Policy at the Unit Level.

### ***MANEUVER ANCOC - MASL : B121043***

Common Leader Training, subjects are; Interpret Cultural Terrain; Supervise Platoon Tactical Operations; Define Ethical Reasoning; Issue Plans, Orders, and Annexes; Supervise Detainee Operations; Supervise Platoon Training Management; Conduct a Platoon Fitness Program; Enforce the Army's Writing Style; Construct a 360 Degree Assessment; Assist Family Members of the Unit During Emergencies; Perform in a Joint Operating Environment.

Mandatory Training Subjects are; FBCB2; OPSEC Awareness; Risk Assessment; COE/COIN; Lessons Learned; Ethical Reasoning; Sexual Assault Prevention and Response Training; Enforce the Army's Sexual Assault Policy at the Unit Level.

Special Information:

M-ANCOC consists of 3 phases back to back (Ph-1, Ph-2 (MOS Specific), Ph-3). Orders must cover all 3 phases.

Soldiers with a permanent designator of "2" in the physical profile must include a copy of DA Form 3349 (Physical Profile) as part of the course application. Soldiers with a permanent designator of "3" or "4" in their physical profile must include a copy of DA Form 3349 and the results of their Military Medical Review Board (MMRB) as part of the course application. Soldiers who have been before a MMRB, awarded medical limitations, and allowed to retain their occupational classification, will be eligible to attend Maneuver ANCOC and train within the limits of their profile, provided they can meet the course graduation requirements.

### ***MANEUVER ANCOC - MASL : B121045***

Combined simulations exercise (CCTT) and Urban Operations.

Active and reserve Soldiers over 40 must complete required medical screening and reserve status prior to attending. Soldiers with a permanent designator of "2" in the physical profile must include a copy of DA Form 3349 (Physical Profile) as part of the course application. Soldiers with a permanent designator of "3" or "4" in their physical profile must include a copy of DA Form 3349 and the results of their Military Medical Review Board (MMRB) as part of the course application. Soldiers who have been before a MMRB, awarded medical limitations, and allowed to retain their occupational classification, will be eligible to attend Maneuver ANCOC and train within the limits of their profile, provided they can meet the course graduation requirements.

### ***MANEUVER ANCOC - MASL : B121042***

Combined simulations exercise (CCTT) and Urban Operations.

### ***MANEUVER ANCOC (CAV SCOUT) - MASL : B121046***

Reconnaissance Missions, Screen Missions, Counter-mobility, and Close Air Support (CAS).

### ***MANEUVER ANCOC (INFANTRYMAN) - MASL : B121041***

MOS Specific Subjects for 11B are; Proponent Military History; Air Assault Operations; Combined Infantry Tactics; Urban Operations; Platoon Tactical Operations (CCTT, J-CATS); Mounted Land Navigation; Close Air Support; CMF 11B Exam and AAR.

### ***MANEUVER ANCOC (INFANTRYMAN) - MASL : B121044***

MOS Specific Subjects for 11B are; Proponent Military History; Air Assault Operations; Combined Infantry Tactics; Urban Operations; Platoon Tactical Operations (CCTT, J-CATS); Mounted Land Navigation; Close Air Support; CMF 11B Exam and AAR.

Active and reserve Soldiers over 40 must complete required medical screening and reserve status prior to attending. Soldiers with a permanent designator of "2" in the physical profile must include a copy of DA Form 3349 (Physical Profile) as part of the course application. Soldiers with a permanent designator of "3" or "4" in their physical profile must include a copy of DA Form

3349 and the results of their Military Medical Review Board (MMRB) as part of the course application. Soldiers who have been before a MMRB, awarded medical limitations, and allowed to retain their occupational classification, will be eligible to attend Maneuver ANCOG and train within the limits of their profile, provided they can meet the course graduation requirements.

### ***MANEUVER CAPTAINS CAREER - MASL : B171622***

The Maneuver Captains Career Course accomplishes this mission in three phases. Phase 1 is distance learning consisting of 71 hours of common core training to be completed before graduation. In Phase 2 all officers receive the same training on fundamentals, troop leading procedures and full spectrum company level operations for Light Infantry, SBCT Infantry, and Armor/mechanized companies and teams. The intent is that all officers will be able to develop company level plans for all types of company organizations for full spectrum operations in various environments. Phase 3 of MC3 divides the Captains into formation-based small groups to prepare officers to serve in an Infantry, Stryker or Heavy Brigade Combat Team. This phase is contingent upon Human Resources Command providing Captains their future assignment, based on the Army Force Generation model, prior to this division. Officers (including the other branches attending MC3) who are assigned to a HBCT will be assigned to a small group with all members pending assignment to an HBCT. Officers who are assigned to an IBCT or SBCT will be assigned to a small group with all members pending assignment to an IBCT or SBCT. Officers who are selected for Special Forces will be assigned to a small group with all members pending assignment to the Special Forces Qualification Course. This assignment-based training provides the officers more detailed technical and tactical training for company, battalion and brigade operations based on the officer's future assignment. All officers receive the same training on fundamentals, troop leading procedures and full spectrum company level operations for Infantry, Stryker, and Heavy Brigade Combat Teams.

Phase Scope: Phase 3 of MC3 divides the Captains into formation-based small groups to prepare officers to serve in an Infantry, Stryker or Heavy Brigade Combat Team. Prior to this phase Human Resources Command provides Captains their future assignment, based on the Army Force Generation model. This assignment-based training provides the officers detailed technical and tactical training for company, battalion and brigade operations based on the officer's future assignment. Officers (including the other branches attending MC3) who are assigned to a HBCT will be assigned to a small group with all members pending assignment to an HBCT. Officers who are assigned to an IBCT or SBCT will be assigned to a small group with all members pending assignment to an IBCT/SBCT. The officers assigned to TDA, ROTC, and Echelons above Brigade or those not having received an assignment attend the track reflecting either their branch or most probable follow-on BCT assignment. Foreign officers attend the track which resembles their own particular unit or branch.

### ***MANEUVER CAPTAINS CAREER - MASL : B171621***

The Maneuver Captains Career Course accomplishes this mission in three phases. Phase 1 is distance learning consisting of 71 hours of common core training to be completed before graduation. In Phase 2 all officers receive the same training on fundamentals, troop leading procedures and full spectrum company level operations for Light Infantry, SBCT Infantry, and Armor/mechanized companies and teams. ### ***MANPOWER AND FORCE MANAGEMENT - MASL : B162011***

The curriculum concentrates on manpower and force management functions. The subject areas covered during manpower blocks of instruction are tailored to the manpower management functions described in AR 570-4. These functions address the fundamental aspects of planning, programming, requirements determination, standards and guidance, documentation, allocation and analysis and evaluation. The force management subject areas address the fundamental aspects of force management: developing, manning, and equipping the force. Last, HQDA automated manpower and information systems are discussed and compared with the Air Force Manpower Management System. This course is offered in the satellite mode. The curriculum concentrates on manpower and force management functions. The subject areas covered during manpower blocks of instruction are tailored to the manpower management functions described in AR 570-4. These functions address the fundamental aspects of planning, programming, requirements determination, standards and guidance, documentation, allocation and analysis and evaluation. Last, HQDA automated manpower and information systems are discussed and compared with the Air Force Manpower Management System. This course is offered in the satellite mode.

### ***MANPOWER APPRENTICE - MASL : D162007***

This course replaces E3ALD3S331 000 effective 2 Aug 05. Training includes an introduction to the manpower career field, work identification and measurement, requirements determination, manpower programming and resource management, organization

structure and performance management, and final project that has the students perform the five phases of consulting services including collecting data, developing recommendations, and briefing unit commanders.

### ***MANPOWER PERSONNEL OFFICER - MASL : D162014***

This is an initial skills course and personnel that previously held a 36P or 38M AFSC prior to the merger are not eligible to attend the 37F course. The course provides training for Air Force Manpower Personnel Officers who possess AFSC 37FX in the skills and knowledge necessary to perform as Manpower Personnel Officers, with emphasis upon performance at squadron level. The scope of training includes Total Force Management Structure, Data Systems, Civilian Employee Management, Customer Service, Air Force Culture, Education and Training, Military Retirement and Separation Program, Assignments, Squadron Programs, Career Enhancements, Employment, Readiness, and Manpower and Organization.

### ***MANPRINT WORKSHOP - MASL : B151824***

Course provides an interactive instruction on MANPRINT and its background, philosophy, purpose and domains. Describes organizational and functional responsibilities and activities in the manager's organization, discusses timing of these activities generally in terms of the life cycle system management mode. Emphasizes MANPRINT success stories and the value added/return on investment from doing MANPRINT and MANPRINT's role in concurrent engineering and total quality management is also described to emphasize the ongoing need for cultural change in materiel acquisition. Provides catalyst for the exchange of views and sharing of experiences related to MANPRINT

### ***MAP/CHART/GEOD STAFF OFF - MASL : B125075***

Purpose: The Mapping, Charting, and Geodesy (MC&G) Staff Officer Course provides an understanding of key organizations, concepts, systems, and procedures involved in the production and use of printed and digital maps, charts and digital information. The course emphasizes areas of interest to the staff officer, the planner, and the supervisors who need to better understand DMA and its products. Target Audiences: DoD personnel in MC&G billets, supervisors whose personnel utilize DMA products, staff officers (especially S/G/J-2s and 3s) and intelligence personnel from all Services, Commands, and DoD Agencies. Topics Include - Fundamentals of MC&G as they impact the staff officer's planning responsibilities, an overview of DMS's products, support and technology, and an introduction to the requirements process. MC&G Fundamentals: - Datum, Grids, and Projections - Product Accuracy - Introduction to Global Positioning Systems (GPS) - Geographic Information Systems (GIS) - Remotely Sensed Imagery (RSI) - Photogrammetric MC&G Support: - Requirements Process - International Agreements - Crisis Support - DMA MUSE Software - Customer Support Teams DMA Products & Services: - DMA Softcopy Catalog - Distribution - Standard Digital Products - Standard Paper Products

### ***MAR SAF PORT CTRL EXAMINER - MASL : P122234***

MARINE SAFETY PORT STATE CONTROL EXAMINER: This course is designed to provide entry-level training that prepares a Port State Control Examiner to perform the tasks required to conduct Port State Control Examinations. It is an intensive four week course that integrates performance-based training with classroom instruction. Students are instructed in the use and application of U.S. and international regulations that include Safety of Life at Sea (SOLAS), Maritime Pollution (MARPOL) Protocols, the International Safety Management (ISM) code, the Standards for Training, Certification and Watch-keeping (STCW) and the International Ship and Port Facility Security (ISPS) code.

### ***MARINE SAFETY EXPLOS HNDL - MASL : P122252***

This course instructs officers and enlisted personnel in the proper procedures and regulations for safe shipping and in port handling of military and commercial explosives. Subjects taught include: compliance with U.S. and international hazardous material transportation regulations, requirements for labeling and packaging hazardous cargo, inspections of cargo blocking and bracing, examinations of cargo gear and rigging, container inspections, vessel pre-load examinations, and supervision of cargo handling operations. The course emphasizes 49 U.S. Code of Federal Regulations and International Maritime Dangerous Goods (IMDG) Code.

### ***MARINE SAFTY INVESTIGATION - MASL : P122253***

This course is designed to prepare investigating officers to accomplish their duties at a Marine Safety Unit. The course provides pay grades E-6 through O-3 with instruction on the applications of laws, regulations and policies related to investigation of

marine casualties. Students use scenarios and role play of marine casualties to practice investigative techniques as well as case processing skills. Note: This course is based on U.S. investigative and administrative laws.

Prerequisite Info: Completion of Marine Safety Entry-Level Port Operations (P122233) or Marine Safety Inspection (P122226).

Note: This course is based on U.S. investigative and administrative laws.

### ***MARINE SCIENCE TECHNICIAN - MASL : P179027***

This course provides entry-level training that includes: pollution investigation, monitoring of federally funded cleanup of oil and hazardous material spills, port safety and security, boarding commercial vessels, providing scientific support for unit operations in support of missions of the USCG, environmental laws, occupational safety, dangerous cargo stowage and segregation, cargo transfer monitoring, leadership, incident command system, and career planning information. Prerequisites: None.

### ***MARITIME INTERCEPTOR TRNG - MASL : P145870***

Enduring Friendship Maritime Interceptor Training Course: The purpose of this program is to prepare 15-16 students per class to operate and maintain Marine Interceptor Motor Vessels manufactured by NOR-TECH, Inc., Ft. Myers, Florida

The course content will include the following: service, repair and overhaul of four-stroke diesel engines and service and repair of boating accessories. With regard to the above, course content will include electrical systems, fuel systems, power transfer systems, ignition systems, cooling systems, lubrication systems, drive systems and boat and trailer rigging.

The course content should also include training in communication, leadership, human relations and employability skills; and safe, efficient work practices.

Shop or laboratory activities are an integral part of this program. These activities provide instruction in the use of tools, equipment, materials and processes found in the industry. Students are also instructed in the following: tools, test equipment, current model motors, location and installation of accessories, emergency response procedures, and operational testing.

After successfully completing the program, the student will be able to operate, maintain, repair, and overhaul major components of the assigned Marine Interceptor Motor Vessel manufactured by NOR-TECH, Inc, Ft. Myers, Florida.

### ***MARKING CLASSIFIED INFO - MASL : P279220***

#### **MARKING CLASSIFIED INFORMATION**

Examines the requirements and methods for marking classified documents and other classified materials. Lessons address general marking requirements, marking originally classified information, marking derivatively classified information, marking special types of documents and materials, changes in markings, foreign government information and marking Atomic Energy information.

### ***MAVERICK - EOD - MASL : P193132***

Trains selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***MBL USEMEDS CONT HOSP TRN - MASL : D309050***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (WCN/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***MECHANIZED LEADER (M2A2) - MASL : B121195***

Vehicle introduction; safety considerations; hull and turret operations and maintenance; weapons systems training; tactics (BFV peculiar); preliminary gunnery; basic gunnery; intermediate gunnery.

### ***MED LOGISTICS MANAGEMENT - MASL : B152217***

The 8B-70K67 consists of principles and techniques used in the management of logistical functions in Army hospitals and TOE medical units. Attendance of this course is mandatory to attain the 70K67 Area of Concentration (AOC). Award of the AOC will be in accordance with applicable policies and regulations. The 8B-70K67 consists of principles and techniques used in the management of logistical functions in Army hospitals and TOE medical units. Attendance of this course is mandatory to attain the 70K67 Area of Concentration (AOC). Award of the AOC will be in accordance with applicable policies and regulations.

### ***MED MGT CHEM/BIOLOGICAL CASUALTIES - MASL : B175322***

This 6 day course is taught at two separate sites, simultaneously, to two separate groups of students. The biological portion (Phase 1) is taught at the United States Army Medical Research Institute of Infectious Diseases (USAMRIID) at Fort Detrick, Maryland. The chemical portion (Phase 2), which includes a field exercise, is taught at the United States Army Medical Research Institute of Chemical Defense (USAMRICD) at the Edgewood area of Aberdeen Proving Ground (APG-EA), Maryland. The order in which students receive Phase 1 and Phase 2 instruction is unimportant, but each student must complete both phases.

### ***MED MGT OF CHEM & BIOL CASUALTIES - MASL : B175302***

This 6 day course is taught at two separate sites, simultaneously. The biological portion (Phase 1) is taught at the United States Army Medical Research Institute of Infectious Diseases (USAMRIID) at Fort Detrick, Maryland. The chemical portion (Phase 2), which includes a field exercise, is taught at the United States Army Medical Research Institute of Chemical Defense (USAMRICD) at the Edgewood area of Aberdeen Proving Ground (APG-EA), Maryland. The order in which students receive Phase 1 and Phase 2 instruction is unimportant, but each student must be a registered for both phases and must complete both phases.

### ***MEDICAL ASSISTANCE-SPANISH - MASL : B175350***

Basic lifesaver measures; basic knowledge of the human anatomy; treatment of complicated injuries; fluid replacement; splinting; suturing, etc.; tactical units with civic actions missions and counterdrug missions, including water purification; emergency childbirth and minor surgical procedures; successful completion of the expert field medic course, where students demonstrate their medical skills, under stress, in simulated conditions; minimum of 12 hours of instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society. Basic lifesaver measures; basic knowledge of the human anatomy; treatment of complicated injuries; fluid replacement; splinting; suturing, etc.; tactical units with civic actions missions and counterdrug missions, including water purification; emergency childbirth and minor surgical procedures; successful completion of the expert field medic course, where students demonstrate their medical skills, under stress, in simulated conditions; minimum of 12 hours of instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***MEDICAL NCO - MASL : B175209***

The BNCOC courses are under the jurisdiction of the AMEDD NCO Academy. Training stresses the technical, tactical and leadership battle competencies including combat, combat support and combat support services. The training includes general military knowledge and MOS skills required to function as a Team Leader or Squad Leader in support of Army operations. MOS SPECIFIC TECHNICAL TRAINING FOR 76J, 91B, 91E, 91M, 91R, 91T IS INTEGRATED WITH THIS COURSE. Total course length will be determined by the number of weeks of technical training plus the 7 weeks, 1 day of common leader training.

Technical track:

Provides enlisted personnel medical skills needed to function at NCO level on a modern battlefield or in Garrison pre-hospital care and emergency/ambulatory treatment facilities. Subjects covered are: forward battlefield care; principles and procedures for triage; physical assessment of body systems; anatomy and physiology; pharmacology; disease and disorders; advanced trauma management skills, and treating minor medical problems. This course is integrated with the Basic Noncommissioned Officer Course. Work uniform required. Strongly recommend IMS be immunized for Hepatitis B. Duration of technical track is 10 weeks. The BNCOC courses are under the jurisdiction of the AMEDD NCO Academy. Training stresses the technical, tactical and leadership battle competencies including combat, combat support and combat support services. The training includes general military knowledge and MOS skills required to function as a Team Leader or Squad Leader in support of Army operations. MOS SPECIFIC TECHNICAL TRAINING FOR 76J, 91B, 91E, 91M, 91R, 91T IS INTEGRATED WITH THIS COURSE. Total course length will be determined by the number of weeks of technical training plus the 7 weeks, 1 day of common leader training.

### ***MEDICAL SPECIALIST (BASIC) - MASL : B175211***

Scope: To prepare enlisted personnel to become soldier medics and provide emergency medical treatment, limited primary care, force health protection and evacuation in a variety of operational and clinical settings from point of injury or illness through the continuum of military health care. The trainee receives specific training in combat and military operations other-than-war casualty care, medical care for patients exposed to weapons of mass destruction, deployable medical systems, aircraft and ground evacuation, and casualty triage and processing. The course trains the requirements of the National Registry of Emergency Medical Technicians - Basic (EMT-B) as a foundation for the Health Care Specialist. Upon successful completion of this course soldiers will be National Registry certified as an EMT-B. Scope: To prepare enlisted personnel to become soldier medics and provide emergency medical treatment, limited primary care, force health protection and evacuation in a variety of operational and clinical settings from point of injury or illness through the continuum of military health care. The trainee receives specific training in combat and military operations other-than-war casualty care, medical care for patients exposed to weapons of mass destruction, deployable medical systems, aircraft and ground evacuation, and casualty triage and processing. The course trains the requirements of the National Registry of Emergency Medical Technicians - Basic (EMT-B) as a foundation for the Health Care Specialist. Upon successful completion of this course soldiers will be National Registry certified as an EMT-B.

### ***MEDICAL STRATEGIC LEADERSHIP PROGRAM - MASL : B175283***

The 6-250-C1 (International) is a multinational, postgraduate level course. For international officers the course is 3 weeks long. The course focuses on strategic planning in the medical arena with emphasis on coalition operations. Major areas of instruction include US Army Medical Policy and Organization, Military Readiness, Medical Observer Training, International Law, Nongovernmental Organizations, Counterterrorism, Intercultural Relations, Nongovernmental Organizations, Strategic Lessons Learned, Media Relations, Force Health Protection, Research and Development, Interagency Planning, and Government Policy. Understanding of and concern for human rights is an integral part of the course. A primary goal is for senior U.S. and International military officers to form close professional and personnel bonds that allow a long-term relationship to develop. Through these relationships U.S. and international officers maintain contacts and work together to support seamless global medical operations. This is extremely important due to the steadily increasing incidence of coalition operations. This goal is accomplished using a management technique known as a "retreat". Students spend as much time as possible together discussing pertinent issues and sharing experiences. During the final week, when relationships solidify, students stay in the same lodging, eat all meals together, and participate in evening functions, both structured and unstructured. This program is divided into three segments. Segment One is for International students only and consists of five days of U.S. Army medical policy and organization, military readiness, and medical observation training. Segment Two is five days of in-residence instruction at the Army Medical Department Center and School, at Fort Sam Houston, Texas focusing on International Law, Counterterrorism, Intercultural Relations, Nongovernmental Organizations, and Strategic Lessons Learned. US Army students join the course at the beginning of Segment Two. Segment Three is convened in New York and Washington D.C. during which students spend five days participating in briefings and guided discussions on force health protection, research and development, media relations, interagency planning, and government policy.

### ***MEDICAL TRAINING - MASL : D309005***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (WCN/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***MEDICAL X-RAY SURVEY TECHNIQUES - MASL : B175243***

Emphasis is placed on the physical principles of x-ray production and imagery, JCAHO and quality assurance, biological effects of radiation, organ dose estimation, and federal x-ray system performance standards. Practical exercises on survey procedures are an integral part of the course.

### ***MET CIV-MILITARY RELATIONS - MASL : P309070***

The program is a five-day seminar on democratic defense decision-making in a wide variety of areas. The underlying theme of the course is the need for military officers and civilian officials to develop habits of cooperation within an interagency decision-

making process. The importance of developing effective civilian control of military forces is emphasized in each iteration of this course. The course relies heavily on interaction among participants during classroom exercises. Because of this, Security Assistance Officers are asked to draw participation from the widest possible spectrum of military and civilian officials, from mid-career to senior positions. Each seminar is tailored to the stated needs of the host nation, and every curriculum is unique. Host nation officials and US Embassy country team members will be asked to help shape upcoming programs and to request new material for follow-on programs. Variations on the central theme under this MASL number can include (but are not limited to) National Security Strategy Development, Legislative Aspects of Defense Decision-Making, Civilian Control of Intelligence, The Public Image and Legitimacy of Armed Forces, Defense Education and Personnel Systems, Military Support to Civilian Authorities, Defense Downsizing, and Structuring Ministries of Defense. Follow-on seminar work, or workshops, can be scheduled for delivery in Monterey, California. CCMR's goal is to build the capacity of host nations to develop and sustain their own capability to present similar material in seminars and conferences independent of US assistance. For that reason, CCMR prefers follow-on programs be scheduled for two years (though this is not a firm requirement). Follow-on seminar work, or workshops, can be scheduled for delivery in Monterey under MASL P309098 ("Continuing Education").

### ***MET CT- REGIONAL CIV-MIL - MASL : P273011***

The Center for Civil-Military Relations (CCMR) conducts one- or two-week seminars in Civil-Military Responses to Terrorism, hosted by security assistance officers in selected countries. The key objectives of the course of instruction are to: (1) support international understanding of the politico-military components of combating international terrorism; and (2) enhance the capabilities of coalition partners to develop effective short- and long-term programs to combat terrorism that are consistent with democratic principles. The Civil-Military Responses to Terrorism course provides a thorough understanding of terrorism in all its forms, with considerable emphasis on strategy formulation and international cooperation. The program utilizes case studies and simulation exercises to stimulate thoughtful discussion, providing participants with the insight needed by decision-makers and their advisors to design successful strategies to contain or defeat modern terrorism. Participation in regional programs is determined by Regional Combatant Commanders, working closely with hosting SAOs and CCMR. Regional programs are financed according to NETSAFA cost-sharing policies. Hosting countries are normally given more seats in these courses than their neighboring states, but diversified audiences are sought. Civilian participation is considered essential for accomplishing the goals of the course. Regional courses can be conducted in a variety of locations, from peacekeeping training centers to hotel conference rooms. The primary requirement is that there be a conference room large enough for an audience of 30-60 people. Two or three smaller rooms are often required for the working/simulation exercise groups (one group can meet in the main conference room). Regional courses will be scheduled as desired, but CCMR's aim is to conduct one regional (or multiple sub-regions) in each AOR once per year.

### ***MET CT-RESP TO TERRORISM - MASL : P309069***

The Center for Civil-Military Relations (CCMR) conducts a one-week Regional Defense Counterterrorism Fellowship (RDCTF) course entitled "Civil-Military Responses to Terrorism" in select countries. The course is conducted by a Mobile Education Team (MET) using RDCTF funding instead of IMET. The key objectives of the course are to: (1) support international understanding of the politico-military components of combating international terrorism; and (2) enhance the capabilities of coalition partners to develop effective short- and long-term programs to combat terrorism that are consistent with democratic principles. The Civil-Military Responses to Terrorism course provides a thorough understanding of terrorism and its remedies. The program utilizes case studies and simulation exercises to provide participants with the insight needed by decision-makers and their advisors to design successful strategies to contain or defeat modern terrorism. All courses are custom-built for specific audiences. Curricula are shaped through an iterative process, using key personnel from CCMR, the Security Assistance office, and the host nation. The course is designed for mid-senior grade military officers and civilian officials from a single country with responsibilities for combating terrorism. Participation is determined by Security Assistance offices, working with their host nation counterparts. The course will be constructed to resonate with the particular audience selected. The program can be conducted in a variety of locations, from peacekeeping training centers to hotel conference rooms. The primary requirement is that there be a conference room large enough for an audience of 30-60 people. Two or three smaller rooms are often required for the working/simulation exercise groups (one group can meet in the main conference room).

### ***MET MEDIA AND MILITARY - MASL : P309148***

A one week course entitled "The Media and the Military." The workshop is conducted by a Mobile Education Team (MET). The key objective of this course of instruction is to examine the methods civilian authorities, military officers, and the media in

emerging democracies can use to structure an effective relationship between a country's armed forces and the media during peacetime and war. The course examines the following subjects: (1) The role of policy-makers in shaping media-military relations (2) Developing a comprehensive media strategy by national security decision-makers and the armed forces (3) Establishing guidelines for media coverage of military operations, press conferences, briefings, and releases (4) Professional roles, missions, and responsibilities of the media (5) Shaping the public image of the armed forces CCMR's approach to teaching "The Media and the Military" focuses on the host country's unique requirements. The course examines the fundamentals of media-military relations as they are affected by national legislation, institutions, principles, and practices. Participants analyze the role of policy-makers, the military, the media, and the public sector in national security policy formulation and implementation. Changing technology, legal restrictions, and public expectations are examined as they affect these relationships. The use of the media by other countries, non-governmental organizations (NGOs), and enemy forces, the proper context for psychological operations (PSYOPS), and the staffing process for military public affairs are considered. Employing a simulation exercise approach and the study of operational lessons learned from a relevant assortment of cases, participants are equipped with the skills and knowledge needed to design effective linkages between the media and armed forces. The exercise enhances the capacity for national security decision-makers and the armed forces to develop plans for addressing the legislature, media, and the public, and strengthens interviewing skills by all parties to minimize the effects of distortion, manipulation, and disinformation. The course provides a neutral venue whereby the virtues of consensus-building and interagency cooperation are demonstrated, and applied, with the result that the experience of cooperation and collaboration continues well after the program. Participants This course is designed for international civilian officials, military officers in the ranks of major to general, and representatives from other institutions (including the media) concerned with developing effective relations between the media and the armed forces. Language The course will be taught in English. Where necessary, the course will be delivered with simultaneous interpretation into the target language.

### ***MET REGIONAL CIV-MIL RELS - MASL : P273001***

Same description as P309070, except that one country agrees to host a MET to which other countries are invited. The hosting country will use IMET funds already programmed for P307090, or it will be given additional funds with which to host the regional program. CCMR has conducted regional METs for Central America, Europe and Africa, and plans to offer that program each year, focusing on a consensus topic within the Defense Decision Making field. Other regional METs are welcome.

### ***MET REGIONAL DIILS - MASL : P309062***

This is a regional MET with the individual topic to be determined by discussion between DIILS and SAOs involved. As a way of furthering cooperation among nations, and of making the best use of available funds, a Regional MET is planned and hosted by one nation, with invited participation from other nations. The topic is a subject of concern to the nations involved in the seminar. The host nation is responsible for finding a suitable conference site and making arrangements for translators, refreshments, and necessary equipment. Additionally, the SAO may be asked to assist in obtaining suitable lodging for participants from other nations. Sending nations use MASL 273010 to program and send their individual students to the seminar. Sending nations are responsible for TLA for their students, and pay a pro rata share of the cost of the conference, along with the host nation.

### ***MET REGIONAL MIL-JUSTICE - MASL : P273010***

SAOs may work cooperatively with neighboring or similar country programs to send individual participants to METs in another country. Regional participation in METs allows for several countries to take advantage of a MET on a topic of interest, expose participants to the DIILS program, and take part with their peers from other countries in a MET of mutual interest.

### ***MGMT INFORMATION SYSTEMS - MASL : PDET002***

Train international officers and enlisted personnel Basic Computer Operations, Basics of Various Computer Software Programs, and Applications.

### ***MIL OPS OTHER THAN WAR - MASL : P173800***

Provide students with a basic knowledge of concepts, terms, organizations, and planning considerations of Military Operations Other Than War (MOOTW).

Present students with the U.S. perspective relative to MOOTW in general and peace operations and humanitarian assistance operations in particular.

Prepare students to assume duties on a staff that may be involved in conducting, planning, or supporting peace operations and/or humanitarian assistance operations.

SCOPE: The course includes classes that cover an array of aspects of MOOTW and include legal considerations; training considerations; interagency organization; NATO, UN, and multinational organizations; intelligence considerations; health services support; civil engineering support; logistical considerations; civil affairs, and U.S. policy on peace operations. Students will conduct a case study and assess lessons learned from previous peace operations and humanitarian assistance operations. The course is taught at the operational level and presents the U.S. perspective relative to MOOTW in general, and peace operations and humanitarian assistance operations in particular.

### ***MIL PK(INACTIVE-SEE PDI) - MASL : P176019***

MIL & PCKEEP OPS IAW ROL

PKRL is a professional development course that promotes the practical application of the rule of law to military and peacekeeping operations.

What are the benefits of PKRL?

- Prepares national contingent commanders and staff officers to effectively apply international legal standards to current peacekeeping and coalition operations to include disaster relief operations.
- The capability of participants to function effectively in a multinational coalition environment is enhanced through understanding and interactive application of UN and other coalition legal procedures.
- Participants learn how to develop national plans and training to prepare for future participation in peace operations.

Who should participate in PKRL?

- The course is designed for military officers and senior civilian officials assigned as peacekeeping contingent commanders or staff advisors as well as attorneys assigned to assist in peacekeeping activities.

What do PKRL participants learn?

- The course curriculum focuses on coalition and peacekeeping operations, and stresses the need to conduct all military operations within the rule of law. PKRL promotes practical application of legal principles through expert guest speakers, working visits to the United Nations and Washington D.C., and discussion exercises. A special three day "mini" course on negotiating and mediation skills is offered by visiting instructors from the U.S. Institute of Peace (USIP). The course also features an Informational Program that supports the curriculum with local sponsors for each student and appropriate visits in Boston, New York and Washington D.C.

PKRL is approved for Expanded IMET. CTFP or FMS funding may be used if authorized. ECL: 80.

### ***MILITAR SEARCH OPERATIONS - MASL : B126001***

Introduction: Search operations allow Commanders to take the initiative by depriving the enemy of resources and disrupting his freedom of movement. The intelligence and evidence located during a successful search will often provide the greatest opportunities to attribute a find to a specific individual or group which may lead to a conviction in a court.

Purpose: The purpose of this course is to train selected personnel on the management and application of advanced, systematic search procedures for the search of personnel, vehicles, external areas, routes, occupied/unoccupied buildings, utilities and venues.

Concept: The course is a 3-week event. Week 1 provides a common core syllabus of theory and practical exercises for both Unit Search Advisors (USA) and Unit Searchers. During Week 2, USAs and Searchers undertake separate modules to enhance their skills applicable to their roles. USAs will concentrate on the planning criteria for search operations while Searchers will undertake a number of basic searches designed to enhance their understanding of the procedures and practicalities associated with each search task. Week 3 is the culmination of training where the USAs and Searchers will be tested on their ability to plan and execute advanced Search Operations in a scenario driven practical exercise.

### ***MILITARY FREE FALL JUMPMASER - MASL : B126625***

Military free-fall jumpmaster duties and responsibilities; nomenclatures; altimeters; automatic ripcord release devices; wind drifts calculations; emergency procedures; oxygen equipment and procedures; jump commands and aircraft procedures; techniques of

spotting; high altitude high opening (HAHO) techniques; MC-4 RAPS rigging and packing; rigging and supervision of rigging/inspection of individual equipment, weapons and main parachutes; military free-fall operations planning; and military free-fall jumper/jumpmaster refresher training.

### ***MILITARY FREE FALL PARACHUTIST - MASL : B126620***

Military free-fall parachute ground training; physiological training, body stabilization (vertical wind tunnel), basic aircraft procedures, combat equipment (rucksack and weapon), advanced aircraft procedures to include individual exits with combat equipment, mass exits, grouping exercises, night airborne operations, and life-support equipment; and procedures with high-altitude airborne operations. Upon completion of the course, the student will be able to perform both night and day combat equipment high-altitude military free-fall operations with and without oxygen.

### ***MILITARY INTEL OFF TACT - MASL : B172610***

This MASL is program for special counter terrorism training for Jordan at Fort Huachuca. This MASL is program for special counter terrorism training for Jordan at Fort Huachuca.

### ***MILITARY INTELLIGENCE BASIC OFFICER LEADER - MASL : B172597***

Officer basic skills and knowledge and tactical all-source intelligence officer and MI platoon leader skills and knowledge. Subjects include enemy threat, unit training management, electronic warfare, human intelligence, signal intelligence, imagery intelligence, operations security support, counter-intelligence, and tactical all-source intelligence production.

### ***MILITARY INTELLIGENCE CAPTAINS CAREER - MASL : B172599***

Phase 1 trains MI officers at Fort Huachuca in MI common core, intelligence support to brigade/battalion operations (ISBO) and intelligence support to division, corps and Joint operations (ISDCJ) with emphasis to preparation for company command and branch staff duties at all echelons (focus to corps and below). Phase 2 is conducted at Fort Leavenworth as CAS3.

### ***MILITARY LAW DEV PROGRAM - MASL : P176026***

#### **MILITARY LAW DEVELOPMENT PROGRAM (MLDP)**

This ten week program offered each year beginning in October promotes the rule of law by assisting military legal advisors in the development and improvement of their own national military legal systems through a comparative study of international and U.S. military law.

What are the benefits of MLDP?

- Self-Assessment of participating students military law systems based on the "best practices" of the U.S. and other national systems of military law.
- Participants capability to provide legal advice consistent with international guidelines is improved.
- Participants improved working relations with legal counterparts through enhanced understanding and appreciation of U.S. military law systems and English legal terminology as well as that of participating countries law systems.

Who should participate in MLDP?

- Qualified participants will be licensed attorneys or those with a college or university degree in law. Participants requiring advanced studies in international and operational law should be programmed for MLDP-ILOMO (MASL P176029).

What do MLDP participants learn?

- Participants study all aspects of military law including international law, military justice and administrative law. Participants attend classes at the Naval Justice School and participate in the DIILS Course on Conducting Military and Peacekeeping Operations in accordance with the Rule of Law (PKRL) and the Legal Aspects of Combating Terrorism (LCT) course. Participants make presentations on their national legal systems and consult with DIILS staff on specific legal issues. MLDP students participate in a community sponsor program and IP activities in Boston, New York, and Washington, D.C.

MLDP is approved for Expanded IMET. CTFP or FMS funding may be used if authorized. ECL: 85.

### ***MILITARY POLICE CPT CAREER - MASL : B171740***

The training will be battle focused and will stress technical, tactical, and leadership skills; military ethics; and customs and traditions of the service -- those values and principles which will enhance the officer's professional development. The MPCCC includes the training of the four essential military police competencies of skill proficiency, human dimension and attitude, camaraderie and team building, and leadership. MPCCC students are trained to develop the doctrinal framework of understanding to allow them to apply critical thinking in the decision-making process. The over-arching theme of MPCCC is leadership. The training will be battle focused and will stress technical, tactical, and leadership skills; military ethics; and customs and traditions of the service -- those values and principles which will enhance the officer's professional development.

### ***MILITARY POLICE INVESTIGATOR - MASL : B173582***

Criminal law, crime scene processing, testimonial evidence, investigation of crimes against persons and property, physical evidence, drug investigations, investigative reports, special investigative techniques, and protective services.

### ***MILITARY TNG INSTRUCTOR - MASL : D166037***

Provides professional training expertise on matters unique to the US Air Force basic training environment for selected male and female personnel to perform as military training instructors. Graduates are awarded special duty identifier (SDI) 8B000, are assigned to Air Education and Training Command (TC), and perform duties only at Lackland AFB TX with the 737 Military Training Group. The course provides pre-service training required to give students the knowledge and skills relevant to perform duty in the basic training MTI field. The course is the only formal course of instruction by which personnel from active, reserve, and guard components of the Air Force may become MTIs. Training includes fundamentals of teaching and job-oriented practice teaching of military training activities. Subjects include instruction, flight administration, and flight management.

### ***MILITARY WORKING DOGS - MASL : D302042***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (WCN/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location either in CONUS or OCONUS.

### ***MILSTAMP - MASL : B153761***

General overview of Defense Transportation Regulation (DTR) Part II/MILSTAMP application and its interface with other military standard transportation systems. Subjects include Activity Address Directories, Transportation Account Codes, shipment planning, Transportation Control and Movement Document (TCMD) preparation, clearance procedures, address marking, ocean cargo and air terminal documentation, shipment tracing, and in-transit data reporting.

### ***MINE COUNTER MEAS OFF INTL - MASL : P123210***

Course is designed for the Junior Officer who requires a supervisor's technical and operational knowledge of streaming, recovery procedures and safety practices for surface mine countermeasures. Instruction includes fantail rigging, streaming and recovery of the various United States Navy Sweep configurations, as well as safety procedures and precautions applicable to each sweep configuration covered. Characteristics, functions and safety considerations for minesweeping winches, cranes, cutters, acoustic devices, and magnetic cables and their applications are covered in detail.

### ***MINE WARFARE INTRO CBT - MASL : P171022***

MINE WARFARE INTRODUCTION COURSE - COMPUTER BASED TRAINING

Computer Based Training (9 hours) curriculum extracted from Mine Warfare Orientation for ROKN Expeditionary Warfare students.

### ***MINE WARFARE ORIEN INTL - MASL : P171221***

NOPRIOR MINE WARFARE EXPERIENCE REQUIRED.

Trains Officers of the rank O1 through O5 in the concepts of U.S. Naval procedures for offensive and defensive mine warfare.

This course of instruction is intended to indoctrinate international officers in the concepts of U.S. Naval procedures for offensive and defensive mine warfare and, through a program of orientation visits to civic, governmental, and military establishments, to acquaint the officers with the economic, industrial, cultural, and military structure of the United States, in accordance with the provisions of the Department of Defense Informational Program as implemented by OPNAVINST 4950.1.

***MISC BUMED TRNG - MASL : P175PBM***

To provide advanced studies in various specialties for Medical officers.

***MISC DRMI TRNG - MASL : P162PDR***

MISC DRMI TRNG

DRMI will work with SAOs to design an educational program that is tailored to meet the needs of the individual(s) who will attend. Course costs will be determined based on the expected teaching load.

***MISC MARCORPS TRNG - MASL : P129PMC***

MISC MARCORPS TRNG

***MISC NAVAIRSYSCOM TRNG - MASL : P129PNA***

To train aviation technicians to independently troubleshoot, disassemble, inspect, repair, reassemble and test airborne equipment and related support equipment.

***MISC NAVSEASYSYSCOM TRNG - MASL : P129PSE***

MISCELLANEOUS UNCLASSIFIED NAVSEA TRAINING

***MISL FLT ANL SM-2 SEMINAR - MASL : P199022***

MISL FLT ANL SM-2 SEMINAR

***MK41 VLS FMS OPER/MAINT - MASL : P145546***

This is an FMS only version of the military Operation and Maintenance Course taught at Fleet Training Center (FTC) San Diego, CA and is tailored to meet the specific FMS requirements for each country and ship class. NAVSURWARCEN PHD serves as the primary overflow site for Mk 41 VLS FMS Operation and Maintenance training when training cannot be provided by FTC San Diego, CA. This course will provide students with a basic understanding of operation of the Mk 41 VLS in all modes and configurations, observing all safety precautions. Students will learn how to perform scheduled and unscheduled maintenance as well as fault isolation and repair to the Lowest Replaceable Unit (LRU) using the required technical manuals and procedures. Operation/maintenance is introduced by equipment/component perspective. Topics include: Introduction to the Mk 41 Vertical Launching System (VLS), Launcher Equipment Operations, Maintenance, and Fault Isolation, Strike-down System Operations, Maintenance, and Fault Isolation when applicable, Launch Control Unit Operation, Maintenance, and Fault Isolation, AN/UYK-44 computer Expansion Adapter Group, AN/USH-26 Recorder/Reproducer Set OL-267 Data Terminal Group Matrix Printer, Launch Functions and System Fault Isolation. Targeted Audience: Military or civilian personnel requiring a basic understanding of the maintenance, operation, fault isolation and field repair of the Mk 41 Vertical Launching System as installed on FMS ship classes.

***MK41 VLS SYS TBSH-FIT (CN) - MASL : P195168***

MK41 VLS SYSTEM TROUBLESHOOTING AND FAULT ISOLATION TRAINING (CANADA) This course provides a systems level approach to prepare MK 41 VLS personnel to fault isolate and repair the MK 41 VLS to the highest levels supported by organizational level documentation. All procedures are closely monitored to insure correct skill development. Lecture topics include: Mk 41 VLS Operational Description, Mk 41 VLS Power Distribution, Functional Description, Mk 41 VLS Deluge System, MK 41 VLS Anti-Icing System, Mk 41 VLS Launch Control System, Functional Description, Data Reduction, and BITE Description, and Strikedown Operations. Laboratory topics include: MRC M-8 (Status Panel BITE) MRC Q-1 (Motor Control Panel and LSEQ BITE) Status Panel Fault Isolation, Anti-Icing Fault Isolation, Motor Control Panel Fault Isolation, LSEQ Fault Isolation, Module Power Supply Fault Isolation, Power Distribution Fault Isolation, and Launch Control System Fault Isolation. Students will receive the skill and knowledge to perform, without direct supervision, the authorized maintenance level, documented fault isolation and repair procedures; repairs and isolation of faults that cannot be located using

procedures contained in prescribed documentation or that require advanced analysis to complete the procedure; and the authorized maintenance level, isolation of launch related faults that require advanced analysis on the MK 41 VLS MOD T. TARGET AUDIENCE: Personnel from VLS related activities who will have direct involvement with the VLS community as well as engineers and technicians who intend to work directly with the VLS.

### ***MK45 UNIVERSAL/FUZE TEST COUPLER FAMILIARIZATION - MASL : P195156***

This course will provide the student with Familiarization of the MK 45 UTC/FTC.

This course includes, but is not limited to MK 45 UTC/FTC Familiarization and Documentation.

### ***MK92 MOD 2 DIFF FMS - MASL : P134179***

MK92 MOD 2 FIRE CONTROL SYSTEM FOREIGN MILITARY SALES DIFFERENCES

The MK92 Mod 2 Fire Control System Foreign Military Sales Differences Course is designed to provide Foreign Military Personnel the training necessary to understand the differences in maintenance and operation between US Navy and Foreign Navy Mk92 Fire Control System platforms. Scope: Perform basic operation, preventative/corrective maintenance on the Mk92 Fire Control System Separate Track and Illuminating Radar (STIR) and the Continuous Wave Illuminator (CWI) subsystems utilized by Foreign Navy's. Pre-requisite course: A-113-0080, FCS MK92 MAINT

### ***MK92 MOD2 (De-act-SeeTCC) - MASL : P134145***

Provides knowledge and skill necessary to enable the technician to operate and maintain the MK-92 MOD-2 Gun FCS. Subsystems include Publication and Documentation, Power Distribution, Combined Antenna System (CAS) Pulse Transmitter, CAS Air Track Radar, CAS Search Processor and Track-While-Scan, Cross Field Amplifier System, Microwave Distribution, Servo Control Cabinet, Command and Control, FCS Weapons Control Consoles operation, Casualty Monitoring Equipment, and the operation and loading of the AN/UYK-7 Digital Computer.

### ***MK92 MOD6 (De-act-SeeTCC) - MASL : P134172***

MK-92 MOD-6 FCS DIFFERENCE

Provides the knowledge and skills required to maintain, and perform operation procedures incidental to maintenance, for the MK-92 MOD-6 FCS. Training includes practical application in identification and function of system components, casualty analysis, troubleshooting and the performance of tests and adjustments for the MK-92 MOD-6 FCS.

### ***MOBILIZATION/DEPLOYMENT PLANNING - MASL : B171769***

Addresses the mobilization and deployment process at various levels of command within the Army. Focus of the course is on the legal authorities, concepts, plans, policies, procedures, and responsibilities for mobilization and deployment at DOD, HQDA, MACOM, CONUSA/STARC/MUSARC, and installation levels. Mobilization and deployment planning interfaces at various Army command levels, and the dependency of mobilization and deployment on automated systems are emphasized.

### ***MOS MAINT/TW - MASL : P145130***

To provide the student with the knowledge and skills necessary to operate and maintain the MOS equipment. The course provides theory of operation, maintenance and troubleshooting procedures for MOS.

### ***MOTOR ELECTRIC REWIND - MASL : P131042***

To provide necessary training on the specific equipment or skill described.

SCOPE: The Electric Motor Rewind Course Outline of Instruction provides personnel with the knowledge and skills necessary to rewind alternating current (A/C) electric motors, operate electric motor test equipment, calculate motor rewind data, disassemble, reassemble and test operate the final product. Students will rewind one single phase A/C motor using the concentric gang wound method and four three-phase A/C motors using the gang, continuity, concentric and lap winding methods incorporating the throw up and throw down technique. The extensive background of motor winding connections will include single voltage (3 lead), dual-voltage (9 lead), and consequent and salient pole connections. The student will be able to rewind motors afloat and ashore under normal conditions with limited supervision.

PREREQUISITES: E-4 or below and a graduate of EM (A) School or EM E-5 and above, and have a rewind facility at present command. (If attending under PCS orders, next duty station must have a rewind facility.) All other Department of Defense personnel must have basic electrical theory equivalent to Electrician s Mate Class "A" School.

***MP BASIC OFFICER LEADER - MASL : B121270***

PROPOSED IMPLEMENTATION FY06

***MQ-9 REAPER PILOT TRANSITION (UK) - MASL : D116198***

The Joint Firepower Course (JFC) located at Nellis AFB, NV, is highly desirable, but not a prerequisite. For the TX course the Pilot must be previously qualified MQ-9 or MQ-1 pilot within the past five years.

Course description as it would be on ETCA:

Trains personnel to mission ready (MR) status in the pilot and sensor operator crew positions on the MQ-9 Reaper system in the following missions:

- Air Interdiction
- Close Air Support (CAS)
- Intelligence, Surveillance and Reconnaissance (ISR)
- Strike Coordination and Reconnaissance (SCAR)
- Time-Sensitive Targeting (TST)

***MQ-9 REAPER SENSOR OPERATOR TRANSITION CRS (UK) - MASL : D116199***

Prerequisites (if any) : The Joint Firepower Course (JFC) located at Nellis AFB, NV, is highly desirable, but not a prerequisite. For the TX course the Sensor Operator must be previously qualified MQ-9 or MQ-1 sensor operator within the past five years.

Course description as it would be on ETCA:

Trains personnel to mission ready (MR) status in the pilot and sensor operator crew positions on the MQ-9 Reaper system in the following missions:

- Air Interdiction
- Close Air Support (CAS)
- Intelligence, Surveillance and Reconnaissance (ISR)
- Strike Coordination and Reconnaissance (SCAR)
- Time-Sensitive Targeting (TST)

***MSL MAINT & AUTO TEST BNCO - MASL : B132470***

This course contains Computer Literacy, Electronic Enhancement Training (EET), Advance Training Simulation (ATS) Trainer, shop operations and supply management, electronic technical manual (ETM), and field training exercise (FTX), required for the training and supervision of an electronic maintenance shop facilities. This course contains Computer Literacy, Electronic Enhancement Training (EET), Advance Training Simulation (ATS) Trainer, shop operations and supply management, electronic technical manual (ETM), and field training exercise (FTX), required for the training and supervision of an electronic maintenance shop facilities.

***MS-PLATOON LEADER OFFICER BASIC (OBLC) - MASL : B175205***

This course meets the requirements of Initial Entry Training mandated by Title 10, U.S. Code, the completion of which is required before an officer can be deployed outside the Continental United States (OCONUS). The course is divided into three modules: Preparatory, Common Core, and Track.

1. Preparatory- (1 week in duration): This module must be attended by those officers who have: a. NOT had prior ARMY service or pre-commissioning training (e.g., U.S. Military Academy, Reserve Officer Training Corps, Officer Candidate School) within the past 4 years OR; b. Served less than 12 months in their Army National Guard or U.S. Army Reserve Unit. (NOTE: Assignment officers should also consider sending officers with special circumstances who would also benefit from attending this Preparatory Module.)

2. Common Core- (8 weeks in duration): a. after students complete the Preparatory Module, they attend the Common Core Module along with those OBC students who have had prior Army experience; b. the Common Core consists of 3 weeks of general military subjects, a 1-week field training exercise (FTX), and 4 weeks of Leader Competencies Training.

3. Track: a. the Track Module begins immediately following the Common Corps Module. b. there are 16 Tracks that run concurrently with students attending the Track that pertains to their specific area of concentration (AOC). (For track lengths, see below.) There is NO track training during mobilization. c. Track lengths are as follows: Length ZA Army Nurse Corps (AN) 2wks; ZB Army Dental Corps (DC); 2wks ZC Medical Corps (MC) 1 wk; ZD Medical Svc Corps (MS)/(70B/67J) Platoon Leader 2wks; ZE Medical Svc Corps (MS)/(71A,B,E) Laboratory 2wks; ZF Medical Svc Corps (MS)/(72C67) Audiology 2wks; ZG Medical Svc Corps (MS)/(72D/72E) Envir Sci/Engineer 2wks; ZH Medical Svc Corps (MS)/(72A67) NBC 2wks; ZI Medical Svc Corps (MS)/(73A/B) Behavioral Science 2wks; ZJ Medical Svc Corps (MS)/(67E) Pharmacy 2wks; ZK Medical Svc Corps (MS)/(67F) Optometry 2wks; ZL Army Med Spec Corps (SP)/(65A) Occupational Therapy 1wk; ZM Army Med Spec Corps (SP)/(65B) Physical Therapy 1wk; ZN Army Med Spec Corps (SP)/(65C) Dietitian 1wk; ZO Army Med Spec Corps (SP)/(65D) Physician Assistant 2wks ; ZP Veterinary Corps (VC) 5wks.

### ***MTT - AIM-7 - MASL : P308006***

MTT includes AIM-7 Missile Handling Maintenance and AUR/GCS Testing. (Consists of training from resident courses P196007 and P196008).

### ***MTT - AIM-9M SIDEWINDER - MASL : P308005***

Provides AIM-9M Sidewinder Missile training including the following elements:

- Theory of Operation
- Missile Safety
- Missile Maintenance Manual Familiarization
- Missile and Component Inspection
- Missile and Component Maintenance
- Missile Assembly/Disassembly

### ***MTT - MOBILE TRAINING TEAM - MASL : B319001***

This MASL is used when a Mobile Training Team is required. This MASL is used when a Mobile Training Team is required.

### ***MTT ADV O/BOARD MTR MTCG19 - MASL : P314103***

This course teaches advanced outboard preventative maintenance and advanced troubleshooting techniques and complete disassembly and re-assembly of power heads. Students will receive classroom instruction as well as practical experience in major engine overhaul procedures. This course is designed for Outboard Motor Corporation (OMC) outboard motors. However, it can be modified to include other engine manufacturers.

### ***MTT BOILER INSPECTOR - MASL : P309178***

Contractor Mobile Training Team (MTT) to provide operator and maintenance training for the Knox Class Ships.

### ***MTT CG LDRSHIP MGMT COURSE - MASL : P305025***

This course develops greater leadership skills for officers and petty officers. It gives them management tools to more effectively achieve their unit's missions. Emphasis is placed on understanding one's own strengths and weaknesses before attempting to change the unit or others. The curriculum utilizes class discussion, group interaction, role plays, case studies, and experiential learning to cover topics including:

- Self Awareness
- Motivation
- Theories of Leadership
- Teamwork
- Conflict management
- Process Management
- Performance Appraisal

- Ethics
- Communications
- Performance Problem Solving
- Change Leadership

### ***MTT COASTAL SAR OPS 23 - MASL : P309163***

This course provides qualified coxswains and patrol boat crews with hands on experience in conducting coastal search and rescue operations. Topics covered include: awareness and initial actions; coxswain duties and decision making; boat crew duties and responsibilities; search area description; selecting, plotting, and navigating search patterns; vessel approaches; stern and alongside towing; communications; risk management and public relations. The course includes two days of classroom instruction on search and rescue planning and three days of underway-operational training, with a final search and rescue exercise.

### ***MTT CONTAINER INSPECTION - MASL : P309165***

This course is designed for enforcement personnel who will be conducting inspections of inter-modal shipping containers. The curriculum consists of various modules so that the MET/MTT can be tailored for the appropriate target audience. The following subjects can be included: primary dangerous goods shipping regulations, radioactive shipments, explosive shipments, shipboard stowage and segregation of dangerous goods, multi- agency strike force operation planning and execution, government/industry partnership training, safety awareness training, and dangerous goods material communications for response personnel. The target audience can range from government or industry personnel with no to little, basic or extensive knowledge of shipment of dangerous goods, including personnel from various agencies that have an overlapping responsibility for inspections of intermodal shipping containers for dangerous goods, drugs and other contraband.

### ***MTT CONTR MISC - MASL : P309508***

MOBILE TRAINING TEAM (CONTRACTOR TAUGHT) MISCELLANEOUS

### ***MTT CT - LEGAL ASPECTS - MASL : P309063***

Combating terrorism is a complicated matter involving the cooperative efforts of agencies within a country and the entire international community. This seminar discusses the many legal questions that arise out of this developing problem including International Law and Terrorism, International Agencies and Terrorism. Coalitions and Alliances Designed to Combat Terrorism, Use of Force, Rules of Engagement, Status of Forces Agreements, Investigation and Prosecution of Terrorists, and Interagency Cooperation.

### ***MTT CURR INFUS PROG EIMET - MASL : P319135***

This course is designed for those nations setting up their own Boarding Officer School at an established training center or academy. Two instructors conduct an intensive curriculum review and assist the trainers in the establishment of a syllabus, honing instructional skills, setting and scheduling the course. Instructors will provide the latest information on MLE, training aids, and instructional expertise working with the dedicated trainers to improve the established program.

### ***MTT DRMEC - OVERSEAS - MASL : P319016***

Mobile education teams from the Defense Resources Management Institute (DRMI), Monterey, California teach the Mobile International Defense Management Course (MIDMC). The course focus is resources management and analytical decision making and can be tailored to address the specific needs of the host nation. Sufficient lead time is essential for the proper planning and preparation of these mobile courses. Logistics considerations that must be addressed prior to programming include expected numbers and characteristics of participants, language requirements, translation needs, on-site facilities, equipment, lodging and transportation. (Participants from countries, other than the host, should use MASL# P262000.)

SPECIAL NOTE: Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***MTT ENG/LOG ADMIN TRNG O/S - MASL : P314100***

This course assists countries in developing an engineering and logistics support system necessary for vessels and support facilities conducting Coast Guard type missions. Basic training is provided in safety, preventative maintenance systems (3M type), engineering logs, records, budgeting and finance.

### ***MTT HULL MT&DMG CONT CG14 - MASL : P314102***

This course teaches basic preventative maintenance and repair for fiberglass, aluminum and steel-hulled vessels. Course will be tailored to host nation's vessel types.

### ***MTT M/MARITIME SCA PHI E/I - MASL : P319132***

The preliminary phase of the Model Maritime Service Code (MMSC) program consists of a visit to the participating country, for about five days, by a team composed (typically) of an experienced Coast Guard attorney and one or two mission area specialists. The MMSC team will make an assessment of the issues and challenges facing the nation as it employs, or undertakes to employ, forces to manage its maritime affairs. The goal is for the MMSC team to learn about existing domestic laws, institutions, legislative and regulatory processes, and major maritime activities within the nation so that subsequent assistance provided under the MMSC program is tailored to the nation's needs. To perform the assessment, MMSC team members will meet with a variety of government officials and with representatives of relevant, non-governmental organizations. Team members also will brief interested persons on the availability and potential uses of the USCG Model Maritime Service Code.

### ***MTT MAINTENANCE - NAVSEA - MASL : P314004***

To provide a NAVSEA Mobile Training Team to go in-country for the purpose of training foreign personnel to maintain identified equipment/systems.

### ***MTT MAINTENANCE NAVSCIATTS - MASL : P309173***

MOBILE TRAINING TEAM SMALL CRAFT OPERATIONS NAVSCIATTS

Provide basic tailored training necessary to maintain and extend the service lifecycle of small craft diesel and outboard engines.

SCOPE: Provide knowledge of basic diesel characteristics and specifications, operating principles, lubrication systems, cooling systems, air and fuel systems. Instruction of outboard motor design and construction, internal combustion theory, preventive and corrective maintenance, overhaul, troubleshooting and operation. Learn how to use manufacturer's manuals for practical application and as a training aid reference.

### ***MTT MAR ENVIRON SECUR SEM - MASL : P319043***

The first phase of this offering is in seminar format and is designed for mid-managers and senior managers. Phase One is an overview of the U.S. Coast Guard's Marine Safety and Environmental Protection Program. An assessment of the host nation's program is also conducted. The assessment is used to determine the host nation's specific training needs, as well as the best audience or agency to receive the training. A specific training program is then designed and delivered at a later date, or over a series of dates. During subsequent phases, a U.S. Coast Guard training team returns and delivers the customized program to the target audience. Topics include the following:

- Waterfront Facility Designations and Inspections
- Freight Vessel/Tank Vessel Navigation Safety and Pollution Prevention Examinations
- Maritime Pollution Laws (MARPOL Annexes I through V)
- Safety of Life at Sea (SOLAS) Conventions
- International Maritime Dangerous Goods Code (IMDG)
- International Hazard Classes
- Cargo Stowage and Segregation
- Freight Container Inspections
- Maritime Occupational Safety and Health
- Spill Containment/Recovery Devices and Techniques
- Shoreline Cleanup Techniques and Damage Assessment
- Contingency Planning
- Incident Command System (ICS)

### ***MTT MARINE CORPS - MASL : P302301***

MTT MARINE CORPS

### ***MTT MARITIME CRISIS MGMT - MASL : P319149***

Coast Guard Maritime Crisis Management Seminar (CG-27)

This course is designed to provide the skills necessary for decision-makers to manage, respond to and mitigate an emergency or crisis incident within a maritime port. Inter-agency cooperation and support are emphasized throughout the course. The course is divided into four modules and can be custom tailored to country's specific needs. Crisis Control: during Module I, students receive an overview on Weapons of Mass Destruction (WMD) as well as information on the latest known WMD smuggling trends. During Module II, students receive lecture regarding internationally recognized principles for protecting a maritime port complex, vulnerability assessment, risk management and risk-based decision making. Module III is an overview of the Incident Command System (ICS) and the principles of crisis management. The final module is a customized tabletop "maritime crisis" exercise.

### ***MTT MISSILE (NAVSEA) - MASL : P308003***

MTT MISSILE (NAVSEA)

### ***MTT MLE ADV BOARD OFF - MASL : P319143***

In addition to the material presented in the Boarding Officer (Counter-narcotics) MLE MET/MTT (P319100), this course includes extensive instruction and practical exercises in defensive tactics, arrest procedures, additional boarding exercises, additional hidden compartment and smuggling detection exercises, crime scene management, use of deadly force judgmental exercises, and hazardous situations awareness training. The course is designed to provide host nations boarding team members with classroom instruction and numerous practical exercises in order to confidently conduct normal to high risk boardings.

### ***MTT MLE BOARDING OFF EIMET - MASL : P319100***

This course consists of three days of classroom instruction with two days of practical training and exercises. The course is tailored to the country's specific needs and previous training experience. Classroom subjects include international law, boarding preparation and procedures, use of force, detection of hidden compartments, narcotics identification, and officer interpersonal communication. Practical training includes high-risk search techniques, arrest procedures, and drug identification lab. Practical exercises are designed to reinforce classroom instruction by giving each student an opportunity to apply classroom theory in simulated boarding situations.

### ***MTT MLE INTERD C/N EIMET - MASL : P319101***

This course is designed for officers and/or senior enlisted with the responsibility for planning and implementing multi-unit law enforcement interdiction operations, i.e. vessel commanding officers and operations center personnel. The course curriculum includes operations center organization, patrol planning, development of an interdiction plan, and stress and crisis management. The course is approximately 70% practical exercise including the development of an operations plan and the implementation of that plan during two intense tabletop exercises.

### ***MTT MLE JOINT BRD EN EIMET - MASL : P319130***

This course is identical to the Boarding Officer, Maritime Law Enforcement (P319100) but is taught jointly by two USCG instructors and two or more host nation instructors. This course is designed to increase the instructional proficiency of the host nation instructors and provide an increased number of trained boarding officers for the host nation at a reduced cost to the funding source.

### ***MTT MLE TRAINER EIMET - MASL : P319102***

This one week course is designed to instruct students on how to effectively train others in maritime law as boarding officers or boarding team members. Students in this course are taught techniques in student management, presentation skills, developing visual aids, developing boarding scenarios, and theories of feedback and adult learning. The course is fast-paced and is instructed in a workshop format. Each student will be required to present two blocks of instruction.

### ***MTT NAVPGSCOL - MASL : P319008***

This is a Defense requirements study.

### ***MTT OPERATIONS NAVSCIATTS - MASL : P309172***

NAVSCIATTS resident courses tailored to country specific needs and taught in-country.

### ***MTT OTHER - MASL : P309034***

MTT OTHER

### ***MTT OUTBOARD MTR MAINT O/S - MASL : P314101***

This course teaches basic preventative maintenance and advanced troubleshooting techniques for outboard boat motors. Students will receive classroom instruction as well as practical experience on the host country's outboard motors. This course is designed for Outboard Motor Corporation (OMC) outboard motors. However, it can be modified to include other engine manufacturers.

Materials: Host country must have outboard motors to work on, including required special tools and manuals for specific motors.

Prerequisite: Students must have a background in engineering.

Note: Requests for MET/MTTs must be specific and include as much background information as possible (See Page V-19). Specifically needed is manufacturer's information on host nation outboard motors.

### ***MTT PORT SEC/VUL ASM - MASL : P319131***

This course provides students with the tools to promote port security, deter theft, and improve counter-narcotics interdictions. Designed for mid-level managers, the course content is identical to Port Physical Security/Port Vulnerability Assessment (P319106). However, students receive additional instruction in waterways management tools and risk management. There is a third tabletop exercise which involves developing a physical security plan within a port area assessed during the physical security survey or port vulnerability assessment exercises.

### ***MTT PORT SECURITY, VUL ASM - MASL : P319106***

This course provides students with the tools to promote port security, deter theft, and improve counter-narcotics interdictions. Students are introduced to various port physical security measures and tactics, as well as security surveys and port vulnerability assessments. Classroom instruction is reinforced through two practical exercises. Students complete a physical security survey and a port vulnerability assessment of their port.

Topics include:

- Access Control
- Barrier Systems
- Intrusion Detection Systems
- Security Lighting Systems
- Locking Systems
- Security Surveys
- Port Vulnerability Assessments

### ***MTT PORT STATE CONTROL CG-31 - MASL : P319042***

This course is designed to provide host nations exposure on how to monitor commercial vessel traffic in compliance to international conventions and verify that vessel operation and manning is applicable to international laws.

Best practices will be shared on the implementation and maintenance of the service's within a Port State Control Program that include inspection techniques for the verification of vessel condition, monitoring techniques, and the application of both security & environmental procedures. Challenges in the adherence to international safety, security, and environmental standards are covered as well.

Class Size: Max: 24 Students; Min: 12 Students

Topics covered during the course:

- Port State Control History
- Vessel Targeting

- - SOLAS requirements for Major Vessel Systems (Hull/Structural Integrity, Machinery/Engineering Plant, Fire Protection, Lifesaving Equipment, Communications, Navigation, Safety Management, Maritime Security, Watch-keeping Certification, Marine Pollution)
- Boarding Procedures for Safety, Security, & Environmental Inspections.
- Boarding Team Safety
- IMO Detention & Appeals Process
- Cargo Classification & Safety
- Documentation & Reporting Guidelines

Materials: The partner nation will need to provide the following:

- A large, well lighted classroom with large tables
- Audio/Visual equipment to include white board (dry erase) and VCR (NTSC)
- Administrative support (printing class rosters and student certificates)

### ***MTT POST DEPL STNDDN--USMC - MASL : P309061***

Seminars are customized for each MET based on prior Assessments, Curriculum Planning, and communication between DIILS and the SAO. Topics will vary depending on the unique needs of the host country. Examples of recent specialized programs include Domestic Operations, Interoperability and Status of Forces Agreements, Advanced Law of the Sea, Peace Operations, Regulation Drafting, and Legal Aspects of Military - Media Relations. Audiences may be military, civilian, or a combination depending on topic and the specific country. DIILS strives to establish a continuing relationship with each participating country by developing follow-on programs that may repeat presentations of the initial seminar or are new programs that focus on any military-related legal subjects. DIILS Country Program Managers will develop future programs in coordination with the embassy team and the host country.

### ***MTT SEAPORT SEC ANTI-TERR - MASL : P319151***

#### **MILITARY TRAINING TEAM SEAPORT SECURITY/ANTI-TERRORISM**

This course is designed to provide the students an understanding of the basic principles of protecting a maritime port complex. A basic explanation of threats and weapons of mass destruction will provide the basis for the students to develop a port defense plan through the use of operational risk management and the development of a training and exercise plan. Case studies of preparations for the waterside security of the Atlanta and Greek Olympics will be studied. The students will be required to visit a local port and provide their recommendations, through the development of a port defense plan, then briefing the other students and instructors on their plan.

Topics covered during the course:

- Maritime Threat Overview (USS Cole, Yemen, Morocco and Tamil Tigers)
- Video/Case Study of Al Qaeda's Navy
- Weapons of Mass Destruction Overview
- Hidden Compartments and Parasites
- Harbor Control and Port Security Operations
- Facility Security
- Introduction to Vessel Duties (Tactics, High Value Asset Protection, Pier Sweeps)
- Port Defense
- ISPS (International Ship and Port Security Codes)
- Operational Risk Management
- Developing an Exercise Plan
- Case Studies of Olympic Waterside Preparations (Atlanta 96, Greece 04)
- Port Operations Plan written by the students after conducting port visit
- Port Visit with student plans

Materials: The partner nation will need to provide the following:

- A large, well lighted classroom with large tables

- Audio/Visual equipment to include white board (dry erase) and VCR (NTSC)
- Administrative support (printing class rosters and student certificates)
- Access to a port facility within 1 hour driving distance from the location of the classroom.

### ***MTT SMALL BOAT OPS O/S - MASL : P319105***

Familiarizes students with procedures to be followed for the safe and effective operation of small boats (less than 50-foot/15 meter length). Course contents will be tailored to meet requesting country's needs and desires. Possible course topics include coxswain skills, navigation, deck seamanship, marlinespike seamanship, navigation rules, towing, fire-fighting, riverine operations, and engineering casualty control.

Class Size: Maximum: 24 students and four boats; Minimum: 12 students and two boats

Materials: Host nation will need to provide the following:

No less than one boat for every six students

Classroom of sufficient size for the class

20 meters of three strands, manila line of no less than 25 mm in diameter

20 meters of double braid synthetic line of no less than 25 mm in diameter

Pier facility and training location of sufficient size so all boats can conduct drills at the same time

Training area of sufficient size to practice navigation

Notes: Students should be in coxswain or coxswain instructor billets.

### ***MTT TRNG ASSESSMENT - MASL : P309502***

MTT TRAINING ASSESSMENT-OTHER

### ***MTT WATERSIDE PORT SECUR - MASL : P319150***

Coast Guard - Waterside Port Security Course (CG-28)

This course is designed to provide the students (three 4-6 member small boat crews) an understanding of the basic principles of protecting a high-risk asset (vessel or land facility) from threats coming from the sea in a port complex. Course includes an overview of Weapons of Mass Destruction and smuggling trends. After the training, students will demonstrate proficiency in boat tactics designed to protect a high-risk asset by conducting live exercises. These exercises will test the student's ability and knowledge by requiring them to prevent an attack on their asset from an "enemy" small boat. Students will be required to demonstrate proficiency of single small boat tactics, dual small boat tactics, including nighttime operations.

### ***MTT-BN & BGD STAFF OPNS - MASL : B302027***

The students will learn to function as various members of battle staff at battalion and brigade level. The course focal point is the decision making process. Staffs conduct intelligence preparation of the battlefield (IPB); prepare personnel, logistics, and civil-military operations estimates; develop courses of action; write orders and annexes; and coordinate the execution of command decisions. The students will learn to function as various members of battle staff at battalion and brigade level. The course focal point is the decision making process. Staffs conduct intelligence preparation of the battlefield (IPB); prepare personnel, logistics, and civil-military operations estimates; develop courses of action; write orders and annexes; and coordinate the execution of command decisions.

### ***MTT-HUMAN RIGHTS INSTR - MASL : B309001***

In-depth discussions of relevant topics followed by practical exercises, topics to be explored include a human rights core block of instruction, to include ethics; the doctrine of just war; the historical development of human rights; case law; pertinent documents and principles; the relationship between human rights and the law of armed conflict, and a case study on the My Lai massacre; performance-oriented instruction; learning analysis; test construction, and presentation techniques; seminar on current issues on human rights and practical exercises within a crisis operation center environment (all exercises are critiqued and terminated with thorough after action reviews). In-depth discussions of relevant topics followed by practical exercises, topics to be explored include a human rights core block of instruction, to include ethics; the doctrine of just war; the historical development of human rights; case law; pertinent documents and principles; the relationship between human rights and the law of armed conflict, and a

case study on the Mi Lai massacre; performance-oriented instruction; learning analysis; test construction, and presentation techniques; seminar on current issues on human rights and practical exercises within a crisis operation center environment (all exercises are critiqued and terminated with thorough after action reviews).

### ***MULTI-CRITERIA DECISION MK - MASL : P162012***

#### **MULTI-CRITERIA DECISION MAKING: A PRACTICAL GUIDE**

This course develops a method of approach to support decision making by managers in defense organizations. The focus is on practical application to management decisions involving many organizational objectives. Emphasis is placed on (i) formulating the problem (ii) understanding the analytical process involved in evaluating potential solution alternatives; and (iii) interpreting the results of the analysis in support of choosing a solution. Practical examples from defense resource allocation problems will be provided. Each participant will be required to apply the approach to a decision problem of current interest to their own MoD. This exercise will serve as a foundation for further work on this problem once they return to their own organization.

### ***MULTINATIONAL PROGRAM MGT - MASL : B154017***

This course prepares students to be effective in an international defense acquisition program. The Multinational Program Management course emphasizes the U.S. policy of encouraging armaments cooperation and enhancing interoperability with our allies. Key national, DoD, and Service policies on international cooperative development, production, and support are explored.

Objectives: Students who successfully complete this course will be able to:

- Comprehend the requirements necessary to participate effectively in an acquisition program that involves participation by foreign governments and their industries;
- Understand key national, DoD, and Service policies on international cooperative development, production, and logistics;
- Recognize the various international defense programs related to acquisition (data exchanges, Nunn Amendment Programs, foreign comparative testing, coalition warfare programs, bilateral and multilateral projects and programs, and security assistance-Foreign Military Sales (FMS)); and
- Prepare, formulate, and support an FMS, Direct Commercial Sales (DCS), cooperative or hybrid international program.

### ***MULTIPLE LAUNCH ROCKET SYSTEMS REPAIRER - MASL : B194085***

Inspection, testing, and adjustment of components to specific tolerances; determination of serviceability, disposition, and malfunctions in electronic, electro-mechanical, and hydraulic systems. Removal and replacement of line-replaceable units; adjustment, alignment and calibration of mechanical components. Quality control measures; preparation of mechanical components. Quality control

measures, preparation of maintenance and supply forms and reports.

### ***MUNITIONS + WEAPONS - MASL : D142029***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***MUNITIONS INSPECTOR - MASL : D142068***

Designed for munitions personnel upon first assignment as a munitions inspector; includes product assurance, product quality deficiency reporting system, material deficiency reporting system, technical order improvement program, types of corrosion and corrosion control, storage and transportation, packaging requirements, research of munitions data, preparation of inspection forms, munitions inspector requirements, and serviceability requirements and CAS procedures as applicable. Also covers application of condition codes, identification of restricted or suspended munitions, munitions color coding, inspection of reusable containers and scrap materials, and perform and document munitions inspections.

### ***MUNITIONS MAINT. OFFICER - MASL : D142079***

This course provides training for Air Force Officers (new accessions), Air Force Reserve (AFRES) Officers, and International Officers assigned to the 21MX Air Force Specialty (AFS). The course provides these officers with the basic skills and knowledge needed to perform the fundamental duties of a Munitions or Missile Maintenance Officer. Subject matter includes, but is not limited to, Maintenance Management Processes/Programs, Personnel, Air Force Organizations, Air Force Publications, Maintenance and Munitions Support, Maintenance Principles and Logistics, Safety, Accountability, Wartime Planning and Contingency Operations. This is a pre-requisite course for all newly accessed 21MX officers. 21MX officers without prior maintenance experience must attend this fundamentals course in order to be awarded their AFSC. 21M munitions maintenance officers must attend follow-on course J3OBR21M1 0M1A, Conventional Munitions Officer course at Sheppard AFB, TX. 21M missile maintenance officers must attend follow-on course V3OBR21M1 088A, Missile Maintenance Officer course at Vandenberg AFB, CA.

### ***MUNITIONS/ARMAMENT SYS SPE - MASL : D142006***

This course provides training for international students in the knowledge and skills needed to perform the duties of munitions personnel. The scope of training includes munitions security, munitions safety, munitions storage areas, munitions storage procedures, munitions serviceability procedures, introduction to and preparation for use of USAF munitions, munitions procedures, equipment/vehicle operations, and munitions accountability

### ***NALC OMA QA ADMIN - MASL : P141230***

NALCOMIS (OPTIMIZED) OMA QUALITY ASSURANCE ADMINISTRATION COURSE

Purpose: To provide Organizational Maintenance Activity Quality Assurance Representatives with the knowledge and skills of the Naval Aviation Maintenance Program (NAMP) and NALCOMIS Legacy OMA and Optimized (OOMA) to effectively manage the Quality Assurance Division. Topics will include: Naval Aviation Maintenance Program (NAMP), Quality Assurance Responsibilities, Work Center Audits/Special Audits, and Naval Aviation Logistics Command Management Information System Optimized for OMA (OOMA)

Scope: To provide Organizational Maintenance Activity Quality Assurance Representatives with the knowledge and skills of the Naval Aviation Maintenance Program (NAMP) and NALCOMIS Legacy (OMA) and Optimized for OMA (OOMA) to effectively manage the Quality

Assurance Division. Topics will include: Naval Aviation Maintenance Program (NAMP), Quality Assurance Responsibilities, Work Center Audits/Special Audits, Naval Aviation Logistics Command Management Information System Legacy for OMA, Naval Aviation

Logistics Command Management Information System Optimized for OMA (OOMA).

### ***NAMP INDOC - MASL : P141970***

NAMP INDOC

To provide newly commissioned or designated aviation ground officers (Navy 152X and Marine Corps 6002) with little or no aviation maintenance management background who are prospective members of organizational or intermediate maintenance organizations with technical information and knowledge of the managerial responsibilities and the administrative duties required to perform at an entry level aircraft maintenance position.

SCOPE: Encompasses the entire spectrum of Naval and Marine Corps aviation maintenance management with particular emphasis on the organizational and intermediate maintenance activities to include their interface with the supply system as well as various other related activities including: Aviation maintenance management (aviation maintenance process, operational readiness organization and support maintenance control); Administration (personal correspondence, manpower management and maintenance training program); Material Management; Navy Supply System; Support Asset Maintenance Data System (NALCOMIS, OMA Operation); Forms and Reports; General Safety (flight deck NAVOSH); Hazardous Materials; Deployment/detachment operating; Aircraft weight and balance certification; and Mock maintenance laboratory.

Prerequisites Info: Aviation Officers (U.S. and International) and DOD-sponsored civilians with a prospective assignment to a billet in or modeled after the Naval Aviation Maintenance Program. Language Requirements: Fluent comprehension of English, oral and written.

### ***NAT SEC MGT CORRESP CRS - MASL : B17902C***

Closely parallels scope of resident course. Curriculum consists of eleven correspondence courses, two two-week resident phases, and an optional writing program. Like the resident course, it focuses on the study of the role of land-power, as part of a unified, joint or combined force, in support of the U.S. national military strategy. Prepares selected military officers and civilians for leadership responsibilities in a strategic security environment during wartime and peacetime. Curriculum focuses on national security and strategy issues, concepts and processes; military strategy, plans and operations; theater level warfare and campaign planning and command, leadership and management.

### ***NATO EWO/STF OFF (SATP) - MASL : D136028***

Training includes fundamentals of electronic warfare, basic air defense systems operations, electronic warfare operations, basic electronic warfare operations, and basic electronic warfare management. Students will be required to present a 30 minute briefing covering the current political, social, economic and military status of their country.

### ***NATO SEASPARROW 7-M MAINT - MASL : P199100***

To train Fire Controlmen (FCs) who have satisfactorily completed FC (A) school to operate and maintain the NATO Sea-sparrow Surface Missile System (NSSMS) MK-57 MOD-2/3 under all conditions of readiness with little or no supervision.

### ***NATO STAFF OFF ORIEN CRS-C - MASL : B171799***

The NATO Staff Officer Orientation Course is a policy-level post-graduate immersion program. The objective of the NATO Staff Officer Orientation course s two-week program is to enable the staff officer to be immediately effective in the NATO staff environment through understanding of NATO policy-level processes and selected high-level issues. The student becomes conversant with NATO terminology; NATO organization and functions; and the political, economic, and intercultural aspects of the alliance. The program was designed for U.S. field grade officers en route to NATO assignments, and has a limited opportunity for attendance by selected international students. International officers and civilians from NATO and partnership for peace nations whose work is NATO related are invited to request attendance from the International Student Management Office (ISMO) at National Defense University.

The course has a two-phased approach. The first phase provides intensive instruction in: the Washington Treaty; NATO Headquarters Organization; the NATO Integrated Military Command Structure; the Alliances Strategic Concept; the NATO Staff Environment. The second phase provides a unique opportunity for intense discussion with senior U.S., Allied, and Partnership for Peace guest speakers, including Military Attachés, representatives from the Joint Staff, the Department of State, Department of Defense, Capitol Hill, and with Senior Flag and General Officers and diplomats with current or recent NATO experience.

### ***NAV AV WATER SURV N9 - MASL : P117426***

To provide initial and refresher adjunctive training for aircrew men and passengers who would benefit from underwater egress training due to frequent overwater flights or pre-deployment work-ups.

Scope: Students shall be instructed on the use of life preservers and equipment, life rafts and contents, rescue devices and procedures for underwater escape from multi-place aircraft.

### ***NAV INTEL FORNOFF PAC-INTL - MASL : P172003***

#### **INTERNATIONAL MARITIME INTELLIGENCE COURSE (IMIC)**

Purpose: Provides enhanced maritime operational intelligence training to international junior officers who are designated special duty intelligence, collateral duty intelligence or general line officers with an interest in maritime intelligence assignments in order to promote coalition interoperability.

Scope: The curriculum stresses skills and knowledge required of intelligence officers in the following areas: academics of intelligence analysis and research; intelligence sources and methods, naval intelligence principles and operations; counter-drug; counter-terrorism; asymmetric warfare; maritime force protection; and operational intelligence fusion. Students will demonstrate learned skills and knowledge in multi-day practical exercises.

### ***NAVAL AVIA WATER SURV N6 - MASL : P117403***

Provides standardized instruction to all aircrew and flight surgeons flying in ejection seat equipped aircraft in procedures and techniques essential to overcome the hazards of a water survival situation. Students receive instruction in parachute descent training(9F5/9F7 device) aviation life support equipment, underwater breathing techniques (9H19 device), underwater egress. Open water parachute descent training, and helicopter rescue training.

### ***NAVAL COMMAND COLLEGE - MASL : P171001***

The Naval Command College assists specially selected international senior naval officers to prepare themselves for higher command responsibilities in their own Navies, and familiarizes them with U.S. Navy methods, practices, and doctrine. Naval Command College students participate in a demanding series of three interrelated trimester courses consisting of Strategy and Policy, National Security Decision Making, and Joint Military Operations. The international officer's academic studies are on an integrated basis with their U.S. counterparts attending the Naval War College. The conduct of courses is at the U.S. graduate level consisting of lectures, seminars, extensive readings and preparation/presentation of papers. An extensive travel program is conducted to expose the students to the economic, industrial, governmental, cultural and geographic diversity of the United States through visits to government, military, industrial and financial activities, and educational institutions. Nominees should have excellent academic skills.

Course meets once annually and begins in August and ends the following June. Student officers are asked to arrive at the end of July to attend an orientation program. The orientation is a two week introduction to the Naval War College programs; living in the Newport area, local base facilities, government agencies and the U.S. Defense Dept organization. The Informational Program provides visits to many cities including Washington DC, New York, San Francisco, Seattle and other cities where participants receive briefings from distinguished business, military and government leaders.

Attendance is by formal invitation only. The invitations are extended by letter from the Chief of Naval Operations of the U.S. Navy. Attendance is limited to one student from each country receiving an invitation. Foreign navies should be advised not to nominate students for the NCC if it is anticipated they will be promoted to Flag/General Officer level during the course of study. This course is open to a maximum of 50 Naval officers in the grades O-5 and O-6 (Commanders and Captains) per convening.

### ***NAVAL GUNFIRE LIAISON OFF - MASL : P124265***

#### **NAVAL GUNFIRE LIAISON OFFICER**

To train U.S. and Allied officers and staff noncommissioned officers for duty as Naval Gunfire Liaison Personnel with units of Marine Corps Divisions, Air Naval Gunfire Liaison Companies, and other designated units. This course consists of lectures, demonstrations, practical application, field exercises, spotting either naval gunfire at San Clemente Island or field artillery at Camp Pendleton, CA, or naval gunfire planning for a landing force in an amphibious operation. Instructional methodology is based on individual training concepts. All trainees must demonstrate proficiency in physical fitness, map reading, land navigation, naval gunfire spotting, naval gunfire planning, and communications capabilities both in written and practical application. Completion of this course indicates that the trainee has met the minimum qualifications to perform as a Naval Gunfire Liaison Officer or Naval Gunfire Planner.

### ***NAVAL SEC FORCE OFFR(NSFO) - MASL : P173802***

#### **NAVAL SECURITY FORCE OFFICER (ASHORE/AFLOAT NSFO)**

This course will provide the designated Installation Security Officer/Law Enforcement Officer and Ships Security Officer for afloat and ashore units with the necessary knowledge and skills to manage Naval Security Force (NSF) assets, determine AT/FP readiness status, implement, organize and oversee all NSF/AT/FP and Law Enforcement policy changes. Provide unit level initial and sustainment training for assigned NSF/AT/FP personnel and functions as the NSF Officer in Charge. The Security Officer is the AT/FP Tactics, Techniques, and Procedures (NTTP) and Law Enforcement Subject Matter Expert (SME). The Security Officer will be able to organize, train and equip the NSF to conduct AT/FP/Law Enforcement operations. The Security Officer assists the Antiterrorism Officer (ATO) in developing and executing the AT/FP plans. Scope: Topics addressed in this course include knowledge of the DoD and DoN Antiterrorism/Force Protection, Law Enforcement, and Physical Security programs, knowledge of requirements for armed sentries/response forces as well as tactics, techniques, and procedures for AT/FP, Law Enforcement and Harbor Defense/Security Boat operations; knowledge and skills involved in supervision of: weapons handling/firearms safety; watch turnover (including guard mount/clearing barrel procedures); the implementation of the unit

AT/FP plan; AT/FP Law Enforcement training programs; readiness and vulnerability assessments. Student teams will develop and brief AT/FP planning, document exercises, draft messages (including Spot Reps and Blue Darts). The course also includes knowledge of instructional delivery/briefing techniques, and practice teaching. Students shall be qualified as unit OIC for NSF.

### ***NAVAL STAFF COL - 10 MONTH - MASL : P171010***

Naval Staff College-10 (P171010).

The Naval Staff College 10-month course (NSC-10) is conducted once annually in the fiscal year fourth quarter, commencing in July, and is open to a maximum of 20 Naval, Coast Guard or Maritime Service officers, grades 0-3 and 0-4 (senior Lieutenants and Lieutenant Commanders). This program is separate resident college within the U.S. Naval War College; however, the academic programs of NSC-10 and its U.S. counterpart, the College of Naval Command & Staff, are almost identical insofar as disclosure restrictions allow.

Students pursue the prescribed studies over three trimesters in Strategy and Policy, National Security Decision Making, and Joint Military Operations. They follow the same basic schedule and are integrated into the seminars and lectures of their U.S. counterparts. On an optional basis they may participate in the Electives Program during two trimesters. Their studies differ from their US counterparts in the addition of a preliminary orientation study, a course in Operational Law conducted during one trimester, and a series of Curriculum Field Trips/Informational Program Visits designed to familiarize them with U.S. Navy organization, methods, and doctrines, as well as the government, economy, culture and geography of the United States.

The orientation is a two-week introduction to the Naval War College facilities and programs, Newport, Rhode Island, U.S. Government agencies, and the Defense Department organization. Field trips provide an opportunity to visit Washington, D.C., and other cultural, industrial and military centers where they meet distinguished military and civilian leaders.

Attendance is by invitation only, extended from the Chief of Naval Operations. Since facilities are limited and to ensure an equitable representation of nationalities in the College, only one student is accepted from each country that receives an invitation.

### ***NAVAL STAFF COLLEGE - MASL : P171002***

Naval Staff College (P171002).

The Naval Staff College (NSC) six-month course is conducted once annually in the fiscal year second quarter, commencing in January, and is open to a maximum of 48 Naval, Coast Guard or Maritime Service officers, grades 0-3 and 0-4 (senior Lieutenants and Lieutenant Commanders).

The program is a condensed version of the ten-month U.S. College of Naval Command and Staff/Naval Staff College ten-month programs. It includes studies in Strategy and Policy, National Security Decision Making, Joint Military Operations, and Operational Law. They will also participate in one academic elective of their choosing during their course of study. Although the students follow a completely independent academic program and schedule from their U.S. counterparts, they have the opportunity to attend lectures presented to the other resident NWC colleges and participate in the War College's cultural and recreational events as their schedule allows. In addition, students will have a preliminary orientation study, and a series of Curriculum Field Trips/Informational Program Visits designed to familiarize them with U.S. Navy organization, methods, and doctrines, as well as the government, economy, culture and geography of the United States.

The orientation is a one-week introduction to the Naval War College facilities and programs, Newport, Rhode Island, U.S. Government agencies, and the Defense Department organization. Field trips provide an opportunity to visit Washington, D.C., and other cultural, industrial and military centers where they meet distinguished military and civilian leaders.

Attendance is by invitation only, extended from the Chief of Naval Operations. Since facilities are limited and to ensure an equitable representation of nationalities in the College, only one student is accepted from each country that receives an invitation.

The Naval Staff College (NSC) is a graduate level international program, designed for mid-career naval officers, which is vital in expanding understanding and cooperation among the world's navies. As coalition forces are increasingly summoned to respond to conflicts and promote peace around the world, the role of NSC gains significance. The Naval War College's (NWC) academic departments have adapted course studies to reflect the mission confronting the naval forces of today. For example, the course incorporates studies of security assistance, combating terrorism, insurgency and counterinsurgency, low intensity conflict, multilateral peacekeeping, human rights, and drug control and interdiction. The course provides its students who are the future leaders in their respective navies with a unique and unmatched opportunity to come together as a team to gain a respect and appreciation of other cultures, and provides a place for individual professional study in order to realize each student's potential.

## **NAVY BOOKS/PUBS/OTHER CNET - MASL : PBKPUB1**

NAVY BOOKS/PUBS/OTHER CNET

### **NAVY LEADER DEV PROG INST - MASL : P162275**

To train officer and enlisted personnel in the skills and knowledge areas required to be a beginning Navy Leadership Instructor. It is designed to provide trainees with experiential situations, based on observable and measurable skills and knowledge, needed for instructing billet specific classes. In order to conduct Navy Leadership courses effectively, the leadership instructor student is required to possess certain skills and knowledge. The student is required to apply these skills and knowledge to classroom situations. Leadership instructor course students are provided the following training areas: knowledge of leadership course assessment procedures - instructor interpersonal skills - taking appropriate action - skills in achieving learning objectives - lesson preparation skills - effective planning (classroom, materials, time, etc.) - taking initiative (acquiring necessary resources, etc.). Check-in begins at 0700 on a start Monday (Tuesday, if Monday is a holiday).

### **NCO PROFESSIONAL DEVELOPMENT - MASL : B179116**

Weapons; training management; battle staff planning, and squad and platoon tactics; fire support; leadership; communications; land navigation; human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society. Conducted in English.

### **NCO PROFESSIONAL DEVELOPMENT - MASL : D171033**

This course is modeled after the USAF Noncommissioned Officers Academy (NCOA) which prepares NCOs for more advanced leadership and management responsibilities. It is specifically designed for those assuming senior NCO leadership positions (E-5 through E-9). The course of study focuses on developing the student's knowledge of military principles and the relationships between national interests and their roles as military members. Instruction is also directed at improving their skills as leaders and managers. Students learn time and stress management, concepts of human behavior, as well as implementing quality in the workplace. The class is designed to take students to a comprehension level of learning with some exposure to application.

#### **COURSE DESCRIPTION:**

- **BLOCK I - TEAMWORK:** In the general areas, students explore subjects such as time and stress management, physical fitness and wellness. The first stage of this course begins with Communication Theory to include impromptu oral presentations. In addition, Total Quality Management Principles are discussed and related to military environment. This area encompasses group dynamics, team leader skills, and quality tools and techniques. Lectures, seminars, and group interaction are methods employed to explore subjects listed not only in this block, but also in others.
- **BLOCK II - LEADERSHIP AND PROFESSION OF ARMS:** Students are exposed to new concepts of leadership/followership theories and their practical application in a quality culture. Leadership and decision-making scenarios will challenge the students and maximize the intensity of learning. A practical exercise will test the student's ability to apply leadership principles in a simulated contingency situation. Areas covered in this block include Code of Conduct, written exercises, team leader skills, problem solving, causes of human behavior, and modification of human behavior. In addition further areas of communication are explored as students present a 5 to 10 minute country specific briefing on the history of Latin America.
- **BLOCK III - NCO VALUES AND MANAGEMENT TOOLS:** The last block of the course focuses on personnel evaluations, customs and courtesies, air force missions, national security, and the NCO in a leadership role. The objective of this area is focused on practical applications of counseling skills, and team dynamics through exercises and the leadership reaction course.

### **NEED NEW PRICE - RDS - MASL : D171007**

This professional military education course prepares noncommissioned officers to be professional, war-fighting Airmen who can lead and manage Air Force units in the employment of air and space power. The principal method of instruction is guided discussion and case studies. Formative exercises are integral to NCOA curriculum and serve as feedback tools for the student and instructor. Summative objective and performance evaluations determine whether established educational requirements outlined in the course are met. Students must satisfactorily accomplish all lesson objectives, including those pertaining to Fit-to-Fight, drill and ceremonies using the criteria outlined in the course curriculum.

***NON-DEG (1 QTR - 1 CRS) - MASL : P179268***

Miscellaneous non-degree training at Naval Postgraduate School.

***NON-DEG (1 QTR - 2 CRS) - MASL : P179267***

Miscellaneous non-degree training at Naval Postgraduate School.

***NON-DEG (1QTR - 3 CRS) - MASL : P179266***

Miscellaneous non-degree training at Naval Postgraduate School.

***NONDESTRUCTIVE INSP SPECL - MASL : D148047***

Principles and applications of non-destructive inspection methods; government specifications and Air Force publication related to non-destructive inspection. Basic metallurgy relating to types, causes, and characteristics of discontinuities in metals; identification of metals; preparation of materials for non-destructive inspection. Theory of basic electricity, magnetism, liquid penetrate, optical, conductivity, ultrasonic, eddy current, bond testing, composite components, and radiographic and spectrometric oil analysis inspection equipment. Development of techniques, interpretation and evaluation of magnetic, penetrate, optical, conductivity, ultrasonic, eddy current, bond testing, composite component inspection, radiographic inspections, and spectrometric oil analysis. All safety requirements included with the above items.

***NON-LETH INDV WPNS INSTR - MASL : P166810***

To certify the student as a Non-Lethal Individual Weapons Instructor. To train the student in the mind set and tasks necessary to perform duties as Non-lethal Individual Weapons Instructor. Course includes instruction on the use of force continuum and Rules of Engagement, the dispersal methods of a crowd, use of non-lethal capabilities in unit operations, riot control formations, dynamics of crowd behavior, employment considerations in Military Operations Other Than War, communication skills, empty hand defensive skills, use of the straight baton, use and employment of Oleoresin Capsicum, and use and employment of non-lethal munitions.

Prerequisite Info: Cpl (E-4 and above), graduate of Instructor Training Course and Instructor Development Course. Students must be able to pass USMC Physical Fitness Test.

Equipment needed: Two sets of camouflage utilities, helmet, flak jacket, load bearing vest, cartridge belt, 2 canteens with covers, cold weather gear and gloves, Physical Training (PT) gear.

***NSW RHIB CATERPILLAR ENGINE TRAINING (KU) - MASL : P145197***

Provides hands-on training for Kuwait Naval personnel on the Caterpillar main propulsion diesel engine, composite hull repair and electrical system trouble shooting/repair at the manufacturer's facility.

***NSW RHIB MAINTENANCE TRAINING (KU) - MASL : P145196***

Provide hands-on training for Kuwait Naval personnel with operation, familiarization and maintenance training sessions on the Naval Special Warfare Rigid Hull Inflatable Boat at the manufacturer's construction facility. Maintenance training will include routine preventative maintenance on the RHIBs.

***NURSING SERVICE MGT - MASL : D175078***

Familiarizes selected Nurse Corps officers with nursing management tools and practices relevant to middle management positions. Instructions are provided in leadership and management strategies, organizational structure, continuous quality improvement, and staff development. Students develop or refine management tools such as nursing practice standards, operational plans, and unit operating directives. Total force policy, Air Force instructions, HSI guidelines, and JCAHO standards are integrated throughout the course. NOTE: This course "DOES NOT" award graduate level credit. This course number will supersede J3OZR46A3 006, effective 2 Oct 06.

***NWC INTERNATIONAL FELLOWS - MASL : B171801***

The National Defense University offers one-year fellowships to select senior officers and civilians from 52 nations. Participation in the National Defense University's International Fellows Program is at the personal invitation of the Chairman, Joint Chiefs of Staff. Country invitations are issued after recommendations have been obtained from the US Regional Unified Commands. The

fellowships provide an opportunity to study and conduct research in either the Industrial College of the Armed Forces or the National War College. The Fellows along with the U.S. counterparts analyze the American political, social and economic infrastructure; along with the American decision making process. The program provides insight into factors and considerations that shape U.S. policy and strategy, the proper role of the military in a civilian-led democracy, and internationally recognized human rights. Qualified Fellows may be awarded a Master s Degree at graduation. An undergraduate degree and TOEFL score of 207 is required for Fellows to receive the Master s Degree. International Fellows should report with copies of university transcripts to determine academic standing.

The International Fellows program also includes extensive Field Study travel throughout the United States designed to acquaint the Fellows with U.S. military, cultural, and industrial institutions. Fellows travel once a month and visit approximately 20 states during the year. Participation in the Field Study Program is optional, but highly encouraged and considered to be of equal importance to the Academic Program. It allows the Fellows to put their academic experience in to the larger context of American society as a whole. Family members are invited to participate in select Field Studies throughout the year.

### ***OAC INTL STUDENT CHEM PREP - MASL : B174016***

This is Prep course for Chemical Captains Career Course.

Familiarizes students with the U.S. Army, Engineer Corps history, military terminology and acronyms, equipment and organization. This prepares them to enter into the engineer officer training program. This is Prep course for Chemical Captains Career Course.

### ***OAC INTL STUDENT ENGR PREP - MASL : B174014***

Familiarizes students with the U.S. Army, Engineer Corps history, military terminology and acronyms, equipment and organization. This prepares them to enter into the engineer officer training program.

### ***OAC INTL STUDENT MP PREP - MASL : B174018***

Familiarizes students with the U.S. Army, MP Corps history, military terminology and acronyms, equipment and organization. This prepares them to enter into the MP Officer training program.

### ***OBC INTERNATIONAL ENGR PRE - MASL : B174013***

Familiarizes students with the U.S. Army, Engineer Corps history, military terminology and acronyms, equipment and organization. This prepares them to enter into the engineer officer training program.

Special Information:

### ***OBC INTL STUDENT CHEM PREP - MASL : B174015***

This is Prep course for Chemical Basic Officer Leader Courses Phase III.

Familiarizes students with the U.S. Army, Engineer Corps history, military terminology and acronyms, equipment and organization. This prepares them to enter into the engineer officer training program. This is Prep course for Chemical Basic Officer Leader Courses Phase III.

### ***OBC INTL STUDENT MP PREP - MASL : B174017***

This is Prep course for Chemical Basic Officer Leader Courses Phase III.

Familiarizes students with the U.S. Army, Engineer Corps history, military terminology and acronyms, equipment and organization. This prepares them to enter into the engineer officer training program. This is Prep course for Chemical Basic Officer Leader Courses Phase III.

### ***OBS DRMI MONTEREY - MASL : P189009***

Enables participants to get hands-on, practical experience in a number of different computer applications. It is not designed to make a computer expert out of a participant, but rather allow them to experience a variety of applications software and operating systems.

### ***OBS MARINE CORPS - MASL : P1790BS***

OBS MARINE CORPS

***OBS MED/HEALTH/HYG-CONUS - MASL : B175292***

Provides training for enlisted and officers where no other course exists. This training is tailored to the student's personal specialties, desires, specific country needs. Duration is normally one week but can be extended.

***OBS MED/HEALTH/HYG-CONUS - MASL : B175285***

This MASL programs observer medical training at the Office of the Surgeon General, Alexandria, VA.

***OBS MED/HEALTH/HYG-CONUS - MASL : B175287***

This MASL programs medical observer training at the William Beaumont Medical Center, El Paso, TX.

***OBS MED/HEALTH/HYG-CONUS - MASL : B175290***

This MASL programs observer medical training at Madigan Army Medical Center, Tacoma, Washington.

***OBS NURSE OFFICER - MASL : P175120***

OBS MEDICAL DEPARTMENT OFFICER

Physician and Nurse observation training in most specialties except Emergency Medicine.

***OBS OPERATIONS TNG-CONUS - MASL : B129902***

This MASL is used when Observer Operations Training CONUS (within United States) is programmed.

***OBS/PROF/SP ELT - MASL : D177002***

Student is placed beside U.S. personnel and learns by observation only. Observation experience is captured in the course title and reflected on the applicable training track line (WCN/suffix)

***OBSERVER (ECL70) - MASL : D183006***

Student is placed beside U.S. personnel and learns by observation only. Observation experience is captured in the course title and reflected on the applicable training track line (WCN/suffix)

***OBSERVER/MAFFS/C-130 - MASL : D183005***

Student is placed beside U.S. personnel and learns by observation only. Observation experience is captured in the course title and reflected on the applicable training track line (WCN/suffix)

***OFFICER CANDIDATE SCHOOL - MASL : B179052***

Combined Arms Tactics (Tactical Doctrine, Artillery Operations, Engineer Operations, NBC Operations, Air Force and Marine Corps Operations, Field Training Exercises, and Tactical Leadership Course ); Staff Subjects (Personnel, Intelligence, Operations, Logistics, and Training Management); General subjects (Military Leadership, Effective Writing, Legal subjects, Medical Subjects, Physical Training, Drill and Command, Military History, and Special Presentations); Communications/Electronics; Weapons, Land Navigation.

***OFFICER CANDIDATE SCH-USCG - MASL : P164007***

Officer Candidate School (OCS) is designed to train civilians and enlisted personnel in basic military principles, discipline, and fundamental professional skills in order to become commissioned as an officer. This intense military and academic training is designed to provide enough basic knowledge to allow the graduate to perform as an effective officer. The course is rigorous and challenging. The cadet's desire to participate must be strong enough to adjust to the demanding regulations, heavy academic schedule, and physically strenuous routine. The 17-hour daily routine includes calisthenics, inspection, morning classes (4 hours), afternoon classes (4 hours), compulsory study period (2 hours), and meals. The leadership and management curriculum includes evaluation of self and subordinates, group dynamics, interpersonal communications, leadership styles, power and authority, and interviewing and counseling. Also included in leadership and management is a subsection on physical fitness, health, and well-being. Cadets will participate in a physical fitness program designed to improve their overall fitness level. A fitness test is given three times during OCS and includes the following events: a 1.5-mile run, a 12-minute swim, push-ups, sit-ups, and flexibility. Cadets are required to complete survival swim training. The academic curriculum provides training in junior officer skills including administration, nautical science, and USCG missions. As part of the training, cadets will conduct extensive research in a

variety of USCG publications; study USCG history and present day missions; and participate in first aid training. Through hands-on training, cadets learn nautical science concepts including maneuvering board and relative motion, piloting, celestial navigation, nautical nomenclature, shipboard communications, ship handling, international rules of the road, damage control, and deck watch officer procedures.

### ***OFFICER INDOCTRINATION SCH - MASL : P164008***

This course, which parallels the OCS program, is offered for junior commissioned officers. Officer Indoctrination School (OIS) shares the classroom professional curriculum with OCS, but does not have intense military indoctrination. It is important to know that OIS students will take daily classes with OCS students. OIS is divided into three segments: leadership and management, academics and nautical science, which includes shipboard navigation and a 2-week cruise [See Officer Candidate School (P164007) for subjects.] OIS students attend the swimming portion of physical fitness training and are required to pass the survival swim. They are strongly encouraged to attend all phases of physical training including morning calisthenics. The officers must bring daily work uniforms and service dress uniforms for their respective service. Some winter clothing items are provided. International students should be in the O-1 to O-3 range. This is an ideal course for officers transferring from Army or Marine forces into a maritime service.

### ***OH-58 MOUNTAIN QUAL - MASL : B113206***

The course consists of flight training during which the student will perform normal and terrain flight navigation, takeoffs and approaches to pinnacles, ridgelines, and confined areas, in terrain varying from rolling hills to steep jagged cliffs with altitudes ranging from 6,500 feet PA to over 14,000 feet PA. Emphasis on risk management, environment mastery, crew coordination, safety awareness, power management, and performance planning.

### ***OH-58C NOE QUAL - ALL - MASL : B113180***

This course is designed to qualify selected foreign military students in NOE flight, and is a prerequisite for NVG training. Training includes physical and mental skills and knowledge objectives for basic rotary-wing flight maneuvers, emergency procedures, flight planning, combat skills flight tasks, and safety factors appropriate to an NOE environment.

### ***OH-58C NVG QUAL (FMT) - EN - MASL : B113171***

This course is designed to provide the pilot with the necessary skills and knowledge leading to qualification as an OH-58C NVG pilot. Training includes flight task training, academic and practical application of NVG tactical operations. This course is designed to provide the pilot with the necessary skills and knowledge leading to qualification as an OH-58C NVG pilot. Training includes flight task training, academic and practical application of NVG tactical operations.

### ***OH-58C NVG QUAL- ALL - MASL : B113170***

This course is designed to provide the pilot with the necessary skills and knowledge leading to qualification as an OH-58C NVG pilot. Training includes flight task training, academic and practical application of NVG tactical operations. This course is designed to provide the pilot with the necessary skills and knowledge leading to qualification as an OH-58C NVG pilot. Training includes flight task training, academic and practical application of NVG tactical operations.

### ***OH-58D (R) WARRIOR IP - MASL : B113134***

Course is designed to provide the aviator with the necessary skills and knowledge required to achieve instructor pilot qualification in the OH-58D(R) Warrior helicopter. Training includes mental and physical skills required for the accomplishment of instructor pilot duties through instruction in aircraft systems; communication; navigation; mast-mounted sight; improved data modem; flight training; mission planning; combat skills; armament systems; and safety. Course is designed to provide the aviator with the necessary skills and knowledge required to achieve instructor pilot qualification in the OH-58D(R) Warrior helicopter. Training includes mental and physical skills required for the accomplishment of instructor pilot duties through instruction in aircraft systems; communication; navigation; mast-mounted sight; improved data modem; flight training; mission planning; combat skills; armament systems; and safety.]

### ***OH-6 HELICOPTER REPAIR - MASL : B141761***

This course of instruction will provide the student with the skills and knowledge required to supervise, troubleshoot and inspect maintenance performed on the AH-64D LONGBOW Attack helicopter armament/electrical/avionics systems and components.

Also will provide knowledge to evaluate operational readiness, recommend proper corrosion control methods, ensure compliance with directives, technical manuals (TM), modification work orders (MWO) and other policies and procedures to enable the student to successfully perform the supervisory and technical inspector (TI) duties required of MOS 68Y/15Y30, AH-64D Armament/Electrical/Avionics Systems Repairer Supervisor.

***OJT AFLOAT CONUS-LANT - MASL : P1210JT***

To provide shipboard experience in the Atlantic. Training helps develop skills in ship handling/ship piloting, seamanship navigation, naval communication and weaponry, bridge/CIC watch standing, use of shipboard communications, operation of gunner/missile systems. OJT provides knowledge of independent and fleet operations and ship and squadron organization.

***OJT AFLOAT CONUS-LANT - MASL : P121099***

OJT FOR LANTFLT SHIPS.

***OJT ASHORE - LANTFLT - MASL : P129963***

OJT ASHORE TRAINING UNDER PCL

***OJT AV8B O/I LEVEL MAINT - MASL : P14JT01***

Provides managed on the job training at the organizational and/or intermediate level for AV-8B maintenance personnel.

***OJT AVIA MAINT - NETC - MASL : P141JT1***

On-the-job training in aviation maintenance.

***OJT AVIATION CONUS - PAC - MASL : P119009***

OJT AVIATION CONUS - PAC

***OJT AVIATION OPERATIONS - MASL : P119026***

To provide prospective pilots and Naval Flight Officers with the necessary prerequisites prior to entry into Aviation Indoctrination. This includes but is not limited to Flight Physicals, Swim and Physical fitness screening, English Language testing and administration paperwork.

***OJT AVIATION OPS - CONUS - MASL : P1190JT***

Tailored on the job aviation training at CONUS sites.

***OJT CONUS-USMC - MASL : P1798JT***

OJT CONUS-USMC

***OJT ENL TECH SOUTHEAST - MASL : P179TE7***

This training provides students with the opportunity to perform U.S. Coast Guard operations related to various technical specialties, including aids to navigation.

Prerequisite: Completion of a USCG aids to navigation course.

***OJT FAMILIARIZATION OFFR - MASL : P179FMO***

OJT FAMILIARIZATION OFFICER

These programs are conducted at operational units and enable participants to observe and, when possible, participate in Coast Guard standard operations. OJT is intended to supplement classroom training and to provide hands-on experience and practical application of skills acquired. The actual training conducted is dependent upon the operational commitments and operational tempo of the providing unit. The training will not qualify a student in a particular rating, but it does offer exposure to daily work situations and familiarization with Coast Guard capabilities.

Prerequisites: Completion of a USCG course. Note: Providing information on the student's specific area of interest and the student's next assignment will aid in the selection of the most appropriate unit for the desired training. OJT objectives must be submitted using the format contained in the USCG Coast Guard International Training Handbook (see Page V-17).

OJT usually follows a resident course. Therefore, the IMSO from the resident training command will coordinate the arrival at the OJT site with the district IMSO.

### ***OJT HEALTH SVC APPRENTICE - MASL : P179299***

An apprenticeship program can be arranged following Completion of the Health Services Technician A course. The student would be attached to the Training Center, Petaluma, CA Health Care Clinic during this program to gain practical experience under the supervision of the course instructors.

### ***OJT INTERM MAINT - SIMA - MASL : P145473***

Provide Intermediate Maintenance On-The-Job-Training (OJT) to international officers and enlisted in the Operations, Maintenance, and Daily Procedures of a Ship Intermediate Maintenance Activity.

### ***OJT MAR SAFETY ENLISTED - MASL : P179MSE***

OJT MARINE SAFETY ENLISTED

This hands-on, in-the-field training provides exposure to commercial vessel inspection activities, port state control inspections on non-U.S. flag ships, pollution investigation and response, and shore-side facility compliance inspections. Typically, some time is spent with other USCG field offices which provide limited exposure to small boat operations, search and rescue, and fisheries enforcement.

### ***OJT MAR SAFETY OFFICER - MASL : P179MSO***

OJT MARINE SAFETY OFFICER

This hands-on, in-the-field training provides exposure to commercial vessel inspection activities, port state control inspections on non-U.S. flag ships, pollution investigation and response, and shore-side facility compliance inspections. Typically, some time is spent with other USCG field offices which provide limited exposure to small boat operations, search and rescue, and fisheries enforcement. Officers may be assigned to enlisted USCG personnel for daily activities, but will normally be sponsored by commissioned officers or commissioned warrant officers.

### ***OJT MEDICAL CONUS-MEDCOM - MASL : P1750JT***

On-the-job training for Doctors in operational medicine with the emphasis on preventive medicine and occupational health programs.

### ***OJT MLE ENLISTED - MASL : P179LEE***

OJT MARITIME LAW ENFORCEMENT (MLE) ENLISTED

This program is conducted at operational units and enables participants to observe Coast Guard standard maritime law enforcement operations at the shipboard level, including counter-narcotics or fisheries law enforcement. OJT is intended to supplement classroom training and to provide practical application of skills acquired. The actual training conducted is dependent upon the operational commitments and operational tempo of the providing unit. The training will not qualify a student in a particular rating, but it does offer exposure to daily work situations and familiarization with Coast Guard capabilities. Providing information on the student's specific area of interest and next assignment will aid in the selection of the most appropriate unit for the desired training.

### ***OJT MLE OFFICER - MASL : P179LEO***

OJT MARITIME LAW ENFORCEMENT (MLE) OFFICER

This program is conducted at operational units and enables participants to observe Coast Guard standard maritime law enforcement operations at the shipboard level, including counter-narcotics or fisheries law enforcement. OJT is intended to supplement classroom training and to provide practical application of skills acquired. The actual training conducted is dependent upon the operational commitments and operational tempo of the providing unit. The training will not qualify a student in a particular rating, but it does offer exposure to daily work situations and familiarization with Coast Guard capabilities. Providing information on the student's specific area of interest and the student's next assignment will aid in the selection of the most appropriate unit for the desired training.

***OJT NAVAIR - MASL : P189002***

Miscellaneous OJT from Naval Air Systems Command.

***OJT NAVEDTRACOM - MASL : P1890JT***

Miscellaneous OJT under the Naval Education & Training Command.

***OJT NAVSEA - MASL : P145JT0***

OJT provided by NAVSEASYSKOM.

***OJT NAVWARCOL - MASL : P179177***

This is an additional study training opportunity to allow students to further their research and education by remaining at the Naval War College and utilizing resources and library materials and completing thesis coursework if desired.

***OJT OFF MARINE SAFETY - MASL : P179MOL***

This hands-on, in-the-field training provides exposure to commercial vessel inspection activities, port state control inspections on non-U.S. flag ships, pollution investigation and response, and shore-side facility compliance inspections. Typically, some time is spent with other USCG field offices which provide limited exposure to small boat operations, search and rescue, and fisheries enforcement. Officers may be assigned to enlisted USCG personnel for daily activities, but will normally be sponsored by commissioned officers or commissioned warrant officers.

***OJT OPERATIONS TNG-CONUS - MASL : B129901***

This MASL is used when On-the-Job Training Operations Training CONUS (within United States) is programmed. This MASL is used when On-the-Job Training Operations Training CONUS (within United States) is programmed.

***OJT OPERATIONS TNG-CONUS - MASL : B129905***

This MASL is used when On-the-Job Training Operations Training CONUS (within United States) is programmed. This MASL is used when On-the-Job Training Operations Training CONUS (within United States) is programmed.

***OJT OPERATIONS TNG-CONUS - MASL : B129903***

This MASL is used when On-the-Job Training Operations Training CONUS (within United States) is programmed. This MASL is used when On-the-Job Training Operations Training CONUS (within United States) is programmed.

***OJT OPERATIONS TNG-USAREUR - MASL : B229931***

This MASL is used when On-the-Job Training Operations Training, United States Europe is programmed. This MASL is used when On-the-Job Training Operations Training, United States Europe is programmed.

***OJT PROFL/SPEC-CONUS - MASL : B179940***

This MASL is used when On-the-Job Training Professional / Specialist CONUS (within United States) is programmed. This MASL is used when On-the-Job Training Professional / Specialist CONUS (within United States) is programmed.

***OJT SAR OFFICER - MASL : P179SRO***

OJT SEARCH AND RESCUE OFFICER

This training provides exposure to real-life applications of maritime search and rescue skills used by the Coast Guard. Students will observe SAR operations at a Rescue Coordination Center (RCC), at the group level (rescue sub-center that controls SAR response units), and at an operational unit. Underway time on small boats and aircraft during actual search and rescue cases is likely.

***OJT SHIP XFER ENLISTED LANTFLT - MASL : P129013***

Ship Transfer MASL used to track enlisted students on ships being reactivated in Atlantic Fleet ports or repair facilities.

### ***OJT SUPPLY - MASL : P1520JT***

To provide On-the-job training at stock points and inventory control points. Areas of interest which can be included are: issue, receiving, storage, packing, freight terminal, air terminal, data processing, procurement and customer service.

### ***OJT TECHNICAL ENLISTED - MASL : P179TEE***

#### **OJT TECHNICAL ENLISTED**

This training provides students with the opportunity to perform U.S. Coast Guard operations related to various technical specialties, including aids to navigation.

Prerequisite: Completion of a USCG aids to navigation course.

### ***OJT USCINCPAC - MASL : P221055***

To provide on-the-job training in various areas at USCINCPAC OCONUS sites.

### ***OPERATING ROOM SPECIALIST - MASL : B175226***

The 91D10, Operating Room Specialist Course is designed to provide the student with a working knowledge of principles of surgical technology practice, and the instruments, supplies, and equipment for surgical procedures. Phase 1 (9 weeks) didactic study includes: basic anatomy and physiology; vital signs, cardiopulmonary resuscitation; principles and methods of decontamination, sterilization and disinfection; storage and handling of sterile supplies; identification and care of surgical instruments, specialized equipment, sutures, needles, blades, linen, and corrosion-resistant metal ware; duties of the scrub and circulating technician; principles and practices of sterile technique and standard precautions; transporting and positioning patients; operating room safety; handling of specimens, medications, dyes and haemostatic agents; and surgical specialties as they relate to selected surgical procedures. A field training exercise (FTX) is also incorporated into the course. Phase 2 (10 weeks) is on-the-job training in the clinical environment. Total course length: 19 weeks.

### ***OPERATIONAL LAW SEMINAR - MASL : B176566***

This course focuses on the role of law in military operational and tactical levels. Lectures cover topics such as: rules of engagement; military justice and claims in the deployed environment; fiscal law and deployed contracting; international agreements; human rights; and air, space, and sea law. Lectures also cover the structure, missions, and capabilities of the Army, Navy, Air Force, Marines, and Coast Guard, focusing on basic knowledge a legal advisor must have to advise a commander, interspersed with lectures are practical student exercises based on a national contingency deployment. The students must complete four different types of exercises; briefings, drafting ROE; target analysis; and a memorandum on fiscal law questions. At the conclusion of the course, attendees will be able to act as a legal advisor during military operations across the spectrum of conflict. Updated: 9 Nov 01. This course focuses on the role of law in military operational and tactical levels. Lectures cover topics such as: rules of engagement; military justice and claims in the deployed environment; fiscal law and deployed contracting; international agreements; human rights; and air, space, and sea law. Lectures also cover the structure, missions, and capabilities of the Army, navy, Air Force, Marines, and Coast Guard, focusing on basic knowledge a legal advisor must have to advise a commander. Interspersed with lectures are practical student exercises based on a national contingency deployment. The students must complete four different types of exercises; briefings, drafting ROE; target analysis; and a memorandum on fiscal law questions. At the conclusion of the course, attendees will be able to act as a legal advisor during military operations across the spectrum of conflict. Updated: 9 Nov 01.

### ***OPERATIONS ENTOMOLOGY - MASL : D175138***

Builds individual capabilities to perform surveillance and control for disease vectors that significantly impact military missions during war or operations other than war. Emphasis is placed on preventing vector-borne disease morbidity and mortality. Instruction includes vector biology, vector-borne disease, surveillance techniques, risk assessment, and control strategies. Operational Entomology provides academic instruction, practical exercises, and field experience. AFSC 3E4X3 personnel requiring 7-skill level craftsman upgrade training should request number B3ACY3E473- 001. Additional details can be obtained from the USAFSAM/PH web page at URL <http://www.brooks.af.mil/web/eh/html/bugs.htm>

### ***OPERATIONS RESEARCH/GRAD - MASL : D178044***

Prepares officers for analysis roles to assist decision makers in allocating resources for the planning, development, acquisition, and use of military systems. Provides an extensive background in mathematics, probability, statistics, simulation, economic analysis, operations research, and related disciplines. While its courses are comparable to those of applied operations research program at civilian institutions, the graduate operations research program at AFIT remains unique with its emphasis on the application of operations research techniques to Air Force and Department of Defense problems. The program leads to a Master of Science degree in operations research. The recommended career fields for assignment of the graduates of this program are scientific analysis (AFSC 268X) and information systems (AFSC 49XX). Potential assignments can be found at all levels of the Air Force and the Department of Defense including the Air Force Studies and Analyses Agency, the Joint Analysis Directorate of the Joint Chiefs of Staff, major command headquarters, Air Force Materiel Command product centers, the Air Force Operational Test and Evaluation Agency, and other DoD agencies. Principal courses in the program include models.

### ***OPERATIONS SPEC A - MASL : P132900***

The Operations Specialist is the tactical command, control and communications rating. This course provides the student with entry level skills in basic computer application, the handling of classified material, setting up and maintaining communications systems, the management of search and rescue cases, tactical operations in a Combat Information Center (CIC) environment, and basic navigation.

### ***OPERATIVE DENTISTRY - MASL : P175660***

Emphasizes dental caries as a disease process - its epidemiology, reversibility, and conservative treatment. Subjects are typically applied anti-caries agents such as fluorides, chlorhexidine, and pit and fissure sealants; conservative cavity prevention techniques; the restoration of badly broken-down teeth; the restoration of endodontic treated teeth; and the relationship between restorative dentistry and the healthy periodontium. New development in restorative materials is presented, along with clinical criteria for their selection and use. Restorative application of electrosurgery is discussed. A hands-on laboratory is provided with the products discussed.

### ***OPNS RESOURCE MANAGEMENT - MASL : D121059***

Provides initial skills training for personnel entering the aviation resource management career field. Personnel are provided basic knowledge in resource management, to include career progression, monitoring flight incentive pay, maintaining the aviation resource management system, publishing aeronautical orders and military pay orders, monitoring aircrew training, maintaining flight and jump record folders, scheduling flight and ground training, utilizing oracle browsers, and performing squadron operations center duties. Material presented throughout the course, combined with interaction amongst yourselves, our aviation resource management staff, and guest speakers will help broaden your perspective on what aviation resource management at the three skill level (basic level) is about. We are confident that you will find the course rewarding.

### ***ORAL MED,RADIOLO,PHARMACO - MASL : P175206***

This course will enhance skills essential for the collection of diagnostic data in a systematic, logical fashion. Special emphasis will be placed on obtaining medical and dental histories, vital signs, review of organ systems, physical diagnoses, the head and neck examination, laboratory studies, the indications for and limitations of radiographic evaluations, definitive or differential diagnoses of oral lesions, and the dental management of selected medically compromised patients. Additional time will be added to present the fundamental principles of proper radiographic technique, as well as a meaningful approach to radiographic interpretation.

### ***ORAL PROF SKILLS FOR AVN - MASL : B177026***

This MASL would be programmed when Oral Professional Skills for Aviation is programmed. This MASL would be programmed when Oral Professional Skills for Aviation is programmed.

### ***ORAL/MAXILLOFACIAL SURGERY - MASL : P175225***

This course will update the general practitioner's knowledge of exodontias and minor oral surgery procedures, and provide an understanding of recent advances in major oral and maxillofacial surgery in the areas of trauma, preprosthetic osseointegration and orthognathic surgery.

### ***ORDNANCE BASIC OFFICER LEADER - MASL : B121275***

To provide lieutenants leadership skills and provide instruction on tactics and unit defense, unit and support supply management, unit and support maintenance, materiel management, and munitions management. To provide lieutenants leadership skills and provide instruction on tactics and unit defense, unit and support supply management, unit and support maintenance, materiel management, and munitions management.

### ***ORSA MILITARY APPLICATIONS-1 - MASL : B151830***

This course provides specialty education in the military applications of operations research methodologies. Subjects covered include artificial intelligence, cost, combat modeling, decision analysis, deterministic and stochastic models, linear statistical models, math programming, simulation, and a capstone case study. A majority of the instruction is from graduate-level textbooks which frequently require the use of calculus. Most areas of instruction are accompanied by practical exercises and/or group projects which are to be worked outside of scheduled class time. Examinations are given at the completion of each block to evaluate the students comprehension and mastery of the material. This course provides specialty education in the military applications of operations research methodologies. Subjects covered include artificial intelligence, cost, combat modeling, decision analysis, deterministic and stochastic models, linear statistical models, math programming, simulation, and a capstone case study. A majority of the instruction is from graduate-level textbooks which frequently require the use of calculus. Most areas of instruction are accompanied by practical exercises and/or group projects which are to be worked outside of scheduled class time. Examinations are given at the completion of each block to evaluate the student's comprehension and mastery of the material.

### ***ORSA MILITARY APPLICATIONS-1 - MASL : B151820***

Course includes a comprehensive block of instruction in probability and statistics. In addition, there is a review of Linear Algebra, Calculus, and in-depth instruction in the use of personal computer with emphasis on word processing, spreadsheets, database, and graphics. The classroom presentation will emphasize principles, demonstrate techniques of analysis, and illustrate typical applications of the analytical techniques. Each area of instruction is accompanied by practical exercise which is expected to be worked in the group problem solving sessions as well as outside of the scheduled class time. These exercises and examinations given during class are graded to determine the student's comprehensive and mastery of the material.

### ***ORSA TECHNOLOGIES AND APPLICATIONS COURSE - MASL : B151802***

The course is designed to update the student's knowledge and skills of analytical techniques with particular emphasis on military applications. The course concentrates on those techniques and applications most frequently employed in the military ORSA community.

### ***OT PARTICIPANT - MASL : B181011***

This MASL is used when OT Participant is programmed.

### ***OUTBOARD MTR MT & OVHL - MASL : P145906***

Provides designated junior officers and enlisted personnel the basic and advanced training necessary to operate, maintain and overhaul outboard motors. Consists of instruction in engineering fundamentals, outboard motor design, internal combustion engine theory, electrical and fuel systems, gear case and power-head overhaul, shop safety, use of hand, power, precision measuring and special tools, sealants, lubricants, cleaning agents, preventive maintenance, and troubleshooting. In amplification of classroom theory, practical application techniques are employed to accomplish course objectives utilizing manufacturer's technical/service manuals and Bombardier two-stroke, 150HP outboard motors as training aids.

### ***OXYGEN CLEANLINESS INSTR - MASL : P166260***

#### **OXYGEN CLEANLINESS INSTRUCTOR**

Purpose: To train and qualify personnel in the procedures and requirements of MIL-STD-1330D and to standardize training throughout the Navy. To train and quality clean- room personnel per the requirements set forth in MIL-STD-1330D. Scope: This course covers cleaning, assembly, disassembly, reassembly, entering into, testing and examination of certified oxygen clean components or piping systems. Training includes practical work on mock-ups to simulate flushes, hydrostatic testing and clean-room operations. NAVSEA approved Halogenated Solvents, Tribastic Sodium Phosphate (TSP) and Navy Oxygen Cleaner

(NOC) cleaning procedures are covered along with special emphasis on NOC flushing and clean-room procedures employed at Trident Refit Facility. All documents referenced by the MIL-STD-1330D will be covered in detail as well as any updated instructions or procedures adopted by higher authority.

***P3 REPL FLIGHT ENG PREP - MASL : P114038***

P-3 REPLACEMENT FLIGHT ENGINEER - PREPARATION COURSE

***P-3 SIMULATOR TRNG - MASL : P117021***

To train newly assigned pilots or to provide refresher training for qualified P-3 Aviators in the proper operation, troubleshooting of the cockpit flight panel during simulated flight operations.

NOTE: Access to device 2f179 (pact) is not authorized under this MASL number.

***P3C III/AIP FLT ENG CAT 1 - MASL : P114033***

To train the Category I Fleet Replacement Flight Engineer in the Flight and operating characteristics of the P-3 aircraft. Emphasis is placed in developing knowledge of aircraft systems operation, area coordination, normal and emergency procedures and weapons systems utilization in an operational environment.

***P3C OFT SIMULATOR TRNG - MASL : P117050***

To provide initial and refresher training for P3 pilots to enhance their flying skills and maintain required qualifications.

***P3C SIMULATOR (OFT-2F87F) - MASL : P117075***

To provide safe and effective training for P3 personnel in skills and techniques required for performance as qualified members of P3 flight crew.

***P3C SIMULATOR (WST) - MASL : P117076***

To provide safe and effective training for P3 personnel in skills and techniques required for performance as qualified members of P3 flight crew.

***P3C UDIII/AIP ACOUST CAT 1 - MASL : P117062***

To train first tour fleet aircrew personnel in the skills and techniques required for designation as a NATOPS qualified Acoustic Sensor Operator in the P-3C Update III model (SASP/C4.7.1 equipped) aircraft.

SCOPE: This curriculum provides the Acoustic AW (AAW) with a thorough study of the Acoustic Systems of the P-3C Update III model aircraft and procedures for their proper use and preflight. The AAW is also introduced to Oceanography, USW tactics, Crew Coordination and Emergency procedures. Academic training is augmented with Weapon system Trainers, Part Task Trainers, and flights on the P-3C Update III model Aircraft. These sessions reinforce classroom instruction and provide hands-on training for the RAAW to develop skills.

***P3C UDIII/AIP NFO CAT 1 - MASL : P114023***

To train first tour Fleet Replacement Naval Flight Officers in skills and techniques required for performance as a navigator/communicator in P-3C model aircraft. The curriculum consists of training in navigation systems and procedures, en route and tactical communication, crew coordination in tactical evolutions, emergency procedures, and systems review. Training is conducted in weapon system trainers and aircraft. Flight training consists of navigation/communication and crew tactical flights.

***P3C/P3C UD2 REP PILOT C1 - MASL : P112100***

To train first tour Fleet Replacement Aviators in skills and techniques required for performance as a Pilot in P-3C model aircraft. The curriculum consists of aircraft systems, normal and emergency procedures, navigation, USW tactics and procedures, and crew coordination in tactical evolutions. Various trainers are utilized for cockpit familiarization, cockpit procedures, flight simulation and tactical training. Flight training consists of familiarization, navigation, and crew tactical flights.

### ***P3C/P3CU2 INST UNDER TNG 3 - MASL : P115011***

To train IUT Pilots in skills and techniques required for performance as an Instructor in P-3 model aircraft. This curriculum provides the prospective VP-30 Instructor with a one week course in instructor techniques followed by fourteen weeks of academic work and flights on P-3C/Update II and AIP Aircraft. The academic work consists of navigation, USW tactics, weapons delivery, crew coordination, aircraft systems, normal and emergency procedures and methods of presenting these subjects to fleet replacement pilots. The IUT demonstrates his instructor ability during familiarization flights. The major thrust of this curriculum is on educational techniques and in-depth systems knowledge.

### ***P3CUDIII/AIP ENG RUSIM - MASL : P119111***

This is simulator training in the 2C41

Special Note: Student must possess a Secret Clearance in order to access the facility where training takes place.

### ***PA OFFICER QUAL CRS - MASL : B164590***

This course is designed to provide instruction and comprehension of the theory, concepts, policies and principles of community relations within the military environment, public affairs communication, speech and research, basic journalist and broadcast instruction necessary for the public affairs officer, public affairs specific for each service, public affairs responsibilities applicable to the unified and specified military command, media relations, and on-camera training and requirements of the public affairs officer in a war-fighting scenario.

### ***PAIN CTRL & NITR-OX SEDAT - MASL : P175677***

PAIN CONTROL AND NITROUS OXIDE SEDATION

This 4-day course is designed for the active duty member to qualify for privileges to use nitrous oxide and oxygen sedation. To enhance participants understanding of the role of sedation emphasis will be placed on understanding the nature of pain and anxiety. Participants will have the opportunity to meet actual chronic pain patients who will discuss their pain experiences. The physiologic signs and effects of pain and anxiety, the behavioral effects and complicating factors will be investigated. Alternate pharmacological and psychological modes of pain and anxiety management will be reviewed. Following the ADA guidelines for the teaching of conscious sedation, the participants will review the spectrum of sedation and respiratory anatomy and physiology. With a sound background in pharmacology and indications/contraindications and management of complications, the participants will gain hands-on experience using nitrous oxide and oxygen. The safety of the working environment will be stressed.

### ***PARACHUTE RIGGER - MASL : B148370***

Inspecting, packing, rigging, recovering, storing, and maintaining air item equipment.

### ***PATHFINDER - MASL : B121180***

Navigate cross country on foot; establish and operate a day/night helicopter landing zone; establish and operate a day/night parachute drop zone; conduct sling load operations; aircraft rappelling; provide air traffic control and navigational assistance to aircraft within an operational site control zone.

### ***PATIENT ADMINISTRATION - MASL : B175217***

To provide AMEDD officers with a working knowledge of all administrative parameters/procedures incidental to admission and disposition of patients; initiation, maintenance and disposition of medical records; medical statistic reporting; birth/death reports and certificates; release of medical information and processing of related correspondence; administrative support of patient movement/transfer, disability processing and medical care evaluations. General knowledge as necessary in the administrative middle-management position in a medical management facility.

### ***PATIENT ADMINISTRATION SPECIALIST - MASL : B165223***

Provides enlisted personnel with a working knowledge of AMEDD basic medical records and reports, admission and disposition records, medical statistical reports and procedures. Basic fundamentals of Microcomputer operations to include keyboard skills (20 wpm) and hospital information systems. Work uniform required

### ***PATRIOT - EOD - MASL : P193134***

Trains selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***PATRIOT AIR DEFENSE OFFICER - MASL : B195185***

System operations; battle drill; maintenance; tactical deployment; and command control procedures.

### ***PATRIOT OPERATOR & SYSTEM MECHANIC-GERMAN - MASL : B179535***

Provide general block and functional theory of operation on the PATRIOT Air Defense Missile System. Subjects include system operation, operational checks and adjustments, fault isolation procedures, and maintenance management functions.

### ***PATRIOT OPERATOR (ICC) - MASL : B179538***

To train allied commissioned officers for duty with the Patriot Air Defense Missile System, Information and Coordination Central (ICC).

### ***PATRIOT SYSTEM REPAIRER - MASL : B195193***

Course Scope:

An intensive course in the specific and generalized concepts and methods for total maintenance, troubleshooting, and repair of the PATRIOT Missile System to include the electrical, electronic, and mechanical theory required to support that training. Provides training on warrior tasks and battle drills.

### ***PATROL CRAFT HULL MAINT - MASL : P145903***

Provides designated junior officers and enlisted personnel the basic training necessary to perform structural repairs and preventive maintenance to steel, aluminum, fiberglass and inflatable hull small craft at the apprentice level. Consists of instruction in oxyacetylene welding and cutting, electric arc and aluminum mig welding, as well as fiberglass and inflatable rubber boat repair. In amplification of classroom theory, practical application techniques are employed to accomplish course objectives in all areas of instruction.

### ***PATROL CRAFT PROP SYS OVHL - MASL : P145907***

Provides designated junior officers and enlisted personnel the advanced training necessary to perform major overhaul of small craft diesel engines. Consists of detailed instruction in 6V92 diesel engine specifications and characteristics, operating principles, lubrication, cooling, air, fuel, and electrical systems, and their interdependent relationship. In amplification of classroom theory, practical application techniques are employed to accomplish course objectives including the complete disassembly, inspection, repair and reassembly of a Detroit Diesel 6V92 engine in accordance with manufacturer s technical/service manuals.

### ***PATROL CRAFT WEAPONS MT - MASL : P145904***

Provides designated junior officers and enlisted personnel the basic training necessary to perform routine and preventative maintenance on various individual small arms and patrol craft weapons systems. Consists of instruction in weapons safety, ammunition fundamentals, malfunction analysis, disassembly, inspection, and reassembly of each weapon to include the M2HB .50 caliber machinegun, MK19 40mm grenade launcher, M60 (Basic) machinegun, M14, M16 and AK47 rifles, M203 and M79 40mm grenade launchers, Mossberg 500A1 shotgun, M1911A1 .45 caliber and Sig Sauer P226 9mm pistols.

### ***PEACE OPERATIONS-SPANISH - MASL : B129203***

Tactics, techniques, and procedures (TTP) of peace operations to include logistics support; chain of command structures; rules of engagement development; information operations; intelligence capabilities and assets; preventive medicine and sanitation for peacekeepers as well as national citizens; role of civilian controls on military operations and the varying roles civilian nongovernmental organizations have in supporting peace operations; mandated minimum of 28 hours of instruction of human rights; the rule of law; due process; civilian control of the military; and the role of the military in a democratic society.

### ***PERFORMANCE BASED LOG - DL - MASL : B151016***

Performance Based Logistics, Part A, provides a dynamic real-time learning environment oriented toward developing a range of logistics competencies. It challenges the student to review current policy and demonstrate an understanding of how early

integration of performance-based support concepts into the system development process leads to achievement of DoD's logistics goals. It is intended for midlevel logistics professionals needing skills required to excel in today's demanding and dynamic product support environment.

Objectives: Students who successfully complete this course will be able to:

- More fully understand the knowledge areas of their job as members of the life cycle logistics workforce (concentrating on performance-based product support, business case analysis, continuous modernization, supply chain management, configuration management, enterprise integration, commercial integration, support options, and reliability, maintainability, and supportability);
- Understand the specific relation and application of the functional areas in a performance-based logistics framework; and
- Develop a more in-depth knowledge of their current applications within the DoD.

### ***PERIODONTICS - MASL : P175674***

To update skills directed at the general dentist.

SCOPE: This course will provide current, practical information that will enhance the practicing dentist's familiarity and treatment options with the dental care of the periodontal patient. Presentations on state-of-the-art periodontics will be addressed to general practitioners and specialists involved in the prevention and treatment of the acute and chronic periodontal diseases. This course will cover such topics as the periodontium in health and disease; diagnosis, prognosis, and treatment planning; osseointegrated dental implants; principles of periodontal surgery; management of osseous defects; soft tissue surgery; chemotherapeutics; early onset periodontitis; periodontal maintenance; the interrelationship of periodontics with restorative dentistry and endodontics; and variety of the most current aspects of periodontal treatment. A laboratory exercise on periodontal surgery will also be offered.

### ***PERIOPERATIVE NURSING - MASL : B175307***

Course instruction is presented through lectures, conferences, discussions, practical exercises, examinations, and clinical practicum. Major areas of instruction include the OR nurse's responsibility in the preparation and sterilization of supplies/equipment, operative nursing aspects in special surgical fields, teaching role of the Preoperative staff nurse, principles and techniques of supervision, and management of an operating room.

### ***PERSONNEL SPECL - MASL : D161006***

This course replaces E3ABR3S031 006 with the first class start of 27 Jun 05. Covers personnel duties such as computer operations, personnel communications management, briefings, Military Personnel Data System (MilPDS) applications, personnel relocations, employment readiness, commander's support staff functions, Personnel Concept-III, keyboarding, and contingency support functions.

### ***PETROLEUM LOGISTICS MGT - MASL : D151021***

Provides training for Air Force personnel, AFSC 2F071, in the knowledge and skills needed to perform the duties of a fuel superintendent or manager possessing AFSC 2F091/2F000. Instruction includes all aspects of managing, planning, organizing, directing, and coordinating fuels operation activities. It is designed to enhance the executive ability of the Fuels Superintendent/manager in the areas of fuel accountability, daily operations, quality assurance, and deliberate/contingency planning. In addition, training received will provide the skills required to manage a deployed fuel operation utilizing fuels mobility support equipment (FMSE).

### ***PETROLEUM OFFICER - MASL : B151655***

Advanced petroleum and water handling skills, operations, and maintenance; energy management, water storage, and distribution; producing and processing petroleum products, data gathering, analyzing energy resources, and planning; the slating process, fuel depot operations, and quality assurance evaluation; safety and environmental stewardship protection considerations, and the force projection scenario for advanced petroleum management.

### ***PETROLEUM SUPPLY SPECIALIST - MASL : B152385***

This course provides training in fuel products operations; bulk petroleum, receipt, storage and issues; water front and pipeline operations, safety, health, and environmental stewardship protection.

### ***PETROLEUM TNK CLEANING AZR - MASL : D148116***

Provides formal training to Air Force personnel (military or civilian) in responsibilities and duties of a tank entry supervisor. This training is mandatory for MAJCOM certification as a Command Tank Entry Supervisor. Training includes hazardous characteristics of fuels, inspection of personnel protective equipment, confined space entry, pre-cleaning inspection, tank cleaning process, disposal of contaminated fuels, acceptance inspection and returning tank to service.

### ***PGS ADMIN SCIENCE MS - MASL : P176002***

MS degree program. This program is designed to provide the officers with fundamental interdisciplinary techniques of quantitative problem-solving methods, behavioral and management science, economic analysis and financial management and to enable the officers to evaluate the written research, study and analysis product of others throughout their careers. The curriculum will further provide the officers with the specific functional skills required to effectively manage. The curriculum integrates mathematics, accounting, economics, behavioral science, management theory, operations/systems analysis and a subspecialty concentration area into an understanding of the process by which the defense mission is accomplished. Specialty concentration areas are selected by the student by their choice of course options.

The 818 curriculum allows students to design a program of course work specific to management effectiveness in the host country's military system. The student may elect to specialize in the relevant portion of a functional area such as financial, logistics, human resources and organization, or manpower and personnel analysis. Or, the student may choose to follow a general management program which would include an overall balance of courses from many areas.

### ***PGS AV SAFETY OFF (ASO) - MASL : P171410***

To prepare safety officers at the squadron level to assist commanding officers in conducting an aggressive accident prevention program. When the SSO/ASO completes this course he will be able to organize and administer an accident prevention program at the squadron level, as defined in OPNAVINST 3750.6. Subject matter for the course includes rodynamics and structural analysis for accident prevention, safety program management, accident investigation and reporting techniques and requirements, aviation physiology and psychology, and safety law. Students must be O-3/O-4.

ELIGIBILITY: Designated Naval aviators or naval flight officers who are deployment or detachment experienced with the rank of Lieutenant/Lieutenant Commander, USN, and Captain/Major, USMC. Medical Corps or Medical Service Corps officers who are in a billet requiring the ASO course. Any exceptions and requests from other services or organizations shall be coordinated with the Director, School of Aviation Safety.

### ***PGS COMPUTER SCIENCE MS - MASL : P177713***

MS degree program. Technical knowledge in computer system design, data processing, hardware, software and research. Note: Attendance is limited to 35 participants per year.

### ***PGS COMPUTER SCIENCE PHD - MASL : P179173***

PHD program.

### ***PGS ELEC/COMPUTER ENGRG MS - MASL : P177712***

The objective of this program is to provide a broad-based, design oriented education focusing on the warship as total engineering system including hull, mechanical, electrical and combat systems and educates officers in current electronics technology and its application to modern naval warfare. The program is for selected Naval/Mechanical Engineering, Electrical Engineering, and Combat Systems Sciences and Technology students and is structured to lead to the MSME, MSEE, or MS in Physics.

MS degree program.

### ***PGS ELECTRICAL ENGRG PHD - MASL : P179109***

PHD program.

### ***PGS ELECTRONIC SYS ENGR ENG - MASL : P177721***

Engineering degree program.

### ***PGS ENGINEERING SCIENCE - MASL : P174233***

Prepares students for entry into a technical program.

### ***PGS FINANCIAL MANAGEMENT - MASL : P179127***

Masters degree program. The objective of the Financial Management Curriculum is to prepare officers for business and financial positions within the Navy. Financial Managers assist the services decision-making processes at all levels by providing accurate, timely and relevant information. They are concerned with the optimal allocation of human, physical and financial resources to achieve the services goals and objectives while assuring efficient and effective expenditure of public funds. Graduate courses cover topics such as financial reporting standards, cost standards, cost analysis, budgeting, internal control, auditing, management planning and control systems, quantitative techniques used in planning and control, and the Planning Program and Budgeting Systems used within the Department of Defense.

Graduates of the Financial Management Curriculum will be prepared for assignment to positions in budgeting, accounting, business and financial management, and internal control and auditing.

### ***PGS MANPOWER/PERS TRA ANAL - MASL : P179105***

MS degree program. Program is designed to fill the leadership roles in military manpower management. MPTA is an extremely analytical curriculum intended to develop skills necessary to perform and evaluate manpower analyses. As such, the curriculum emphasizes mathematical, statistical, and other quantitative methods. Areas covered include an understanding of MPT policy development, compensation systems, productivity analysis, enlistment supply and retention models, manpower requirements determination processes, career mix, enlistment incentives, reenlistment incentives, training effectiveness measures and hardware/manpower tradeoffs. Students gain familiarity with current models and methods of MPT analysis as well as military MPT organizations and issues.

### ***PGS MECHANICAL ENGRG MS - MASL : P177715***

The objective of this program is to provide a broad-based, design oriented education focusing on the warship as total engineering system including hull, mechanical, electrical and combat systems. The program is for selected Naval/Mechanical Engineering students and is structured to lead to the MSME. Produces officers with technical competence to operate and maintain modern warships and naval systems. MS DEGREE PROGRAM

### ***PGS OCEANOGRAPHY MS - MASL : P174011***

MS degree program. Develop expertise to provide and use data and models in support of all aspects of at-sea operations.

SPECIAL NOTE: Please see Section II of the U.S. Navy International Training & Education Catalog for further information regarding quota procedures.

### ***PGS OPNS RESEARCH PHD - MASL : P179030***

PHD program.

### ***PGS RESEARCH MS - MASL : P177714***

Education in the application of quantitative analyses to operational, tactical and managerial problems.

### ***PH II MIL JUSTICE CONUS - MASL : P176023***

The Joint CONUS planning phase is conducted in the United States. A delegation of five to eight members from the participating country will travel to the United States and visit military installations, legal institutions, and other appropriate government agencies. During the visit to the United States, the delegation will receive a variety of briefings on U.S. programs. The ultimate goal of this MET is to clearly define the curriculum for future seminars. A CONUS planning visit can be held in various appropriate locations throughout the United States.

### ***PHARMACY SPECIALIST - MASL : B175248***

Provide a working knowledge of drugs, their sources, preparation, uses, incompatibilities, and doses; pharmaceutical symbols and terms; interpretation of prescriptions and medication orders; storage, control procedures, and dispensing procedures performed

under supervision of a pharmacy officer (AOC 67E) or a medical corps officer. Subjects include pharmacy administration, pharmaceutical calculations and chemistry, therapeutics, pharmaceutical preparation, sterile products, and pharmacy practice.

### ***PHYSICAL/SWIM/INDOC - MASL : P129492***

To provide physical and swimming training to foreign personnel to prepare them for follow on training in courses that require students to meet specific physical and swimming qualifications.

### ***PHYSIOLOGICAL - MASL : D175005***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***PHYSIOLOGICAL TNG OFF - MASL : D175066***

Runs in conjunction with B3OBY43A1 001, Aerospace Physiologist (USAF), and provides the knowledge to perform basic duties as an aerospace physiologist. Includes principles and application of aviation physiology, science of the earth's atmosphere, introduction to human factors, and aircraft accident investigation techniques. Instruction in the use of the night vision trainer, barany chair and applicable aircrew life support equipment necessary to expose physiologists to the flying stresses experienced by aircrews. Familiarizes students with operation and maintenance of low pressure chambers and associated equipment used in career field. Students undergo low pressure chamber, centrifuge, and advanced spatial disorientation demonstrator training. Students will also perform duties at each crew position on the low pressure chamber.

### ***PHYSIOLOGICAL TNG SPEC - MASL : D175003***

Provides knowledge and basic skills to perform entry-level duties as an enlisted aerospace Physiology Apprentice. Training includes basic facts and terms about aerospace physiology, physiology fundamentals, operation of hypobaric chambers and supporting equipment, other physiological training devices, personal life support equipment, administrative procedures of physiological training, aircraft emergency escape, cabin pressurization, and briefings on specialized aspects of MAJCOM aerospace physiology programs.

### ***PHYSIOLOGIST CRS - MASL : P175113***

The mission of the Student Naval aerospace Physiologist Course is to develop the knowledge, skills, and self-confidence essential for officers involved in the support of an Aviation Physiology Program. Training includes hypobaric chamber operations, aero medical aspects of flight, visual problems, spatial disorientation, protective life support and rescue equipment, emergency egress systems, operation and maintenance of training devices, instructor techniques and administrative skills. Environmental physiology, aviation medicine, and selected operational medicine topics are taught concurrently with the Student Naval Flight Surgeon Course.

Course is for officers with an education level of Masters Degree or equivalent experience. For enlisted training, the 10-week course is "Aviation Physiology Technician."

### ***PILOT INSTRUCTOR/T-38C - MASL : D115012***

Screens instructor potential and qualifies pilots to perform duties as T-38 instructor pilots in SUPT. Training consists of diversified flying in the T-38 aircraft and simulator. Academic training includes applied aerodynamics, flight planning, methods of instruction, and ancillary topics.

### ***PILOT/TACT INSTR/C-130 - MASL : D115018***

Formal school course that qualifies pilots to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. Includes academic, simulator, and flight training.

## ***PK LEGAL DEVELOPMENTS PKLD - MASL : P176017***

### PEACEKEEPING: LEGAL DEVELOPMENTS PKLD

PKLD promotes the rule of law by presenting the latest legal and organizational developments in the ever-changing field of peacekeeping.

What are the benefits of PKLD?

- Develops professionalism, knowledge about current peacekeeping issues, and the ability to participate effectively in peace and humanitarian missions by examining the operational impact of legal considerations that influence national involvement in current peacekeeping operations.
- Promotes understanding and cooperation between the U.S., partner nations and international organizations involved in peacekeeping.
- Condensed two week program provides a current update on pressing peacekeeping issues that are before the General Assembly and Security Council.
- Prepares participants to be able to make decisions based on the most current trends and developments in peacekeeping.

Who should participate in PKLD?

- PKLD open to military officers of any rank and civilian equivalents and there are no prerequisite requirements. PKLD is best suited for senior officials, faculty members of national peacekeeping training centers or War Colleges, and for staff military legal advisors who have a need to understand current developments in preparation for assignments in peace operations. There are no prerequisites.

What do PKLD participants learn?

- The curriculum is focused on international law and the work of international organizations along with a study of recent developments and trends in peacekeeping missions, peacekeeping policy, and doctrine directives. Participants take part in a working visit to UN headquarters in New York with UN Staff members, individual country missions, and regional organization staffs. The Informational Program features visits in the Newport area and Boston.

## ***PLANNING, PROGRAMMING, BUDGETING, EXEC SYSTEM - MASL : B156541***

Course Scope:

Resource management organizations and functions; budgeting; review and analysis; RDA management; Special Appropriations Management; commercial activities; cost analysis; economic analysis; installation management programs; Total Army Quality; commitment and obligation principles and rules; manpower and force structure management; management controls; auditing; flow, receipt and administrative control of funds; fiscal code; working capital funds; fiscal law and single stock fund.

Special Information:

This course serves as phase 1 of Comptrollership training for FA 45 and CP 11. This distributed learning course, the Planning, Programming, Budgeting, and Execution System (PPBES) Functional Course consists of three phases of Distance Learning development: Phase 1 - (6 lessons, 13 academic hours), Phase 2 - (7 lessons, 9 academic hours), and Phase 3 - 32 academic hours. On complete conversion to Distance Learning, the PPBES course will be linked through the LMS. The PPBES Distance learning course will be conducted via the World Wide Web using visual text, graphics, and audio. Students will access the training through the Reimer Digital Library. The course is asynchronous and includes student interaction, checks on learning, pre and post module tests. The student can contact a school representative via separate email function. Due to programming limitations, hot linked email cannot be embedded within a single lesson itself. The students may take the course from their home/billets, office, education center, or a Digital Training Facility. There are no read-a-heads for this course.

The course is Web-based only and can be accessed from the Reimer Digital Library for credit or information. PPBES is a prerequisite for enrollment in the Resource Management Budget Course as well as a mandatory component of the CPT OES initiative. PPBES is also a Resource Management Certification requirement for CP 11 civilian employees. The student will enroll once in PPBES and will complete all blocks of instruction, practice exercises, and pass post-module testing to receive credit for the course. The lessons covered in this development phase are not homework; they present separate distinct subject areas that the student needs to understand and to interact within PPBES courseware. The formal course title is Planning, Programming, Budgeting, and Execution System.

This courseware is primarily intended to provide essential training for personnel who will perform duties in Resource Management activities. This is the initial, leader development course for Functional Area (FA) 45 for officers and civilian personnel in the comptroller career field (CP 11), and other soldier and civilian personnel with duties closely related to FA 45 and CP 11. Its secondary purpose is for self-development or review. All who can access the Reimer Digital Library may review its contents. The entire course must be completed successfully before the student is awarded course credit. From a practical standpoint, 6 months seems reasonable for the student to complete all PPBES requirements. The logical sequence for this course follows the current approved POI. Following POI numeric sequence will ease control and tracking requirements. The DL Phase will eventually replace the resident course. With the completion of this development Phase and interlinking all development phases via the LMS, the residence course will be eliminated.

There should be a two-year overlap to allow for validation and full implementation. Both versions (Resident and DL) should coexist over the two-year span. Student registration for credit will be accomplished through ATRRS. All authorized personnel will be able to audit lessons for self-development or refresher training through the Reimer Digital Library. The Hours will remain at 76 until complete conversion and implementation to DL media. PPBES DL consists of approximately 64 academic hours of self-paced IMI via the Internet. The average student who takes a lesson here and there for self-development should be able to complete the lessons developed at the rate of one per hour. The students that take the lessons in consecutive logical blocks will probably complete the phase in less time than allotted. All lessons are tested utilizing post-module tests. The student must achieve the minimum stated score for each module to receive credit. All lessons must be successfully completed to receive credit (DA Form 1059).

### ***PLT INSTRUMENT PROCEDURES - MASL : D121064***

This course helps prepare pilots for flying missions under Instrument meteorological conditions (IMC) and in accordance with Instrument Flight Rules (IFR). It will teach both Federal Aviation Administration (FAA) and International Civil Aviation Organization (ICAO) rules and procedures. Students will learn the use of various charts, navigational aids, and instrument flight procedures, to include basic fundamentals and planning of international flight plans. There is no actual flight training involved, and application is taught via flight simulators. Graduates of this course are still required to apply these procedures in their respective weapon systems with an experienced instructor or evaluator in order to fully qualify for instrument flight operations.

#### **COURSE DESCRIPTION:**

- **BLOCK I - FUNDAMENTALS OF INSTRUMENT FLIGHT:** This unit is designed to improve basic instrument knowledge through the introduction of fundamental instrument procedures and concepts. Upon completion of this unit, students will comprehend the fundamental procedures for implementing the 60-1 rule, control and performance concepts, and instrument cross-check procedures. In addition, this unit teaches students procedures on the use of Navigational Aides (NAVAIDS), aircraft instrumentation, radial/arc intercepts, fix-to-fix navigation, and holding pattern procedures.
- **BLOCK II - FLIGHT PLANNING AND SPECIAL TOPICS:** The purpose of this unit is to enhance the student's instrument flight planning skills. The student will receive instruction on instrument approach procedures, the use of Jeppesen and Department of Defense charts, airspace and weather considerations, departures and arrivals, and spatial disorientation recognition. ICAO procedures are covered and compared with FAA instrument procedures. Additionally, a thorough revision of procedures used to calculate flight plan data and the submission of an international flight plan will take place during this block.
- **BLOCK III - INSTRUMENT APPROACH PROCEDURES:** This unit is designed to develop knowledge of procedures and techniques to fly precision and non-precision instrument approach procedures. Both high altitude and low altitude approach procedures are discussed. Additionally, techniques and procedures for missed approach and landing out of an approach receive in-depth analysis. Topics on autopilot approaches, safety of flight, Crew Resource Management, Global Positioning System operations, airspace and communications is covered to include a tour of the San Antonio or Kelly Field air traffic control facilities and tower. Terminal Instrument Procedures criteria is addressed to give the students basic understanding of instrument procedures and limitations.
- **BLOCK IV - INSTRUMENT SIMULATOR:** Fundamentals and performance of basic instrument skills is the objective of this block. The student will fly 21 missions in either a twin prop or twin jet simulator, such as, a Frasca 242 (twin prop), AST Hawk (twin prop), T40 (twin jet) or 737 simulator. Students will receive instruction in the following: basic instrument maneuvers, confidence maneuvers, radial/arc intercepts, fix-to-fix navigation, and holding pattern procedures. Students will additionally receive several hours of self-paced instruction on the NT361 computer based flight trainer (CBFT) where they will practice basic procedures individually or with an instructor. Students will practice all

maneuvers and instrument approach procedures, with emphasis on incorporating fundamentals, basic skills, and instrument procedures in several real-time missions. On the last simulator sortie of each block the student will receive a progress check of all assigned maneuvers. A comprehensive simulator check ride is administered at the end of this unit.

### ***POLLUTION RESPONSE - MASL : P122703***

The Pollution Response Course basic training covers 4 modules (prepare for incident response, assess on-scene situation, initiate actions to resolve/mitigate damage to the environment, and prepare and submit reports) dealing with the initial response and management of oil and hazardous materials pollution and other all-risk incidents.

### ***POST GRADUATE STUDY AT SALVE REGINA UNIVERSITY - MASL : P178000***

Post Graduate Studies Program

- INR 511 Philosophical Foundation of Politics
- INR 521 Global Ethics
- INR 512 Justice and Order in International Relations
- INR 516 Identity, Harmony and Conflict
- INR 513 Comparative Political Developments

### ***POWER GENERATOR EQUIP RPR - MASL : B174120***

Safety consideration; malfunction; diagnosing; organizational, direct and general support concepts for repair to replacement of defective components and assemblies of gasoline and diesel engines, electrical control systems of electric power generation and associated equipment.

### ***PR COMMON CORE CLASS A1 - MASL : P148375***

This course is designed to provide Navy and Marine Corps personnel with the basic knowledge and skills in the field of Aircrew Survival Equipment. This knowledge will enable them to perform as maintenance technicians at aviation activities, both afloat and ashore, under all operating conditions with appropriate supervision. Introduction and Indoctrination, Maintenance Concepts, Levels and Types, Tool Control Procedures, Foreign Object Damage (FOD), Common Tools, SEATS/ICAP Program, Corrosion Control, Aircraft Battle Damage Repair, Introduction to Composite Materials, Industrial Sewing Machine Usage, Operation and Maintenance, General Purpose Flight Equipment, Flight Helmets, Oxygen Masks, Anti-G Garments, Parachute Restraint Harness Assemblies, Anti-Exposure Assemblies, Survival Equipment, SV-2B (series) Survival Vest, Search and Rescue Equipment, LPP-1A Life Preserver Assembly, LRU-12/P Life Raft Assembly and Inspection Requirements, SKU-2/A Seat Survival Kit, Parachute Loft Administration and Structure, NB-8 Parachute.

### ***PRECISION MEAS EQUIP LAB - MASL : D131009***

Students learn to use technical data and test equipment to maintain and calibrate US Air Force Test Measurement and Diagnostic Equipment (TMDE). They receive theory, hands-on training, and apply electronic principles, data principles, logic analysis, shop procedures, testing, and maintenance management. Training includes the application of electronic principles, the use of electronic schematics, TMDE circuit analysis, AC/DC measurement, measurement techniques, oscilloscope calibration, waveform analysis, precise time frequency measurement, signal generation measurement, and physical dimensional measurement. Students are mission-ready certified on the calibration of the passive analog multimeter, digital multimeter, oscilloscope, pressure gauge, torque wrench, and frequency counter.

### ***PRECISION PHY/DM MEAS NAV - MASL : P148362***

INFO: Safety regulations require students to wear steel toed shoes. This course requires a background in Algebra and Trigonometric functions; it is recommended to have a scientific/engineering calculator and be knowledgeable in its operation.

PURPOSE: Train Navy Enlisted and DOD Civilians in principals, methodology and calibrations to perform as Advanced Calibration Technicians in the Physical, Mechanical and Dimensional areas of Navy Calibration Programs.

SCOPE: Personnel are trained in linear, angular, optical, temperature, force, mass and weight, density, viscosity and flow, pressure, torque, rotary motion, humidity and gas analysis. Training includes measurement principals, applied mathematics, use of test equipment and calibration procedures. Course testing is accomplished through progress checks and written measurement. Application and calibration of test equipment included: Portable Pressure Testers, Dead Weight Testing Systems, Load Cells,

Theodolites, Surface Plates and Mercury Vapor Sniffers. A pre-entrance test is required to be completed prior to enrollment in this course.

### ***PRED REQUAL SR PILOT - MASL : D116186***

Trains personnel to mission ready (MR) status in the pilot and sensor operator crew positions on the MQ-1 Predator system in the following missions: Intelligence, surveillance and reconnaissance (ISR). Strike coordination and reconnaissance (SCAR). Surface attack tactics (SAT). NOTE: This course will not qualify crewmembers to launch, takeoff, or land the aircraft.

### ***PRE-HOSP TRAUMA LIFE SUPPORT - MASL : B175482***

The Defense Medical Training Institute (DMRTI) located at Fort Sam Houston, TX provides the Pre-Hospital Trauma Support Course which is based upon the Advanced Trauma Life Support (ATLS) course for physicians developed by the Committee on Trauma of the American College of Surgeons. Student's participant in an intensive 2-1/2 day experience with lecture and skill stations content to identify the need for life saving interventions for the multi system trauma patient. The intent is to provide the student with a specific body of knowledge related to the pre-hospital care of the trauma patient. This course includes practical exercises and examinations, which reinforce the material presented in the lecture and practical sessions.

### ***PREVENTIVE MEDICINE SPECIALIST - MASL : B175237***

Inspect and evaluate sanitation and safety of living quarters, food service facilities, water supplies, industrial operations, and other facilities and operations as required. Evaluate adequacy of wastewater and solid waste disposal operations. Perform various entomological functions in support of insect and rodent control programs. Help collect data for communicable and occupational disease investigations.

### ***PRIN INVEN CTRL (WPN SYS) - MASL : P152085***

Principles of Inventory Control (PIC)

International Officers only, grade O-1 to O-4, waivers available for civilian and enlisted students. Course provides a detailed overview of Acquisition Logistics, Allowance Models, Integrated Logistics Support (ILS) and Inventory Control Point (ICP) operations, with a focus on weapons systems support. Course includes study of math models for outfitting and determining allowances quantities. Also discusses ship transfer and shipyard procedures, and specific allowance determination for the FMS customer.

### ***PRIN OF MILITARY PREV MEDICINE - MASL : B175236***

Provide Army Medical Department (AMEDD) officers with the skills and knowledge to function in preventive medicine specialty areas at an entry level. Subjects common to all preventive medicine are presented in a common core for all students. In addition, each group receives instruction unique to their specialty.

### ***PRINC DEF PROCUREM & CONTR - MASL : P159202***

PRINCIPLES OF DEFENSE PROCUREMENT AND CONTRACTING

This two week resident course is offered twice yearly immediately following the Principles of Defense Acquisition Management course. The course provides an in-depth examination of policy, procedures and best practices applicable to all phases of the procurement and contracting process. During the course, international practices which include the U.S., EU and NATO models for procurement and contracting are examined. The goal is to enable course participants to understand and implement, to the extent possible, the principles of efficient and effective procurement and contracting systems. Specific topics include transparency, procurement planning; market research, writing and reviewing work specifications, competition policies, developing requests for tenders, tendering methods, evaluation techniques, analysis of technical and price proposals, contract administration/management and contract closeout. Additionally, the course includes in depth discussions of development and use of reporting systems and creation and sustainment of a professional procurement workforce. A study of concepts and practices related to on line auctioning and electronic procurement are also included. This course is approved for E-IMET funding for civilian students.

The course is highly interactive and combines lecture and class discussion with group exercises. This course is suitable for military officers (grade 0-4 through 0-6) and civilian officials who deal in any aspect of procurement and contracting or in peripheral fields such as economics, program management, logistics or budgeting and finance.

### ***PRINCIPLES OF INSTRUCTION - MASL : D166039***

This course provides training in instructional methodology with emphasis on actual practice teaching. The major subject areas included in the course are the learning process, communicative skills, curriculum development, instructional media, student measurement, lesson planning, questioning techniques, and student counseling. The course is available to active duty Air Force, AFRES, ANG, and other Department of Defense personnel who are involved in teaching programs. This course is group-paced.

### ***PRINCIPLES OF METALLURGY - MASL : D148075***

Identification and specification of metals; operations and procedures used in heat treatment of metals; testing of metals; correction of heat treatment troubles; inspection of grain structures; and operation of heat-treating equipment. Training includes: mechanical and physical properties of metals; theory and principles of heat treating; furnace operation/adjustment and calibration of furnace controls; heat treatment of ferrous and non-ferrous metals, including hardening, tempering, annealing, normalizing, and case hardening of steels; and solution and precipitation heat treatment of heat and corrosion resistant metals and aluminum metals. Safety, compliance with standards, Operational Risk Management, and Air Force core values are stressed in all phases of the course. Class starts at 0600 in Building 3074, Dickson Hall.

### ***PROFESSIONAL/SPECIALIZED - MASL : D171010***

The Air War College mission is to develop and support senior leaders through education, research, and information programs focused on strategic and institutional leadership, joint and multinational warfighting, multi-agency international security operations, air and space force development, and national security planning. In the core curriculum, the Leadership and Ethics course prepares students to make successful strategic decisions. The course examines the personal and environmental senior leadership competencies required of today's complex, multi-cultural, expeditionary warfighting environment. The Foundations of Warfighting course provides students with a common framework for examining the development and practice of military strategy in order to broaden the students perspective regarding the nature of strategy and applying the military instrument of national power. The course provides a deep appreciation of the relationships between military operations and political purpose, and how this relationship influences choices about the use of military power in pursuit of national objectives. The National Security and Decision Making course assesses the context and processes for developing U.S. security strategy and policy as well as the military force structure to support policy and strategy. The context assessment encompasses the overarching cultural, religious, political and economic currents that influence local, regional and global security environments. The course assesses the role and impact of civil-military relations on policy development and execution. The Regional Studies (RS) course prepares senior leaders to investigate, analyze, and evaluate a geographic area from a combatant commander perspective in support of international and national security policies. To meet the challenges of the Air and Space Expeditionary Force, the course provides students the opportunity to evaluate an area of the world where a unified combatant commander must implement the national military strategy in support of US security policy. The course provides the opportunity for students to gain unique perspectives by studying and visiting one of 16 regions.

The Joint/Coalition Military Operations course prepares senior officers to deploy, employ and control joint forces across the spectrum of conflict. The course emphasizes the employment of air and space forces as they contribute to the joint, combined or coalition environment in support of the National Military Strategy. The course assesses the best ways to present, plan, and control military resources (U.S. and coalition) as they serve the unique requirements of the Combatant Commander. The Global Security course examines the roles that nations and non-state actors play in shaping the global environment. The course uses a comparative approach to examine the political and economic elements of actors and their impact across a wide range of global security issues and environments. In the Research course, students exercise their critical and creative thinking skills as well as their ability to communicate actionable results to a potentially wide audience. Students may chose a topic sponsored by a military agency or develop a topic on their own. Students work with faculty and research advisors as well as sponsors to research and document their results, recommendations and insights. The Professional Studies Project (PSP) results in a 25-30 page deliverable. With the author's permission, Air University post papers on AU Web site and provides copies to the Defense Technical Information Center, Air University Library, and the Force Academy Library. In addition, sponsors receive a copy of the product for their use. Although most research is an individual effort, the AWC offers students the opportunity to complete the PSP as part of a group research effort. In the elective curriculum, students complete three electives.

### ***PROGRAM MANAGEMENT OFFICE - MASL : B154030***

The Program Management Office Course (PMOC), Part A, is the first part of the Level III certification course in the Program Management (PM) career field. It is a follow-on to ACQ 201B and PMT 250 and is designed to train Level II qualified students to be effective PM Level III leaders in a program office by honing analysis, synthesis, and evaluative skills. PMT 352A focuses on key PMO knowledge and skills not covered in the prerequisite courses. This course must be completed prior to attending PMT 352B.

Objectives: Students who successfully complete this course will be able to:

- Describe the role of science and technology in supporting the system acquisition process;
- Understand Information Technology (IT) policy, best practices, information assurance measures, and interoperability considerations;
- Describe current manufacturing and logistics concepts and best practices, such as lean manufacturing and supply chain management; and
- Explain appropriate management and decision making models to aid in addressing various acquisition program issues (business and financial; international; environmental, safety, and health; etc.).

### ***PROGRAM MANGT TOOLS DL - MASL : B154813***

The Program Management Tools course provides application skills needed in a program office or as an Integrated Product Team (IPT) lead. It is a follow-on to ACQ 201B and is designed to enhance journeyman-level skills. This course is required, along with ACQ 201B, for Level II certification in Program Management (PM) and also prepares students for later work in the Level III Program Management Office Course, PMT 352, Parts A and B.

Objectives: Students who successfully complete this course will be able to:

- Apply best practices for establishing effective IPTs;
- Develop Work Breakdown Structures (WBSs);
- Build program schedules and apply risk management principles using state-of-the-industry software;
- Apply current cost estimating processes;
- Perform contract planning and post-award activities; and
- Use earned value tools and techniques for program planning and control.

### ***PROGRAM MGT OFC RESIDENT - MASL : B154031***

The Program Management Office Course (PMOC), Part B, is the second part of the Level III certification course in the Program Management (PM) career field. PMOC is a follow-on to ACQ 201B and PMT 250. The classroom component of PMOC, PMT 352B, follows PMT 352A, which is the prerequisite distance learning component of PMOC. These courses are designed to train Level II qualified students to be effective PM Level III leaders in a program office by honing analysis, synthesis, and evaluative skills. PMT 352B features scenario-based practical exercises with topical themes, such as interoperability, prototyping, and evolutionary acquisition.

Objectives: Students who successfully complete this course will be able to:

- Lead and contribute to effective teams in a DoD PMO;
- Apply critical-thinking and problem-solving skills to systems acquisition problems throughout a defense systems life cycle;
- Understand, analyze, and develop solutions to cost, schedule, and performance issues faced in defense program management; and
- Evaluate the tradeoffs in program decisions in compliance with DoD 5000 Series directives.

### ***PROGRAM ON TERRORISM SECURITY STUDIES (PTSS) - MASL : B279002***

The course will focus on introducing methods that will effectively help a nation combat terrorism but still allow it to adhere to the fundamental values of a democratic society. Participants will develop a common understanding of the definition of terrorism and establish contacts that will help them approach this problem in a collegial, international environment. The PTSS will give current and future national security officials an appreciation of the nature and magnitude of today's threat. By developing common grounds of knowledge, understanding and contacts, an intellectual interoperability, PTSS will improve national security officials'

ability to counter terrorism's regional implications that transcend national borders by cooperating internationally. Finally, the course will help integrate the counter-terrorism community and enable individual nations to cooperate successfully in the on-going global war on terrorism.

Designed for government officials and military officers currently employed in mid-level and upper-level management of counterterrorism organizations.

### ***PROGRAMMING SPECL - MASL : D156016***

This course teaches an introduction to software technology, hardware concepts, software concepts, software engineering goals and principles, the software life-cycle, problem solving and algorithm design. Computer concepts, internal data representation, computer architecture, and communications fundamentals are also addressed. Program Design Language will teach logic and design methodologies. Visual Basic programming will teach high order language concepts such as conditional statements, iterative statements, error handling, file processing, procedures and functions, and general event-driven practices. In addition, software maintenance concepts and database management systems development, usage and maintenance are addressed.

### ***PROPUL FUEL TESTING-SHPBD - MASL : P145759***

#### SHIPBOARD PROPULSION FUELS AND OILS AND JP-5 SYSTEMS AND TESTING

The Shipboard Propulsion Fuel and Oil, JP-5 System and Fuel Testing course is designed to provide Oil King and fuel handling personnel basic knowledge, and the skill necessary to operate/maintain propulsion/JP-5 shipboard fuel systems, to monitor the quality of shipboard fuels through a vigilant fuel testing program, and provide familiarity with logs, records, and reports necessary to monitor fuel and oil usage. Instruction of the physical properties of propulsion/JP-5 fuels used in Navy ships and aircraft and the significance of the quality test performed thereon; functional training regarding steps and procedures to conduct required quality surveillance testing of propulsion, JP-5 fuels and oils used in Navy ships and aircraft; lubricating oil management, the Navy Oil Analysis Program (NOAP) and logs, records, pollution abatement and control, and reports needed to monitor shipboard fuel and oil use; and characteristics and hazards of fuel tanks, transfer, stripping and service piping, pumps, and filters.

### ***PROSP CO/XO/COMBAT SYS(NO) - MASL : P179355***

#### PROSPECTIVE COMMANDING OFFICER/PROSPECTIVE EXECUTIVE OFFICER/COMBAT SYSTEM OFFICER (NORWAY).

This course is specific to NORWAY and trains personnel to direct warfare area operations, operate the Advanced Display System and C&D System consoles in a command role. This course provides Prospective Commanding, Prospective Executive Officers and Combat System Officers with command level knowledge in the operational characteristics, capabilities, limitations, and administrative requirements of the Integrated Weapon system. Additionally, this training provides the general, physical, and functional descriptions of the Royal Norwegian Navy (RNoN) FFG Combat System elements, computer programs and integration descriptions of elements within the Combat System for a specific hull. The course Training provides the management level information required to direct system operation in anti-air, anti-surface warfare. Personnel will conduct multi-warfare scenarios, constructing, entering, and manipulating operational doctrine, make tactical and administrative considerations, management techniques for the system, under simulated underway conditions.

Hands-on instruction (approximately 40% of the course) includes operational scenarios.

### ***PROSP COMMANDING/EXEC OFF - MASL : P171300***

This advanced course covers specific topics to enhance preparation of officer and senior enlisted personnel for command at sea. The course includes classroom and lab work, case studies and practical instruction in ship handling, rapid radar plotting, radar collision avoidance, military justice, stability, and public affairs. The value of this course is highly dependent upon active student participation.

### ***PROSTHODONTICS - MASL : P175661***

#### PROSTHODONTICS IN THE COMPREHENSIVE DENTAL PRACTICE

The purpose of this training is to help board eligible candidates prepare for comprehensive oral exam by reviewing all areas of oral medicine. Scope: Case histories will be presented for oral medicine and candidates will answer questions about patient management and recommended treatment modalities. On pharmacology, candidates will be examined on modes of action of drugs

and their interaction. Radiology will be presented by having candidates make differential diagnosis from radiograph and discuss accepted standards of radiation technique and safety.

### ***PS-SCH (PORT SEC) - MASL : P179121***

This course teaches enlisted personnel to perform as junior petty officers at the job entry level in the Port Security Specialist rating. Students will be taught basic maritime law enforcement. Subject matter covered includes the following: Physical Security and Protective Measures, Coast Guard Unit Security, Commercial Facilities Security, Introduction to Small Arms (M-9, M-16 and M870), Authority and Jurisdiction, Asylum Requests, Harbor Control, Terrorism, Security Patrols, and Incident Command System (ICS).

### ***PSYCHOLOGICAL OPERATIONS OFFICER - MASL : B126619***

Introduction to Psychological Operations; doctrine; organization and employment; PSYOP development process; marketing and advertising principles; social and behavioral science; adaptive leadership techniques; public diplomacy; interagency; Army digital training; political/military analysis; contemporary issues and PSYOP; course exercises and examinations.

### ***PT-6A ENGINE TECHNICIAN - MASL : D141280***

This course is designed to provide PT-6 engine technicians advanced operational theory and hands-on maintenance training in order to establish a solid craftsman foundation, with extensive knowledge on intermediate level maintenance repair skills. The student will analyze facts and draw conclusions related to operation and troubleshooting of the PT-6 engine and engine systems. Students are required to pass a written and or performance test at the end of certain blocks prior to advancement to the next block of instruction.

#### **COURSE DESCRIPTION**

- **BLOCK I PT-6 ENGINE FAMILIARIZATION** This block begins with a course introduction, in which students learn about the academy's policies and procedures along with academic requirements. Subsequently, students are given an orientation of the aircraft and engine maintenance campus and academic objective requirements. Immediately afterwards, students receive a thorough description of the PT-6 engine main sections, engine air system, engine lubrication system, engine start system, engine fuel system, engine controls and instruments. Finally, the students are given a comprehensive written examination covering everything learned throughout this block of instruction.
- **BLOCK II HOT SECTION INSPECTION AND MAINTENANCE** This block covers full engine teardown and build up procedures. This includes hot section inspection, and general inspection procedures, engine power section removal, compressor turbine segment measurement and grinding procedures, and installation of the gearbox and external components. This block of instruction concludes with a written exam and course assessment

### ***PUBLIC AFFAIRS SUPERVISOR - MASL : B164593***

This course consolidates the Public Affairs Supervisor Course and Advanced Public Affairs Supervisor Course. It updates tasks and supporting materials placing greater emphasis on leadership and management concerns in the Joint Operations arena. Its target audience is mid-level and senior public affairs specialists from all branches of the Armed Forces. The course provides instruction in enhanced public affairs skills, training methods and management techniques for noncommissioned officers and civilian employees. The training focuses on tools for measuring effective public affairs programs, assessing markets for public information, media operations, resource management, and emerging trends in PA and military communications.

### ***QUALITY CONTROL/ACFT - MASL : D148097***

Provides training in the knowledge and skills necessary to perform various duties within a Quality Assurance (QA) organization. Training includes: responsibilities of the Quality Assurance Flight, QA programs and assessments including the Quality Assurance Program (QAP), Product Improvement Program, Quality Assurance concepts, and USAF Publications Systems including technical orders and Time Compliance Technical Orders (TCTO).

### ***QUALITY MANAGEMENT PROGRAM - MASL : P162376***

Provides the necessary knowledge to effectively manage a quality assurance program within an intermediate maintenance activity.

### ***QUARTERMASTER BASIC OFFICER LEADER - MASL : B121280***

Unit management tasks; tactical logistics operations; leadership; supply support activity procedures; trial delivery and field services; petroleum and water operations, and subsistence.

### ***QUARTERMASTER/CHEMICAL EQUIP RPR - MASL : B148380***

Performance of unit, direct and general support maintenance on laundry, bath equipment, pumps, engines, burner equipment, decontamination equipment, filters units, smoke generators, water purification equipment and basic knowledge and skills training.

### ***R-25 FUEL SYS OPER - MASL : D314301***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***RADAR REPAIRER - MASL : B148390***

An intensive course in basic electronics, digital technology, and advanced electronic theory. Provides training on Warrior Tasks and Battle Drills.

### ***RADAR REPAIRER/TPQ-37 - MASL : B148393***

Basic digital, computer and radar fundamentals; test, troubleshoot and fault isolate defective component(s); and perform required Organization, Direct and General Support level maintenance troubleshooting, repair and alignments. Provides training on Warrior Tasks and Battle Drills.

### ***RADIO REPAIRER ONLY - MASL : B137200***

Perform direct support, general support, and depot level maintenance on tactical and semi-fixed communications equipment and systems, and repair COMSEC equipment by substitution of pluggable assemblies at the direct support level. Perform direct support, general support, and depot level maintenance on tactical and semi-fixed communications equipment and systems, and repair COMSEC equipment by substitution of pluggable assemblies at the direct support level.

### ***RADIOLOGICAL SAFETY - MASL : B127053***

This 120 hour course provides an in-depth knowledge of the calculations involving the shielding of beta and gamma radiation, decay and the half-life concept. It also provides the student with the opportunity to learn decontamination procedures using open source radioactive nuclides deposited on a variety of materials in a laboratory environment under strict supervision of the instructors. The student also obtains a working knowledge of fundamental radiological safety principles for ionizing and non-ionizing radiation, to include storage, handling, transportation, disposal, reporting, control, and general precautions for depleted Uranium, Tritium, X-rays, microwaves, and lasers. Students gain hands-on experience with scalar counters and a variety of other instruments. This course will qualify an individual as an Installation Radiation Protection Officer.

### ***RADIOMAN USCG - MASL : P145296***

This course trains personnel in the knowledge and skills required of a Third Class Boatswain Mate. The course is intended for non-rated personnel (E-1 to E-3) with little or no related experience. Training includes physical fitness, leadership, first aid, and underway operations for cutters and small boats (primarily 41-foot) including basic marlinespike seamanship, deck seamanship, underway operations (cutters and small boats), navigation rules, communications, piloting and navigation, anchoring, firefighting and dewatering, egress from capsized vessel, open-water survival techniques, aids to navigation, rescue and survival equipment and procedures, personnel rescue and evacuation, towing and assistance operations, and basic visual signaling.

Prerequisites: None.

### ***RAM-AIR PARACHUTE SYSTEMS - MASL : B152398***

Personnel will receive instruction on packing and inspection procedures of the Ram-Air parachute systems. Personnel will receive instruction on packing and inspection procedures of the Ram-Air parachute systems.

### ***RANGER - MASL : B121181***

The Ranger Course consists of three phases. The first phase, (Benning), is conducted at Fort Benning, Georgia for 20 days. The second, phase (Mountain), is conducted near Dahlongega in the mountains of North Georgia for 21 days. The third and final phase, (Swamp/Jungle/Urban), is conducted at Eglin Air Force Base in the North Western Florida for 18 days. Two days at the end of the course are used for out processing and graduation.

### ***RC NATIONAL SECURITY - MASL : B172632***

The RCNSC is a two-week course designed to enhance appreciation for and understanding of the factors on which national security is based, its development process, and the allocation and management of defense resources in support of national security policy. The RCNSC lays a foundation for students moving on to joint command management and staff responsibilities in a multinational, intergovernmental or joint national security setting. The curriculum consists of lectures, panel discussions, seminars, on-site visits and simulation exercises dealing with national security policy and defense resource management. The presenters are faculty members of the National War College, the Industrial College of the Armed Forces, the Joint Forces Staff College, the Information Resources Management College, and other distinguished speakers.

### ***RECRUIT DIV CDR - MASL : P166023***

RECRUIT DIVISION COMMANDERS SCHOOL

To train enlisted personnel, E-5 - E-9, to effectively undertake the basic military training of a division of naval recruits, facilitating a smooth transition from civilian to Navy life. Scope: The 13 week training provides instruction in military indoctrination, seabag and barracks, military drills, division management and those portions of the behavioral sciences, which will prepare him/her to support and carry out the command mission while he/she is engaged in leading recruits.

Prerequisite: The trainee must satisfy qualifications set forth by the Enlisted Transfer Manual. This course is open to all rates.

### ***RECRUITER - MASL : D162025***

Provides training for selected Air Force personnel (SDI 8R000) in the knowledge and skills necessary to perform duties as recruiters. Includes speech fundamentals and delivery of a persuasive speech, sales fundamentals and making a sales presentation, eligibility requirements, applicant processing and classification, delayed enlistment program, advertising and promotion, telephone techniques, management of recruiter activities, recruiter-related safety, stress management, and AFRISS computer functions including familiarization, lead management, files management, electronic mail, and files maintenance.

### ***RECRUITING COMPANY COMMANDER - MASL : B162003***

Curriculum designed to provide training in the principles of sales, time management, personnel procurement, analysis, and market penetration.

### ***REFR SURV TRNG EJECT SEAT - MASL : P117415***

REFRESHER SURVIVAL TRAINING FOR AIRCREW FLYING EJECTION SEAT EQUIPPED AIRCRAFT (R1/RP1)

Provides platform-specific scenario-based survival refresher training for aircrew flying ejection seat equipped aircraft. Combines courses B-9E-1224 (NAWSTP R-1) and B-322-0041 (TAC JET REFTRA).

Scope: Includes overview of the Naval Aviation Survival Training Program; classroom instruction on stress and human performance; classroom presentations and laboratory evolutions to include aviation physiology, parachute descent/landing/drag procedures, ejection seat training, sensory physiology, Combat/Survival First Aid (SELF), aviation life support systems, signaling devices, aviation survival swim skills, underwater problem solving skills, multiplace aircraft underwater egress skills, extended sea survival, life raft organization, rescue procedures and a written final examination.

### ***REFRIGERATOR AND AIR COND - MASL : P145414***

This advanced level course teaches specific machinery and related systems.

### ***REFUELING TRAINING - MASL : D301033***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full

consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country, but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***REPRODUCTION EQUIP RPR - MASL : B149084***

Troubleshooting and repair of major items of lithographic equipment. Orientation on unique equipment found in the different services.

### ***RESEARCH ONLY PROGRAM - MASL : P179914***

This program is for international military officers enrolled in resident in-country masters programs who are interested in conducting cooperative research at the Naval Postgraduate School in conjunction with their thesis requirements.

### ***RESIDENCE IN AEROSP MED II - MASL : D175105***

Provides advanced training in aerospace, occupational medicine, and general preventive medicine leading to eligibility for certification by the American Board of Preventive Medicine in aerospace medicine plus either occupational medicine or general preventive medicine. The residency consists of the following:

- One academic year (Phase I) of graduate study in preventive medicine at a school of public health accredited by the Council on Education for Public Health (CEPH), culminating in a Masters of Public Health (MPH) degree. This year includes training in epidemiology, public health, biostatistics, toxicology, and other required subjects as specified by the school of public health.
- One aerospace medicine practicum year (Phase II) accredited by the Accreditation Council for Graduate Medical Education (ACGME) at the USAF School of Aerospace Medicine. This year includes training in aerospace physiology, aircrew selection, health maintenance of patients, health administration and management, aeromedical research, operational support, medical officer flight familiarization training, basic combat survival training, water survival training, aircraft mishap investigation, and clinical aerospace medicine, space medicine, community and international health, and hyperbaric medicine.
- One occupational medicine practicum year, or alternatively, one general preventive medicine year (Phase III) at the USAF School of Aerospace Medicine. This year includes training in clinical occupational medicine, preventive medicine, public health, and occupational health administration and management. Residents may select a curriculum track leading to board eligibility in either occupational medicine or general preventive medicine.

Objectives: Prepare selected flight surgeons to accomplish all aspects of operational medicine support to include the practice of aerospace and general preventive medicine to be authorities in the fields of aerospace, occupational, and general preventive medicine, and to be board certified by the American Board of Preventive Medicine (ABPM) in those fields. Residents who are Doctors of Osteopathy (DO) and have not met ABPM clinical year requirements for board eligibility are expected to challenge the corresponding board examinations offered by the American Osteopathic Board of Preventive Medicine (AOBPM).

### ***RESOURCE MANAGEMENT BUDGET - MASL : B156542***

Budgeting at all levels from activity to congressional level in different appropriations or commands.

### ***RESOURCE PLN/MGT INTDEF MS - MASL : P179905***

This is an interdisciplinary program, which integrates mathematics, accounting, economics, behavioral science, organization and management theory, operations/systems analysis, managerial communications, and international law into an understanding of the process by which the defense mission is accomplished. The course of studies explores the interface among international politics, national security objectives, civil-military relations, resource planning and management, and synthesizes the political, technological, economic, cultural, social and ideological forces influencing international defense. Students receive extensive exposure to human rights issues. It provides techniques of quantitative problem-solving methods, behavioral and management science, economic analysis and financial management, which will enable graduates to evaluate the written research, study and analysis products of others throughout their careers. The course curriculum is conducted in two phases beginning with two quarters of management fundamentals and followed by four quarters of graduate level courses.

***RISK ANALYSIS - MASL : B151804***

This course is a comprehensive introduction to the qualitative and quantitative methodologies for conducting a risk analysis of a project or program. Practical experience is gained using actual case studies, which have been adapted for instructional purposes. Specific subjects include brief reviews of probability and decision theory; introduction to networking and simulation techniques and software; and integrative practice through small group workshops based on actual case studies. (Note that the current 1-week course is roughly equivalent to the second week of ALMC's former 2-week Decision Risk Analysis Course, DRAC, formerly ALMC-DA.)

***RIVERINE OPS PLANNING - MASL : P145909***

Provides designated junior officers and senior enlisted personnel the specialized training necessary to safely and effectively plan and execute patrol craft missions in a riverine environment. Consists of an overview of riverine patrol craft engineering and component systems with instruction in riverine unit organization and missions, basic riverine operations planning, seamanship, navigation, communications, weapons, riverine patrol techniques, principles of board and search, emergency drills, first aid, basic human rights and maritime law enforcement.

***ROKN SUB WARFARE - MASL : P135455***

This course of instruction is intended to provide Submarine Force personnel specialized classroom training on various tactical and operational topics. Scope: Training topics include Submarine Fire Control Operations, SONAR, Plots, Periscope Skills, Undersea Warfare, Surface Warfare, and Littoral Operations.

***ROLAND & ASSOC MONTEREY CA - MASL : B178090***

This MASL is used when Contractor Services for Roland & Associates Monterey California is programmed.

***ROTARY WING PILOT - MASL : P118301***

To provide experience in actual testing of modern aircraft and airborne systems and reduction and reporting of the data obtained. The rotary wing curriculum prepares pilots and engineers for flying qualities and performance testing of primarily the helicopter and secondarily the airplane. Please contact USNTPS at our website at [WWW.usntps.navy.mil](http://WWW.usntps.navy.mil) for further information.

***RSNF AVIATION PREP SCHOOL - MASL : P119311***

Prepare international officers as Pilots and Weapons Systems Operators for successful completion of U.S. Naval Aviation training. This curriculum consists of six primary areas of instruction: Aerodynamics, Aircraft Engines, Navigation, Flight Rules and Regulations, Meteorology, and Physical Fitness/Survival Swim/CPR/First Aid.

***RSNF STUDENT ADMIN - MASL : PADMIN1***

RSNF STUDENT ADMIN

***RSNF STUDENT LEAVE - MASL : PLEAVE1***

LEAVE TIME - STUDENT

***RULE LAW&DISCP MIL OPS FOT - MASL : D176006***

The objective of this course is to teach international officers and NCOs of any military force the basics of the international rules of law and their impact on human rights, including how these international standards fit into the planning of military operations. This information is vital to any country that may participate in international peacekeeping missions sponsored by the United Nations. This is an Expanded International Military and Education Training course offered between periods A and B, B and C, and if the schedule permits, at the end of C period.

**COURSE DESCRIPTION** The Defense Institute of International Legal Studies, a detachment of the US Naval Justice School, teaches this course at the academy. The course is a week-long guided discussion seminar conducted by Spanish speaking JAGs of the US Air Force with no final exam. Subjects of discussion include rules of engagement, the law of armed conflict, the role of a military justice system, and human rights. Depending on availability, the students will spend an afternoon visiting an actual military courtroom located at Lackland AFB, TX.

### ***RULE OF LAW&DISCP MIL OPS - MASL : P176038***

The International Maritime Officers Course (P171575) contains this 1-week (32-hour) course on international law, human rights, law of the sea, military justice, law of war, and rules of engagement for international students attending U.S. military schools. It combines lecture presentations by experienced USCG and Navy judge advocates with interactive discussion problems to engage international students in analysis and application of the principles advocated by the Expanded International Military Education and Training (E-IMET) initiative. Because the target audience for International Maritime Officers Course (IMOC) is maritime officers, the curriculum is adapted especially for naval officers and includes material on maritime legal issues. Although this course is part of the IMOC curriculum, international students also can sign up to attend this course separately.

### ***RULE OF LAW&DISCP MIL OPS - MASL : P176036***

This course Provides line officers and senior enlisted personnel of any international military the basics of the rule of law, its impact on human rights, and how these considerations fit into the planning and conduct of military operations. The course includes consideration of such fundamental concerns as the Rules of Engagement, the Law of Armed Conflict, and the role of military justice system in the accomplishment of disciplined operations. U.S. Military Judge Advocates who utilize a DIILS curriculum teach this course.

### ***RW INST FLT EXAM -EN - MASL : B115023***

Instrument, instrument instructor, and instrument flight examiner training to include: basic and advanced instrument flight and emergency tasks, and instrument instructor and flight examiner techniques. Academic instruction includes: regulations for Army aircraft, flight plans, air traffic control, instrument approach criteria, cockpit communications, and fundamentals of instruction.

### ***RW INST FLT EXAM-ALL - MASL : B115017***

Course provides for instrument, instrument instructor, and instrument flight examiner training to include: basic and advanced instrument flight and emergency tasks, and instrument instructor and flight examiner techniques. Academic instruction includes: regulations for Army aircraft, flight plans, air traffic control, instrument approach criteria, cockpit communications, and fundamentals of instruction.

### ***RW INSTRUMENT-GERMANY - MASL : B113003***

This course is designed to provide the student with the necessary skills and knowledge required to achieve pilot qualifications necessary for the safe operation of helicopters during actual or simulated instrument conditions. Includes training in the mental and physical skills required for the accomplishment of pilot duties through instruction in aircraft systems, communication, navigation, flight training, and safety.

### ***S/P AIR SICK DESENSITIZE - MASL : P175305***

A comprehensive treatment of last resort for airsickness in aircrew who have not adapted to the disequilibrating environment of flight. SPAD use of cross-coupled coriolis stimulation (a hypothetical force postulated to explain a deflection in the path of a body moving relative to the earth when observed from the earth. The deflection (Coriolis effect) is due to the earth's rotation and is to the left in the S hemisphere and to the right in the N hemisphere) combined with extensive biofeedback techniques have enabled most aircrew with seemingly intractable airsickness to return to flying. Treatment typically takes from four to five weeks.

### ***SAFE BOAT FAM & INDOC - MASL : P121041***

The four-week manufacturer course will provide operational familiarization and indoctrination into the unique capabilities of the Defender Class Response Boat Small (RBS) and the Arch Angel Class Fast Response Boat (FRB). This course is intended for countries that have purchased RBS ad FRB assets.

### ***SAFETY SPECL - MASL : D122023***

Provides training for Air Force, ANG, and AF Reserve personnel to perform duties as a safety apprentice in USAF safety program(s). Training areas includes: Safety Career Field, Education, Training and Publications--Local Traffic Conditions, Safety Career Field Orientation, Security, Safety Functions, Publications, Safety Education, Traffic Safety Programs, Safety Training, Conduct Safety Presentations, Written Test and Critique; The USAF Mishap Prevention & Occupational Safety, Fire Prevention, and Health (AFOSH) Program--Programs Content, Safety Elements, Product Purchases, Contract Safety, Hazard Abatement,

Safety Councils and Committees, Support Agreements and Plans, Safety Criteria For Blueprints, Operational Risk Management (ORM) Program; Mishap Investigations and Reporting--Responsibilities, Human Factors, Review Information, Air Force Safety Automated System, Investigation and Reporting, Assemble Formal Reports, Post-Report Activities, USAF Deficiency Reporting System; Safety Inspections, Assessments, and Staff Assistance Visits--Objectives, Methodology, Preparation, and Frequency, Post Report Activities, General Safety Criteria, Confined Spaces, Lock-Out/Tag-Out Procedures; Industrial and Non-Industrial Areas--Industrial Areas, Weapons Areas, Flight Line Areas, Non-Industrial Areas, Perform Safety Inspection, Prepare Safety Inspection Report.

### ***SAL-SOFTWARE ACQUISITION LEADERSHIP - MASL : B155496***

This course provides comprehensive insight into the risks and issues associated with developing and implementing complex software systems. Students will examine the risks, problems, and issues that challenge large or complex software acquisition, integration, or development efforts and evaluate strategies, methods, and tools to achieve successful program outcomes. Specific areas of focus include software development methods, tools and best practices, software-unique testing and architecture issues, and software assurance challenges and issues. This course provides comprehensive insight into the risks and issues associated with developing and implementing complex software systems. Students will examine the risks, problems, and issues that challenge large or complex software acquisition, integration, or development efforts and evaluate strategies, methods, and tools to achieve successful program outcomes. Specific areas of focus include software development methods, tools and best practices, software-unique testing and architecture issues, and software assurance challenges and issues.

### ***SAP ORIENTATION - MASL : P179813***

Special Access Program Orientation SA101.01

Introduces students to Department of Defense (DoD) Special Access Programs (SAPs). The course describes the SAP environment and discusses the interaction among the executive, legislative and judicial branches of government in establishing SAP policy. The roles and responsibilities of oversight and support offices and agencies, and mandatory SAP requirements are reviewed. Lessons address security enhancements, annual reviews, inspections and audits. This orientation is offered in residence or as a field extension course.

### ***SATCOM SYSTEMS OPER-MAINTAINER (STRAT-1) - MASL : B137192***

Provide an introductory level student with a fundamental knowledge of the operation and maintenance of SATCOM terminals and attend a Brigade-wide Capstone Field Training Exercise (FTX) upon graduation to reinforce the Warrior Ethos Combat Skills.

### ***SATCOM SYSTEMS OPER-MAINTAINER (TACT-2) - MASL : B137195***

Provide Active Army and Reserve Component personnel the skills and knowledge required for operating, configuring, maintaining, troubleshooting, and repairing tactical satellite communications terminals AN/TSC-85(V) and AN/TSC-93(V).

### ***SATCOM SYSTEMS OPER-MAINTAINER COMMON CORE - MASL : B137191***

Provide an introductory level student with a fundamental knowledge of the operation and maintenance of Satellite Communications terminals and associated equipment. During Phase 1 of the 25S Course, the student will receive training on basic electronics principles, the Satellite Principles Transformation Trainer, Digital Communications Satellite Subsystem (DCSS) and STEP Operation and Maintenance, Network Operations, Midas Operations and the Switch Multiplexer Unit (SMU).

### ***SATELLITE SYSTEMS/NETWORK COORDINATOR - MASL : B132486***

The scope of training includes operating the following major systems, subsystems, equipment and software: DSCS ECCM Control Subsystem Control Console (DECS-CC) AN/FSC-115 and DSCS ECCM Control Subsystem Remote Control (DECS-RC) AN/GSC-63; Frequency Division Multiple Access equipment; DSCS FDMA Control Subsystem Network Control Terminal (DFCS-NCT) AN/FSC-96 and DSCS FDMA Control Subsystem Network Terminal (DFCS-NT) AN/GSC-51, network monitoring equipment ; DSCS Operational Support Subsystem (DOSS) AN/FYQ-110A and DSCS Automatic Spectrum Analyzer (DASA) AN/FSQ 142, Objective DSCS Operations Center Subsystem (ODOCS), DSCS Network Planning Software (DNPS), Spectrum Plotting Utility (SPU); Replacement FM Orderwire Equipment (RFMOW); DSCS Integrated Management Software (DIMS) System; and Global Terrestrial Critical Control Circuit System (GTC3S).

## ***SCH OF NAT'L SEC STRAT STU - MASL : B171798***

Selected senior military officers will be given a unique opportunity to view a rapidly changing world in a strategic perspective. While the world is threatened by global terrorism, its impacts are unique to each country. Each must plan deliberately to counter the threat of terrorism to its stability. The Program will ask Fellows to consider in their coursework questions such as: How does the military change to meet the challenges of global terrorism? What is the role of the military in protecting the homeland from the threat of terrorists?

The program will emphasize the role of U.S. ties, the impact of military professionalism, and the challenges and opportunities of civil-military cooperation in an environment where terrorists are resourceful and adaptable in their efforts to exploit weaknesses across the globe.

Fellows will be given a broad, strategic perspective on fighting terrorism with a particular emphasis on the historical, political, economic, organizational, social, psychological and judicial aspects of counterterrorism.

Courses:

- A six-course program will take place over two terms, for a total of some 30 weeks.
- Each course will be taught in a seminar setting of some 16 students comparable to a graduate course. The courses will emphasize leadership, logical analysis, understanding alternative viewpoints, and making effective arguments, presentations, and decisions. An understanding of strategic thinking, decision analysis, organizational behavior, and conflict management will be developed through discussions and coursework.
- Courses will include outside activities such as class visits to sites such as Joint Forces Command, Gettysburg, and Congress to build understanding of concepts developed in the classroom.

Specific courses will include:

- Foundations & Issues of Homeland Defense
- Nation-building
- The War On Terrorism
- Force and Statecraft
- Issues for Defense Organizations and Homeland Security
- Threats and Risks
- Economics and Budgets
- The Role of Law in Counter-Terrorism and Homeland Security
- Military Leadership and Civil-Military Cooperation
- Countering Terror in Different Nations: A Comparative Perspective
- Geostrategy (Regional and Global Politics and Influences)
- Information Operations and Knowledge Management
- Concentrations will be available in Homeland Security and Defense Transformation.

The program will award the Fellow a Certificate in National Security Studies upon completion of six required and elective courses.

Information Program: The CT Fellowship program at SNSEE will include a robust information program that will take students to places of social, historical, cultural value so that they return to their countries with a greater appreciation for the United States and its institutions. Students will be expected to participate in IP travel as a requirement of the program.

## ***SCHL OF ADV AIR/SPC STDIES - MASL : D171043***

Prepares Air Force staff officers and future commanders to shape airpower strategy in its role of supporting national security. Building on the curricula and themes of resident Intermediate Development Education (IDE), the School of Advanced Airpower Studies (SAAS) examines the historical record of airpower in the context of western military theory, considers airpower's human, theoretical, economic, and technological facets, and focuses on the use of airpower across the operational spectrum of war. A very competitive record is required. Further, students must possess both the ability and the willingness to complete a graduate level program of reading, colloquia, research, and writing. Successful completion of SAASS results in award of Master of Airpower Art and Science degree.

### ***SCHOOL OF ADV WARFIGHTING - MASL : P171806***

The School of Advanced Warfighting (SAW) is designed to provide the nation with leaders who can help shape the Marine Corps to meet the needs of the future. It is graduate-level, military education tailored to amplify and complement the comprehensive foundations in Warfighting experienced during the 47-week Command and Staff College (CSC) curriculum. This follow-on course for selected graduates of CSC focuses on the link between Warfighting and Warplanning, or preparation for war. Utilizing a dynamic curriculum and an active methodology, SAW specially prepares its students for significant roles in the future preparation of armed forces for success in war, should the nation require that end.

### ***SCOUT PLATOON LEADER - MASL : B144577***

Using constructive, virtual, live and computer based training, this course will emphasize the graduates ability to identify and operate within the contemporary operating environment (COE), applying the skills, knowledge and capabilities necessary to ascertain and communicate the nature of the threat with respect to the operating environment to ensure mission success. Students will conduct intelligence preparation of the battlefield by integrating information on the enemy, weather, and terrain to provide the basis for situational development, target value analysis and collection, and reconnaissance and surveillance planning essential to the battlefield decision-making process. Practical exercises will require students to plan and conduct advance reconnaissance and security missions on linear and nonlinear modern day battlefields, preparing them to fulfill their responsibility to the maneuver commander for the collection, assessment, and accurate reporting of battlefield information that enables the commander to make critical decisions. Students will become tactically and technically proficient in all aspects of mounted and dismounted reconnaissance and security operations, to include but not limited to, evaluating routes and obstructions; calculation, designation and placement of demolitions; tactical questioning; missions and organizations; plan, prepare and brief an operations order; troop leading procedures; urban area and multi-dimensional reconnaissance; and stability and support operations in a high OPTEMPO environment. Furthermore, the intensity and rigor of this course has been increased by the addition of computer-based training that extends the training day during the first eight days so that students receive a greater training value without sacrificing time from the force.

### ***SCOUT SNIPER ADV - MASL : P122294***

Contact Security Cooperation Education and Training Center (SCETC) Country Program Manager for additional information.

### ***SCOUT SNIPER BASIC (SSB) - MASL : P122296***

Contact Security Cooperation Education and Training Center (SCETC) Country Program Manager for additional information.

### ***SCOUT SNIPER BASIC (SSB) - MASL : P122293***

Contact Security Cooperation Education and Training Center (SCETC) Country Program Manager for additional information.

### ***SCOUT SNIPER PLATOON CMDR - MASL : P122262***

Contact Security Cooperation Education and Training Center (SCETC) Country Program Manager for additional information.

### ***SDV ELECTRONIC MAINTENANCE - MASL : P145951***

To teach Electronic Technicians to maintain, troubleshoot and repair all electronic systems to the board level in MK-8 SDV.

SCOPE: Graduates must be able to maintain, troubleshoot and repair electronic systems to associated SDVs under all conditions of readiness.

### ***SDV HULL MAINTENANCE - MASL : P145950***

To provide personnel assigned to SDV Commands with specialized instruction and training necessary to repair Naval Special Warfare MK-8 SEAL Delivery Vehicles (SDV s) and associated support equipment.

SCOPE: Instruction in fiberglass repair, corrective/preventive maintenance in the hull, mechanical and electrical sub-systems; hazardous materials relative to SDVs, pre/post dive maintenance and safety checks constitute the main thrust of this course.

Actual repair and maintenance of SDVs will be performed.

### ***SDV OPERATOR TRNG - MASL : P124350***

To train SEAL officer and enlisted personnel of the U.S. Navy in the operation of the MK-8 SEAL Delivery Vehicles (SDV).

SCOPE: The two phases of the course consist of the following:

Classroom instruction on theory and design characteristics (2 weeks).

Practical phase consisting of driving, navigating and maintaining the MK-8 SDV (8 weeks).

### ***SEAPORT SECURITY ANTI-TERR - MASL : P179289***

This course is designed to instruct personnel in anti-terrorism awareness and how to prepare security and contingency plans in a port environment to prevent terrorist and criminal activity. Students are taught through lecture and practical exercises. The program examines the types of ports, cargo handling procedures and recommended security measures necessary for prevention of terrorist and criminal activity. The course introduces the student to the phenomenon of contemporary terrorism and its impact on the world scene. It explores terrorist behavior, their organizations, and the means by which these organizations acquire financial and logistical support. Course discussions and exercises include hostage situations, tactical considerations, port survey and inspections, physical equipment and hazardous materials security, defensive boat tactics, bombs and explosive devices, media considerations, security and contingency planning, and crisis management. This course also examines the appropriate use of force and weapons.

### ***SEARCH/RESCUE INLAND PLNG - MASL : P116035***

U.S. Air Force instructors present this 5-day course, which provides a comprehensive graduate-level look at search theory and its application to land and air searches for missing persons and aircraft, with a focus on wilderness, not urban, searches. The course consists of classroom lessons and practical tabletop exercises only. Emphasis is placed on the planning necessary for effective area-type searching during an extended search, using probability of success (POS), to allocate limited resources to their best effect productively. Additional topics include search area development, effort allocation, an overview of the National Interagency Incident Management System (NIIMS) and Incident Command System (ICS), the federal role in search and rescue (SAR), and related subjects. The course does not teach search tactics or technical procedures. Classes are held at selected locations around the United States approximately 10 times per year.

### ***SEARCH/RESCUE MARITIME - MASL : P173100***

Students receive training in oceanic and coastal search planning techniques, in the performing of duty as SAR Mission Coordinator (SMC), and in using SAR-PC software, which is available for purchase. This course does not train students in on-scene procedures, but emphasizes SAR planning and coordination. Instruction follows the sequential stages of the SAR system as organized by the U.S. National SAR Manual, including awareness, initial actions, search planning, search operations, and mission conclusion. Several mathematical models are used to calculate ocean drift forces, determine search datum, and allocate available search units. The course is difficult and intense, and requires many hours of homework for completion. The international student will train alongside his/her U.S. counterpart who is typically en route from an operational SAR unit to duty at a Maritime Rescue Coordination Center or Rescue Sub-center.

### ***SEC ASST MGT CRS-LOG CUST - MASL : D178238***

The Logistics/Customer Support Course (SAM-CS) is designed to provide personnel who are directly involved in or concerned with foreign military sales (FMS) requisitions and materiel movement with a comprehensive understanding and application of the policies, procedures, systems and actions necessary to move FMS materiel from its initial requisition to its shipment to the customer's final destination. The objective is to understand the functions of key organizations involved in materiel distribution, to include the International Logistics Control Organizations (ILCOs), Defense Logistics Agency (DLA), contractors and freight forwarders. Students will understand how to identify the proper procedures for processing requisitions, and the handling and movement of security assistance (SA) program materiel, with an objective of reducing or preventing deficiencies in the FMS materiel distribution process. The course focuses on specific aspects of logistics such as the integration of the elements of the total package approach, requisition processing, requirements determination, details of military standards, with an emphasis on shipping and transportation considerations throughout the FMS case and requisition life cycle. The course emphasizes the responsibilities and relationships between the case managers at the ILCOs, with the weapon system program manager, the contract administrative office, the military departments (MILDEP) and DLA item managers, the transportation coordinator, the freight forwarder, and the customer. The course will focus on reducing frustrated and misdirected shipments, reducing supply discrepancy reports, and improving case reconciliation. This course earns 30 continuous learning points for members of the acquisition workforce.

## ***SEC ASST MGT OC - MASL : D178258***

SAM-OC is an entry-level course designed primarily for personnel who are new to the security assistance (SA) field, or who perform security assistance duties on a part-time basis. It provides an overview of the full range of security assistance activities, to include legislation, policy, foreign military sales (FMS) process, logistics, finance, and training management. The course offers the advantage of immediate training for employees as soon as they are assigned to a security assistance position, rather than waiting for the next scheduled DISAM resident course. Graduates of SAM-OC who require more training in SA should be scheduled for the two-week SAM-C course, or other follow-on instruction as determined by their supervisor and DISAM. For most personnel, SAM-OC should not be considered a substitute for initial DISAM SA education, but can always be used as a precursor to any appropriate DISAM course (i.e., the SAM-C, SAM-O, SAM-E, or SAM-F). For foreign personnel, especially those new to SA, SAM-OC would be beneficial prior to attendance at a resident SAM-F course, although it is not a prerequisite. This course is also ideal as a refresher for personnel who are returning to SA. The familiarization with basic terms and concepts of SA and cooperation will ultimately be very beneficial to students when supplemented with a DISAM resident course.

SAM-OC is an on-line distance learning course that contains 12 lessons, on topics in functional areas of security assistance management. In progressing through each lesson the student will be able to view graphics with key instructional points; listen to the instructor narrate text and address points on a graphic; and follow along by reading the text of the instructor's remarks at the bottom of the screen. Lessons are divided into short segments varying in length. During each lesson, students can play a lesson from start to finish, but can also use navigation features to go directly to any specific area in a lesson. Each lesson has a built-in e-mail link to the DISAM faculty, which will allow student communication with the instructor in the event a student has a question or concern about the material. Students may register for the course at anytime and progress at their own speed. The course takes about 27 hours to complete and includes three timed 30-minute open book quizzes and a course evaluation, which are taken on-line. In order to receive a certificate of completion, students are required to achieve an overall average score of 70 per cent and complete the course within a 90 day period. Registered students may take the course during duty hours or at home, depending on their supervisor's guidance and their personal preference. This course earns 25 continuous learning points for members of the defense acquisition work force.

## ***SEC ASST MGT-STUDENT PURCH - MASL : D178088***

The Foreign Purchaser Course (SAM-F) is designed to address the planning and resource processes of requirements generation, budgeting, acquisition, and sustainment within a United States host country security assistance relationship. It provides students an opportunity to study U.S. laws, policies, and procedures governing the security assistance program. General course objectives are fourfold: to increase student understanding of the management of U.S. security assistance resources; to improve student knowledge of their responsibilities as individual security assistance resource managers; to enhance communications between purchaser/recipient country security assistance agencies and U.S. supporting agencies, thereby enhancing the overall efficiency of security assistance management; and to demonstrate the role of security assistance within the context of a civilian controlled military. This course is designed for security assistance managers representing international purchaser and recipient countries, international organizations, and international employees of U.S. security assistance organizations (SAOs) overseas. The course is tailored to present the significant aspects of the foreign military sales (FMS) program and the management concerns of purchaser/recipient countries. In addition to the two-week resident SAM-F course, a comparable course may be provided overseas through the use of a DISAM Mobile Education Team (MET). See the MET section of this catalog, for SAM MET data. A variety of educational techniques are employed. To reinforce the lectures and reading material, a number of practical exercises are woven into the curriculum.

## ***SECURITY FORCES APPR CRS - MASL : D173071***

The SF Apprentice Course trains SF personnel to perform the duties of a SF Apprentice. Training includes application of IBD operations, nuclear/nonnuclear security, convoy operations (nuclear/conventional and humanitarian), response force, alarm response, installation entry control, area/building/vehicles, high-threat entry, authority and jurisdiction, advisement of rights, installation patrol, recapture/recovery operations, verbal control judo, expandable baton, land navigation (topographical map and grip map), military working dog operations, sentry duties, secure prisoners, interview persons, restricted area security, launch facility response force tactics, expanded weapons use and tactics (M9 Handgun, M4 Carbine, M203 Grenade Launcher, M240B Grenade Launcher, M240B Machine Gun, M249 Squad Automatic Weapon), force protection/participation in homeland defense, individual physical apprehension and restraint techniques, participation in F operations, extensive tactical response force in a Mission Rehearsal Area (MRA) and MOUT, use of non-lethal weapons, career field history, training and supervision, force

protection, operations security threats to USAF installations and resources, legal considerations and provisions, general security forces duties, application of force, contingency operations, and SF operations.

### ***SECURITY POLICE OFF/MAP - MASL : D173006***

All training is conducted at Camp Bullis, TX with the exception of 8 days at Lackland for specific lab use. Course content includes some of the following: weapons qualification on the M9 and M4, SF history, guard mount, military law, SF career path, use of force, apprehension, personal and vehicle challenges, crime scenes, AF protection level system, restricted area/controlled area physical security, installation entry control, threat conditions, response force duties, missile security, concepts and principles of air base defense, individual and unit tactical training, ground defense planning, close air support, indirect fire operations, military operations in urban terrain, troop leading procedures, patrolling, tactical communications, and defensive fighting positions.

### ***SECURITY SPEC/ABGD/CERTIFY - MASL : D173056***

This course is designed for security forces personnel (defenders) of any branch charged to protect key resources in the field needed to sustain air operations during peacetime or contingencies. It will take the novice security forces member from a basic understanding of force protection and air base defense, to a mid-level understanding on why and how to protect resources. Classroom instruction is augmented by intense field training exercises, which simulate patrol and urban defense operations. This course benefits anyone interested in force protection, regardless of experience. Students will learn the latest in force protection methodology. Suggested ranks are airman to company grade officers or civilian equivalents.

#### **COURSE DESCRIPTION**

- **BLOCK I - GROUND DEFENSE SKILLS** The student is taught the primary objectives of active ground defense in which concepts and principles/threat spectrum, fundamentals of defense, measures and techniques used in the field to control and combat the enemy are learned. The handling of prisoners of war, rules of engagement and law of armed conflict are covered in accordance with international human rights agreements. In tactical communications and use of brevity codes, the student is shown how to install a tactical net and how to encode and decode messages. Students are also taught how to select cross-country routes, what actions to take on enemy contact, introduction to night training and elementary night movement, routines in defense, patrolling and land navigation. Other topics in this block include: personal hygiene and field sanitation, hand grenades, tactical vehicle deployment, camouflage individual/equipment, listening/observation posts, range determination, warning/operations orders, hand and arm signals, cover and concealment, illumination and night observation devices, tactical sentry duties, move under direct fire/move over, through, and around obstacles, tactical vehicle deployment, and electronic security system concept of operation.
- **BLOCK II - GROUND DEFENSE SKILLS/WEAPONS/FTX** In this block the defender is taught how to select cross-country routes, what actions to take on enemy contact, introduction to night training and elementary night movement, routines in defense, patrolling/land navigation, support weapons, operator maintenance and M-16 familiarization, operator maintenance and M-203 grenade launcher familiarization, operator maintenance, T & E, and range cards on M-60 Machine Gun, familiarization on M-60 machine gun, fire arms training simulator, and close quarter battle drill exercise.

### ***SELF-PROP FA SYSTEMS MECH - MASL : B144563***

Initial entry training, providing Basic Knowledge and Skills training in Unit Level (Automotive) Maintenance training emphasizing maintenance publications, tools, TMDE, maintenance safety and discipline, troubleshooting, replacement, repair, and service of the cooling systems, electrical systems, power plants/packs, suspension systems, steering systems, braking systems, and hull of M109-series Howitzers, M88A1 Medium Recovery Vehicle, and M992A2 Ammunition Carrier.

### ***SENIOR EXECUTIVE SEMINAR (SES) - MASL : B279003***

The Senior Executive Seminar (SES), an intensive, one-week program, addresses security issues of particular interest to government policy makers. Each SES focuses on a timely theme and includes practical lessons that will improve participants' problem-solving skills in democratic defense management and transnational security concerns.

Participants include high-level government officials, general officers, senior diplomats, ambassadors, ministers, and parliamentarians.

## ***SENIOR MUSICIAN - MASL : P179014***

### **SENIOR MUSICIAN COURSE**

Course Mission: The Senior Musician Course is designed to prepare senior musician personnel in the Navy and Marine Corps (E6-E7) to perform the duties of the Senior Enlisted Assistant Director/Enlisted Bandmaster.

Course Overview: The course content includes conducting/rehearsal techniques, instrumental performance, ear training, theory, counterpoint, history, form and analysis, and band scoring. This course prepares the student for the highest levels of responsibility through advanced score study, ear training, and rehearsal techniques. In addition to advanced "core" academic subjects, emphasis in this course focuses on conducting and rehearsing the concert band and large jazz ensemble. Student to teacher ratio is limited to 12:1, allowing for more personalized instruction. Students also maintain a computer workstation at their desk, enabling them to take advantage of the most current music education software available. Navy personnel completing this course earn a new primary NEC (3851).

## ***SENIOR SUPERVISORY CHAPLAINS COURSE (SSCC) - MASL : P179200***

To prepare senior Navy chaplains (captains and captain selects) to serve in leadership positions on large staffs. Chaplains will be equipped to conduct strategic planning for religious ministry support in their commander's areas of responsibility, and to coordinate and supervise the provision of such ministry support. In addition, students will be equipped to carry out appropriate staff support functions such as advising commanders on the moral, ethical, and religious implications of proposed policies and decisions.

## ***SENTRY DOG HANDLER SUPV - MASL : D173004***

This course trains airmen, sister service, and other government agency personnel to perform duties prescribed in AFMAN 36-2108, Enlisted Classification for MWD Trainers and Kennelmasters in AFSC 3P0X1A and sister service equivalent specialties. The scope of the training includes: operational responsibilities, transportation, resources, employment factors, air base defense, drug training aids, explosives training aids, evaluation procedures, principles of conditioning and proficiency training. This course provides training for personnel meeting the prerequisites in applicable regulations for the following agencies: Air Force, equivalent sister service counterparts, Department of Defense (DoD) hired personnel, and foreign nationals employed by the United States Government.

## ***SERGEANTS COURE (MLT III) - MASL : P171820***

Instruction places emphasis on leadership development and the working knowledge of weapons organic to an infantry battalion, their maintenance, disassembly/assembly, engagement of targets on a live fire range, and defensive position. Instruction is designed to increase tactical knowledge of patrolling, land navigation, defensive operations, rear area security, and maneuver warfare. Emphasis is also placed on drill, inspections, and military instruction.

## ***SERGEANTS COURSE (MLT III) - MASL : P171819***

Instruction places emphasis on leadership development and the working knowledge of weapons organic to an infantry battalion, their maintenance, disassembly/assembly, engagement of targets on a live fire range, and defensive position. Instruction is designed to increase tactical knowledge of patrolling, land navigation, defensive operations, rear area security, and maneuver warfare. Emphasis is also placed on drill, inspections, and military instruction.

## ***SERGEANTS COURSE (MLT III) - MASL : P171809***

Instruction places emphasis on leadership development and the working knowledge of weapons organic to an infantry battalion, their maintenance, disassembly/assembly, engagement of targets on a live fire range, and defensive position. Instruction is designed to increase tactical knowledge of patrolling, land navigation, defensive operations, rear area security, and maneuver warfare. Emphasis is also placed on drill, inspections, and military instruction.

## ***SGSI WOLSM - MASL : P141820***

### **STABILIZED GLIDE SLOPE INDICATOR AND WAVE-OFF LIGHT SYSTEM MAINTENANCE**

The Stabilized Glide Slope Indicator (SGSI) and Wave-Off Light System Maintenance (WOLSM) Course is designed to provide special training for selected DOD personnel, and U.S. Navy and Coast Guard personnel of the Interior Communications Electrician and Electrician s Mate ratings (E-4 thru E-7), who are stationed on board LHA, LPH, LPD class ships, and air capable

ships deploying the SGSI System for helicopter recovery on both U.S. Coast Guard and U.S. Navy vessels. Graduates of the course will be able to maintain, troubleshoot, and repair the (SGSI and WOLSM) system at the journeyman level, without supervision, under all conditions of readiness, and in accordance with all safety precautions and approved PMS procedures.

Scope: The course content will include the following Units of Instruction:

- Stabilized Glide Slope Indicator (SGSI) System
- Wave Off Light System (WOLS)
- Flight Deck Status and Signaling System (FDSSS).

### ***SH-2G(E) SENSOR OPERATOR - MASL : P119703***

To train students how to operate the SH-2G(E) Sensor Operator.

Special Note: Student must possess a Secret Clearance in order to access the facility where training takes place.

### ***SH-3 SIMULATOR TRAINING - MASL : P119308***

SH-3 SIMULATOR TRAINING

To provide initial and refresher training for SH-3 pilots to enhance their flying skills and maintain required qualifications.

### ***SH-60B ATO TRNG - MASL : P113322***

SH-60B AIRBORNE TACTICAL OFFICER TRAINING

### ***SH60B CAT V PILOT TRAINING - MASL : P113302***

To train SH-60B Category I Fleet Replacement Lamps MK-3 Pilots in the skills and techniques required for performance as a pilot qualified in Model (PQM)/Airborne Tactical Officer (ATO). This course provides the training necessary to qualify lamps MK-3 Fleet Replacement Pilots to perform basic operational missions in the SH-60B Aircraft. Introductory Ground Training Phase I consists of DWEST, Swim Qualification, SERE and Helicopter Instrument Ground School. Further ground training, Phases II, III and IV in SH-60B systems familiarization and all phases of mission performance are accomplished through a combination of mediated materials developed utilizing the Instructional Systems Development (ISD) process. The result is an instructional system utilizing a mix of self-paced and instructor-paced lessons.

### ***SH-60B SIMULATOR (OFT) - MASL : P119378***

To provide safe and effective training for SH-60 B personnel in skills and techniques required for performance as qualified members of SH-60 flight crew.

### ***SH60F ASW PILOT - MASL : P113900***

To train the SH-60F Category II Fleet Replacement ASW Pilot in skills and techniques required for performance as a pilot qualified in model.

### ***SH-60F ATO TRNG - MASL : P113903***

SH-60F AIRBORNE TACTICAL OFFICER TRAINING - SINGAPORE

### ***SH-60F/R SIMULATOR (OFT) - MASL : P119377***

To provide safe and effective training for SH-60F/R personnel in skills and techniques required for performance as qualified members of SH-60 flight crew.

### ***SHAPING SMART BUSINESS ARR - MASL : B154805***

Personnel new to the contracting specialty will gain a comprehensive understanding of the environment in which they will serve. Students will develop professional skills for making business decisions and for advising other acquisition team members in successfully meeting customer needs. Before beginning their study of technical knowledge and contracting procedures, students will learn about the different DoD mission areas and the procurement alternatives for each. Knowledge management and information systems will be introduced as well. Small group exercises will prepare the students to provide contracting support within the overarching business relationships of government and industry.

Objectives: Students who successfully complete this course will be able to:

- Describe the acquisition/contracting mission and its impact on the American economic system;
- Select training and development opportunities for career progression;
- Describe the interdependence of functional team members;
- Describe the importance of the oversight roles of the Government Accountability Office and the DoD Inspector General;
- Explain the characteristics and responsibilities of the contracting professional in the role of a business advisor;
- Explain the distinctive interests of both the buyer and seller and the role those interests play;
- Determine the relationship between financial and acquisition communities and how fundamental financial principles and requirements are important;
- Describe commercial acquisition and government unique requirements of market research in identifying the best arrangements to meet mission requirements; and
- Explain e-business and information technology in supporting business processes.

### ***SHIPCREW TRNG - LANTFLT - MASL : P121015***

Ship Transfer MASL used to track individual students during crew indoctrination training on ships being reactivated in Atlantic Fleet ports or repair facilities.

### ***SHPBD CBR-D OPS/TRNG SPEC - MASL : P127437***

To provide basic to advanced Chemical, Biological, and Radiological Defense (CBR-D) training for enlisted personnel (E5-E9), Source Ratings (DC, HT, & HM). Enlisted graduates of this course will be prepared to conduct CBR-D training at Training Commands and aboard ship for CBR-D, advise on integration of CBR-D operations into a normal command organization of the functions necessary to prepare for, defend against and recover from CBR-D involvement.

### ***SHPBD DC(Deact-SeeTCC) - MASL : P127012***

Required course for DCRS and Import Emergency Teams (IET). Provides a one day opportunity for DCRS and IET Teams to perform as a team in investigating, reporting, repairing structural damage (shoring, pipe patching and plugging), and to control/stop flooding. This is equivalent to Level One training IAW OPNAVINST 3541 series.

SCOPE: This course utilizes lectures, PowerPoint and practical exercises. Subject matter consists of 2 hours of classroom instruction and 6 hours of practical application. Areas covered include investigation, dewatering, damage control communications and equipment, shoring, pipe patching, EEED, PHARS, hazardous material, material conditions, patching and plugging drills, and a wet battle problem utilizing the damage control wet trainer.

### ***SIDEWINDER - EOD - MASL : P193136***

To train selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***SIGNAL BASIC OFFICER LEADER - MASL : B121285***

The BOLC is a 3-phase course consisting of: Instruction on general knowledge, information technology, basic electronics, information assurance, DOD tactical networks, network management and CAPSTONE exercises. Phase Scope - Instruction on Army Operations doctrine; communications planning and management; communications interface; offense; defense; leadership; automation; electronics; microwave; tropospheric scattering; property accounting; telecommunications; COMSEC accounting; military justice; C-E systems tactics and doctrine; digital training on FBCB2, ABCS, and MCS-2. Also, includes communications requirements, planning and execution unique to a Maneuver Battalion.

### ***SIGNAL OFF ADV PREP - MASL : B171772***

Instruction in Signal Unit structure, Corps and below; signal support on communications systems to include DGM, MSE, and CNR; and automation. The informational program includes the twelve designated IP subjects.

### ***SIGNAL OFFICER ADV - MASL : B171771***

The Signal Corps installs, operates, and maintains a myriad of state-of-the art, real-time voice and data tactical information services to all elements on the battlefield. Inherent with the Signal Corps missions are command, supervisory, managerial, and technical leadership for the installation, operation, administration, and maintenance of information systems in both fixed and mobile configurations.

### ***SIMULATOR IP - MASL : B119993***

This MASL is would be used when Field Studies Program Simulator training is required.

### ***SLING LOAD INSPECTOR CERTIFICATION - MASL : B153725***

To provide instruction on procedures for selecting, preparing, and controlling pickup zones and landing zones; and, preparing, rigging, and inspecting sling load transported supplies and equipment.

### ***SM-2 MISSILE ASSEMBLY/DISASSEMBLY/INSPECTION - MASL : P195153***

SM-2 MISSILE ASSEMBLY/DISASSEMBLY AND MK 45 TDD COUPLER (KOREA)

### ***SM2 MISSILE CONTAINER HANDLING - MASL : P195155***

Provides the student with the skills and knowledge necessary to safely pack, unpack, & inspect Missiles and components and inspect and handle all-up round SM-1 Missile containers and associated component containers.

This course includes but is not limited to the following topics:

- Understanding of Documentation (SMPDs)
- Can / Decan and MRI of an All-up-Round Missile
- Pack, unpack, & Inspection of components, including container markings and labeling
- Container Inspection
- Limited Container Maintenance
- Handling Equipment Familiarization & Use
- Safety Precautions

### ***SM-2 THEORY OF OP (KS) - MASL : P195152***

STANDARD MISSILES-2 THEORY OF OPERATION (MK698 GMTS)

### ***SMALL ARMS/TOWED ARTILLERY REPAIRER - MASL : B142390***

Maintenance of small arms weapons to include shoulder fired weapons, handguns, machine guns, and mortars; inspect, disassemble, clean, operate, function-test, lubricate, measure, and repair small arms materials; common maintenance subjects, such as, publications, tools, maintenance forms, and soldier's manual orientation.

### ***SMALL ARMS/TOWED ARTILLERY REPAIRER (SMALL ARMS) - MASL : B142391***

Effective 2006-11-17 (Draft)

Course Scope:

- To train students in the basic knowledge and skills to perform field and sustainment maintenance on the M242 25mm automatic gun; the 120mm mortar; the M198 medium towed howitzer; the M119A2 light towed howitzer; and specialized weapons. It will also train the student in Army peculiar artillery subjects.
- POI 641-45B10 Phase 1 is the consolidated ITRO portion of the course. Both US Army and US Marine Corps students will attend Phase 1 collectively. Phase 1 subjects include: Shoulder and Hand Fired Weapons, Light Machine Guns, Heavy Ground Mounted Machine Guns and Mortars.
- POI 641-45B10 Phase 2 is unique only to US Army students. Subjects include: Basic Knowledge and Skills, M242 25mm Automatic Gun, M120 120mm Mortar, M590 12 Gage Shotgun, M107 Sniper Rifle, Army Peculiar Subjects, M198 Medium towed Howitzer, and M119A2 Light Towed Howitzer.

### ***SMALL UNIT LEADER (JA) - MASL : P121010***

SMALL UNIT LEADERS SUPPORTING ARMS ORIENTATION

Purpose. To provide initial and refresher instruction on the basics of requesting and controlling/ adjusting mortars, artillery, naval surface fire support, and close air support.

Scope. The course provides instruction designed to introduce the student to the organization, capabilities, limitations, and company-level utilization of supporting arms. Enlisted personnel who do not possess a supporting arms occupational field are the

target population. Testing will be conducted by a multiple-choice exam with 70% as a passing grade. To successfully complete the course, the student must attend all classes. If a student is not present for a class, course failure will result. This course is designed for active duty units.

Special Equipment. Light projection system, visual-aid panel, and Forward Observer Training System (FOTS), or Indoor Simulated Marksmanship Trainer - Enhanced (ISMT-E).

### ***SNCO ADVANCED COURSE - MASL : P171822***

This course provides gunnery sergeants and gunnery sergeants selectees with the education and leadership skills necessary to lead personnel in combat. Instructions are presented through a variety of teaching techniques to include guided discussions, research, writing, presentations, and guest lectures. Emphasis is placed on leadership, education, administration, and tactics.

### ***SNCO ADVANCED COURSE - MASL : P171821***

This course provides gunnery sergeants and gunnery sergeants selectees with the education and leadership skills necessary to lead personnel in combat. Instructions are presented through a variety of teaching techniques to include guided discussions, research, writing, presentations, and guest lectures. Emphasis is placed on leadership, education, administration, and tactics.

### ***SNCO CAREER COURSE USMC - MASL : P171207***

To provide professional education, which enhances the base of professional knowledge of Marine Staff NCOs and intensifies their appreciation of the high standards, esprit de corps, and leadership that are traditional in the Marine Corps. Instruction is designed to provide staff sergeants, and sergeants selected for staff sergeant, with the fundamental professional knowledge and skills required by the modern Marine Staff NCO, regardless of occupational specialty, at the staff sergeant and gunnery sergeant levels.

Primary emphasis is placed on leadership, techniques of military instruction, effective military writing and communication, problem solving, confidence building, military bearing, command presence, and physical fitness. The course includes instruction in: career planning; civil disturbances; custom, courtesy, and discipline; drill, command and ceremonies; effective military writing; general administration; interior guard; leadership; logistics; Marine Corps history and traditions; Marine Corps organization; personal financial management; physical training; public affairs; staff organization and functioning; techniques of military instruction; and uniform regulations. The course has the following three basic objectives:

- Developing the individual leadership potential
- Imparting military knowledge and skills
- Enhancing individual physical fitness and the ability to supervise and conduct an effective physical conditioning program

### ***SNCO CAREER COURSE USMC - MASL : P171215***

To provide professional education, which enhances the base of professional knowledge of Marine Staff NCOs and intensifies their appreciation of the high standards, esprit de corps, and leadership that are traditional in the Marine Corps. Instruction is designed to provide staff sergeants, and sergeants selected for staff sergeant, with the fundamental professional knowledge and skills required by the modern Marine Staff NCO, regardless of occupational specialty, at the staff sergeant and gunnery sergeant levels.

Primary emphasis is placed on leadership, techniques of military instruction, effective military writing and communication, problem solving, confidence building, military bearing, command presence, and physical fitness. The course includes instruction in: career planning; civil disturbances; custom, courtesy, and discipline; drill, command and ceremonies; effective military writing; general administration; interior guard; leadership; logistics; Marine Corps history and traditions; Marine Corps organization; personal financial management; physical training; public affairs; staff organization and functioning; techniques of military instruction; and uniform regulations. The course has the following three basic objectives:

- Developing the individual leadership potential
- Imparting military knowledge and skills
- Enhancing individual physical fitness and the ability to supervise and conduct an effective physical conditioning program

### ***SNCO CAREER COURSE USMC - MASL : P171216***

To provide professional education, which enhances the base of professional knowledge of Marine Staff NCOs and intensifies their appreciation of the high standards, esprit de corps, and leadership that are traditional in the Marine Corps. Instruction is designed to provide staff sergeants, and sergeants selected for staff sergeant, with the fundamental professional knowledge and skills required by the modern Marine Staff NCO, regardless of occupational specialty, at the staff sergeant and gunnery sergeant levels.

Primary emphasis is placed on leadership, techniques of military instruction, effective military writing and communication, problem solving, confidence building, military bearing, command presence, and physical fitness. The course includes instruction in: career planning; civil disturbances; custom, courtesy, and discipline; drill, command and ceremonies; effective military writing; general administration; interior guard; leadership; logistics; Marine Corps history and traditions; Marine Corps organization; personal financial management; physical training; public affairs; staff organization and functioning; techniques of military instruction; and uniform regulations. The course has the following three basic objectives:

- Developing the individual leadership potential
- Imparting military knowledge and skills
- Enhancing individual physical fitness and the ability to supervise and conduct an effective physical conditioning program

### ***SNIPER - MASL : B122600***

Sniper Tactics; Staff Subjects (Intelligence, Mission, Training, Combat Orders, Command and Control, and Training Management); Basic Sniper skills; Marksmanship Sniper Tactics; Staff Subjects (Intelligence, Mission, Training, Combat Orders, Command and Control, and Training Management); Basic Sniper skills; Marksmanship.

### ***SNR ENL EO CRS - MASL : D179027***

The goal of the workshop is to impart upon the participants the manner in which EO issues impact unit cohesion, mission accomplishment, combat readiness and increased awareness, sensitivity, and understanding of EO issues. The program is divided into the following topic areas:

- Socialization and values
- Power and discrimination
- Sexism and sexual harassment
- Leading a culturally diverse work force
- Contemporary and emerging EO issues
- Future focus

The training methodology is interactive lectures, video presentations followed by discussions, case study and scenario solving, and facilitated action planning. Facilitators are experienced subject-matter experts and are graduates of DEOMI's 15-week EO staff advisor course.

### ***SOF SR ENLSTD CRS - MASL : D126018***

Course focus will be on SOF Command and Control, Joint SOF Orientation, Joint Planning Orientation, Force Protection, Professional Development, Cross Cultural Communication, and Region Orientations. Resident Army, Navy, and Air Force instructors and civilian and military personnel who are course specific subject matter experts will be featured speakers. This course meets Force Protection Level I Requirements and will provide a comprehensive orientation for SOF senior enlisted leaders.

GOAL: To strengthen the interoperational skills to make the student as effective in the joint environment as they are in their own service.

### ***SONAR AN/SQS-56 MT - MASL : P135017***

To train selected USN enlisted and foreign national personnel in the theory and maintenance aspects of the AN/SQS-56 Sonar Detecting/Ranging Set and the MK 309 Mods 0/2 Underwater Battery Fire Control System. Upon completion of this course, technicians will be able to perform fault isolation, repair and replacement and preventive maintenance procedures.

Scope: This course provides instruction in preventive and corrective maintenance to the printed circuit board level, review of digital logic, and use of special test equipment on the AN/SQS-56 Sonar System, MK 309 Mod 0 and 2 UBFCs.

***SONAR AN/SQS-56 OPERATOR - MASL : P123044***

To train selected U.S. naval personnel, civilian personnel, and foreign nationals to operate the AN/SQS-56 Sonar System under limited supervision. This course provides instruction in the operation of the AN/SQS-56 Sonar in all modes, knowledge of and practical application in performance prediction, equipment readiness, major units and sub units, search, attack and lost contact procedures, classification cues available and basic signal flow.

***SOS INT'L OFF SCH CRS - MASL : D171012***

Prepares international officers in the Air Force grade equivalent of lieutenant, captain, or junior major to participate in Squadron Officer School (SOS). Instruction centers on providing a foundation in officership values, application, leadership tools, and air and space power in order to improve the professional competence of the students. Instruction also includes the traditions and ideals of US society, extensive physical training commensurate with the officership application program at SOS, and language and communicative skills specific to SOS. The purpose of the course is to develop: an awareness of the organizational structure, curriculum content, terminology and instructional methods used at SOS; an awareness of the United States military mission and organization; and an appreciation of US society, institutions, and ideals.

Provides a forum for exchange of ideas, fostering a greater understanding of regional, cultural, and societal issues. Course is designed to meet individual needs by providing course work based on language fluency. The majority of class time is devoted to lectures and seminars with military or civilian instructors. Local and extended field trips provide students with insights into US society, institutions, and ideals. A sponsor program aids students in becoming acquainted with the military and civilian communities.

***SP AVN SAFETY MGT CN 1004 - MASL : B113036***

Designed to provide commanders, operations officers, aviation maintenance managers, safety officers and other key aviation unit leaders and managers the necessary skills, knowledge and expertise required to establish, manage, and execute critical aviation safety programs.

***SPACE OPERATIONS/GRAD - MASL : D178111***

Prepares Air Force officers for management roles involving the use of engineering principles and scientific management techniques in planning, executing, and evaluating space operations. Provides a thorough grounding in quantitative and qualitative approaches to the analysis and management of space missions. The program is highly interdisciplinary in nature; all students study subjects spanning the areas of space sciences, engineering, and management sciences.

Space operations graduates are prepared to apply scientific management techniques to the accomplishment of the full spectrum of space missions. They are educated in the areas of probability and statistics, operations research, systems simulation, effectiveness and trade-off analyses, contracting and acquisition, and operations planning. They have an understanding of the space environment, orbital mechanics, propulsion systems, computers, communications systems, surveillance systems, and systems design and integration. The space operations graduate is prepared to plan, operate, and analyze military space systems.

The recommended career fields for assignment of the space operations graduate are space systems (20XX), communication and computers (49XX), and weather (25XX). The career progression starts with an officer serving one or more nonacademic tours prior to attending this program. After graduation, these officers are assigned to space-related middle management positions, and form a cadre from which the senior leadership and management of Air Force space operations may be selected. Typical students in the graduate space operations program are senior lieutenants through majors. While the program is primarily oriented to the Space Operations (20XX) career field, academically qualified officers from any career field are encouraged to apply.

***SPAN AVIATION SAFETY MGT - MASL : B113035***

Designed to provide commanders, operations officers, aviation maintenance managers, safety officers and other key aviation unit leaders and managers the necessary skills, knowledge and expertise required to establish, manage, and execute critical aviation safety programs.

***SPAN MAINT MGR CN 1004 - MASL : B141770***

Instruction on aircraft maintenance management, allied shops support, aviation supply, aircraft systems such as; electrical, fuel, flight controls, engine, powertrain, etc. to include systems troubleshooting. Also Combat Maintenance/Battle Damage Repair (BDR) and Periodic and Phase Maintenance Programs..

***SPAN MAINTENANCE MGR - ALL - MASL : B141769***

Instruction on aircraft maintenance management, allied shops support, aviation supply, aircraft systems such as; electrical, fuel, flight controls, engine, powertrain, etc. to include systems troubleshooting. Also Combat Maintenance/Battle Damage Repair (BDR) and Periodic and Phase Maintenance Programs.

***SPAN UH-1 HELO RPR - ALL - MASL : B141785***

Removal and installation of subsystem assemblies and subsystem components; servicing and lubrication of helicopter and its subsystems; performance of scheduled inspections; safety practices and procedures; usage of ground support equipment required for helicopter maintenance; identification and maintenance of common, special and precision tools; usage of forms and records; application of technical manuals and other applicable publications associated with helicopter maintenance.

***SPAN UH-1 HELO RPR CN 1004 - MASL : B141786***

Removal and installation of subsystem assemblies and subsystem components; servicing and lubrication of helicopter and its subsystems; performance of scheduled inspections; safety practices and procedures; usage of ground support equipment required for helicopter maintenance; identification and maintenance of common, special and precision tools; usage of forms and records; application of technical manuals and other applicable publications associated with helicopter maintenance.

***SPANISH AIR MISSION COMMANDER - MASL : B113021***

Course is designed to provide selected rotary wing aviators with the necessary skills and knowledge to plan, coordinate, and execute aviation operations as Air Mission Commanders. Instruction includes training in aviation operations' principles, aviation planning, mission analysis, plans, orders, execution, humanitarian relief operations, civil military operations, peacekeeping operations, and supervision (rehearsals).

***SPANISH AVIATOR (UH-60FS) (REFRESHER) - MASL : B113039***

This course consists of flight and academic training in the UH-60 flight simulator to include all basic flight and emergency tasks; and academic instruction and practical application of the UH-60 aircraft systems subjects to provide the aviator with the necessary skills and knowledge to properly operate the UH-60 helicopter.

***SPANISH IERW - COLOMBIA - MASL : B113033***

This course is designed to provide the student with the necessary skills and knowledge leading to qualification as a pilot in the UH-1, with night, instrument and combat skills training.

***SPANISH UH-60 AIRCRAFT MAINTENANCE TECHNICIAN - MASL : B113068***

To provide information and training on UH-60 maintenance test flight procedures, troubleshooting, and aircraft systems.

***SPANISH UH-60 IP - MASL : B113000***

Consists of flight and academic instruction in theory of flight, instructing fundamentals, aircrew training, safety, automatic flight control systems, power train, hydraulic and electric systems, malfunction analysis, and night academics; methods of instruction for contact maneuvers, tactics and N/NVG training, dual and single engine operations and emergency procedures.

***SPARROW - EOD - MASL : P193133***

To train selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

***SPEC CONT - MASL : D147037***

Contractor provided training that requires a 70 ECL. Specific contractor training course title should be reflected on the applicable student training track/line (wcn/suffix)

### ***SPEC REACTION TEAM/CERTIFY - MASL : D173067***

This course is designed for security forces personnel (defenders) of any branch charged to protect key resources in the field needed to sustain air operations during peacetime or contingencies. It will take the novice security forces member from a basic understanding of force protection and air base defense, to a mid-level understanding on why and how to protect resources. Classroom instruction is augmented by intense field training exercises, which simulate patrol and urban defense operations. This course benefits anyone interested in force protection, regardless of experience. Students will learn the latest in force protection methodology. Suggested ranks are airman to company grade officers or civilian equivalents.

#### **COURSE DESCRIPTION**

- **BLOCK I - GROUND DEFENSE SKILLS** The student is taught the primary objectives of active ground defense in which they will learn concepts and principles/threat spectrum, fundamentals of defense, measures and techniques used in the field to control and combat the enemy. The handling of prisoners of war, rules of engagement and law of armed conflict are covered in accordance with international human rights agreements. In tactical communications and use of brevity codes, the student is shown how to install a tactical net and how to encode and decode messages. The students are also taught how to select cross-country routes, what actions to take on enemy contact, introduction to night training and elementary night movement, routines in defense, patrolling and land navigation. Other topics in this block include: personal hygiene and field sanitation, hand grenades, tactical vehicle deployment, camouflage individual/equipment, listening/observation posts, range determination, warning/operations orders, hand and arm signals, cover and concealment, illumination and night observation devices, tactical sentry duties, move under direct fire/move over, through, and around obstacles, tactical vehicle deployment, and electronic security system concept of operation.
- **BLOCK II - GROUND DEFENSE SKILLS/WEAPONS/FTX** In this block the defender is taught how to select cross-country routes, what actions to take on enemy contact, introduction to night training and elementary night movement, routines in defense, patrolling/land navigation, support weapons, operator maintenance and M-16 familiarization, operator maintenance and M-203 grenade launcher familiarization, operator maintenance, T & E, and range cards on M-60 Machine Gun, familiarization on M-60 machine gun, fire arms training simulator, and close quarter battle drill exercise.

### ***SPEC/OPS COMBTNG TERRORISM - MASL : D126019***

NONE.

### ***SPECIAL DENTAL TNG-CANADA - MASL : B175219***

This MASL programs special dental training for Canada.

### ***SPECIAL ELEC DEVICES RPR - MASL : B132468***

Training in fundamental subjects and basic electronics, alternating current, solid-state technology, precision soldering, the Army Maintenance Management system, mine detectors, night vision devices, battlefield illumination, advanced instrumentation, position and azimuth determining systems, NBC detection and warning systems, test measurement and diagnostic equipment organic to the maintenance shop or maintenance van.

### ***SPECIAL FORCES COMBAT DIVER QUALIFICATION - MASL : B126623***

Waterborne operations, including day and night ocean subsurface navigation swims; deep dives, diving physics; marine hazards; tides and currents; buoyant ascent; submarine lock-in/lock-out procedures of WIT.

### ***SPECIAL FORCES COMBAT DIVING SUPERVISOR - MASL : B126621***

Plan and supervise combat diving operations; tides and currents; submarine operations; diving operations; diving equipment; medical aspects of diving; recompression chamber operations; diving physics and a course culmination exercise.

### ***SPECIAL FORMAL MEDICAL TNG - MASL : B170035***

This MASL programs special formal training at the William Beaumont Medical Center, El Paso, TX.

### ***SPECIAL FORMAL TRAINING - MASL : B170041***

This MASL programs unique training at the Academy of Health Science and Brooke Army Hospital, Fort Sam Houston, TX that is specifically requested by countries which is not taught in formal Army courses.

### ***SPECIAL OPERATIONS INDEPENDANT DUTY CORPSMAN - MASL : B126643***

Preventive medicine; dental; laboratory; physical exam; medical subjects; radiology; sports medicine; nursing; echelons of care including combat trauma management; surgery; anesthesia; and mission planning; and Special Operations clinical training.

Two weeks of Navy specific subjects: Navy Department Administration, Responsibilities, Medical Supply and Authorized Medical Allowance List (AMMAL), Navy Occupational Safety and Health (NAVOSH), Automated Medical Systems, Medical Department Training, Medical Intelligence, and Patient Administration.

SPECIAL INFORMATION: Special Operations or Recon IDC (NEC 8491/8403) is awarded upon successful completion of the Advanced Special Operations Combat Medic course.

### ***SPECIAL OPNS COMBAT MEDIC - MASL : B126633***

Basic Life Support/Automatic External Defibrillation (D); pharmaceutical calculations; anatomy; physiology; pathophysiology; medical terminology; basic physical exam techniques; medical documentation; pharmacology; basic airway management; medical patient assessment; advanced airway management; patient management skills; pre-hospital trauma emergencies and care; advanced trauma tasks/skills; operating room procedures; minor surgical skills; NREMP-Basic examination; obstetrics and pediatric emergencies; cardiac pharmacology; Advanced Cardiac Life Support (ACLS); EMT Paramedic clinical rotation and field internship (consists of 2 weeks ambulance, 2 weeks of hospital, and 4 weeks of paramedic testing preparation); Hospital rotation: rotations in the emergency department, labor and delivery, surgical intensive care, pediatric emergency department, and operating room; Ambulance rotation: assignment to an Advanced Life Support EMS unit responsible for responding to a variety of 911 emergency calls; NREMT-Paramedic exam; care of the trauma patient in a field environment; preventive medicine; nursing care; 30 hours of clinical rotations in clinics located on Fort Bragg, NC, conducting sick call under the supervision of a physician or physician's assistant.

### ***SPECIALIZED ENG LANG TNG - MASL : B177008***

This MASL would be programmed when Specialized English Language Training is required.

### ***SPEC-OPS COMBATNG TERR-MET - MASL : D309048***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***SP-INSTR (UH-1FS) (REF) CN - MASL : B113010***

This course is designed to provide previously qualified aviators with introduction refresher training in instrument tasks using the 2B24 synthetic flight training system..

### ***SQUADRON OFFICER SCHOOL - MASL : D171003***

To develop dynamic Airmen ready to lead air and space power in an expeditionary warfighting environment. Instruction covers the profession of arms; leadership; international security studies; military studies; and communication. The course continues the development of the warrior/leaders and "whole person" professional officers--capable of increased contributions to varied Air Force missions. A small number of international officers, DoD civilians, non-active duty Reserve and ANG may attend. When AU funds are authorized for use (see Authorized Use of AU Training Funds under General Information), fax TDY order to 12CPTS/FMFLT at DSN 487-2592 or commercial at (210) 652-2592. 12CPTS/FMFLT will provide travel order number, fund cite, and certification of funds.

## ***SQUADRON OFFICERS COURSE - MASL : D171032***

This course is modeled after the program taught at the USAF Squadron Officers School (SOS), which prepares USAF company grade officers for increased leadership responsibilities. The course is designed to develop dynamic Airmen ready to lead air and space power in an expeditionary warfighting environment. Educated students will value their unique role as air force officers by applying air and space leadership to effectively execute military missions, and valuing the warrior-leader ethos and its impact on air and space power development. The course improves the student's leadership and management skills, using lessons on leadership, military ethics, air force values, and human rights in addition to developing their knowledge of the use of airpower, including basic theories of warfare and the increasing role of aerospace and information systems in the joint environment. Students in this course receive the same instruction taught to all captains in the United States Air Force that attend SOS in-residence.

**COURSE DESCRIPTION** This Course is not divided into Blocks.

The Squadron Officer Course (SOC) introduces the student to ideas on how an officer should view his/her profession. Students are taught lessons regarding the study of Air Force and Joint doctrine and history. The lessons on officer-ship emphasize the concept of how all officers, regardless of nationality, share the same basic ideals. The course includes studies of United States Air Force (USAF) core values. Lectures and seminars with guest speakers are used to further develop the concepts of leadership, senior officer perspectives, the role of women in the Armed Forces, human rights, military ethics, Law of Armed Conflict and the Uniform Code of Military Justice. Leadership exercises in this course are designed to help students manage their resources. Students investigate the skills necessary to lead, supervise, and communicate with their subordinates, peers, and superiors. Focus is on team building, applying the leadership principles, and developing basic presentation skills. Also included are lessons in quality principals such as techniques for group problem solving, process action teams and methods for continuous improvement that can be realistically applied to any work environment. The course includes a basic primer on the principles of war found in US basic doctrine and the history of air power, from the US perspective, beginning in World War I to lessons learned in Operation IRAQI FREEDOM. The course includes in-depth lessons on the keys for US military success in future conflicts: Joint Operations, Information Operations and Space Systems, and concepts pertinent to the Global War on Terror. In addition, students apply new concepts and principles of leadership during field trips to the Leadership Reaction Course (LRC) located at Lackland AFB. These challenges help the students with leadership, communication skills, and teamwork in a more realistic environment. Prior to the exercises, the students will receive lessons in Operational Risk Management and apply them to the LRC and Confidence Courses.

## ***SR ENL ACAD (SEE LOC: NEA) - MASL : P171019***

To prepare selected senior enlisted leaders, in the grades of E-8 and E-9, to better fulfill their expanded leadership and management responsibilities. The class is divided into small study groups to allow a free exchange of ideas, sharing of experiences, reasoning in problem-solving, and fostering self-confidence and team building. Guest lecturers are used extensively throughout the course as subject matter experts. The 240-hour curriculum addresses the following areas: communication skills, leadership and management techniques, national security affairs, U.S. Navy programs, and health and physical readiness. This course of study requires intensive reading, writing, and public speaking skills. Basic computer skills are also required. To receive a graduation certificate, students **MUST**: pass all writing and speaking assignments, pass all exams, and pass the U.S. Navy Physical Fitness assessment, which includes an initial body fat assessment and physical readiness test with body fat assessment.

## ***SR INFO WRFARE APPL CRS - MASL : D121094***

The Senior Information Warfare Applications Course (SIWAC) is designed to prepare flag officers and civilian equivalents for leadership responsibilities in the planning and execution of information operations. Our guest lecturers and attendees include flag officers, Senior Executive Service members and other senior executives. It is designed to bridge the public and private sectors and enhance senior leaders' understanding of how current and emerging technologies are impacting human decision-making and operations. The focus of the course is on warfighting at the operational and strategic levels and protecting the national critical information infrastructure. Course objectives include: comprehending the role of information in modern warfighting, exploring strategies for protecting and exploiting information, discussing policy and legal ramifications, and examining capabilities available to the warfighter.

### ***SR INTERNATIONAL DEF MGT - MASL : P162004***

The SIDMC course applies basic concepts, techniques, and analysis of comparative resources management to enhance the theoretical knowledge, competence, and capabilities of foreign general/flag officers and equivalent civilian officials. The major curricular concept of this course is comparative resources management, i.e., the examination of theories and practices of various nations, not only those of the U.S. The Institute stresses that each country is unique and must choose resource management systems that meet its specific needs.

### ***SR NCO PROFESSIONAL DEV - MASL : B179115***

Weapons; training management; battle staff planning; counterdrug operations; squad and platoon tactics; fire support; leadership; engineering; communications; land navigation; minimum of 12 hours instruction of human rights; the rule of law; due process; civilian control of the military, and the role of the military in a democratic society.

### ***STAFF NCO ACAD ADV MLT IV - MASL : P171812***

This course provides gunnery sergeants and gunnery sergeants selectees with the education and leadership skills necessary to lead personnel in combat. Instructions are presented through a variety of teaching techniques to include guided discussions, research, writing, presentations, and guest lectures. Emphasis is placed on leadership, education, administration, and tactics.

### ***STAFF ORIENTATION VISIT/DV - MASL : D281904***

Orientation tours are provided to select foreign officers for familiarizing them with U.S. military doctrine, techniques, procedures, facilities, equipment, organization, management practices, and operations. These tours are conducted as short-term orientations as opposed to long-term formal courses. OTs are also intended to enhance mutual understanding, cooperation, and friendship between U.S. forces and participating nations. Tours require appointed escort officers.

### ***STANDARD MISSILE - EOD - MASL : P193140***

STANDARD MISSILE TRNG

### ***STEAM GENPL(Deact-seeTCC) - MASL : P145023***

The Steam Generating plant Inspector Certification course is primarily designed to train and certify personnel in the Machinist Mate rating in pay grades E-7 through E-9 and selected officers (i.e. INSURV, PED) and civilians with the knowledge and skill required to inspect propulsion, auxiliary and waste heat steam generating plants. The certification program will provide technical instruction in propulsion, auxiliary and waste heat steam generating plant inspection. The program will teach inspection criteria and evaluation of the four major loops within the steam generating plant; boiler inspection, automatic boiler control inspection, oil/water laboratory inspection, and support machinery and equipment to include: Inspect for material condition, monitor general readiness, and diagnose improper operating procedures and equipment casualties/failures. Recommend appropriate operational and maintenance corrective measures. Detail repairs of all types of boilers ( main propulsion, auxiliary and waster heat).

### ***STINGER - EOD - MASL : P193144***

Trains selected International Military students in the operation and render safe procedures for a specifically requested guided missile.

### ***STRATEGIC DEPLOYMENT PLANNING - MASL : B153731***

STRADPC is a two-week resident course whose target audience is the movement planner from battalion/brigade to CORPS and Installation Level. Focus is on strategic deployment planning. Students learn concepts and key factors involved in deliberate and crisis action planning. Discuss requirements and capabilities of strategic mobility triad and support operations at POEs and PODs. They are provided an overview of JOPES, TC-ACCIS, MOBCON and learn essentials of mobilization and redeployment. Students participate in a variety of deployment planning exercises. STRADPC employs a variety of teaching methods, with an emphasis on active and higher level thinking.

### ***STRESS & ANGER MANAGEMENT - MASL : P175302***

To provide students with the means of recognizing signs and symptoms of stress and the ability to cope with it through relaxation techniques, diet and exercise, assertiveness, time management, how to study and how to avoid burnout. Anger management

includes discussion, audiovisuals and assignments in such topics as causes of anger, history, responses, acceptable ways to handle criticism and anger aggression vs. assertiveness, coping and self-esteem.

### ***STRIKE FTR NFO IUT - MASL : P115032***

Prepares Naval Flight Officers and Air Force Navigators for advanced concepts of NFO/NAV duties.

### ***STRL DEFENSE PRIVT & OUTSG - MASL : P162011***

STREAMLINING DEFENSE: PRIVATIZATION AND OUTSOURCING

This course will demonstrate how economic and management concepts can be applied to improve the structure and functioning of defense operations and support activities. Practical example of successful outsourcing, public-private partnerships, and make-buy decisions will be provided. Each participant will be required to develop a Strategic Proposal applied to their MoD as a final practical exercise. This proposal will serve as a model for implementing positive change in their Defense Ministry.

### ***SUB DAM CTL WET TEAM TRAIN - MASL : P148040***

Provide refresher training for SSN/SSBN Submarine Damage Control Teams in the use of onboard damage control equipment and in combating flooding casualties under adverse conditions while performing as a team.

### ***SUB F/F 21C12 TM - MASL : P124600***

To develop the proficiency of submarine fire fighting teams by evaluating two practice scenarios and grading the overall performance in the third scenario. Responsive training on individual components will NOT be conducted unless it is requested at least one day PRIOR TO CLASS convening. The team will be comprised of graduates from the Submarine Advanced and Submarine Basic Firefighting Courses (see prerequisites).

SCOPE: Provide instruction on fire, fire extinguishers, hoses and nozzles, SSN-21 class fresh water hose reels, portable atmosphere monitoring equipment, Emergency Air Breathing Masks, A-4 Oxygen Breathing Apparatus, Self contained breathing Apparatus, trainer orientation and safety, and application of fire fighting. Students participating in training must be medically and physically qualified to wear a Self Contained Breathing Apparatus(SCBA) in accordance with OPNAVINST. 5100.23 series.

MEDICAL CRITERIA FOR PARTICIPATION IN FIRE FIGHTING TRAINING:

The following conditions require evaluation by a corpsman and a decision rendered regarding training suitability prior to an individual's participation in live fire fighting training:

- Has had in the last 10 days or is currently being treated for pneumonia, bronchitis, conjunctivitis, or asthma.
- Has had any fractures, sprains, casts, or hernia; less than four hours of sleep the previous night or consumed alcohol in past 12 hours.
- Is currently pregnant.
- History of heart disease or stress related chest pain.
- Current nasal congestion or an ear, nose, or throat infection.
- Within 10 days of postoperative procedure(minor surgery).
- Taking ANY medications.
- On limited duty/light duty or had a tooth extraction, stitches or new tattoos within last 72 hours.
- History of prior heat exhaustion or heat stroke.
- Any other conditions which may affect the ability to complete the course.
- Unable to participate in or complete the Semi-Annual Physical Readiness Test, including body fat standards. 1. Have hypotension or hypoglycemia.

All students will be given a brief regarding the necessary hydration procedures.

All students are required to complete a student HIGH RISK training self-identification statement prior to commencing training. Forms are available at local fire fighting trainer commands. Minimum of 10 students.

### ***SUB FORCE INDEP CORPSMAN - MASL : P175240***

SUB FORCE INDEPENDENT DUTY CORPSMAN

Purpose: To train in the knowledge and skills required to prepare Hospital Corpsmen to render medical care aboard submarines.

Scope: The course includes submarine and nuclear medicine techniques in diagnosis and treatment; management of medical and surgical emergencies; occupational/environmental preventive medicine; medical laboratory techniques; submarine medicine; health physics; radiobiology; atmosphere control; instructor training; mathematics.

### ***SUB FORCE QUAL ASSUR INSP - MASL : P124012***

#### **SUBMARINE FORCE QUALITY ASSURANCE INSPECTOR**

To provide training for perspective Quality Assurance Inspectors to ensure they have a thorough understanding of the requirements and procedures necessary to implement the submarine-type commander policies as they relate to the Quality Assurance Program.

SCOPE: This course provides training for Submarine Force personnel to support coordinating and administering the Submarine Force Quality Assurance Program within their respective work centers. This course fulfills the type commander requirements for formal controlled material petty officer training.

### ***SUB SONAR PRINCIPLES - MASL : P222002***

#### **JMSDF SUBMARINE SONAR PRINCIPLES AND EMPLOYMENT TRAINING**

### ***SUB-SAHARAN AF ORIENTATION - MASL : D126028***

Provides a broad overview of the Sub-Saharan Africa region with an emphasis on cultural, historical, economic, and political issues. The course covers each of the four major regions of Sub-Saharan Africa, providing a historical, cultural, and politico-military background. It also covers health, humanitarian, economic, security, and US policy issues on the continent. The first day is dedicated to regional introduction and historical and cultural overview. The rest of the week examines regional-specific issues focusing on conflict resolution, SOF involvement, and US policy and interests. Completion of this course meets requirements for Force Protection Level I training.

GOAL: To provide individuals with regional information on Sub-Saharan Africa whether deploying to Africa or remaining in CONUS as an African regional analyst.

### ***SUBSISTENCE SPECIALIST "A" - MASL : P163207***

This course provides specialty training for the entry level Food Service Technician in the areas of safety, personal hygiene, sanitation, recipe conversion, equipment usage and basic food preparation for bakery products, a variety of meats and meat products, sauces, egg cookery, vegetables, pasta and starches. The course is taught through both the classroom and through practical experience in the galley. The student will learn how to prepare nutritious foods and a well-balanced menu with recipes that are easily convertible from small to large numbers. The student will also learn how to attractively present foods.

### ***SUPPLY - MASL : D152004***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***SUPPLY AND SERVICE MANAGEMENT OFFICER - MASL : B152761***

Logistic organizations in a theater of operations; field service operations; unit supply procedures; supply support activity procedures; petroleum and water distribution; mortuary affairs; subsistence management; maintenance management; transportation management; military operations other than war; contingency contracting and automated logistics systems.

### ***SUPPLY CORPS OFF BAS QUAL - MASL : P152223***

#### **Supply Officers Basic Qualification Course (BQC)**

The Basic Qualification Course (BQC) is designed to prepare newly commissioned Supply Corps officers with a broad range of initial supply skills. The 22-week computer intensive, detail oriented curriculum includes technical training in supply

management, disbursing, retail operations, food service, postal operations, personal computing, leadership and management (divisional and personnel management), shipboard hazardous material, and Maintenance and Material Management (3M).

### ***SUPPLY MGMT SFO NAVY - MASL : P171003***

International Logistics Executives Advanced Development (ILEAD),

Formerly Senior International Officer Supply Management Course.

Senior International Officers, grade O5 and above, waivers available. Course is taught once per year. This eight-week course is designed to give Senior International Officers a better understanding of current trends in logistics and supply chain management from the military perspective. Starting in FY07, this course will include the Advanced Management Program (AMP) as the first portion of the course. AMP is a three-week long executive leadership course designed for CDR s and GS-13/14 s that deals with transformation, supply chain management, lean six-sigma, and many other management skills used both by industry and DoD. It is a post-MBA level course, taught by professors from University of North Carolina-Chapel Hill and other top-level business schools. It is a full immersion program in which all classes, meals, lodging and snacks are included in the MASL price for this course (first three weeks only). The students will be embedded with equivalent U.S. personnel during this period, and work on group projects and make a group presentation for a panel of Flag Officers on the last day of AMP. Following the three weeks of AMP, site visits will be conducted to various Navy commands in the in U.S. and Canada to give the students an on-site view of the various logistics initiatives and projects currently be worked on by Department of Defense, U.S. Navy, and Canadian Forces. The students will also participate in various events that will allow for a better understanding of American and Canadian societies and culture. All course travel is included in the MASL cost. Class requires an 80 ECL score.

### ***SUPPLY OFF BAS INTL-IOSCO - MASL : P152002***

International Officer Supply Course (IOSCO)

International Officers only, grade O-1 to O-4, waivers available for civilian and enlisted students. Course designed to familiarize students with the organizational structure of the United States Government, United States Navy, Navy Supply Systems Command, Defense Logistics Agency, and the relationship to the Foreign Military Sales (FMS) process. Students are introduced to U.S. Government and civilian leadership of the military, the DoD and Navy Command structure, and how the Defense Logistics Agency and Navy Supply Systems Command support both U.S. and International warfighters. Included in the course is material identification, catalog systems, FMS requisitioning procedures, Security Cooperation Information Portal (SCIP) and other computer and web based tools for customer support.

### ***SUPPLY OFFICER DEPT HEAD - MASL : P152222***

Supply Officer Department Head Course (SODHC)

This four-week course prepares Ensigns through Lieutenant Commanders to assume the duties of the Supply Officer on a ship or submarine. This course includes training in the areas of Supply Management, Food Service, Retail Operations, and Disbursing Management. In addition, training is presented for the following specific technical functions: Small Afloat Purchasing, user certification for the government commercial purchase card program, Small Ship Aviation Logistics, Configuration Management, Hazardous Materials Management including certification as a Hazardous Materials Coordinator Afloat, Total Asset Visibility, and submarine-specific supply functions. Automated Information Systems training is also provided in Streamlined Automated Logistics Transmission Systems (SALTS), Logistics Toolbox, Ported SNAP II/III, Micro-SNAP, R-Supply, FSM, ROM, HICS, HMIS, FEDLOG and Micro-Q. SODHC focuses on current fleet trends and technical developments while it also stresses developing effective and efficient managerial skills to meet the challenging "at sea" environment.

### ***SUPPLY PROCEDURES - MASL : D304023***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***SUPPLY SYSTEMS MGT - MASL : D152023***

This course trains senior noncommissioned officers and civilians to perform duties of a materiel manager. Training includes development of supply policy and enhancements, provide logistics information, train and equip personnel, stockage / retention policy, mission support/weapon system management, purchasing and supply chain management, logistics readiness, and wartime/contingency planning.

### ***SUPT T-1A (T/T) 119FH - MASL : D111025***

Qualifies officers to perform duties and responsibilities of rated pilot. Advanced training (T-1A) airlift-tanker track graduates qualify to fly Air Force airlift/tanker jet aircraft with minimal transition and normally proceed to graduate flying training. Approximately 104 flying hours, 42 simulator hours, 172 academic hours, and 95 hours of officer development. Graduates also receive training on professional officer skills and knowledge required of a junior Air Force officer.

### ***SUPT T-38C (BF) 119.2FH - MASL : D111024***

Qualifies officers to perform duties and responsibilities of rated pilot. Approximately 208 flying hours, 60 simulator hours, 254 academic hours (330 academic hours for T-1A students), and 185 officer development hours. Graduates qualified to fly Air Force jet and helicopter aircraft with minimal transition and normally proceed to advanced flying training. Helicopter assigned pilots will fly the UH-1H in the advanced phase, airlift-tanker assigned pilots will fly the T-1 in the advanced phase, bomber-fighter assigned pilots will fly the T-38 in the advanced phase, and C-130 bound will fly the Navy T-44 in the advanced phase. Graduates will also receive training on professional officer skills and knowledge required of junior Air Force officers.

### ***SURFACE RESCUE SWIMMER C1 - MASL : P129491***

Surface Rescue Swimmer School is designed to provide Navy, USMC (E1-E9), designated Army personnel, and Military Sea Lift Command personnel with the knowledge and skills necessary to initially qualify as Search and Rescue Swimmers. Upon completion of this course, the Surface Rescue Swimmer is prepared for assignment with surface units to provide Rescue Swimmer duties.

SCOPE: This course provides personnel with initial training and hands-on experience in First Aid, CPR, Rescue Equipment, Waterborne Lifesaving Techniques, Day/Night Water Entries, Parachute Disentanglement, Search and Rescue Tactics, Inanimate Object Recovery, Night and Multiple Rescue Situations, and Motor Whaleboat/Rescue boat/Focsle operations. Students will also undergo rigorous physical training which consists of calisthenics, timed swims (up to 2000 meters), and running 25-30 minute group paced runs at a 8.5-10 minute per mile pace.

### ***SURV, EVAS, RESIST, ESCAPE - MASL : P129196***

This course is designed to provide level "C" code of conduct training to selected high risk of capture personnel as directed by respective TYCOMS/MCCDC in accordance with DoD directive 1300.7 and the JSSA executive agent instruction (EAI). Training is accomplished by providing basic skills necessary for worldwide survival, evasion, resistance to exploitation, and escape from captivity. This course is taught at Nas North Island, Ca and Nas Brunswick, ME.

Scope: To train pilots, flight officers, intelligence officers, aircrew, and other selected high risk of capture personnel in the basic skills necessary for world-wide survival, expediting search and rescue efforts; evading capture by hostile forces; resistance to interrogation; exploitation and indoctrination; escape from detection by enemy forces in accordance with DoD directive 1300.7. Training is conducted as outlined in the approved curriculum document. It is based on and reinforces the values expressed in the code of conduct while maintaining an appropriate balance of sound educational methodology and realistic/stressful training scenarios.

### ***SURVIVAL - MASL : D302010***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***SWO DH OPS SPEC INTL - MASL : P179135***

To prepare middle grade International Surface Warfare Officers with previous sea experience to execute Operations and Combat Systems department head duties on board surface units of frigate or larger vessels of the international navies through classroom and available training device instruction.

This training emphasizes department, systems and unit interdependence and interaction, and provides theoretical and technical instruction required to prepare those officers for combined operations at sea with surface units of the United States and other Navies. This course also provides opportunities, through the Informational Program, to enhance the International Surface Warfare Officer's understanding of basic social, moral, and political systems as practiced in the United States.

### ***SWORD ENGLISH LANGUAGE - MASL : B177009***

This MASL would be programmed when English Language Course is required.

### ***SWOS - INTL - MASL : P179136***

#### **INTERNATIONAL SURFACE WARFARE OFFICER**

The International Surface Warfare Officer course prepares junior commissioned officers to execute with confidence, assigned junior officer watch station duties aboard surface warfare craft and ships by providing fleet oriented training. This training highlights shipboard organization, basic systems interdependence and interaction, including a foundation in surface combat systems, operational concepts, watch standing, basic seamanship skills, and engineering. Upon completion of this course, the graduate will possess entry-level skills to perform duties as junior officer of the deck, combat information watch officer, officer of the deck (inport), assistant navigator, and safety officer during deck evolutions, and officer of the deck (underway). This course emphasizes fleet missions as they apply to individual international countries. It discusses naval operations and supporting areas, i.e. air warfare, undersea warfare, amphibious ships, surface warfare, mine countermeasures, damage control, intelligence, and chain of command.

### ***SYS ACQ MAP FOR GEN OFF - MASL : B151000***

The MLC acts a force multiplier by familiarizing students with logistics strategy, doctrine, theory, programs and processes in a multinational environment. It provides the opportunity for them to develop the attributes, perspectives and insights necessary to perform effectively and efficiently as logistics managers in an alliance or coalition at the operational level of war.

NOTE: The MLC deals with activities between countries, not services, as is done in the Joint Course on Logistics (ALMC-JC). As such, there is minimal overlap between the two courses.

### ***SYS SUST MGT FUNDAMENTAL - MASL : B154025***

Systems Sustainment Management Fundamentals provides a broad overview of the role of the life cycle logistician during the sustainment phase of a weapons system's life cycle. Modules cover logistics/ supply-chain management concepts, maintenance processes, end-to-end distribution, best commercial practices as applied to weapons systems sustainment, performance metrics, partnering/alliance opportunities and experiences, performance-based support, enterprise business environment and opportunities, and reduction in life cycle/total ownership costs.

Objectives: Students who successfully complete this course will be able to:

- recognize the role of the life cycle logistician during the sustainment phase of a weapons system's life cycle;
- identify the concepts, policies, and practices of logistics/supply-chain management as they apply to new and legacy systems during the sustainment phase of their life cycle; and
- identify the best practices in developing and implementing performance-based support.

### ***SYSTEMS APPROACH TO TRAIN - MASL : B155470***

This MASL is used when Systems Approach to Training is programmed.

### ***SYSTEMS AUTOMATION - MASL : B155428***

Encompasses information acquired in the ISOL course (7E-F70) and a broad range of automation topics to include networking fundamentals, resource planning and management, systems analysis, programming and database fundamentals, and network/system security fundamentals. This is the primary course for all FA 53s.

## ***SYSTEMS ENGINEERING (GRAD) - MASL : D178218***

The application of scientific and engineering knowledge to the analysis and design of complex systems and their associated components, a system being a collection of objects that operate together to perform some function. The goal of the systems engineer is to understand the entire system, its internal structure and its interactions with its environment. This understanding forms the basis for both analysis and synthesis of systems. Typically, the systems engineer is required to develop system objectives and means of measuring satisfaction of those objectives, create feasible alternatives, and apply rational decision-making procedures to select the best solution. In addition, the large scale problems involved generally require team efforts for solution. The systems engineer must be able to understand and integrate contributions from other specialists, as well as make his or her own contributions. Thus, the systems engineer must be a generalist, with a broad interdisciplinary background, but with depth of knowledge in a particular specialty. The systems engineering curriculum at AFIT is structured to develop such a person. On successful completion of the program, the student receives the master of science or master of science in systems engineering degree.

## ***T-37 JOINT SUPT (89FH) - MASL : D111023***

Qualifies officers to perform duties and responsibilities of rated pilot. Approximately 208 flying hours, 60 simulator hours, 254 academic hours (330 academic hours for T-1A students), and 185 officer development hours. Graduates qualified to fly Air Force jet and helicopter aircraft with minimal transition and normally proceed to advanced flying training. Helicopter assigned pilots will fly the UH-1H in the advanced phase, airlift-tanker assigned pilots will fly the T-1 in the advanced phase, bomber-fighter assigned pilots will fly the T-38 in the advanced phase, and C-130 bound will fly the Navy T-44 in the advanced phase. Graduates will also receive training on professional officer skills and knowledge required of junior Air Force officers.

## ***T-6 JOINT SUPT - MASL : D111140***

Primary training qualifies students for advanced training in the T-38, T-1A, T-44, or UH-1H. Approximately 90 flying hours, 60 simulator hours, 225 academic hours, and 15 officer development hours. Fighter/bomber assigned pilots will fly the T-38 in the advanced phase and airlift-tanker assigned pilots will fly the T-1A in the advanced phase. Helicopter students will fly the UH-1H and C-130 bound students will fly the Navy T-44 in the advanced phase. Graduates will also receive training on professional officer skills and knowledge required of junior Air Force officers.

## ***TAC ACFT MAINT APPR (F-15) - MASL : D141340***

This course provides training for Air Force personnel, AFSC 2A333A, in the skills and knowledge needed to perform duties on the F-15 aircraft. Scope of training includes: TO usage, forms documentation, inspection, servicing, launch, recovery and maintenance of the F-15 aircraft.

## ***TAC ACFT MAINT, F-16 (MRT) - MASL : D141326***

The instructional design for this course is group paced. When necessary, deviation from the preferred sequence of instruction to allow cross utilization of aircraft and major pieces of equipment with operational squadrons is authorized. The course provides first term airmen with the minimum knowledge required for initial assignment to a maintenance organization. Training includes aircraft familiarization with ground safety, basic aircraft system operation, servicing, inspection, launch and recovery. Operational Risk Management (ORM), safety, technical data usage, Core Automated Maintenance Systems (CAMS) and 781 series form documentation are integrated throughout the course for all hands-on performance tasks.

## ***TAC ARCFT MAINT APR (F-16) - MASL : D141231***

The AFSC 2A333B will be awarded after completion of this course and completion of course J3ABP2A333B 007, Fighter Aircraft Maintenance Apprentice (F-16), at Luke AFB AZ. Training includes 19 days of common maintenance training and 65 days of aircraft -specific training with aircraft systems such as airframe, electrical, utility, hydraulic, landing gear, flight controls, fuel, and engine. Commons training includes career progression, AFOSH, security, maintenance management and documentation, hand tools and hardware, technical orders, aircraft ground handling, and inspections.

## ***TAC ARCFT MAINT APR (F15) - MASL : D141341***

The AFSC 2A333A will be awarded after completion of this course and course J3ABP2A333A025A, Fighter Aircraft Maintenance Apprentice (F-15), at Tyndall AFB, FL. Training includes 19 days of aircraft maintenance fundamentals and 55 days of weapon system familiarization and hands-on training with aircraft systems such as egress, airframe, electrical, utility,

hydraulics, landing gear, flight controls, fuel, and engine. Training also includes such items as career progression, security, maintenance management, maintenance documentation to include CAMS and AFTO forms, ordering parts, aircraft and flight line safety (AFOSH), hand tools and hardware, technical orders, aircraft support equipment, aircraft ground handling, corrosion identification, and inspections.

### ***TACT AIR CNTR PRTY-N036741 - MASL : P124514***

To train students in the joint tactics, techniques and procedures used for controlling and integrating the broad spectrum of fire support and air power available to the Marine Air-ground Task Force (MAGTF) or Joint Task Force (JTF) Commander. Marine aviation officers (naval aviators and naval flight officers), assigned to a Marine Expeditionary Force (MEF) Tactical Air Control Party (TACP) will receive a 7502 MOS and be prepared to accomplish their mission as Forward Air Controller (FAC) or staff Air Officer (AO).

SCOPE: This course encompasses the concepts, doctrine and principles used in the employment of air power in support of MAGTF or JTF operations. The curriculum prepares students to accomplish eight broadly based mission-essential duties and includes instruction in both planning and employing air power as an integrated fire support asset or force multiplier in support of the ground combat scheme of maneuver.

### ***TACT NETWORK SPEC OPS CRS - MASL : P155403***

#### **TACTICAL NETWORK SPECIALIST OPERATORS COURSE**

Tactical Data Network Operators are responsible for installation, configuration, operation, and maintenance of networking systems. This includes installing and configuring switches, routers and various transmission media. Tactical Data Network operators also, install, optimize and trouble-shoot Wide Area Networks (WAN) and operate the current Tactical Network system. They will receive core data concepts training before receiving more detailed training in tactical networking principles and systems.

### ***TACTICAL AIR CONTROL PRTY - MASL : P124520***

Format. Taught in residence at EWTGPAC. Includes three-day live fire exercise at Marine Corps Air-Ground Combat Center, Twentynine Palms. Course is presented at EWTGPAC and EWTGLANT. N306741

Purpose. To train students in the joint tactics, techniques, and procedures used for controlling and integrating the broad spectrum of fire support and air power available to the Marine Air-Ground Task Force Commander (MAGTF) or Joint Task Force (JTF) Commander. Marine aviation officers (naval aviators and naval flight officers) assigned to a Marine Expeditionary Force (MEF) Tactical Air Control Party (TACP) will receive a 7502 MOS and be prepared to accomplish their mission as a Forward Air Controller (FAC) or staff Air Officer (AO).

Scope. The course encompasses the concepts, doctrine, and principles used in the employment of air power in support of MAGTF or JTF operations. The curriculum prepares students to accomplish eight broadly based mission-essential duties and includes instruction in both planning and employing air power as an integrated fire support asset or force multiplier in support of the ground combat scheme of maneuver.

### ***TACTICAL AIR INTELLIGENCE - MASL : D172023***

This course targets officers O1-O3 and enlisted requiring basic intelligence operations experience. The course prepares personnel with little or no intelligence experience to accept the responsibilities of an intelligence officer or NCO at the unit level. Students receive fundamental information on the different fields within the intelligence community. Instruction includes brief and de-brief, development and use of maps and charts for order-of-battle information as well as target mission folder preparation.

#### **COURSE DESCRIPTION**

- **BLOCK I MAPS AND CHARTS** The overall objective of this block is to give the students the capability to use and understand the principles of maps and charts. Students receive instruction on the fundamentals of maps and charts to include distance measurement, course and direction, and are taught to use two specific coordinate systems: geographic and the military grid system. Finally, the students build situation maps and order-of-battle displays.
- **BLOCK II INTRODUCTION TO INTELLIGENCE** The overall objective of this block is to introduce students to the different fields of specialization within the intelligence community and principles of information security. Students study intelligence officer (analyst) duties and responsibilities, various intelligence specialties, the mission and

responsibilities of intelligence in the Air Force environment, intelligence production, and information security. Discussion focuses on air force intelligence career fields and the interrelation of these fields to the intelligence application specialist, the primary focus of the course. Students study the phases of the intelligence cycle from planning to dissemination. Additionally, students learn and apply the principles of security throughout the course in daily operations.

- **BLOCK III - INTELLIGENCE SUPPORT TO AIR OPERATIONS** The overall objective of this block is to provide students with the necessary skills and confidence to effectively deliver timely professional intelligence products to their customers. During this block of instruction, students learn about the various intelligence briefings and how to conduct and construct them using computer media. Discussion and implementation includes debriefing techniques and reporting with emphasis placed on briefing techniques and basic analysis of message traffic. Students also receive basic visual recognition training for air, ground, and naval systems.
- **BLOCK IV - TARGETING** The overall objective of this block is to give the student the capability to perform target analysis and prepare target folders and mission briefing/debriefing. The course places emphasis on route and threat analysis. Students also receive basic instruction on plotting information on electronic map software.
- **BLOCK V MISSION PLANNING AND FORCE EMPLOYMENT** The course culminates with five days (45 hours) of exercises, which include all areas previously learned in the course. The exercises encompass order-of-battle construction for air, ground, naval, and electronic systems, pre-mission preparation and planning, post-mission debriefing, and a commander's crisis situation briefing. This block also includes law of armed conflict and human rights instruction.

### ***TACTICAL DATA LINK & C4I - MASL : P139298***

Long Title: Tactical Data Link (TDL) and Command, Control, Communications, Computers and Intelligence (C4I) course of study (JMSDF only). Training is approximately one year in duration.

### ***TACTICAL LOGISTICS OFFICER - MASL : P179251***

This course will provide company grade, career-level professional military education to logisticians. The goal of the course is to enhance the professional abilities of logisticians who must plan and execute complex combat service support operations in support of the tactical operations of ground and aviation units. The course focuses on the fundamental and doctrinal aspects of tactical-level logistics in support of combat service support operations, as well as current and future issues that will help to prepare logisticians to assume active roles in the Expeditionary force-level and below.

The objective is to bridge the gap between entry-level initial skills training and advanced intermediate-level logistics education. The course is divided into three phases:

- Phase I examines the Theory and Nature of logistics; the role of logistics in supporting combat service support operations; and reviews Marine Air-Ground Task Force organization, employment capabilities and limitations.
- Phase II centers on the tactics, techniques, and procedures for creating effective and efficient CSS for the MAGTF across the spectrum of employment scenarios.
- Phase III is to consider future operational concepts and the role logisticians play in enabling the execution of emerging war fighting concepts and technologies. This is a PME School course.

### ***TATS AIR DEF ART ANCOC - MASL : B171803***

The ADA core (phase 2) addresses topics in SHORAD/HIMAD operations/tactics, RSOP, employment, defense design, command and control, destruction of weapon systems, service support, and maintenance management.

### ***TATS BRIDGE CREWMEM BNCOC - MASL : B174125***

Training in demolitions, reconnaissance, fixed bridging, float bridging, offensive and defensive operations.

### ***TATS CANNON CREWMEMBER - MASL : B122190***

Course Scope:

Basic duties of a soldier in a field artillery howitzer section include identifying the different types of howitzer and the techniques of handling ammunition, setting fuses, preparing charges, loading and firing the howitzers, performing maintenance, and performing other duties of the cannoneer.

### ***TATS CHAPLN OBC (COM CORE) - MASL : B169530***

Basic military training including acculturation to the Army, physical fitness, and drill and ceremony. Provides training in basic military skills, profession of arms, leadership doctrine, and organization of the Army.

### ***TATS DRILL SERGEANT - MASL : B179949***

The course is designed to provide candidates information and training techniques for subjects that drill sergeants are required to teach in IET to include human relations, leadership, counseling, physical fitness training, weapons training, drill and ceremonies, methods of instruction, hand grenades, combatives, general subjects, gender integrated training management, and tactical training applicable to the IET environment. The major emphasis of the instruction will be on how to train initial entry training soldiers to become highly motivated, skilled, and physically fit.

### ***TATS FA CANON SEC CH BNCOC - MASL : B122195***

The Basic NCO Course (BNCOC) is conducted in an NCO academy environment. The course includes training on safety, weapons, the Precision Lightweight Receiver (PLGR) and the Force XXI Battle Command Brigade and Below, FBCB2.

### ***TATS FA MET CREWMEMBER - MASL : B121148***

The course is designed to train personnel in the basic concepts of meteorology, basic communications systems, surface observations, balloon inflation, and operation of the Meteorological Measuring Set, AN/TMQ-41.

### ***TATS FA PLATOON SGT ANCOG - MASL : B122200***

The Platoon Sergeant Advanced Noncommissioned Officer Course (ANCOG) is designed to teach the 13B40 to perform skill level (SL) four tasks. Skills focused upon are the duties of the platoon sergeant, chief of firing battery, gunnery sergeant, battalion master gunner, and the battalion ammunition NCO. The course provides instruction in leadership training management, professional, skills, resource management, and military skills. Subjects include common leader skills: operations, intelligence, and warfighting skills, the course also teaches the student to process tactical fire control data.

### ***TATS FLD ARTILLERY SURVEY - MASL : B121150***

Skills that a level one personnel need to perform as a member of a field artillery survey party are: tactical communications, map reading, determine the distance between stations by mechanical and electronic means, determine direction by astronomic observation and gyroscopic means, operate angular measuring instruments and automated survey systems, record field data, prepare schematic sketches of field surveys, and finally compute direction, distance, grid coordinates, height and astronomic azimuth from field data.

### ***TATS MET EQP-MET DATA SYS - MASL : B121167***

Preventive maintenance checks and services, troubleshooting and isolation of faults, and repair and replacement of defective components.

### ***TATS MLRS CREWMEMBER - MASL : B194086***

The soldier will receive training on either the M270 or M270A1 Launcher depending on first unit of assignment. In addition all soldiers will be trained on the proper operation of the M985 Heavy Equipment Mobile Tactical Truck (HEMTT) and the M989A1 Heavy Equipment Mobile Ammunition Trailer (HEMAT). Soldiers will also be instructed on proper maintenance procedures, proper hand and arm signals, communications, duties at the firing point, reload operations, and land navigation skills.

### ***TATS PAT SYS TECH WO BASIC - MASL : B195194***

Provide knowledge on the PATRIOT missile systems operations, support concepts, and organization of technical publications. Training in the principles and theory of tactics, fault diagnostics and problem isolation; functional theory of operations of the Engagement Control Station, Antenna Mast Group, Information Coordination Central, Communications Relay Group, Electric Power Plant, radar set and launcher station maintenance.

### ***TECH PREP TRNG PH II ELEC - MASL : P179612***

FST Phase II Electricity and Electronics curriculum provides the student who will be entering the electricity or electronics career field with the academic skills and practical knowledge of fundamental electricity and electronics. This curriculum includes

safety, magnetism, inductance, capacitance, resonance, transformers, generators, motors, power supplies, simple circuits, radio frequency communication, navigation, radar, and test and measuring equipment. The intent of FST Phase II is to provide specialized training prior to entry in a U.S. Navy Class A1 (Initial Skill Training & Enlisted) School.

### ***TECH TRAINING INSTRUCTOR - MASL : D166041***

This course prepares experienced officers, NCOs, and civilians to perform instructor duties in their respective specialty. Top Air Force technical training concepts and techniques taught in this course ensure instructors deliver quality instruction. The course is designed to give the student a fundamental base of knowledge, not only on how to conduct classroom instruction, but on how to develop a curriculum as well. The course uses extensive practical exercises to build the students presentation skills. The end result is a fully certified instructor ready to meet the most demanding instructional assignments.

#### **COURSE DESCRIPTION**

- **BLOCK I - FUNDAMENTALS OF TEACHING** Instructional techniques and communicative skills lay the foundation for technical instruction. The developmental approach to academic instruction covers instructor roles, responsibilities, and motivational theories. The purpose and use of effective instructional aids are covered in detail. Effective questioning techniques are reviewed and practiced. The students will prepare one informal lecture presentation to practice those technical concepts covered in this block of instruction.
- **BLOCK II - CURRICULUM DEVELOPMENT** Techniques learned in the fundamentals of teaching block are applied to the instructional system development process. This process teaches the instructor how to develop and maintain a quality course. Development of criterion instructional objectives set the stage for standardized instruction. Development of effective measurement devices is covered and practiced. The student will prepare one informal lecture presentation. This lecture allows the student to further enhance their teaching techniques prior to practice teaching (Block III).
- **BLOCK III - PRACTICE TEACHING** This block is designed for maximum student participation. The student will apply all instructional techniques covered in the two previous blocks to practice and deliver effective presentations. The students will prepare and present four different presentations; one informal lecture, one demonstration/performance, one guided discussion, and one final lecture using an instructional method chosen by the student and approved by the instructor. Test administration, control, and security procedures are also covered in detail. Student administration procedures are reviewed and discussed. Instructor counseling techniques are reviewed, practiced, and enhanced through classroom scenarios. This block completes the instructor certification requirement.

### ***TECHNICAL AMMUNITION - MASL : B142922***

This course provides basic training in the technical aspects of ammunition and explosives for personnel involved in ammunition related operations. It also provides a base for advanced study in the ammunition areas of maintenance, demilitarization, and storage and supply/inventory management. In addition, the course meets the requirements for certification of personnel under the provisions specified in AMCR 350-4, TRADOC-R 350-30 and FORSCOM-R 350-10. Course content includes Department of Defense (DoD), Army, Navy and Air Force references for ammunition and related operations, basic information on types of explosives and non-surety chemical agents, descriptions and functions of ammunition items, explosives safety and requirements for the storage and on-installation transportation of ammunition.

### ***TECHNICAL CHEMICAL SURETY MATERIEL COURSE - MASL : B142957***

This course covers descriptions of toxic chemical agents, their effects, symptoms from exposure, and self aid/buddy aid treatments of effects. Types of munitions, containers, protective clothing, and detection equipment, along with detection capabilities and decontamination procedures are discussed. The Personnel Reliability Program (PRP) is identified and defined. Chemical Accident/Incident Response and Assistance (CAIRA) to include types of emergencies, agent hazard prediction capabilities, and effects of weather and terrain are examined. Current and proposed methods for disposal/demilitarization of surety agents are also discussed.

### ***TECHNICAL ENGINEERING SPECIALIST - MASL : B174100***

Construction surveying using conventional equipment, and the automated integrated survey instrument for military construction to include: project mapping operations, construction support surveys, road operations, construction support surveys, road construction, and building and utilities layout surveys. Conventional and computer aided drafting to include: applied engineering graphics, architectural, structural, and roadway drawings, materials estimating, and map overlays. Use of soils, concrete and

asphalt test sets for obtaining information on materials properties of aggregated, soils, concrete and bituminous materials used for site evaluation, design, construction, and quality control of military construction. .

### ***TECHNICAL ENGINEERING SPECIALIST-CN ONLY - MASL : B174114***

Construction surveying using conventional equipment, and the automated integrated survey instrument for military construction to include: project mapping operations, construction support surveys, road operations, construction support surveys, road construction, and building and utilities layout surveys. Conventional and computer aided drafting to include: applied engineering graphics, architectural, structural, and roadway drawings, materials estimating, and map overlays. Use of soils, concrete and asphalt test sets for obtaining information on materials properties of aggregated, soils, concrete and bituminous materials used for site evaluation, design, construction, and quality control of military construction. Also includes Common Engineer Training (CET) for Army personnel.

### ***TECHNICAL OPERATIONS - MASL : P179353***

TECHNICAL OPERATIONS (NORWAY). This course is specific to NORWAY and provides training in the operation of the IWS system in tactical submode positions. In addition, trainees will be able to recognize system casualties, repair and recommend decisions in a tactical multi-warfare environment. This course covers the operation of CIC sub modes that respond to system casualties, which influence system effectiveness. Specific sub modes are Radar System Controller (RSC), Combat Systems Coordinator (CSC), Missile System Supervisor (MSS), Computer Program Interface Supervisor (CPIS), Training Supervisor (TNGS) and Training Assistant (TRNGA). Discussion and practical applications will include Doctrine, LINK information, SPY doctrine, ADS doctrine, System Training set-up, ACTS scenario operations, Engagement operations. Training will include a normal system and a system with casualties. Trainees will initialize repair and maintain system while conducting operational scenarios.

### ***TECHNICAL PREP TRNG PH I - MASL : P179610***

FST Phase I is a 16-week course of instruction that provides the international student with fundamental academic skills and practical knowledge in the following areas; Training Orientation, Learning Skills, Vocabulary, Reading, Reading Comprehension, Mathematics, Interpretation of Graphics, Learning to Use a Manual, Physical Science, Job Skill Orientation, and Life Fitness. The intent of FST Phase I is to provide an entry-level ability in science, math, and technical comprehension prior to FST Phase II and eventual enrollment in U.S. Navy Class A1 (Initial Skill Training & Enlisted) Schools. FST Phase I instruction is followed by one of three variants of FST Phase II depending on the students intended area of skill training. Phase II training currently consists of three tracks; Mechanics, Electricity and Electronics, or Logistics/Computers.

### ***TECHNOLOGIES FOR INFO OPS - MASL : P179220***

Course Title: Technologies for Information Operations (replaces current title: Information and Electronic Warfare Technology)

Course A course tailored for mid to high-level officers (Capt - LtCol) based on recent research and development in associated Information Operations technologies. The course is a technical workshop presented by various NPS faculty that covers several exciting technology areas important for tomorrow's war fighters. Examples of areas covered include: Decision modeling and tactical analysis as an introduction to special methodologies of command and control; newest developments in unmanned aerial vehicles, cruise missile technologies and SAR image compression techniques, high-speed networking, wideband receiver design methods as well as wireless antennas; ultra wideband impulse methods; atmospheric predictions; weapons effects and radar and laser cross-section engineering. Topics will vary depending on faculty availability.

There are two tracks available:

Command and Control warfare

Weapons Systems

The course also offers fieldtrips to different defense related engineering facilities, and serves as an excellent opportunity for the exchange of information and technology among participants in a stimulating environment

### ***TELE-COMM SYS CNTL/ATT/MAP - MASL : D132024***

Principles-centered training related to the management of networks and Communications-Computer Systems (C-CS) ; theory and procedures for monitoring status and performance of various types of analog and digital transmission circuits and systems, Local Area Networks (LANS) and Wide Area Networks (WANS), and associated equipment; procedures for configuring circuits,

systems and networks based on service requirements. Provides standards and techniques relating to circuit testing and quality control, to serve as a basis for predicting, preventing, and correcting circuit deterioration or system malfunctions; theory and techniques for circuit, system, network, and equipment fault isolation; control and coordination procedures to direct or perform corrective actions. Identify basic characteristics and capabilities of the TSEC/KY-68 (DSVT-Digital Secure Voice Terminal), present common uses of the KY-68, TSEC/KG-84A/C (GPED - General Purpose Encryption Device), contrast between the different versions of the KG as well as its compatibility with the KIV-7. Basic characteristics and of the KIV-7 High Speed Data Encryption Device/KG-84 Embeddable, the TSEC/KG-94/94A (Trunk Encryption Device), and TSEC/KOI-18 General Purpose Tape Reader.

### ***TEMPOROMANDIBULAR DISORDER - MASL : P175655***

Designed to clarify the relationship between TMJ mechanics, jaw movement, occlusal schemes, and the functional needs of the patients. Scope: Clinically oriented discussions and laboratory exercises will focus on the application of occlusal concepts, principles of articulation, recording and transferring hinge axis and interocclusal records, manipulation of semi-adjustable articulators.

### ***TERMINAL INSTRUMENT PROC - MASL : D121020***

The course trains officers and Airmen to perform the duties prescribed for an Automated Terminal Instrument Procedures (TERPS). Training includes: Introduction to TERPS, General Criteria, TERPS Automation, Database Management, Terminal Area Fixes/Waypoints, Precision Approach Procedures, Non-Precision Approach and Radar Procedures, Diverse Departures, Terminal Airspace, Aeronautical Studies, Waivers, Administration, Digital Mapping, Source Documentation, MVAC, MIFRAC, PAR equipment, and RNAV.

### ***TH-67 ADV IFR - NORWAY - MASL : B113078***

Provides additional instrument training beyond that received in the Initial Entry Rotary Wing Aviator course. Includes physical and mental skills and information as necessary for accomplishment of rotary wing instrument flight tasks and flight planning.

### ***THE ARMY INSTRUCTOR TNG CRS - MASL : B179921***

The Methods of Instruction portion contains lessons on the basic fundamentals and techniques of instruction to include training objectives; lesson plan types and format; training aids; USAOMMCS evaluation program; training support; and student planning and presentation of two lessons. The Counseling and Guidance portion includes lessons on interpersonal communication skills, listening skills, body language, counseling fundamentals, documentation of the counseling session and students are also given the opportunity to role-play different counseling situations.

### ***THEATER AIR OPNS TRNG - MASL : D122055***

To provide Air Force Security Assistance Training (AFSAT) for international officers in the advanced knowledge and skills needed to perform air battle manager duties in an air operations center (AOC) environment

### ***TMDE MAINTENANCE SUPPORT SPECIALIST - MASL : B142501***

To provide training in the skill and knowledge required to maintain the U.S. Army Test, Measurement and Diagnostic Equipment (TMDE) program, including calibration and troubleshooting of Army peculiar TMDE and provides training on the identified Army-wide Warrior Training Tasks and Battle Drills requirements.

### ***TOP KNIFE II (SN) - MASL : D119052***

The TOP KNIFE II course is designed to educate flight surgeons and other selected medical professionals about the demanding world of fighter pilot aerospace medicine. Provides training to flight surgeons on their role as providers/crewmembers in high performance aircraft. Provides a comprehensive background in the physiology of high performance flight as well as tactical, operational and squadron environments. Training is accomplished through a combination of medical didactics, flying academics, tactical flying sorties, and various simulators. Training can be conducted at Luke AFB, AZ or at Kelly Field, TX using TC Syllabus F16C0FSOPL.

### ***TRACK DATA COORD - MASL : P121154***

MULTI-TADIL (TACTICAL DIGITAL INFORMATION LINK) TRACK DATA COORDINATOR

To provide selected Naval Personnel (Operations Specialist, E3-E9, and Officers, 01-03) with the requisite knowledge of the capabilities and limitations of Link capable units, Data Links, 11, and 16; and the necessary skills to write an Optask Link Message, initialize and monitor Links 11 and 16, and operate in a multi-link environment in accordance with Joint Maritime TADIL Operating Procedures 6120.1C and current operational directives.

Scope: This course provides the knowledge and skills required of Naval personnel in the Operations Specialist rating (E3-E9) and Officers (O1-O3) to perform as Tactical Information Coordinator (Tic)/Track Supervisor and/or Interface Control Officer. Upon completion of this course of instruction the trainee will have obtained the knowledge and skills to : Initialize the C2P Subsystem, Links 11 and 16 in accordance with Joint Maritime TADIL Operating Procedures 6120.1C. 3. Monitor the C2P Subsystem and Links 11 and 16 in accordance with Joint Maritime TADIL Operating Procedures 6120.1C.

### ***TRACKED VEHICLE MECHANIC - MASL : B144314***

Initial entry level (IET), automotive Direct and General Support (DS/GS) maintenance training emphasizing maintenance publications, tools, TMDE, maintenance safety and discipline, troubleshooting, repair, and replacement of assemblies and components.

### ***TRAFFIC MGT APR - MASL : D153029***

Provides training for planning, arranging, and procuring air, rail, motor carrier, and bus transportation service for DoD military and civilian personnel and dependents, including shipment and storage of personal property, house trailers, and privately owned vehicles; classifying, documenting, and arranging for shipment of government-sponsored cargo by military air and motor vehicle and by commercial air, rail, express, motor carrier, and parcel post. Provides instruction in operating material handling equipment; procedures for receiving inbound shipments; performing packing and crating procedures; preservation of items; custom requirements; freight terminal operations; saw operations and heat sealing; deployment operations; data automation; security and safety. Utilizes the TOPS and CMOS computer systems.

### ***TRAINING MGT & DEVELOPMENT - MASL : D162030***

This course provides training for officers, NCOs, and civilians to enable them to effectively develop, administer and evaluate On-The-Job Training (OJT) Programs. The course is oriented for middle to upper-level training supervisors and managers who are directly involved with job-specific training activities. The training concepts taught in this course are easily adaptable to any professional specialty and include how to plan an OJT program, administer training, evaluate training programs, prepare training directives, and document an OJT program.

#### **COURSE DESCRIPTION**

- **BLOCK I - OJT ORGANIZATION** This block covers basic organization of OJT programs. Topics include structure of the OJT program, OJT responsibilities for the supervisor/trainee, presentation of an impromptu speech, developing a specialty job description, and documenting and maintaining training forms and records. The student learns to develop training charts, OJT records, and master task listings as well as determine training needs, capabilities, and resources. Training scheduling processes is also covered.
- **BLOCK II - HOW TO CONDUCT, EVALUATE, AND DOCUMENT TRAINING** Block II focuses on the actual execution of training programs. Topics include initiating the training process, identification and application of the laws of learning (training related), selecting training strategies and principles, and selecting/applying training methods and techniques. The student learns to develop and apply the demonstration-performance method, as well as select and apply training evaluation methods. Instruction also includes managing the training evaluations process and developing effective written and performance tests.

### ***TRAINING SYS SPECIALIST - MASL : D166024***

This course provides training in the development, administration, and management of work center training programs to include training program design and development, use and interpretation of various training reports, including Core Automated Maintenance System (CAMS) reports, maintenance training functions, management of Career Development Course (CDC) programs, the design and use of automated products, and hands-on application in staff assistance visits (SAVS) and teaching the Air Force Training Course.

## ***TRANSP STOW HAZ MAT - MASL : P153050***

HAZMAT Transportation

A two-week (80 hour) course that provides the mandatory training prerequisite for command approved qualification to certify hazardous material for shipment via all modes of transportation. This course is directed at all personnel that may certify hazardous material that are not previously certified or that need to re-certify and have not used their prior training extensively. Covers certification for ship, air (internationally) and ground transportation (U.S. and Canada) for shipments of Hazardous Material.

## ***TRANSPORTATION BASIC OFFICER LEADER - MASL : B121290***

PROPOSED IMPLEMENTAION FY06.PROPOSED IMPLEMENTAION FY06.

## ***TRAUMA REFR CRS FOR SURGEO - MASL : D309025***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

## ***TRAUMA REFR FOR SURGEONS - MASL : P175801***

TRAUMA REFRESHER COURSE FOR SURGEONS (TRCS)

Course Objectives:

- Describe the common patterns of battlefield injuries and be familiar with their surgical management -- Discuss a variety of battle damage control techniques
- Define the concept of forward resuscitative measures in the management of battlefield casualties and evacuation-- Perform basic emergency ophthalmologic, orthopedic and neurosurgical procedures through "hands-on" instruction by surgical specialists in a cadaveric lab.
- Demonstrate expertise in performing an exploratory laparotomy for trauma through a variety of simulated injuries in the pig lab.
- Demonstrate the principles of ultrasound techniques in a combat trauma patients using didactics and simulation lab.
- Demonstrate ability to manage multiple battlefield casualties in a simulated mass casualty exercise.

## ***TRAUMA/CRIT CARE PARARESC - MASL : D309024***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

## ***TRNG, MANPWR & PERS MGT - MASL : P179204***

Manpower, Personnel, Training and Education (MPT&E) Course (MASL P179204) This training is designed for officer and senior enlisted personnel who plan, manage, and conduct training, as well as personnel involved in manpower, personnel and resources. The course objective is to acquaint students with the various aspects of managing navy training, manpower and personnel programs from top to bottom including planning, budgeting, and execution. The organizational functions at the various functional levels are explored, from joint chief, ministry, headquarters staff, and training activity levels. The course is designed to create an awareness of the procedures of material readiness and operational readiness objectives. The MPT&E explains techniques and identifies tools available for use in applying and implementing training, manpower and personnel management principles. Participants examine the integration of training disciplines with other disciplines that must be managed during each phase of the acquisition process. The formal classroom instruction is approximately 3 weeks and comprises a series of lectures delineating key facets of training, manpower, and personnel management subjects. The course provides participants a wide range

of ideas that may be incorporated into their own training management and training programs. The approximately 3 weeks following contain orientation tours of military activities, which are designed to show modern training techniques, technologies, and procedures. Additionally, the International Instructor Training School is also an optional course to be taken by all personnel attending this course (please see course description and MASL numbers below).

**INTERNATIONAL INSTRUCTOR TRAINING SCHOOL (IITS):** Course objective is to provide the student with the knowledge, skills, and tools required to excel in various military training capacities - facilitator, stand-up presenter, subject matter expert, mentor, and administrator. The course of instruction is divided into 3 phases:

- **PHASE I - Management Information System (MASL PDET002)** (2 weeks) is an intensive phase of instruction that provides the student with required computer skills in the following areas: Operating Systems, Word, Excel, Access, PowerPoint, Internet, and Networking Fundamentals. Note that Phase I is not a prerequisite for the final 2 phases; however, Phase I is highly recommended and complements Phases II and III.
- **PHASE II - (MASLs P166308 and P166309)** Facilitated computer based training (CBT) (3 weeks) consists of four facilitated CBT modules of instruction individually tailored to student needs. This provides the student with the specific technical knowledge, skills, and tools required to successfully complete the two required performance tests and to perform successfully in their future positions. The training includes, but is not limited to the following: Instructor Training Overview, Effective Communication Techniques, the Instructor's Role(s) in Training, CBT facilitation, Stand-up instruction - the Art of Teaching, Assessment - More than a Test, Administration - Taking Care of Details, Mentoring - Instructors are Leaders, Preparation of Lesson Plans, and a Practicum.
- **PHASE III - (MASL 166316)** Two performance tests (1 week) are required for the learner to pass in order to become a certified Journeyman-Level Instructor - tests are graded by the student using CBT facilitated format and stand-up instruction using technology.

### ***TRNSP HAZARDOUS MATERIALS - MASL : D153019***

Replaces L3AZR2T000 009, Hazardous Materials Preparer (Initial)(Resident). NOTE: This course number change is due to the mandated HQ TC Course Number System initiative and NOT due to course material changes.

Provides training for selected DoD military and civilian personnel to prepare hazardous material shipments for transport via military air, commercial air, rail, motor, and water modes. Provides packaging requirements and procedures for marking, labeling, placarding, and compatibility requirements. This course meets the formal training requirement for preparers of hazardous materials according to AFMAN 24-204(I) and meets the provisions stated in the Hazardous Materials Training Working Group common core curriculum. Authorizes personnel to certify the shipper's certification on government bills of lading and provides training to complete and certify legally binding certification documents (such as, shipper's declaration for dangerous goods, and shipper's certification for military air) for shipments of hazardous materials according to DoD, commercial, and military publications.

### ***TROP WEATHER ANALY > FCST - MASL : D121014***

Training in specialized techniques required for analysis and forecasting in the tropics. Intended primarily for Air Force personnel with assignment, or potential assignment, to duties that require forecasting for tropical areas. The course contains instruction in tropical climatology, kinematics and dynamics of the tropical atmosphere, analysis techniques, application of satellite data to analysis, and forecasting methods for tropical systems. Emphasis is placed upon lab application of analysis and forecasting techniques.

### ***TROUBLESHOOTING ELEC PWR - MASL : D148132***

Provides knowledge and skills needed to perform advanced electrical troubleshooting of electrical power generating equipment. The scope of training includes: Electrical characteristics of current, voltage, resistance, and power in direct current (DC) circuits; Requirements and factors affecting AC power generation; Soldering techniques; In-depth reading/interpretation of electrical wiring diagrams and troubleshooting of the MEP-007B and Onan (80 kW) generator sets; Construction features, theory of operation, and troubleshooting of Onan and Zenith automatic transfer panels (ATP).

### ***U.S. COAST GUARD ACADEMY - MASL : P170011***

FOUR-YEAR UNIVERSITY. This U.S. service academy's cadet (undergraduate-level) program is demanding both physically and mentally. Professional education in nautical science, military training, and physical fitness are given. Training culminates in

the individual receiving a bachelor of science degree in one of the following majors (specialties): marine engineering and naval architecture, electrical engineering, civil engineering, mechanical engineering, marine and environmental sciences, management, or government. The sponsoring government must agree in advance to reimburse the USCG for all costs incurred for a cadet's training at the Academy (predetermined price varies annually), except where a waiver has been granted by the Commandant, and also must agree that, upon graduation, the cadet will serve in the comparable maritime service of his/her respective country, for an appropriate period of time, as determined by the sponsoring government.

### ***U-36 SIMULATOR - MASL : P128011***

Lear Jet (U-36) Simulator Training.

### ***UH-1 FLIGHT SIMULATOR - MASL : B119962***

Training will consist of emergency procedure training, instrument training, visual flight training, crew coordination, and aircraft system training. Specialized training available upon request. Contact the IMSO for special requests.

### ***UH-1 HELO RPR SUPVR BNCOC - MASL : B141780***

Technical training in the aircraft maintenance management field is oriented toward developing skills and knowledge of aircraft maintenance management principles and procedures. The student is provided with the training required to successfully perform the supervisory and technical inspector (TI) duties required of MOS 67N30.

### ***UH-1 MAINT MGR/MAINT TP - MASL : B141782***

Based on tasks that are specified for skill level I training; also covered subjects (Not included in the trainer's guide) considered necessary for student understanding and proficiency in powertrain repair and non-destructive testing skills.

Foreign Military Latin American and selected National Police Personnel. Course covers the systems for the OH-58A/C, UH-1H and UH-60. The OH-58 is similar to the Bell 206; UH-1H is similar to the Bell 204, 205 and to a lesser extent, the 212 and 214 series aircraft, this course will only be trained with military manuals.

### ***UH-1H HELO MECH - MASL : D141304***

This course was designed to provide the apprentice level helicopter crew chief with specific advanced maintenance on the UH-1H airframe and its systems. Emphasis is placed on those tasks that relate to the journeymen level such as operating adjustments, component overhaul and troubleshooting of most common helicopter anomalies.

#### **COURSE DESCRIPTION**

- **BLOCK I - GENERAL FAMILIARIZATION** This block begins with flight line safety responsibilities at the supervisory level. Students will receive a thorough understanding of flight controls and rigging procedures. They are familiarized with tasks related to airframe and landing gear inspections, landing gear cap adjustments, deflection checks and weigh the helicopter using load cells. Flight control inspections are performed and troubleshooting procedures discussed. Rigging procedures are performed on the collective, cyclic and tail rotor flight control systems.
- **BLOCK II - T 53-L-13 TURBOSHAFT ENGINE MAINTENANCE** Adjustment and troubleshooting of the T-53 turbo shaft engine and its components is the focus in this block. Students will perform engine throttle and power control rigging. They will also perform engine to transmission alignment and starting engine procedures using the UH-1 systems trainer.
- **BLOCK III - ROTORS AND DRIVE TRAIN SYSTEM** Main and tail rotor hub assembly inspection and overhaul procedures are accomplished. The main rotor hub is disassembled and reassembled with special emphasis on seal replacement. Wear limitations are identified and discussed. Dynamic balancing procedures of main and tail rotors are accomplished through hands-on training. The student will learn the operating characteristics of the drive train system. They will also become skilled on how to disassemble and reassemble the drive shaft hanger bearings and main drive shaft. Students will gain knowledge of operating principals of all gearboxes. They will learn to remove, inspect, and install the 42 degree and 90 degree gearboxes
- **BLOCK IV - HELICOPTER VIBRATIONS AND VIBRATION ANALYSIS EQUIPMENT** In this block the student is taught vibration characteristics and their effects on the helicopter airframe and rotating components. They will learn to install and use vibration analysis equipment and apply troubleshooting techniques to solve vibration problems. Students

will install actual equipment on aircraft and apply troubleshooting procedure with a whirly-gig simulator to reduce vibrations. An in-depth introduction to the 8500 spectrum analyzer, its use and function is described.

### ***UH-1H MOUNTAIN QUAL - MASL : B113205***

The course consists of flight training during which the student will perform normal and terrain flight navigation, takeoffs and approaches to pinnacles, ridgelines, and confined areas, in terrain varying from rolling hills to steep jagged cliffs with altitudes ranging from 6,500 feet PA to over 14,000 feet PA. Emphasis on risk management, environment mastery, crew coordination, safety awareness, power management, and performance planning.

### ***UH-1H/T-53/L-13 ENGINE - MASL : D141242***

This course is designed to provide jet engine technicians with a thorough understanding of all T-53-L-13B engine systems and maintenance procedures. Students learn the necessary skills to perform intermediate and organizational level maintenance on the T-53 -L-13B engine. Students are required to pass a written and or performance tests at the end of certain blocks prior to advancement to the next block of instruction.

#### **COURSE DESCRIPTION**

- **BLOCK I - ENGINE SYSTEM FAMILIARIZATION AND OPERATION** This block begins with a course orientation, in which students learn about the academy's policies and procedures along with academic requirements. Immediately afterwards, students begin learning the general characteristics and theory of operation of the T-53-L-13B engine. With a strong foundation in theory of operation, students begin in-depth study of oil, torque meter, fuel, electrical, variable guide vane, compressor, bleed air, and anti-icing systems.
- **BLOCK II T-53 ENGINE COMPONENTS AND MAINTENANCE PROCEDURES** The students receive instructions and are made aware of general safety issues concerning T-53 engine maintenance. The second block covers general maintenance and inspection concepts, removal and inspection of reduction gear assembly, removal of N1 accessories and gearbox assembly, and upper compressor case removal and inspection. The 2J-T-53-16 engine technical manual is explained in detail. Students learn how to proficiently use it to find information to remove, disassemble, and inspect the combustion and turbine assembly. The students receive hands-on experience on the tear-down and build-up of the T-53-L-13B engine to include: inspection of the diffuser section; removal, inspection, and installation of the fuel control and its designated filters. This block of instruction culminates with engine preservation, storage procedures and is measured with a written examination.
- **BLOCK III UH-1H HELICOPTER ENGINE MAINTENANCE** Students are familiarized with engine related systems on the UH-1H helicopter. They learn to safely remove, inspect, and install the T-53-L-13B engine. They also learn to properly adjust engine controls for normal operation. The last unit in this block deals with a discussion on troubleshooting procedures of all engine systems. This block of instruction ends with a written examination and course assessment.

### ***UH-60 AVIATOR QUAL - ALL - MASL : B113037***

Provides the student with the necessary skills and knowledge required to achieve pilot qualification in the UH-60 helicopter. Includes training in the mental and physical skills required for the accomplishment of pilot duties through instruction in aircraft systems, navigation and command instrument systems, combat skills, flight training, mission planning, and safety. Aviators who are night vision device (NVD) qualified will receive NVD qualification in the uh-60. Aviators not NVD qualified will receive NVD familiarization based on proficiency.

### ***UH-60 AVIATOR QUAL - EN - MASL : B113169***

Course Scope:

Provides the student with the necessary skills and knowledge required to achieve pilot qualification in the UH-60 helicopter. Includes training in the mental and physical skills required for the accomplishment of pilot duties through instruction in aircraft systems, navigation and command instrument systems, combat skills, flight training, mission planning, and safety. Aviators who are night vision device (NVD) qualified will receive NVD qualification in the UH-60. Aviators not NVD qualified will receive NVD familiarization based on proficiency.

### ***UH-60 AVR QUAL - SPANISH - MASL : B113127***

Course designed to provide the student with the necessary skills and knowledge required to achieve pilot qualification in the UH-60 helicopter. Training in the mental and physical skills required for the accomplishment of pilot duties is achieved through instruction in aircraft systems, navigation and command instrument systems, combat skills, flight training, mission planning, and safety. Aviators will receive night vision device (NVD) qualification training in the UH-60 helicopter.

### ***UH-60 FLIGHT SIMULATOR - MASL : B119960***

This MASL is used when UH-60 Flight Simulator is programmed.

### ***UH-60 FLIGHT SIMULATOR - MASL : B119981***

This MASL would be programmed when UH-60 Flight Simulation training is required.

### ***UH-60 FLIGHT SIMULATOR - MASL : B119951***

This MASL would be programmed when UH-60 Flight Simulation training is required.

### ***UH-60 HELICOPTER RPR SPAN - MASL : B141729***

Emphasis is on aircraft maintenance technical training. Instruction covers aircraft maintenance procedures that will provide the student with the skills and knowledge necessary to perform UH-60 maintenance: replacing system and subsystem assemblies and components; servicing and lubricating components and obtaining oil samples; performing limited maintenance operational checks, scheduled inspections, and troubleshooting; using and maintaining ground support equipment and common, special, and precision tools required for maintenance and ground handling; using hand and arm signals to guide aircraft; using applicable forms, records, and publications; and using the Unit Level Logistics System-Aviation (ULLS-A).

### ***UH-60 HELO REPAIRER - MASL : B141778***

Trains the student in the use and preparation of selected forms and records applicable to Army Aviation Maintenance to include Unit Level Logistics System-Aviation (ULLS-A); to perform AVUM and AVIM tasks, to include component removal, inspection, and requisitioning of repair parts; to perform visual inspections to identify common, precision and special tools; to identify and select correct fuels and lubricants used on the UH-60 Helicopter; and to train the student in the facets of shop and flight line safety procedures.

### ***UH-60 HELO RPR SPAN-PLN CO - MASL : B141731***

Emphasis is on aircraft maintenance technical training. Instruction covers aircraft maintenance procedures that will provide the student with the skills and knowledge necessary to perform UH-60 maintenance: replacing system and subsystem assemblies and components; servicing and lubricating components and obtaining oil samples; performing limited maintenance operational checks, scheduled inspections, and troubleshooting; using and maintaining ground support equipment and common, special, and precision tools required for maintenance and ground handling; using hand and arm signals to guide aircraft; using applicable forms, records, and publications; and using the Unit Level Logistics System-Aviation (ULLS-A).

### ***UH-60 HELO RPR SUPV BNCOC - MASL : B141767***

Technical training in the aircraft maintenance management field is oriented toward developing skills and knowledge of aircraft maintenance management principles and procedures. The student is provided with the training required successfully perform the supervisory and technical inspector (TI) duties required of MOS 67T/15T30.

### ***UH-60 HELO RPR SUPV SPAN - MASL : B141726***

Technical training in the aircraft maintenance management field is oriented toward developing skills and knowledge of aircraft maintenance management principles and procedures. The student is provided with the training required to successfully perform the supervisory and technical inspector (TI) duties required of UH-60 Helicopter Repairer Supervisor.

### ***UH-60 INSTRUCTOR PILOT - MASL : B115021***

Course consists of flight and academic instruction in theory of flight, instructing fundamentals, aircrew training, regulations, safety, automatic flight control system, power train, hydraulic and electrical systems, malfunction analysis, and night academics;

methods of instruction for contact maneuvers, tactics and night vision goggle maneuvers, dual and single operations, and emergency procedures.

***UH-60 IP MOI (GRAD) - ALL - MASL : B115009***

Flight and academic instruction in theory of flight, instructing fundamentals, aircrew training, regulations, safety, automatic flight control system, power train, hydraulics and electrical systems, malfunction analysis, methods of instruction for contact maneuvers, tactical tasks, night vision goggles training, dual and single engine operations, emergency procedures, and command instrument system operations. Sufficient depth of knowledge will be gained to enable the graduate to teach academic and flight instruction in the UH-60 aircraft.

Flight and academic instruction in theory of flight, instructing fundamentals, aircrew training, regulations, safety, automatic flight control system, power train, hydraulics and electrical systems, malfunction analysis, methods of instruction for contact maneuvers, tactical tasks, night vision goggles training, dual and single engine operations, emergency procedures, and command instrument system operations. Sufficient depth of knowledge will be gained to enable the graduate to teach academic and flight instruction in the UH-60 aircraft.

***UH-60 SIMULATOR - KOREA - MASL : B119904***

This MASL is used when UH-60 Simulator-Korea is programmed.

***UH-60/CH-47 HELICOPTER ELECTRICIAN - MASL : B141754***

Restore electrical systems and subsystems, to include troubleshooting and repair of aircraft wiring and stabilization, basic electronics theory, aircraft battery maintenance, common soldering and systems installation practice with use of associated tools and test equipment.

***UHF SYSTEMS TECHNICIAN - MASL : P139224***

To provide operation and maintenance training on the AN/WSC-3 Communications Sets, OA-9123/SRC Antenna Coupler, OE-82(Series) Antennas, the UHF Demand-Assigned Multiple Access (DAMA) system and the Officer in Tactical Command Information Exchange Subsystem (OTCIXS) and Tactical Data Information Exchange Subsystem (TADIXS) for E-2 through E-9 Electronics Technicians.

SCOPE: To provide selected trainees with the knowledge and skills required to operate and maintain, under limited supervision, the AN/WSC-3 Communications Sets (including satellite and line-of-sight), the UHF Demand-Assigned Multiple Access (DAMA) and the Officer in Tactical Command Information Exchange Subsystem (OTCIXS) and Tactical Data Information Exchange Subsystem (TADIXS) to the card/module level of maintenance and to perform system level troubleshooting under normal operating conditions aboard surface ships.

***UHPT FLIGHT INST - MASL : P115006***

The Undergraduate Helicopter Flight Instructor Under Training curriculum is designed to provide designated Naval Aviators with the appropriate flight procedures, instructional methodology, and techniques to instruct undergraduate helicopter pilots in the Undergraduate Helicopter Flight Training Curriculum. CIN Q-2C-0015.

***UNIT MVMT OFF DEPLOY PLAN - MASL : B153729***

Unit deployment planning; unit movement plans; plans and conduct of movement training; COMPASS/AUEL; unit movement automation; preparation of unit supplies and equipment; hazardous cargo by surface mode; plan and conduct CONUS highway operations; convoy documentation; marshalling procedures; use of containers in unit deployment; rail movement planning; railway equipment characteristics and use; blocking, bracing, packing, crating and tie down procedures and equipment for all modes; rail load out exercise; host nation rail; sea deployment, strategic airlift, A/DACG operations, preparation of supplies, equipment and personnel for movement by air, and building a 463L pallet; unit deployment through the sea port of embarkation; use of Military Shipping Labels (MSL) (TC-ACCIS familiarization); port support activity; prepositioned stocks are mentioned in several blocks of instruction; and theater reception and redeployment.

***UNIT SUPPLY SPECIALIST - MASL : B152466***

Procedures used to request, receive, store, issue, and maintain or establish accountability of individual, organizational, installation and expendable/durable supplies and equipment; maintain security and administration of a unit arms room, and organizational

maintenance of small arms; setup and operate a computer system, install and use DA Pam 25-30, use automated forms program to create selected forms, and use the ULLS-S4 automated supply program to operate and manage the supply operation at unit/organizational level.

***UNIT SUPPLY SPECIALIST ANCOG - MASL : B152467***

Inspections; leadership; operations management; correspondence; briefing techniques; effective listening; personnel management; the enlisted promotion system; non-commissioned officer development; military justice; safety; threat; Army and platoon operations; technical assistance to units; requesting and posting changes to authorization documents; maintaining status of funds (Tactical Unit Financial Management Information System/Standard Financial System/Self Service Supply Center; TUFMIS/STANFINS/SSSC); manual property book procedures; unit readiness (DA Forms 2406 and 2715); supply services; maintenance and transportation in the theater of operations, and methods of obtaining relief from responsibility for property. Automated data processing training will be limited to subjects such as fundamentals of automation and introduction to the operation of the Unit Level Logistics System S-4.

***UNIT SUPPLY SPECIALIST BNCOC - MASL : B152468***

Provide a training overview of the capabilities, purpose, use, and alternate CP configurations of the FBCB2 system. Also, provide training on how FBCB2 integrates with other ABCS systems

***UNIX SOLARIS/LAN OV (KS) - MASL : P179365***

GIS COMPUTER NETWORK OPERATION AND MAINTENANCE (O&M) (KOREA)

Through Classroom presentation with simulations and tactical equipment use, where appropriate, this course provides the student a detailed knowledge of the GIS element Advanced Processing Services (APS), enclosures, and AN/UYQ-70 based tactical display equipment theory, operation, and maintenance. The course covers the physical, functional, and operational elements of the GIS Advanced Processing Services (APS). Also included, are the Mission Critical Enclosures (MCE) and Commercial-Off-The Shelf (COTS) related equipment Functional and operational description of the AN/UYQ-70 tactical display equipment will be discussed. Basic operation of the ORTS, to include Fault Detection and Fault Isolation (FD/FI) testing of the MCE cabinets will be included. Other areas covered will be ADS, ADS Command Role, and submode operations to support warfare operations.

***UNRP E/E CNTR(INACT @ EWL) - MASL : P149302***

UNREP ELECTRICAL AND ELECTRONIC CONTROLS MAINTENANCE

To provide training in the maintenance, operation and repair of UNREP electrical and electronic control systems. To provide training in maintenance, operation and repair of the STANDARD ELECTRONIC MODULES (SEM) controller for 4th generation tension and speed winches. The first week of instruction is designed to provide the student with basic knowledge in cargo and fuel STREAM operations as well as a fundamental understanding of hydraulic theory. Also provided are necessary alignment procedures for the STANDARD ELECTRONIC MODULES (SEM) electronic controls for the fourth Generation Highline Winch. The second week of instruction is designed to provide the student with the necessary skills and related knowledge to troubleshoot, repair, maintain, and align UNREP Electrical Electronic controls of the 4th generation tension winches. Basic knowledge of the Ram tensioner, Ram position indicator, and Automatic Ram controls are also included. The third week of instruction provides the student with the necessary skills to maintain and troubleshoot the electrical control for the Electric Drive/RAM Drive (HPU) sliding block, three speed/two speed Saddle winches. The student will acquire knowledge in electro-hydraulic closed loop servo systems. NEC 4668 will only be granted with satisfactory completion of the three week course.

***UNWTR DEMOL/SEAL INDOC - MASL : P124302***

To prepare prospective officer and enlisted personnel physically and psychologically for the rigorous twenty-five week (BUD/S) curriculum. A progressive approach to physical conditioning of running, swimming, calisthenics and obstacle course. Attention is given to sufficient recovery time between physical evolutions to eliminate injuries due to fatigue and poor conditions, with emphasis on achieving a passing score on the BUD/S physical screening test. This course is HIGH-RISK.

### ***UNWTR DEMOL/SEAL TRNG BAS - MASL : P124301***

To train officer and enlisted personnel of the U.S. Navy in the basic skills for duty with SEAL Teams. Physical and mental conditioning, including extensive physical training, distance running and swimming; beach reconnaissance and survey techniques; small unit tactics; practical demolition techniques; principles of diving; and open and closed circuit SCUBA diving.

### ***USA C&GSC OFF PREPARATORY - MASL : B171782***

Attended by all international officers, officers from other U.S. military services, and U.S. Army Chaplain, Judge Advocate General, and AMEDD officers. It is a course in U.S. military and U.S. Army terminology, organization, tactics, logistics, and management. It also provides the international officers with an appreciation of the political, social, and economic factors which have bearing on U.S. people, their traditions, and their way of life.

### ***USA FLIGHT SURGEON PRIMARY - MASL : B175260***

The course covers Army regulations pertaining to aviation medicine, Army flight surgeon responsibilities and procedures, Army Flying Duty Medical Exam administration, Army aviation organization and operations, rotary wing aerodynamics, aviation safety, aircraft accident investigation, flight physiology, aviation medicine issues of clinical specialties, health service support of aviation units and operations, aeromedical evacuation, and deployment medicine issues of the aviation operation environment.

### ***USA SERGEANTS MAJOR ACAD - MASL : B171200***

The Sergeants Major course is a task-based, performance-oriented, scenario-driven course of instruction designed to prepare promotable Master Sergeants for Sergeants Major and Command Sergeants Major positions within a force projection army. Major subject areas include leadership, combat operations, and sustainment operations. Specific areas of study include team-building, communicative skills, national military strategy, training management, force projection, operations other than war, Reserve Components, and a professional development electives program. The course integrates the learning objectives from the Battle Staff NCO course, the Master Fitness Trainer course, and facilitator training. To identify battle-staff qualification, graduates will receive the ASI2s upon successful completion of the course. Additionally, qualified students who successfully complete master fitness training during extension studies will receive the ASIP5. Course emphasis is on skills, knowledge, and attitudes required for Sergeants Major to excel in positions of greater responsibility throughout the defense establishment.

### ***USA SGT MAJ ACAD PREP - MASL : B171201***

In-processing; orientation; duties and functions of the International Military Student Office; federal, state, city, local, installation, and USASMA regulations and policies; currency; living allowances; conduct and personal appearance; dependent care; firearms; off-limits establishments; medical and dental examinations; emergency care; leaves and passes; travel; overview of the Sergeants Major course, International Fellows Program, Informational Program, and the Physical fitness training program; team building and group process; preparation for class, briefings, and presentation; using the Learning Resource Center; U.S. Army uniform equivalents; USASMA history and command briefing; techniques of military briefing; Army writing; military acronyms and abbreviations; country brief standards; NCO history and museum tour; American military culture, customs and courtesies; understanding and expecting cultural differences; human rights issues; computer training using Microsoft Office Word, Excel, and PowerPoint, and maintaining an e-mail account on a newly issued notebook computer and printer; Informational Program includes the history of El Paso, Fort Bliss, and the southwestern area of the U.S.; city, county, state, and federal governments and law enforcement agencies, and introduction to a ten-month study of the culture and lifestyle of the American society.

### ***USAF CENTRIFUGE TNG CRS - MASL : D128025***

A two-track course that provides qualification (Track 1) and refresher (Track 2) centrifuge training to Air Force and other non-DOD and FMS aircrews. AFI 11-404 provides a detailed description of the centrifuge training requirements. Instructs aircrews in procedures and techniques for increasing High G tolerance. Classroom instruction provides information on High G physiology, proper anti-G straining techniques, and prevention of G-Loss of Consciousness. Centrifuge runs provide aircrews an opportunity to practice an effective anti-G straining maneuver and also provide an assessment of the aircrew's ability to transition to high-G aircraft. Completion of the appropriate track of centrifuge training is a prerequisite for entry into all fighter formal training courses. \* The retraining program is 3 days. This program is for aircrews who fail qualification training. Refer to AFI 11-404 for additional information.

### ***USAF LIFE SCI EQUIP INVEST - MASL : D122094***

NOTE: Course number L3AZR 1T171 000 will be replaced by course number L3AZR1T171 0L1A effective with the 7 Nov 06 class. Provides the knowledge to conduct the life sciences equipment portion of a Safety Investigation Board (SIB). Familiarize students with aircraft safety investigation board responsibilities, mishap investigation techniques, and formal report writing.

### ***USAF SENIOR NCO ACADEMY - MASL : D171029***

Conducts an advanced professional military education program for selected senior NCOs to better prepare them for their leadership responsibilities by expanding their leadership and managerial capabilities and their perspective of the military profession. The curriculum, designed to meet senior NCO needs, consists of lectures and small group work seminars. The principal instructional method is the 12 to 14 member-guided discussion. In this forum, students share ideas and experiences and work collectively to achieve various educational objectives. Members of the Academy's faculty and speakers from AU, Headquarters USAF, other commands, and civilian agencies lecture at the Academy. The Academy curriculum is based on the belief that the senior NCOs attending the course bring with them some understanding and competence in all areas of the curriculum. Curriculum modules include: Communications Skills, Profession of Arms, and Leadership and Management (Behavior Analysis, Human Relation Development, and Organizational Management) and Combined Ops.

### ***UTILITIES SYS APR - MASL : D148211***

This course provides training for Air Force personnel in the Enlisted Classification Directory for the 3E431 AFSC. Training includes the fundamentals of utilities systems, water systems and waste water systems; installation of fixtures; repair and maintenance of plumbing systems; repair of interior piping systems; repair of exterior piping systems; backflow prevention; and utilities equipment. The AF-unique portion of this consolidated tri-service course includes Air Force Civil Engineer organization and Utilities Career Field structure; utilities-specific mathematics, biology and chemistry; fundamentals of water and wastewater treatment; special systems; and utilities-specific contingency operations.

### ***VBSS TEAM TRAINING - MASL : P124013***

VBSS TEAM TRAINING

### ***VETERINARY FOOD INSP SP (BASIC) - MASL : B175239***

Provides enlisted personnel the techniques used to determine identity, condition, and quality in the food groups; red meats to include pork, water foods, poultry, eggs, dairy products, fresh fruit and vegetables, and semi perishables. Sampling procedures and forms; contract administration; basic food inspection procedures to include sensory evaluation; and basic food establishment sanitation. Safety and quality assurance procedures; surveillance inspection and veterinary preventive medicine. Work uniform required.

### ***VIBRATION BASICS - MASL : P145537***

VIBRATION BASICS

The Vibration Basics Course outline of instruction provides personnel with the knowledge and skills necessary to properly perform machinery vibration measurement as a key component of a Condition Based Maintenance Program. Students will be provided coverage of vibration measurement basics, data acquisition sensors and instrumentation, various measurement standards, and necessary physical and mathematical models for understanding actual measurements and what they represent. The course demonstrates how these components are utilized to form a Condition Based Maintenance Program in a hands-on fashion. The course includes use of vibration instrumentation and actual machinery vibration data acquisition and review. The student will be able to properly perform machinery vibration measurements on machinery afloat and ashore as part of a modern Condition Based Program.

### ***VLS ISEA/FSR TRNG - MASL : P195125***

USN MK 41 IN-SERVICE ENGINEERING AGENT/FIELD SERVICE REPRESENTATIVE (ISEA/FSR) COURSE

SYNOPSIS: The VLS Basic ISEA/FSR Training Course is the major system theory, operation, fault isolation, and repair course. Course provides students with in-depth theory; experience and safety awareness required to operate/maintain and repair the Mk 41 Vertical Launching System. Course also provides instruction designed to assist in system installation and check-out. Students will learn operational theory and "next higher level" fault isolation from a systems view with emphasis on the interaction between

the major equipment components of VLS and the interaction between VLS and the Weapon Control System (WCS). This course is a requirement for all field service engineers and technicians planning to attain official certification as a VLS System Maintenance Technician (SMT). Successful completion of this course is required prior to performing work on the Mk 41 Launcher. Satisfactory completion of this course is the first requirement of the U.S. Navy Mk 41 VLS Personnel Certification Program. Additional field experience is required prior to applying for SMT certification. Official SMT certification is granted by PHD-NSWC after completion of the PCP.

This course is offered to foreign navies who have adopted a similar PCP to certify their own MK 41 VLS installation and operational personnel, subject to NAVSEA concurrence. Topics include: Introduction to the Mk 41 Vertical Launching System, Gas Management System, Power Distribution System, Deluge, Sprinkler, Launcher Drainage and Plenum Drain Systems, Anti-Icing System, Launch Functions and Launch Control System, System Installation and Special Test Equipment, Strikedown and Replenishment System, System Fault Isolation, Data Reduction, and Missile Safety Report. TARGET AUDIENCE: Engineers and Technicians entering the Mk 41 VLS Personnel Certification Program (PCP) and others requiring an in-depth understanding of the theory, operation, fault isolation and repair of the Mk 41 Vertical Launching System.

NOTE: Military personnel must be graduates of Mk 41 VLS O&M or equivalent course

### ***VLS MK41 O/M BASELIII (NO) - MASL : P122037***

#### **MK41 VERTICAL LAUNCHING SYSTEM OPERATION AND MAINTENANCE BASELINE III COURSE**

Provides personnel in the gunner's mate missile rating with the technical knowledge and requisite skills necessary to operate and maintain the System under limited supervision at the organizational level of maintenance. Training includes the theory and operation, troubleshooting procedures, PMS requirements and applicable safety precautions for the following components:

- VLS MK-41 GMLS
- Status Panel
- AN/UYK-20(V) Computer
- AN/UYK-44(V) Computer
- AN/USH-26(V) Cartridge Magnetic Tape Unit
- OL-267(V)1/UYK Data Terminal Group
- AN/USQ-69(V) Data Terminal Set
- RO-530/UYK Line Data Printer
- Sprinkler System
- Ventilation System
- Deluge System
- Strikedown Elevator/Crane Assembly
- Package, Handling, Storage and Transportation Equipment (PHST)
- Strikedown Replenishment Equipment
- Magazine Support Equipment.

### ***VLS MK41 OPS/MT/MAG SPKLR - MASL : P195154***

A combination of VLS MK41 OPS/MT (P195990/A-121-0569 and Magazine Sprinkler System (P145068) and taught by contractor Lockheed Martin Baltimore. Provides students with a basic understanding of how to operate the MK 41 VLS in all modes and configurations, observing all safety precautions. Students learn how to perform scheduled and unscheduled maintenance as well as fault isolation and repair to the lowest replaceable unit using the required technical manuals and procedures. Operation and maintenance is taught from an equipment viewpoint. Second aspect of training is to train personnel in proper operation, testing casualty analysis, preventive maintenance, and repair of salt water activated magazine sprinkler systems and associated thermo-pneumatic automatic controls. Course includes classroom and laboratory instruction including theory of operation, valves, thermo-pneumatic controls and piping. During practical sessions students operate, test, isolate casualties, and repair operational classroom mock-up sprinkler systems. Tailored to country requirements.

### ***VLS MK41(Deact-See TCC) - MASL : P122061***

Provides personnel in the gunner's mate missile rating with the technical knowledge and requisite skills necessary to operate and maintain the System under limited supervision at the organizational level of maintenance. Training includes the theory and operation, troubleshooting procedures, PMS requirements and applicable safety precautions for the following components:

- VLS MK-41 GMLS
- Status Panel
- AN/UYK-20(V) Computer
- AN/UYK-44(V) Computer
- AN/USH-26(V) Cartridge Magnetic Tape Unit
- OL-267(V)1/UYK Data Terminal Group
- AN/USQ-69(V) Data Terminal Set
- RO-530/UYK Line Data Printer
- Sprinkler System
- Ventilation System
- Deluge System
- Strikedown Elevator/Crane Assembly
- Package, Handling, Storage and Transportation Equipment (PHST)
- Strikedown Replenishment Equipment
- Magazine Support Equipment.

### ***VLS STNDRD MISS ENCAN/DECA - MASL : P195145***

This course will provide the student with the skills and knowledge necessary to safely and efficiently install and remove STANDARD Missiles from the MK 13 VLS canisters and perform empty and loaded canister tests the MK 680 Combined Missile Test Set (CMTS). This Encan/Decan course includes, but is not limited to the following topics.

- Safety overview
- MK13 canister, MK 41 VLS and Standard Missile general overview
- Missile inspection
- Pack and unpack missile from its shipping container
- MK13 canister inspection, testing and maintenance
- Missile encanisterization and All-Up-Round (AUR) testing
- Installation and removal of canister PHS&T
- Missile decanisterization
- Canister code plug configuration
- Canister Code Plug recertification
- Canister S&A manual safe precautions and procedures
- VLS support and test equipment maintenance, certification and overview
- Support documentation overview

### ***VLSMK41(Deact-See TCC)(SP) - MASL : P195992***

This is an FMS only version of the military Operation and Maintenance course taught at FTC San Diego and is tailored to meet the specific FMS requirements of a specific country and ship class. The course provides students with a basic understanding of how to operate the MK 41 VLS in all modes and configurations, observing all safety precautions. Students learn how to perform scheduled and unscheduled maintenance as well as fault isolation and repair to the lowest replaceable unit using the required technical manuals and procedures. Operation and maintenance is taught from an equipment viewpoint.

### ***VTS CERTIFICATION - MASL : P124405***

VESSEL TRAFFIC SERVICE (VTS) CERTIFICATION

To provide certified Vessel Traffic Control Specialists to operational VTSs having the basic knowledge, skills and abilities requisite to pursue local qualification. The objective of the course is to provide the student with knowledge regarding Vessel

Service operations and to provide insights into port and commercial vessel operations. Supported by VTS and vessel bridge simulation the student gains understanding of the role played by a VTS in an operational port.

### ***WARRIOR LEADER - MASL : B229002***

Basic leadership skills, NCO duties, responsibilities and authority, and how to conduct performance-oriented training. It focuses on leader training for first time leaders. Produces battle competent junior NCOs who are qualified team/section/ squad leaders, trainers of leader and warfighting skills, evaluators and counselors, conductors/participants in individual and collective training, and performers/teachers of leader skills, knowledge, and attitudes. The course is non-MOS specific, taught in an NCO Academy live-in environment using small group instruction with practical application, followed by hands-on, performance-oriented training conducted in a field environment, culminating with a field training exercise. Cadre assess the student's leadership potential and evaluate their ability to apply lessons learned and effectively lead their classmates in a tactical environment.

### ***WARRIOR LEADER - MASL : B229021***

Basic leadership skills, NCO duties, responsibilities and authority, and how to conduct performance-oriented training. It focuses on leader training for first time leaders. Produces battle competent junior NCOs who are qualified team/section/ squad leaders, trainers of leader and warfighting skills, evaluators and counselors, conductors/participants in individual and collective training, and performers/teachers of leader skills, knowledge, and attitudes. The course is non-MOS specific, taught in an NCO Academy live-in environment using small group instruction with practical application, followed by hands-on, performance-oriented training conducted in a field environment, culminating with a field training exercise. Cadre assess the student's leadership potential and evaluate their ability to apply lessons learned and effectively lead their classmates in a tactical environment.

### ***WARRIOR LEADER COURSE - MASL : B219906***

Basic leadership skills, NCO duties, responsibilities and authority, and how to conduct performance-oriented training. It focuses on leader training for first time leaders. Produces battle competent junior NCOs who are qualified team/section/ squad leaders, trainers of leader and warfighting skills, evaluators and counselors, conductors/participants in individual and collective training, and performers/teachers of leader skills, knowledge, and attitudes. The course is non-MOS specific, taught in an NCO Academy live-in environment using small group instruction with practical application, followed by hands-on, performance-oriented training conducted in a field environment, culminating with a field training exercise. Cadre assess the student's leadership potential and evaluate their ability to apply lessons learned and effectively lead their classmates in a tactical environment.

### ***WARRIOR LEADER COURSE - MASL : B129908***

Basic leadership skills, NCO duties, responsibilities and authority, and how to conduct performance-oriented training. It focuses on leader training for first time leaders. Produces battle competent junior NCOs who are qualified team/section/ squad leaders, trainers of leader and warfighting skills, evaluators and counselors, conductors/participants in individual and collective training, and performers/teachers of leader skills, knowledge, and attitudes. The course is non-MOS specific, taught in an NCO Academy live-in environment using small group instruction with practical application, followed by hands-on, performance-oriented training conducted in a field environment, culminating with a field training exercise. Cadre assess the student's leadership potential and evaluate their ability to apply lessons learned and effectively lead their classmates in a tactical environment.

### ***WARRIOR LEADER COURSE (AI) - MASL : B219907***

Basic leadership skills, NCO duties, responsibilities and authority, and how to conduct performance-oriented training. It focuses on leader training for first time leaders. Produces battle competent junior NCOs who are qualified team/section/ squad leaders, trainers of leader and warfighting skills, evaluators and counselors, conductors/participants in individual and collective training, and performers/teachers of leader skills, knowledge, and attitudes. The course is non-MOS specific, taught in an NCO Academy live-in environment using small group instruction with practical application, followed by hands-on, performance-oriented training conducted in a field environment, culminating with a field training exercise. Cadre assess the student's leadership potential and evaluate their ability to apply lessons learned and effectively lead their classmates in a tactical environment.

### ***WATER SURVIVAL - MASL : D121002***

Train aircrew members and other designated personnel in employing principles, procedures, techniques, and equipment that improve the probability of survival and recovery after over water ejection or bailout.

### ***WATER SURVIVAL TRAINING - MASL : PDET006***

Program provides international students the opportunity to qualify in one of several U.S. navy aviation oriented training programs including pilot, Naval Flight Officer (NFO), rescue swimmer, Basic Underwater Demolition/Seal (BUD/S), or aircrew training. The physical training is designed to build the students overall body strength in order to perform the many physically demanding tasks that are encountered during all types of flight training. Water survival training exposes student to special swim conditioning for familiarization, and be able to adapt to, the open water environment.

### ***WATER TREATMENT SPECIALIST - MASL : B174861***

Water purification and treatment equipment; storage facilities; distribution systems; site set-up operations, safety; environmental stewardship protection, and TRADOC-Mandated common military training (CMT) subjects.

### ***WATERBORNE INSTRUCTOR CRS - MASL : P122033***

Course provides instruction in medical training, instructor development, weapons, seamanship, and swimming. Course breakdown is as follows: Medical training teaches basic life support and first aid. Instructor development covers theoretical and practical application of learning principles and concepts, instructional methods, communication skills, interaction and control techniques. Additionally, the course covers the use of training aids and technology, as well as performance-oriented training to include planning and developing of learning objectives and lesson topic guides. Weapons instruction covers basic training in the operation, employment, and maintenance of patrol craft weapons systems and various individual small arms to include routine and preventive maintenance as well as range safety procedures. Weapons systems include the M2HB .50 caliber machinegun, MK19 40mm grenade launcher, M60 machinegun, M16A2 carbine rifle, M203 and M79 40mm grenade launchers, and the M1911A1 .45 caliber pistol. Seamanship training includes high-speed and confined-space maneuvering. Additional training includes night vision goggle employment, and the operation of on-board electronic equipment such as radar, GPS and communications equipment. Swim instruction teaches the basics of water survival to include breast, side, and elementary back survival strokes, drown-proofing, improvised floatation, and lifesaving procedures. Patrol Craft training includes principles of board and search, inserts, extracts, emergency extracts, waterborne guard posts, command and control of large waterborne movement and assaults, as well as ambush/counter ambush principles.

### ***WEAPONS CONTROLLER - MASL : D302004***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***WEAPONS CONTROLLER/MAP - MASL : D122009***

To provide initial skills qualification training through the Security Assistance Training Program (SATP) for international officers who will perform duties as entry level weapons directors

### ***WEAPONS SAFETY - MASL : D122091***

Provides training for Air Force, ANG, Reserve, civilian, and international personnel who are assigned primary duty in weapons safety management. Includes the organization of the US Air Force safety program; governing nuclear and non-nuclear standards; support agreements; safety council/meetings; weapon safety training and education; weapon safety representatives; inspections and evaluation; flight line munitions operations; Operational Risk Management (ORM); weapons safety program management; mishap classifications and categories mishap investigation techniques; mishap reports; weapon safety inspection requirements; munitions storage methods; transportation of munitions; quantity-distance separations; weapons ranges, sitting, waivers, exemptions, and deviations; site plan packages; Air Force explosive exemption data base, and contingency operations.

### ***WEAPONS/MUNITIONS - MASL : D308001***

Training teams are composed of DoD personnel for the purpose of training foreign personnel. This assistance is provided to meet specific training objectives in connection with the development of a country's capability. It should be requested only after full consideration has been given to in-country capability and other DoD school training. Provided training is captured in the course

title and reflected on the applicable training track line (wcn/suffix). Training is normally conducted at a specified location in the host country but can often be conducted for groups of internationals from different countries at a single location in either the CONUS or OCONUS.

### ***WEAPONS/SENSORS OFF NFO - MASL : P114029***

Course Mission: Advanced NFO/AF NAV S/F training is designed to further enhance navigation, communication, and aircraft systems management skills developed in Advanced Core NFO/AF NAV Training. Emphasis shall be placed on teaching the principles, rules, and concepts necessary to conduct aggressive air-to-air intercepts by requiring their pilot to fly the assigned aircraft throughout a mission profile to engage a simulated enemy aircraft from a correct missile firing position. Crew coordination and mission priorities are stressed in this teach-to-objectives curriculum. Skill and performance level standards are outlined in the Enabling Objectives (EOs). Successful completion of this phase of training qualifies graduates for Advanced Jet Training.

Scope: Primary Instructional Methods: Lecture, self-paced and group-paced; aircraft mission simulator; flight tutorial; instructional television; learning centers.

Student Performance Measurement:

- Flight Support: Criterion reference testing is used for all examinations.
- Flight and Simulators: All events are subjectively graded using nominative reference measurement procedures.
- Final Phase Grade: Final flight support, flight, and simulator grades are combined algebraically and applied to the Navy Standard Scoring System in accordance with CNATRAININST1500.4E.

### ***WEATHER - MASL : D121012***

Familiarization (FAM) training offers over the shoulder observer training in an operational environment. It consists of general training objectives and normally complements the formal training that was received at the beginning of the students training pipeline. Familiarization training is normally two (2) weeks in duration and completion of standard familiarization objectives is subject to the availability of equipment and the job requirements of the operational unit to which the student is assigned. Training duration can exceed two (2) weeks if the student's country provides justification accompanied by specific training objectives. Familiarization training is normally tasked for scheduling approximately sixty (60) days prior to the completion date of the students preceding training.

### ***WEATHER EQUIP SPEC - MASL : D146003***

This course replaces E3ABR2E132 002/0A1A, Meteorological and Navigation Systems Apprentice, initial skills course. Note AFS name change.

This course offers initial skills training on Airfield Systems equipment to include meteorological, navigational, and air traffic control communications systems. Students learn to align, calibrate and troubleshoot an Instrument Landing System (ILS), Very High Frequency Omnidirectional Range (VOR), Tactical Air Navigation (TACAN), Automatic Meteorology Station (AMS), Digital Voice Recorder (DVR), Enhanced Terminal Voice Switch (ETVS), and a Very High Frequency (VHF) and Ultra High Frequency (UHF) transmitter, receiver and transceiver. Students also receive training in the use of test equipment to include oscilloscopes, frequency counters, signal generators, digital multimeters, voltmeters, wattmeters, spectrum analyzers, distortion analyzers, power meters, audio oscillators, and telephone test sets. Training also includes Safety, Operational Risk Management, Core Automated Maintenance System (CAMS), Technical Orders, Schematics, Air Expeditionary Force (F), and Flight Inspection and Facility Certification information.

### ***WEATHER OFFICER - MASL : D121079***

This course provides training for entry-level officers in AFSC 15W1. The major subject areas taught in the course include weather support, climatology, analysis techniques, satellite, WSR-88D Doppler Radar, Operational Weather Squadron (OWS) data terminal, special topics such as weather observations and equipment, tropical weather and oceanography, aircraft hazards, Numerical Weather Prediction (NWP) products, and operational weather squadron forecast laboratory.

### ***WEATHER SPEC - MASL : D121008***

Course prepares Air Force weather forecaster apprentices for a career in the 1W0X1/A career field. The scope of training includes training in basic, intermediate, and advanced meteorology. Meteorological reports and computer operations are also

covered. Other topics include: satellite meteorology, weather chart analysis, weather radar, weather products, tropical meteorology, synoptic level analytical meteorology, weather prognosis techniques, forecasting weather elements to include severe weather, synoptic lab, forecasting lab, and a unit on the weather career field and weather equipment.

### ***WEIGHT & BALANCE(GEN)\*\*FTD - MASL : D149057***

This internet-based course provides training to military and civilian personnel assigned to weight and balance responsibilities. Topics covered include weight and balance TOs, levels of responsibilities, terms, flight characteristics, handbooks, loading calculations and documentation. The proctored end of course test must be completed within 3 months of enrollment. Students who fail the course academically or do not complete the course within the allocated time will be eliminated and will incur a one-year re-enrollment penalty. Students may submit a request for extension due to extenuating circumstances through the training manager at 362trswebtrn@sheppard.af.mil.

### ***WELDING ALUMINUM - MASL : P145422***

This advanced welding course provides an in-depth working knowledge of gas metal arc and gas tungsten arc welding. The course teaches the following topics: characteristics of aluminum alloys, gas tungsten arc welding, gas metal arc welding, and non-destructive testing.

### ***WELDING STEEL - MASL : P145421***

This advanced welding course provides an in-depth working knowledge of shielded metal arc welding. The following topics are covered: shielded metal arc welding of mild- and high-yield steel, non-destructive testing, and carbon arc gouging/cutting.

### ***WHEELED VEHICLE MECHANIC - MASL : B144186***

Course Scope: To perform field level maintenance on automotive wheeled vehicles; wheeled vehicle operations; introduction to troubleshooting; fuel system maintenance; electrical system maintenance; power train maintenance; chassis, suspension, and steering maintenance; brake maintenance; preventive maintenance checks and services (PMCS); common maintenance subjects; TMDE; publications; maintenance forms; use and care of tools/power tools; shop safety; maintenance discipline; information systems security; physical fitness; use of Soldier's Manual and 40 warrior tasks and 9 battle drills.

### ***WHEELED VEHICLE MECHANIC - MASL : B144187***

To perform unit and direct support level maintenance on automotive wheel vehicles; wheel vehicle operations; introduction to troubleshooting; fuel system maintenance; electrical system maintenance; power train maintenance; chassis, suspension, and steering maintenance; brake maintenance; preventive maintenance checks and services (PMCS); recovery operations; common maintenance subjects; TMDE; publications; maintenance forms; use and care of tools/power tools; shop safety; maintenance discipline; information systems security; physical fitness; and use of soldiers manual.

### ***WHEELED VEHICLE MECHANIC BNCOC - MASL : B143312***

Maintenance management; supervision of unit maintenance on tracked and wheeled vehicles and MHE; recovery operations; supply management; inspection techniques; unit defense; battlefield cannibalization techniques; maintenance of TMDE; training management; and basic leadership.

### ***WILDERNESS MEDICINE - MASL : P175235***

#### **MOUNTAIN MEDICINE**

To become a proficient member of a Marine Corps rifle platoon as a supporting medical person, in a summer mountain environment. Students learn to move a casualty in a summer mountain environment without vehicle or air support. They become a proficient medical provider in a high altitude environment and learn to plan and conduct medical operations in a high altitude, summer mountain environment.

This course of instruction is designed to bring the students to a high standard of technical and tactical proficiency necessary for a mountainous environment. The course subjects cover mountain safety, balance climbing, top roping, rappelling, stream crossing, high and low angle rescue techniques, small unit leadership and discipline, utilization of pack animals, casualty movement over mountainous obstacles, casualty movement utilizing pack animals, diagnosing, treating and preventing heat and cold illness, in addition to high altitude illness, and preventative medicine.

### ***WIRE SYS INSTALLER/MAINT - MASL : B132462***

Learn to install, operate, and perform unit level maintenance on cable and wire systems, to include Digital Group Multiplexers (DGM), Remote Multiplexing Combiners (RMC), repeaters, restorers, telephones, test stations, intermediate distribution frames, and related equipment. Configure DGM and RMC for operations. Install, operate, perform PMCS and unit level maintenance on COMSEC devices. Splices and maintains fiber optic cable systems. Perform tests on cable communications systems to ensure circuit and system quality. Tests circuits/groups to detect and locate line faults. Operate manual and motorized cable construction equipment. Climbs poles, as necessary, and assist in the construction of tactical cable and wire lines.

### ***WORK CENTER INSTRUCTOR - MASL : P145905***

Provides designated junior officers and enlisted personnel the skills necessary to conduct formal training in a classroom or lab environment. Consists of instruction in planning learning objectives, development of lesson topic guides, instruction methods and techniques, and effective classroom communication with an emphasis on practical applications. Students will give a minimum of four video-taped oral presentations that will be critiqued and later reviewed by the student for enhanced learning and attainment of course objectives. Recommend that this course be taken immediately after completion of either Patrol Craft Hull Maintenance (P145903), Patrol Craft Propulsion Systems Maintenance (P145902), Patrol Craft Propulsion Systems Overhaul (P145907), or Outboard Motor Maintenance and Overhaul (P145906).

### ***WORKSPACE TRAINER QUAL - MASL : P166308***

WORKSPACE TRAINER QUALIFICATION PROGRAM - CNL-IDC-AP-1

The Workspace Trainer (WST) Qualification Program enables personnel to acquire the knowledge and skills necessary to conduct effective on-the-job training. Apprentice Trainers will complete the thirty hours of on-line content, activities, and performance tests.

As the military services become increasingly reliant on on-the-job training (OJT) as a training delivery method, there is an increased need for military personnel who possess instructional skills. The Workspace Trainer Qualification Program provides these skills. This course is strongly recommended to be completed prior to entry into the Journeyman Instructor Training (JIT) course.

### ***WPNS AND TACTICS INSTR CRS - MASL : P122261***

WEAPONS AND TACTICS INSTRUCTOR (WTI) COURSE

This course will visit several subject matters to include different aircraft training, weapons systems, simulator training, classroom training, and observation.
